

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

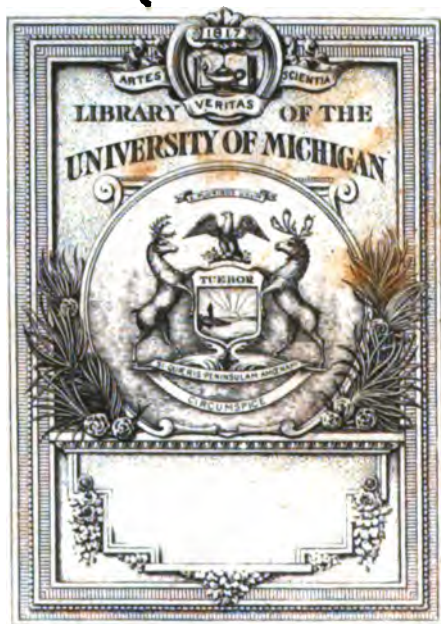

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

KANSAS—1901-1902.

MESSAGE OF GOVERNOR BAILEY.

REPORT OF SECRETARY OF STATE.

TREASURER OF STATE.

AUDITOR OF STATE.

ATTORNEY-GENERAL.

SUPERINTENDENT OF PUBLIC INSTRUCTION.

BANK COMMISSIONER.

TOPEKA:
W. Y. MORGAN, STATE PRINTER.
1902.

*July
1902*

44

GOVERNOR BAILEY'S MESSAGE.

JANUARY 13, 1903.

To the Senate and House of Representatives:

No Legislature has ever convened in our state under more favorable conditions than those which surround you at this time. The business and commercial interests of Kansas have never been upon a stronger or more substantial basis than now. No state in the Union has absorbed more of the general prosperity that has come to the whole country during the past six years than has Kansas. New life, new hope and new energy have come to our people as the result of these conditions, and the increase in value of nearly all real and personal property has largely enhanced the wealth and commercial importance of the state.

Having been elected by the people of Kansas as their governor for the ensuing two years, it is the consciousness that I will have your hearty cooperation in doing those things which will build for Kansas that nerves me to meet the responsibilities confronting me.

In compliance with the law, I herewith submit such suggestions and recommendations as to me seem proper.

AGRICULTURE.

With all due recognition of the vastness and importance of her other constantly developing resources, and her unsuspected possibilities, as revealed by each passing year; the basis of the state's material prosperity must be her agriculture—the utilization of her soil's wonderful fertility and the favoring climate. That Kansas, with her comparatively sparse population, already leads all other states in the production of such commodities as wheat, alfalfa, and the sorghums, and ranks with the foremost in the output of corn, is suggestive of her capabilities. The official statistics indicate that, in the decade just closed, the increase in value of farm products has been nearly 24 per cent., and of live stock more than 53 per cent., or, for all combined, 31.6 per cent.

The promotion and record of our farm industries were early in the state's history entrusted to the State Board of Agriculture, which fortunately from its beginning, in methods of practical helpfulness, the thoroughness and reliability of its statistical work, and the high order of its publications, has rendered an invaluable service to the growth and development of the agricultural interests of the state. The high standard of the work done under the administration of the

present secretary justifies such appropriations as are necessary to maintain the usefulness of the board.

The opportunities afforded the state for needed agricultural experimentation by the possession of the Fort Hays land make judicious such appropriations as are necessary to establish and equip the work there on a proper basis for greatest future usefulness. The past two years it has been well demonstrated that portions of our state are adapted to the production of sugar-beets yielding largely in tonnage and sugar content. The last Legislature provided for the payment of a bounty of one dollar per ton on all sugar-beets grown in Kansas in the years 1901 and 1902, containing not less than twelve per cent. of sugar and actually used in the manufacture of sugar. The advisability of providing such a bounty on sugar-beets grown in the ensuing two years will be for the Legislature to determine.

HORTICULTURE.

I would impress upon you the importance of encouraging this important industry; an industry that elevates our rural communities, creates a love of home, and induces the boys to stay on the farm. Under the educational influence of the department of horticulture, the orchardists of the state have, in the last decade, planted 5,784,495 apple trees, bringing our state up from ranking seventh to ranking fourth, or an increase in ten years of nearly 100 per cent. The total of fruit-trees and grape-vines is quite 25,000,000 in our state.

The officers of this department are chosen by the practical horticulturists for their long experience and ability. The product of the horticulturist is fast becoming one of the great commercial items of our state, and I recommend such appropriations as may be necessary to carry on the work of this society.

LIVE-STOCK SANITARY BOARD.

The work of this commission during the past year has been very satisfactory, resulting in a large saving to the live-stock interests of the state by preventing the spread of contagious diseases. During the first eleven months of the calendar year 1902, there were inspected under the supervision of this board 543,876 cattle. Certificates were issued to 267,190 of these, the legal fee collected amounting to \$5285.80; 282,086 head of cattle have been passed free of charge under the statute exempting cattle which are intended for immediate slaughter. The loss to the cattle-owners of the state caused by the Texas fever is comparatively small, and this fact is due almost wholly to the efficient work of this commission. Of the whole number of cattle offered for admission to Kansas during the year, 7560 were found to be infectious cattle, and were turned back or sent to quarantine pens.

By reason of the extended territory embraced in quarantine laws passed in 1901, and new railroads having been built and old ones extended into new territory, the board felt called upon to employ inspectors beyond the contemplation of the appropriation of

the last Legislature, in order to meet the requirements of the statute, and I recommend an appropriation to cover this expense, as suggested by the sanitary board. The whole number of inspectors employed did not at any time exceed the statutory provision.

The board recommends the amendment of the law which admits cattle intended for immediate slaughter free of charge to our state and markets, and make them liable for inspection fees, the same as any other cattle. It is claimed this will not increase the work or expense and will nearly double the revenue from that source. It will also eliminate the dangers of the Texas fever contagion in the native division of the Kansas City market, from which source the state has suffered during the past year, as the infection which has been encountered in different counties is directly traceable to the Kansas City yards. There is every reason to believe that the infection was carried there by cattle which were permitted to come in under the clause admitting slaughter cattle free.

I believe this amendment is worthy of your careful consideration.

EDUCATIONAL INSTITUTIONS.

As a result of the general prosperity of the state, there is a marked increase in the attendance at each of our state educational institutions—the University, the Agricultural College, and the State Normal School. I would respectfully recommend for each of these institutions such appropriations as in your judgment may be necessary to maintain them upon a plane commensurate with the growth and development of the state. For a detailed report of the workings and necessities of these institutions, I refer you to the reports of the different boards, made to my predecessor.

I believe that the law should provide for the charging of a nominal incidental or tuition fee at our educational institutions. I find, upon investigation and correspondence with other states, that this custom is largely in vogue, resulting in considerable revenue for maintenance without inflicting any hardships or burdens. Especially do I think it unjust to the taxpayers of our state that pupils from other states can attend our state educational institutions free of cost, as is now done. In the three institutions of our state, there are now enrolled 169 pupils from other states, with practically no cost to them. I would respectfully recommend that a tuition fee be charged for pupils outside of the state of at least fifty per cent. of the per capita cost of the tuition at the institutions they attend.

WESTERN UNIVERSITY, QUINDARO.

This institution, founded for the liberal education of the colored youth of the state, I believe is doing a work, under the management of Prof. W. T. Vernon, that is worthy of your generous consideration and liberal support.

EDUCATIONAL INTERESTS.

In the matter of school legislation, I invite the attention of the Legislature to the recommendations of State Superintendent Nelson, as found in his biennial report. Without indorsing his recommendations, it is a clean and conscientious review of the work and needs of our public schools.

There is a universal sentiment among the teachers and educators of the state that the salary of the state superintendent should be increased from \$2000 to \$2500. It is claimed the salary of this official should be equal to that of secretary of state, state treasurer, state auditor, and attorney-general. This claim seems to me but just.

Repeated efforts have been made in recent years to improve our compulsory-attendance law. It is conceded that our present compulsory-attendance law is weak in many respects, and should be strengthened. The state has the same right to enforce attendance at school that it has to enforce collection of taxes for the support of schools. It is wise economy for the state to enact such laws as will enable school authorities to enforce attendance at school. The boy upon the street in many cases becomes the dangerous citizen of the state.

The people of Kansas will justify a liberal appropriation for the educational exhibit at the St. Louis exposition. Kansas has a splendid school system, and it will be a great credit to us to secure a worthy display at the St. Louis exhibit of our educational resources. Our public-school system is the greatest heritage that the founders of our commonwealth have bequeathed unto us, and it should be preserved and enlarged by wise and conservative legislation.

STATE BOARD OF RAILROAD COMMISSIONERS.

The law creating this board was passed by the Legislature in its session of 1901 and took effect on the 29th day of March of that year. The fact that there had been no railroad commission in the state for a number of years caused a large number of grievances against the railroad companies to accumulate, and there have been filed with this board since its organization and prior to November 30, 1902, 202 cases, besides a large number of complaints of minor importance that were not filed and taken up formally, but through the negotiations of the board were adjusted to the satisfaction of the complainants. Of the 202 cases filed and docketed, 152 have been settled by trial and judgment or by compromise and adjustment between the parties to the action through the recommendations of the board; thirteen have been dismissed for want of jurisdiction, and seven dismissed for want of prosecution, leaving twenty-nine cases pending and unsettled. Of the 152 cases that have been tried and settled, 106 have been favorable to the complainants and forty-six to the respondents. No appeals have been taken from the findings and judgments of this board, but the question involved in case No. 44, the case of *The Shawnee Milling Company et al. vs. The Atchison,*

Topeka & Santa Fe, was brought before the district court of Douglas county, Kansas, and the judgment of that court sustained the findings and judgment of this board.

The Kansas City-Leavenworth Railway Company, an interurban railroad operating by electricity in and between the cities of Leavenworth and Kansas City, Kan., carries both freight and passengers, and crosses at grade the tracks of other railroads operated by steam. This road, and all other interurban roads doing business as common carriers and operated by electricity, in my judgment, should be placed under the jurisdiction of this board.

The relations between the railroads and telegraph companies are so intimate and close that in some cases jurisdiction over the telegraph companies is necessary in order to get a full and satisfactory adjudication of the issues, and for this reason the board feels that the telegraph companies of the state should be placed under its jurisdiction, and this recommendation of the board, in my judgment, is worthy of your careful consideration.

The report required by law to be made by this board is intended largely for the information of the governor and the Legislature, to show the doings of the board and the efficiency of the law, and, as the Legislature meets biennially, I would respectfully recommend an amendment making the report of this board biennial instead of annual, as the law now provides.

GRAIN-INSPECTION DEPARTMENT.

At the last session of the Legislature the grain-inspection laws were changed from fees to a salary basis. There have been inspected and weighed by the department, in the past twenty months, 216,400 cars of grain, at a cost to the state of \$61,277.56, and the department has turned into the state treasury \$62,982.44, leaving a balance to the credit of the department of \$1704.88.

The work at the different stations has been done in a generally satisfactory manner. In the past two years the department has had less work to do than usual. In 1901 we had an almost total failure of the corn crop, and in 1902 the wheat crop was shorter than in former years; still, in spite of this fact, the department has been self-sustaining. With a normal crop of all grains, a substantial profit would come to the state.

The weighing department at Kansas City has been hampered by a lack of appropriation, necessitating a smaller force than was needed to do the increased amount of work properly. I would suggest a larger appropriation, so that the work could be done thoroughly, if necessary, making a small increase of the fee charged to meet the increased expense.

CHARITABLE INSTITUTIONS.

The dictates of humanity suggest generous appropriations for the support of the charitable institutions of the state, and it is very gratifying to me to be able to say that I believe each one of the in-

stitutions under the control of the Board of Trustees of State Charities and Corrections is in good condition and has been maintained during the last administration without a deficit. For your guidance and information as to the needs of each of the institutions under the control of this board, I refer you to their thirteenth biennial report.

I especially call your attention to the Parsons State Hospital. The last Legislature having reappropriated the lapsed appropriation of 1899 for the establishment of a hospital at Parsons, the board has proceeded to the work of erecting an institution in compliance with the law. After careful investigation of the subject, they have decided to make the Parsons institution one wholly for the treatment of epileptics. Several other states have provided themselves with institutions of this character with very satisfactory and humane results. The removal of the insane epileptics from the other state hospitals is most desirable, and it is believed will prove beneficial both to the epileptics and the other insane. I believe, therefore, the recommendation of the board in reference to this institution is worthy of careful consideration, and that the making of the Parsons institution an asylum for epileptics will be a humane and progressive movement.

You will also note that the board is asking more land at some of the institutions; also increased water-supply, both for sanitation and fire protection. The reasons given for these requests seem excellent and the improvements necessary.

THE PENITENTIARY.

Certain repairs and improvements are needed at the Penitentiary. These are set forth in detail in the thirteenth biennial report of the directors and warden. I specially call your attention to the need of a new ward for the women prisoners, also for the appropriation for water-supply.

The Legislature of 1901 authorized the purchase or lease of additional coal lands for the use of the state, but no appropriation was made for the purpose of making either the purchase or lease; but a contract has been made for the purchase of what is known as Staiger's island, a tract of land containing 844½ acres. The deeds conveying this land to the state have been executed, and are now in escrow in the Leavenworth National Bank, subject to the approval of the Legislature. I invite your attention especially to this matter.

The parole law for convicts of the State Penitentiary, a development of the conditional-pardon rule inaugurated by Governor Stanley during his first term, is in successful operation, as shown by the reports on file. It was an experiment in this state, but in many other states, where it had been in force for several years, it may be said to have passed the experimental stage, especially in Ohio and Minnesota. It is now recognized by experienced prison management as an aid in prison discipline, and as a means through which young

men, especially those who are serving their first terms in the Penitentiary, can be saved from following a life of crime.

The defect, however, in the present system of granting paroles in this state is, in my judgment, the lack of an equitable adjustment of the method through which it is put in operation. It should be based upon a merit system. The parole should come from a list of eligibles, on grades which the prisoner attains through his own efforts. This would place the friendless inmate upon the same footing with the one favored by friends and influence from the outside. I do not mean to allege that, under the present working of the parole law, this latter class has been intentionally permitted to enjoy its benefits, but in the very nature of things they are so favored, for the influences which they have are able to take up their respective cases and present them, while the friendless and unknown man is without these opportunities. The board of directors and warden of the Penitentiary, under the rules of a merit system to be devised by the Legislature, are best qualified to place the names in the respective grades and classes, through which grades and classes the inmates could reach the eligible list, and from which list the governor could parole. I would suggest such legislation as may be necessary to meet these requirements.

The twine plant at the Penitentiary, in view of the inexperience of those charged with its conduct, has achieved a reasonable degree of success, and I believe should be maintained upon its present basis; and suggest that the profits of the plant be set aside until \$25,000 is accumulated, this fund to be used to protect the revolving fund from loss, should any occur, which is liable to happen even under the most careful business management.

OKLAHOMA PRISONERS.

There are 1069 prisoners in the Penitentiary, of whom 276 are from Oklahoma. I question the wisdom of Kansas longer assuming the responsibility of taking care of Oklahoma's prisoners, and recommend that Oklahoma be asked to relieve us of this charge as soon as she can do so.

KANSAS STATE SOLDIERS' HOME.

This home was founded upon the patriotic sentiment that it was the duty of the state to provide for the indigent soldier of the civil war and his family. I believe the home and its affairs are in splendid condition, but I call the attention of the Legislature to the very important need of fire protection at this institution. Situated upon the prairies, several miles from Dodge City, with practically no fire protection, in case a fire should break out during severe cold weather or during a blizzard, the loss of life and the suffering that would be entailed upon the inmates, many of whom are nearly helpless, would be something too terrible to contemplate. I most earnestly recommend an appropriation large enough to meet this emergency.

STATE BANKS.

The report of the bank commissioner shows the institutions under the control of this department as being in excellent condition. Perhaps nothing more clearly indicates the prosperous condition of our people than a comparison of the statements made by our banks under the official call in 1900 and again in 1902. Comparison made between the calls of September 1, 1900, and November 25, 1902, shows the total number of banks under state supervision at this time is 477, a gain of eighty-nine banks in two years. The total capital is now \$7,751,000, an increase of \$1,138,000 during the same period. The total surplus is now \$1,769,701.86, a gain of \$419,491.34. The total deposits are now \$40,135,176.58, a gain of \$8,508,841.14. The total loans are now \$32,885,046.98, an increase of \$11,072,211.42. The total value of all real estate, other than bank buildings, is \$253,641.78, a decrease of \$279,716.14 in two years. The banking law does not contemplate banks holding real estate other than a suitable building for the transaction of the bank's business, and a large proportion of the real estate now held was acquired through the adjustment of matured loans, and the banks are rapidly, as their best interests will permit, disposing of this class of security, as the decrease of nearly \$300,000 will show. The cash and sight exchange (legal reserve) at this time is \$15,352,451.44, or 38.25 per cent. of the entire deposits, showing the banks of the state are upon a safe and conservative basis.

HANDLING OF PUBLIC FUNDS.

I believe that the law should be so amended that county treasurers, when they remit any funds to the state treasurer, should be required to notify the state auditor of the amount remitted, and the auditor, upon receiving such notice, should be required to charge the treasurer with such amount.

And I would further recommend that our laws be so amended that the accounts of the state fiscal agency and the state depositories be kept with the auditor of state and state treasurer in a more businesslike manner. Under the present law, neither the state fiscal agency nor the state depositories are required to report to the auditor of state. When the state treasurer remits to the fiscal agency or makes a deposit with the state depository, he should be required to sign, with the auditor of state, a statement showing that said remittance or deposit has been made, and the auditor of the state should be required to charge the state fiscal agency or state depository with said remittance or deposit, and credit the state treasurer; and when the state treasurer issues a check or draft on the fiscal agency or state depository, before delivering said check or draft to the party to whom it is issued, the treasurer should be required to present it to the auditor of state, and the auditor be required to countersign said check or draft, keeping a record of the same, charging the treasurer with the amount of said check or draft and crediting the fiscal agency or state depository with the amount. Under the exist-

ing law, when the board of examiners, consisting of the governor, secretary of state, and auditor of state, makes its monthly examination of the state treasury, it is compelled to ask the banks what the state has on deposit with them, and is compelled to take the treasurer's statement as to what amount of money is in the state fiscal agency, New York, in place of getting this information from the records in the auditor's office.

I find, from the record kept of the examinations made by the aforesaid board of the state treasury for the year 1902, that the average amount of funds in the fiscal agency during said year was \$51,390. I also find that the state has a contract with the state fiscal agency whereby the agency pays the state two per cent. on the average daily balances of state funds in said agency, which for 1902 would amount to \$1027.80. I also find from the records of said board that the average amount deposited in Topeka banks, the same being state depositories, for the year 1902, was \$481,272.69. If the New York bank which is the fiscal agency can pay two per cent. on the average daily balances, it occurs to me that the banks of Kansas will be willing to pay the same. Two per cent. on the average deposits in the Topeka banks for 1902 would amount to \$9625.45.

I also find from the records of said board that the average amount of money in the state treasury and in the Topeka banks as state depositories for the year 1902 amounted to \$768,811. This amount, at two per cent. on average daily balances would net the state \$15,376.22 per annum. It seems to me that business prudence and the public welfare demand that some change, such as suggested herein, be made in the handling of our state funds. I would also recommend, if these suggestions are enacted into law, that the bond of the state treasurer be reduced one-half its present sum, the bond to be made by some surety company and paid for out of the profits accruing to the state upon the daily balances as suggested in this recommendation.

REQUIRING ACCOUNTING OF MONEYS.

I would recommend that the Legislature enact such laws as will forever abolish trading and trafficking in the marketable commodities from the various state institutions. At every institution, educational or otherwise, where any money is received from any source, or where any commodity is sold, it should be sold for cash, and the cash paid at the end of each month to the state treasurer. I think it is due the members of the Legislature and the taxpayers of the state of Kansas that they know what it costs to run the institutions of the state. The Legislature could then more intelligently make the necessary appropriations.

I would also suggest that all public moneys received from any of the sources mentioned at any of the state institutions, after being paid to the state treasurer, be reapportioned or at once placed to the account of said institution, and that it be paid out by the state treasurer on warrants issued by the auditor of state, on vouchers made

out and properly approved, the same as required in paying out regular appropriations.

ASSESSMENT AND TAXATION.

The subject of taxation is one of the most important that will engage your attention. For many years it has been generally conceded that our present tax law is insufficient for present conditions, crude and inequitable in its operation. Framed thirty-four years ago, when Kansas was a frontier state and all its property visible and easy of assessment, it is now imperfect, and wholly inadequate to meet the changed conditions of society.

The expenses of government tend to increase much faster than population, so that the per capita of taxation in this, as in all other states, constantly increases, but the burdens remain where they were placed when the state was new, on real estate and visible personal and railroad property.

The increase in the use of the corporate form of business, the vast growth of enterprises of a *quasi*-public character, holding from the public franchises of great value, have led to a vast increase in intangible personal property which almost wholly escapes taxation. The protection of these and other new forms of wealth, as well as the increasing extension of government into new fields of regulation and control, have vastly increased the cost of government, the burden of which these new forms of wealth successfully evade under the present law. In 1873, when the assessment of railroad and personal property was first separated, real estate paid 74.47 per cent. of the total tax, personal property 17.79 per cent., and railroads 7.85 per cent. In 1900 railroad taxation had increased to 17.53 per cent. of the total, real estate bore 66.01 per cent., a slight decrease, and personal property, in spite of its vast increment, had fallen to 16.46 per cent. of the total. In that year, with \$60,000,000 in our banks, the assessors found but \$3,000,000 for taxation, and the total assessment of personal property was but \$57,000,000, or \$3,000,000 less than our holdings of money alone. As in 1873, the farmer, the small-home owner, the possessor of real estate and the owner of visible personal property, such as the stockman and merchant, pay five-sixths of the tax, and the railroads pay the rest.

Besides this, there are glaring inequalities between the assessment in adjoining counties, and consequent inequalities in the burden of both state and county government.

These inequalities and injustices have attracted the attention of our lawmaking power for many years, and many attempts have been made to adjust the law to the new conditions, but the brief time allowed by the session has prevented a comprehensive and satisfactory plan; and so thoroughly has this been proven that the session of 1901 adopted the plan which has been followed with success in most of the Northern and Western states in recent years of a State Tax Commission.

The commission consisted of representatives of both houses and

certain state officers, and was empowered to sit in vacation and prepare a new tax law. The attention of the commission was called to the evils above recited, and it was particularly directed to provide for the fuller assessment of personal property.

The commission so constituted has expended much time and thought upon a bill and report, which will be submitted to you. It has collected a large amount of information, investigated the laws of other states and their operation, and its conclusions and the information it has obtained will be of value to you in considering this subject. Without commenting upon the bill prepared, or assuming to pass any opinion upon its merits, I invite your earnest attention to its various features, with the sincere hope that you will not permit the work of the commission to be lost by a failure to act in this matter, and that you will be able, starting with their work, to formulate a law that will bring upon the tax-rolls the vast amount of personal property that now escapes, thereby lightening the burden borne by the farmer, the home-owner, the merchant, and all who own real estate and visible personal property.

LOUISIANA PURCHASE CENTENNIAL EXPOSITION.

For the purpose of exhibiting the resources and showing to the world the industrial, commercial and social progress of our state, the Louisiana Purchase Centennial Exposition Commission of Kansas was created by an act of the last Legislature, and directed to assume and exercise all powers necessary to secure a complete and creditable display of the interests of the state at the international exposition to be held at St. Louis in 1903, and to select a site and erect thereon buildings for such display.

This commission, pressing the fact that Kansas was the first state to make an appropriation, succeeded in securing one of the best sites awarded to any state. The collection of exhibits has begun and plans and specifications for a building are being considered.

Such appropriations should be made as will enable Kansas to assume her place of proper eminence at this exposition and to present a display which will be an inducement to investment in and immigration to this portion of the territory covered by the Louisiana purchase. The postponement of the exposition until 1904 will necessitate such amendments to the law as are necessary to meet the changed conditions.

BUREAU OF LABOR AND INDUSTRY.

The report of the commissioner of labor is a collection of data with special reference to the industrial interests of the state. Certain legislation is recommended concerning labor that I believe worthy of your consideration, especially that referring to the prohibition of child labor under the age of fourteen years in factories and workshops, except under certain conditions prescribed by law; also, a just and equitable arbitration and conciliation law, in order to better protect the industrial interests of the state against the disastrous

effects of long-drawn-out strikes, and at the same time guarantee justice and fairness to employer and employee.

NATIONAL GUARD.

I recommend a just and liberal support of the organized militia of the state. It is composed of nearly 1400 young men, who give their services to the state without compensation, except during the brief period while in attendance at the annual encampment. The general government is liberal in supplying all needed equipment, the expense devolving upon the state being for the maintenance of the organized companies and batteries. The annual appropriation made by the government to Kansas for equipments amount to \$21,241.82, but it is contingent on the organization and support of a sufficient militia. The government has awakened to the necessity of a revision of the obsolete national militia laws, and a bill now pending in Congress makes still more liberal provisions for the support of the National Guard. If the bill now before Congress becomes a law, it will be necessary to amend the state militia act to harmonize it with certain provisions of the national law.

I believe in an organized and efficient militia, and I trust the state of Kansas will cooperate with the national government in all efforts toward improvement, and will liberally aid all movements tending to the development of the National Guard.

STATE HISTORICAL SOCIETY.

The State Historical Society is now provided with satisfactory accommodations for the care and proper exhibit of the collections showing the trials and accomplishments of our people in creating this splendid commonwealth. No state has had a more inspiring history; and now that the work of the society is in order, it is a source of gratification that liberal support by the Legislature has always been accorded, instead of leaving this patriotic service to individual effort. All Kansans should be proud of the society and its work, and I heartily commend it to the Legislature for continued consideration and liberality. A proper cataloguing of the collections has been reasonably well kept up, and I would suggest that, upon its completion, a catalogue of the Kansas portion, at least, be published, that it may be more available to the general public.

PUBLIC PRINTING.

I call your attention to the lavish waste of the public money in the printing of useless and unnecessary public documents. The law, in many instances, provides for the publishing of reports and documents far beyond any demand or necessity, and, as a result, the store-rooms of the capitol building are rapidly filling up with this matter that is worse than useless. I am sure a careful inspection of this accumulated material will convince any legislator of the necessity of reform along this line.

THE FISH AND GAME INTERESTS.

I recommend that the fish and game interests of the state be put under one control, and that laws be made more stringent for the preservation of both game and fish, and that the power of the warden and his deputies be enlarged, so that they can more effectually enforce the law.

I also believe that a fish hatchery should be established, with the view of propagating such fish as are adapted to the streams of Kansas. Other states have made this a profitable industry where conditions are no more favorable than they are in Kansas.

STATE ARCHITECT.

I would recommend the enactment of a law authorizing the appointment of a state architect. The legislature of 1901 appropriated \$730,250 for new buildings, to say nothing about the repairs that are included in the appropriations for maintenance and repairs at the different institutions. The average paid architects by the various boards is $2\frac{1}{2}$ per cent. of the contract price. Some are less, but others include the expenses of the architect. On \$730,250, $2\frac{1}{2}$ per cent. would be \$17,206 paid out during the past two years.

I feel that a state architect who has supervision over the buildings of the state will not only result in a saving to the state but will induce a uniformity in the buildings, a condition much desired.

ELECTION LAW.

I recommend that the election law passed by the last Legislature be so amended that no square shall be placed upon the official ballot opposite "No Nomination." The law should as far as possible make it easy for the voter to register his wish at the polls. I believe, with this one amendment, the law will be very satisfactory.

FREE EMPLOYMENT BUREAU.

The free employment bureau has been in operation for a period of nineteen months. The report of the director shows that during the existence of the bureau there have been applications for work and help, 6687; furnished, 4937. The workings of the bureau have not been as satisfactory as the Legislature anticipated. The law provides that the city clerks of cities of the first and second class shall open and maintain free employment agencies to work in conjunction with the bureau. There is no compensation provided for this work and there is no penalty for neglecting to comply with the law, and, as a result, but few cities have maintained free employment agencies, as contemplated. I believe the law should be so amended that the free employment agencies must be maintained permanently, as contemplated in the present law.

CONGRESSIONAL REAPPORTIONMENT.

Kansas has eight members in the National Congress and the state is divided into seven congressional districts, necessitating the election of one member at large. I recommend the redistricting of

the state and the formation of eight congressional districts, as is contemplated by law. The congressman-at-large, while he has the same rights upon the floor and in the committee room as the member who has a district, is practically denied other prerogatives of a member. Each congressional district is entitled to certain recognition, certain patronage. Kansas practically loses one-eighth of what she is entitled to under the present apportionment. The fact that a district has 60,000 or 70,000 more population than it is entitled to does not entitle the people of the district to any more recognition than they would have if they had the number contemplated by law. I earnestly hope that this legislature will reapportion the state and follow the example set by other states.

OIL INSPECTION.

The report of the state oil inspector shows a net profit to the state from this department of \$14,000. His recommendation that the present law be so amended that the consumer can be protected against poor grades of oil, as well as the dangers of explosion, seems to me to be just, and I recommend this matter to your consideration.

STATE-HOUSE.

The last appropriation made for the completion of the state-house was sufficient for the purpose, and it is gratifying to know that we have a capitol building which is a source of just pride and for which no further expenditure is now needed, save for its proper maintenance.

STATE ACCOUNTANT.

I believe that a competent state accountant can render valuable service to the state in systematizing the vast business of the state. I recommend an appropriation to maintain this office, as contemplated by the law of 1895.

REVISION OF INSURANCE LAWS.

The insurance laws of the state should be revised and corrected. While the laws have been added to from time to time, there has been an absence of positive corrections and repealing acts, and we are left in doubt as to the implied repealing force. As a result, the insurance department is in possession of a compilation of laws in which there are contradictions and inconsistencies. This is unfortunate, both to the insurance companies and the people, and it is certainly annoying to the superintendent, who, under the law, is charged with "the execution of all laws now in force, or which shall hereafter be passed, in relation to insurance and insurance companies doing business in the state."

ESTIMATES.

The law provides that the state auditor shall embody in his official report estimates of the expenditures to be made during the next two official years. In compliance with this law, the auditor has compiled these estimates, and they will be submitted to you for your guidance and information.

CONCLUSION.

To be called upon to legislate for a great state like Kansas is a responsibility that I know you fully realize, and that you will bring to your work your best thought and effort. The natural pride every citizen has in his state suggests at once that the institutions of the state should be maintained upon a plane commensurate with the dignity and growth of the state. This is commendable; but there is another interest that should be sacred to every one charged with responsibility, and that is the duty we owe to the burden-bearers, the people who pay the taxes. The people will justify a generous support of all the great interests of our state, but they will condemn any profligate waste of the public money.

Hoping your associations may be pleasant and your work harmonious, I pledge you my hearty cooperation in carrying out your wishes and in giving Kansas the best administration possible.

W. J. BAILEY.

THIRTEENTH BIENNIAL REPORT

OF THE

SECRETARY OF STATE

OF THE

STATE OF KANSAS.

1901-1902.

TOPEKA:
W. Y. MORGAN, STATE PRINTER.
1903.

LETTER OF TRANSMITTAL.

OFFICE OF SECRETARY OF STATE,
TOPEKA, KAN., December 31, 1902.

Hon. W. E. Stanley, Governor:

DEAR SIR—I have the honor to transmit herewith the biennial report of this office for the two years ending June 30, 1902; also an appendix showing the official vote of the state at the general election held November 4, 1902, and tables of information which may be of use to the public. Respectfully,

GEO. A. CLARK, *Secretary of State.*

SUGGESTIONS.

THE conditions in this office during the past two years have been very satisfactory. The receipts have practically covered the entire expense of the office. The help has been ample to discharge the business promptly, and I am satisfied that no material change should be made in the number of employees. A comparison of the salaries of the employees of this office with those paid in the other state offices will unquestionably satisfy the most skeptical that the employees in this office are not as liberally rewarded as those in other departments. The work in this office is constant. There is no such thing as a dull period, as in some of the other departments, but week after week during the entire year the business of the office is at its maximum. Reviewing the past, I am firmly convinced that this office should be placed on an equality with others.

Two years ago I prepared, and Hon. John Francis introduced, a bill providing that certain departments and boards should publish their reports biennially instead of annually, as had been the custom previously. That bill was passed, and the saving to the state was considerable. However, the same legislature passed measures creating new boards and other agencies, which added considerably to the volume of the public printing.

The law permitting the secretary of the State Board of Agriculture to print an additional number of his report alone cost the state \$7000, and the submission of the two constitutional amendments \$8000 more.

It might be well to itemize briefly the new printing made necessary by laws enacted by the legislature two years ago :

| | |
|---|-------------|
| Increased number report of secretary Board of Agriculture.. | \$7,000 00 |
| Tax Commission..... | 758 60 |
| Employment Bureau..... | 229 62 |
| Board Medical Registration and Examination..... | 558 72 |
| Two constitutional amendments..... | 8,000 00 |
| Increase in membership of supreme court..... | 1,000 00 |
| Agricultural College bulletins..... | 7,000 00 |
| Total..... | \$25,018 94 |

The item of \$472 for the Board of Railroad Commissioners is for incidental printing, and does not cover the expense of printing the biennial report of the board, which is now in the hands of the state

printer, and will amount to not less than \$2000, which amount should be added to the footing in the above table. The reports of the Employment Bureau and the Board of Medical Registration and Examination have not been printed. These will also add considerably to the above total for printing made necessary by laws enacted two years ago.

Kansas is a great advertiser. Our people believe in the greatest publicity; but, notwithstanding all this, I am firmly convinced that many dollars are uselessly wasted, and that the interests of the state would not suffer if some of the reports and much of the printing now permitted by law should be curtailed or altogether prohibited. The prices paid for public printing are not too high, but the quantity done is enormous, and in excess of the needs of the departments of state, the boards, the institutions, and for the best interests of the people.

I especially direct attention to the various tables in this report. A perusal of them will show where every dollar has gone for public printing, and possibly offer suggestions for curtailment and elimination.

FEES.

The following statement shows the fees received by this office and turned into the state treasury for the fiscal years ending June 30, 1901, and June 30, 1902:

| MONTHS. | Notary commis- sions. | Charters. | Miscella- neous. | Old paper sold. | Total. |
|---------------------------|-----------------------------|--------------------|---------------------|-----------------------|--------------------|
| 1900—July | \$37 00 | \$401 00 | \$338 00 | | \$806 00 |
| August..... | 93 00 | 463 50 | 209 00 | | 765 50 |
| September..... | 60 00 | 484 25 | 29 00 | | 573 25 |
| October..... | 84 00 | 349 25 | 14 00 | | 447 25 |
| November..... | 76 00 | 268 50 | 10 00 | \$5 47 | 359 97 |
| December..... | 123 00 | 657 75 | 8 00 | | 788 75 |
| 1901—January | 135 00 | 575 60 | 13 00 | 10 67 | 734 27 |
| February..... | 144 00 | 525 35 | 17 50 | | 686 35 |

THIRTEENTH BIENNIAL REPORT

OF THE

TREASURER OF STATE

OF

KANSAS,

FOR THE

FISCAL YEARS ENDING RESPECTIVELY
JUNE 30, 1901, AND JUNE 30, 1902.

F. E. GRIMES,
State Treasurer.

TOPEKA:
W. Y. MORGAN, STATE PRINTER.
1902.

THE TREASURERS OF KANSAS,

FROM THE ADMISSION OF THE STATE, JANUARY 29, 1861, TO JULY 1, 1902.

- WILLIAM THOLEN**, of Leavenworth county, elected treasurer under the Wyandotte constitution at a general election held December 6, 1859. Mr. Tholen entered the volunteer service, and never qualified or acted as treasurer.
- H. E. DUTTON**, of Brown county, appointed March 26, 1861, and elected to fill vacancy November 5, 1861; served until January 12, 1863. Term of service, 1 year, 9 months, and 16 days.
- WILLIAM SPEIGGS**, of Anderson county, elected November 4, 1862, and on November 8, 1864, re-elected. Assumed control of office January 12, 1863, and served 4 years.
- MARTIN ANDERSON**, of Jackson county, elected November 6, 1866. Took the oath of office January 7, 1867, and served 2 years.
- GEORGE GRAHAM**, of Nemaha county, elected November 3, 1868. Term of service, 2 years—from January 11, 1869, to January 9, 1871.
- J. E. HAYES**, of Johnson county, elected November 8, 1870. Took the oath of office January 9, 1871; was reelected November 5, 1872. Served until April 30, 1874, when he resigned. Term of service, 3 years, 3 months, and 22 days.
- JOHN FRANCIS**, of Allen county, having been appointed May 1, 1874, took charge of the office, and served until January 11, 1875—8 months and 10 days.
- SAMUEL LAPPIN**, of Nemaha county, elected November 3, 1874. Entered the office January 11, 1875; resigned December 20, 1875. Served 11 months and 11 days.
- JOHN FRANCIS**, of Allen county, again appointed December 22, 1875, and took charge of the office. Was elected November 7, 1876; reelected November 5, 1878, and again November 2, 1880. Served from December 22, 1875, to January 8, 1883. Term of service, 7 years and 16 days.
- SAMUEL T. HOWE**, of Marion county, elected November 7, 1882, and reelected November 4, 1884. Took charge of office January 8, 1883. Term of service, 4 years.
- JAMES W. HAMILTON**, of Sumner county, elected November 2, 1886, and reelected November 6, 1888. Resigned March 1, 1890. Term of service, 3 years, 1 month, and 19 days.
- WILLIAM SIMS**, of Shawnee county, appointed and took charge of the office March 1, 1890, and served until December 30, 1890. Term of service, 10 months.
- SOLOMON G. STOVER**, of Republic county, elected November 5, 1890, to fill out the unexpired term ending January 12, 1891, and the regular term ending January 9, 1893. Took charge of the office December 30, 1890. Term of service, 2 years, 1 month, and 1 day.
- WILLIAM H. BIDDLE**, of Butler county, elected November 8, 1892. Took charge of the office February 1, 1893. Term of service, 1 year, 11 months, and 15 days.
- OTIS L. ATHERTON**, of Russell county, elected November 6, 1894. Took charge of office January 16, 1895. Term of service, 2 years and 2 days.
- D. H. HEFLEBOWER**, of Miami county, elected November 3, 1896. Took charge of office January 18, 1897. Term of service, 1 year, 11 months, and 23 days.
- F. E. GRIMES**, of Wichita county, elected November 8, 1898. Took charge of office January 14, 1899. Reelected November 6, 1900.

THIRTEENTH BIENNIAL REPORT.

STATE OF KANSAS,
TREASURER'S OFFICE, TOPEKA, July 1, 1902.

To his Excellency W. E. Stanley, Governor of Kansas:

SIR—Pursuant to the requirements of law, I have the honor herewith to present the following report of this department for the years ending June 30, 1901, and June 30, 1902.

The financial affairs of this state continue to be most prosperous. Payment of taxes, fees, bonds and interest is prompt and regular. The total delinquent taxes due the state are only \$62,814.94 as compared with \$74,748.77 two years ago, and \$164,838.58 four years ago.

The appropriations made by the last legislature provide for the expenses of state government up to June 30, 1903, and the tax levy has been made to produce revenues accordingly. Next January the legislature will convene and reappropriate this money for legislative expenses. There is no way to avoid this, but still it drains the general revenue of the funds necessary for the ordinary expenses of the state. Whereas, the incoming legislature commences to spend money at once, the revenues which it provides will not begin to come into the treasury until January 10, 1904. This system goes on from one legislature to another, and cannot well be remedied. One thing could be done, and that is, for the legislature to refrain from making so many of its appropriations immediately available; to distribute them throughout the following fiscal year in July and January, after the taxes are received at the treasury. This would prevent the alternating surplus and deficit which so often occurs in the treasury.

It is a continuous source of gratification to our people that the entire bonded indebtedness of the state is held by the state school funds—that what we owe, we owe to ourselves. On July 1, 1903, \$220,000 of the state bonds falls due, and on January 1, 1904, \$159,000 falls due. With reasonable prudence, it will not be necessary to refund them. They should be paid. While it is creditable for Kansas to owe no one except herself, it will be still more creditable to owe nothing at all. It would be another instance of the unique position which Kansas delights to hold in the sisterhood of states.

Among the minor suggestions I have to make is one with reference to the law directing the bank commissioner to report the amount of

fees collected by him to this department. This is useless, as the treasury is not an auditing office. That section of the law should be repealed.

Another matter which needs attention is the \$15,900 of fraudulent bonds which have been carried for many years as a part of the resources of the treasury. The legislature should reimburse the school fund and order the destruction of these old bonds.

While the responsibilities of your treasurer have been heavy, and have called for unremitting watchfulness and continuous solicitude, yet he feels considerable satisfaction in that, in all the millions of dollars that have passed through his hands, not a dollar, not a bond, not a coupon, has been lost to the state during his administration.

My associations with your excellency and with my brother officers during the years we have served the people together have been most pleasant, and I shall regret the approaching dissolution of our official relations.

I desire, also, to express my appreciation of the uniform courtesy extended to me by the county treasurers of Kansas. Our official relations have been most cordial, and not an instance can I recall which was not in full accord with the heartiest business courtesy. To the county treasurers, the city treasurers, and to all who have had business with this department, I acknowledge lasting obligations.

Most respectfully,

FRANK E. GRIMES,

Treasurer of Kansas.

Transmitted September 20, 1902.

LIFE ASSURANCE SECURITIES.

Of the guarantee reserve securities belonging to mutual life assurance companies, associations, unions and societies deposited in this office, as required by chapter 114, Laws of 1886, the following remain in the treasury subject to the provisions of the act of the legislature above referred, to wit:

ALLIANCE MUTUAL LIFE ASSURANCE SOCIETY.—*Defunct.*

This company has on deposit in the treasury, for the benefit of the policy-holders, bonds and securities as follows:

| | |
|--------------------------------|--------------------|
| General deposit account..... | \$23,938 00 |
| Registered policy account..... | 12,000 00 |
| Total..... | <u>\$35,938 00</u> |

MUTUAL LIFE INSURANCE ASSOCIATIONS.

Pursuant to the provisions of chapter 114, Laws of 1886, there have been deposited and are now held in the treasury for the companies named the following amounts:

| | |
|---|--------------|
| Kansas Mutual Life Association, securities..... | \$533,210 55 |
| Temperance Mutual Benefit Union, cash..... | 385 17 |
| Kaw Life Association..... | 96 79 |

AMERICAN MUTUAL LIFE ASSOCIATION, OF TOPEKA, KAN.—*Defunct.*

This company has on deposit in treasury, for benefit of its policy-holders, bonds and securities as follows:

| | |
|---------------|-------------|
| One bond..... | \$50,000 00 |
|---------------|-------------|

BANKERS' LIFE ASSOCIATION, OF KANSAS CITY, MO.—*Defunct.*

This company has on deposit in treasury, for benefit of its policy-holders, bonds and securities as follows:

| | |
|---------------|-------------|
| One bond..... | \$50,000 00 |
|---------------|-------------|

CENTRAL UNION ACCIDENT AND LIFE INSURANCE COM- PANY.—*Defunct.*

This company has on deposit in treasury, for benefit of its policy-holders, bonds and securities as follows:

| | |
|---------------|-------------|
| One bond..... | \$50,000 00 |
|---------------|-------------|

TREASURER OF STATE.

SAFETY FUND ASSOCIATION.

This company has on deposit in treasury, for benefit of parties interested, bonds and securities as follows :

One bond..... \$50,000 00

KANSAS MUTUAL HAIL ASSOCIATION.

This company has on deposit in treasury, for benefit of parties interested, bonds and securities as follows :

One bond..... \$50,000 00

STATE OF KANSAS.

THIRTEENTH BIENNIAL REPORT

OF THE

AUDITOR OF STATE

AND

REGISTER OF STATE LAND-OFFICE,

FOR THE FISCAL YEARS

ENDING JUNE 30, 1901, AND JUNE 30, 1902.

TOPEKA :
W. Y. MORGAN, STATE PRINTER,
1902.

THIRTEENTH BIENNIAL REPORT.

OFFICE OF THE AUDITOR OF STATE,
TOPEKA, KAN., November 1, 1902.

To his Excellency W. E. Stanley, Governor of Kansas:

SIR—I herewith submit the report of the transactions of this department for the biennial period ending June 30, 1902, the Thirteenth Biennial Report of the Auditor of State.

I beg the privilege of a number of suggestions, contained herein, with reference to what are, in my judgment, necessary changes in the existing methods of handling portions of the business of the state and in the governing bodies of the public institutions, and for the suggestions I ask your careful consideration. The experience of this department in examining and passing upon the various accounts gives me the opinion that the changes herein suggested will not only result in economy, but will also furnish additional facilities for disposing of the business which reaches this office. The diversified methods of handling accounts of the various state institutions and the difficulties experienced in securing a uniform system of accounts are reasons which I submit to you for consideration in connection with the reforms, which I offer simply as suggestions, with the hope that the governor will be able to secure legislative enactments for the improvement of the system of our public accounts.

Herewith is a detailed estimate of the expenditures to be defrayed from the treasury for the two next ensuing fiscal years, which is provided for in section 7242, General Statutes of Kansas, 1901.

The suggestions concerning changes in our present accounting system and governing bodies are in brief as follows:

That the Board of Trustees of the Charitable Institutions be reduced from five to three members.

An increase in salaries for superintendents and assistant superintendents at charitable institutions, and that these officers be required to maintain themselves and their families, instead of being kept by the state.

Placing all of the educational institutions under the management of one board of regents.

Placing penitentiary and industrial reformatory under one management of three directors, abolishing the two boards now in existence.

For an accounting of moneys received from sale of products at state institutions; also, the accounting of all moneys received from any source whatsoever.

Appropriation for and continuation of the office of state accountant.

CONCERNING APPROPRIATIONS.

To make this report more intelligently, I have visited the state institutions and consulted with the various boards, wardens, the superintendents, and presidents. I am of the opinion that a number of changes can be made that would aid in the betterment of the institutions and at the same time result in economy.

I have given particular attention to the needed fire protection for the state institutions, as will be seen in the estimate of appropriations. The state carries no insurance; therefore should use every precaution against fire.

As suggested in your message two years ago, I think the Board of Charities and Corrections, now composed of five members, should be reduced to three members, salary \$2500 per annum, which would make the total amount of salary of this board \$7500 per annum, as against \$10,000 paid at this time.

SALARIES FOR SUPERINTENDENTS, ETC.

I suggest increased appropriation for salaries of the superintendents and assistants at the charitable institutions, with the understanding that these officers will furnish sustenance for themselves and their families and pay their own help. The state in the past has provided first-class apartments, lighted, heated, and well furnished; also carriages and horses, and board and laundry. Where I have suggested an increase in the salary of the assistant superintendents, it is expected such officers should not be at the state institutions at night except when on duty. This same reform has been brought about at the penitentiary, and it is much more satisfactory than it was under the old "boarding system." Some of the superintendents of the charitable institutions have informed me they would rather have an increased salary and provide for their own table, so if they wish to entertain they will not be criticized for so doing at the expense of the state.

I find that some of the institutions have not sufficient room. At the Osawatomie hospital, the families of the four assistant superintendents, the clerk and the steward contain twenty-one people. They occupy sixteen rooms in the institution and board at the state's expense. A conservative estimate of expense of board and lodging of these twenty-one people would be \$15 per month each, which includes laundry work for the families, beds and bedding, and tableware, to say nothing about the use of the sixteen rooms. Two additional em-

ployees are thereby made necessary, which, at a salary of \$15 per month each, and board \$15 per month, would amount in all to \$375 per month, or a total in this one institution of \$4500 per year. Many thousands of dollars can be saved to the state each year if these officials at all of the charitable institutions maintain themselves and families elsewhere.

EDUCATIONAL INSTITUTIONS.

As suggested in your message, January, 1901, much could be done to render the management of educational institutions more effective in carrying out the intent of the constitution, and the first step in this direction would be to place them under the control of one board of regents.

I would suggest that the governor recommend to the legislature the repeal of the laws creating a board of regents for each of the educational institutions, and the passage of an act creating one board of regents of four members for the educational institutions; this board to be appointed by the governor, with the head of each institution an *ex officio* member and the presiding officer of such board in all matters relating to that particular institution. This board of regents should have charge of the State University, the State Agricultural College, the State Normal School and the Quindaro industrial school for the colored youth, known as the Western University.

The appropriation at the present time for the boards of regents is \$1400 per year for each board, a total of \$4200. This amount is inadequate for proper remuneration of the eighteen members now composing the three boards. The regents of the Quindaro industrial school receive no compensation for salary or expenses. They will ask the legislature to make an appropriation to pay at least their expenses; and the present board of regents of the normal school and agricultural college will ask an appropriation to defray the additional expense required in visiting the experiment station and western branch of the normal, located on the Fort Hays reservation.

I have therefore estimated a stated salary for one board of four regents, together with necessary and actual traveling expenses.

PENITENTIARY AND INDUSTRIAL REFORMATORY.

I would suggest that the governor recommend abolishing the two boards of directors for these institutions, and that there be one board of directors of three members.

At the present time the directors of the State Penitentiary are allowed salary and expenses not to exceed \$2100 per year; the managers of the industrial reformatory, per diem and expenses not to exceed \$2400 per year, making a total appropriation of \$4500 per year for the two boards. This amount is inadequate for six men, and

I believe the two institutions can be handled by one board more satisfactorily than by two boards, and at the same time pay the members of the board a reasonable compensation for their services.

In the estimates for appropriations I do not include the penitentiary brick plant. I think the brick plants in our state are too numerous and too successful to encourage the building of a brick-manufacturing plant at the state penitentiary, where the work is done by convict labor. I find at the state institutions where the penitentiary brick have been used they are scaling badly. In some of the buildings the bricks are crumbling in such a manner as to force the plastering off the walls. At the State Industrial School, Topeka, penitentiary brick were used to build a greenhouse. They crumbled and scaled so badly that it was necessary to cover the outside walls with a heavy coat of cement. The penitentiary brick used in sidewalks have proven failures, and further use for buildings or sidewalks should be avoided, unless a better grade of brick can be produced.

FOR STATE ACCOUNTANT.

I have included in the estimates of appropriations an appropriation for a state accountant.

The legislature of 1895, as set forth in chapter 247, Session Laws of 1895, passed an act creating the office of state accountant, stating "there shall be appointed by the governor a competent accountant, to be known as the state accountant." This law is still upon our statute-books, and I think this can be made one of the most useful positions for the state. He can visit the different state institutions, check up the accounts of all officials and departments, attend all lettings of contracts, and thereby keep the governor in close touch with the entire proceedings relative to the receipt and disbursement of the public funds.

RELATIVE TO SCHOOL-LANDS.

I would call attention to the fact that nearly all the permanent school-land that is being contracted in the state, now and since March 1, 1901, is being sold at \$1.25 per acre. Chapter 350, Session Laws of 1901, provided "that no appraisement of school-land should be made for less than \$1.25 per acre." There is some school-land in the state that is not worth any more than this, but from the best information I can get from the county clerks, most all of the school-land is worth much more than this, and I would, therefore, suggest that this act be repealed.

I would also suggest that the minimum price for which school-lands can be leased should be increased, and the law so amended that the county clerk would be required to report to the auditor of state all school-lands leased. The law at this time does not require the county clerk to make this report.

PRINTING.

A great amount of money could be saved the state by preventing surplus and duplicate printing. To make this policy effectual, there should be some amendments to our laws governing printing.

As an example, I call your attention to the vast quantity of supreme court reports now stored in the dark rooms adjoining the state law library; also to the quantity of department reports stored in the sub-basement of the state-house, and statutes, public documents, senate and house journals stored in the large vault in secretary of state's department on ground floor.

QUANTRILL RAID CLAIM CERTIFICATES PAID.

The legislature of 1901 made an appropriation to pay the balance on the Quantrill raid certificates, which were issued under an act of the legislature of 1887. Amount of claims, \$362,567.91; interest, \$104,720.26; making a total of \$467,288.17; which amount, in my judgment, is a just claim against the national government, and the state of Kansas should be reimbursed.

INTEREST ON STATE MONEY.

Two years ago I made some suggestions relative to the necessity of keeping accounts in this office with the state fiscal agency, as well as with the state depositories, but nothing was done by the legislature. I can add nothing to the suggestions made in my report at that time.

VALUE OF STATE PROPERTY.

During my visit to the state institutions, I have, with the officers in charge, made a careful estimate of the value of the property. The state has been liberal in its appropriation of money for its public institutions. I have tabulated and present the following statement, showing the acreage and value of property owned by the state:

VALUE OF STATE PROPERTY, 1902.

| INSTITUTION. | No. of acres. | No. of lots. | Value of real estate. | Value of buildings. | Value of library. | Value of museum. | Endow- ment. | Value of live stock. | Value of all other property. | Total |
|---|------------------|-----------------|-----------------------------|------------------------|----------------------|---------------------|-----------------|----------------------------|------------------------------------|--------------|
| Oswatimie Hospital..... | 325 | | \$20,000 | \$650,000 | \$300 | | | \$5,000 | \$125,000 | \$800,300 |
| Topeka Hospital..... | 180 | | 36,000 | 650,000 | 100 | | | 5,000 | 100,000 | 791,100 |
| Parsons Hospital..... | 641 | | 48,000 | 70,000 | | | | | | 118,000 |
| Industrial School for Boys..... | 178 | | 13,350 | 160,000 | 900 | | | 1,800 | 20,000 | 186,050 |

ESTIMATE OF APPROPRIATIONS.

Detailed estimate of the expenditures to be defrayed from the treasury for the two next ensuing fiscal years:

| To the Governor: | 1903. | 1904. | 1905. |
|---|---------|----------|----------|
| Governor..... | | \$3,000 | \$3,000 |
| Private secretary..... | | 2,000 | 2,000 |
| Chief clerk, stenographer, and messenger..... | | 2,500 | 2,500 |
| State accountant..... | \$750 | 1,500 | 1,500 |
| Travelling expenses state accountant..... | 400 | 800 | 800 |
| Rewards and arrests..... | | 1,500 | 1,500 |
| Postage, express, and contingent fund..... | | 3,500 | 3,500 |
| Maintaining executive residence..... | 750 | 1,500 | 1,500 |
| Totals..... | \$1,900 | \$16,800 | \$16,800 |
| | | | |
| To the Lieutenant Governor: | | 1904. | 1905. |
| Salary as member of State Board of Railroad Assessors..... | | \$700 | \$700 |
| | | | |
| To the Executive Council: | 1903. | 1904. | 1905. |
| Stationery..... | | \$1,500 | \$1,500 |
| Lights..... | | 600 | 600 |
| Freight and hauling..... | | 2,200 | 2,200 |
| Ice..... | | 350 | 350 |
| Engineer..... | | 1,200 | 1,200 |
| One assistant engineer and electrician..... | | 900 | 900 |
| Four firemen at \$300 each, which shall be in full for all labor performed..... | | 2,400 | 2,400 |
| Twelve janitors at \$300 each, which shall be in full for all labor performed..... | | 7,200 | 7,200 |
| Two messengers at \$300 each, which shall be in full for all labor performed..... | | 1,200 | 1,200 |
| Two night-watchmen at \$300 each..... | | 1,600 | 1,600 |
| One guide..... | | 480 | 480 |
| Water rent..... | | 1,200 | 1,200 |
| Furniture, fixtures, and repairs..... | | 3,000 | 3,000 |
| Contingent fund..... | | 1,500 | 1,500 |
| Custodian of state-house and grounds..... | | 1,200 | 1,200 |
| Expense of extra labor and caring for capitol grounds..... | \$500 | 1,000 | 1,000 |
| Expense of running elevators..... | | 480 | 480 |
| Curator of Goss birds and other museum collections..... | | 600 | 600 |
| Totals..... | \$500 | \$28,610 | \$28,610 |
| | | | |
| To the Adjutant General: | | 1904. | 1905. |
| Adjutant general..... | | \$1,500 | \$1,500 |
| Quartermaster general..... | | 1,200 | 1,200 |
| Clerk hire..... | | 600 | 600 |
| Contingent expenses, express, and postage..... | | 500 | 500 |
| Rent of company armories and contingent expenses of companies, bands, corps, regimental and separate battalion headquarters, and for pay departments, and judge advocate general, freight and drayage, arsenal expenses, and property inspection..... | | 8,000 | 8,000 |
| Semiannual inspection of companies..... | | 1,000 | 1,000 |
| Small-arms practice and purchase of small-arms badges..... | | 500 | 500 |
| Per diem and mileage of military board..... | | 400 | 400 |
| Muster and camp of instruction for national guard..... | | | 18,000 |
| Totals..... | | \$13,700 | \$31,700 |

For pay of the militia when called into active service for the purpose of suppressing riot, preventing mob violence, or to repel invasion, or for the expenses created in mobilizing and raising troops under the call of the president of the United States, there is hereby appropriated, for the year ending June 30, 1904, \$20,000; for the fiscal year ending June 30, 1905, is hereby reappropriated any unexpended balance of the appropriation for the fiscal year ending June 30, 1904.

To the Secretary of State:

| | 1904. | 1905. |
|---|-----------------|-----------------|
| Secretary of state | \$2,500 | \$2,500 |
| Assistant secretary of state | 1,600 | 1,600 |
| Chief clerk | 1,200 | 1,200 |
| Commission clerk | 1,000 | 1,000 |
| Charter clerk | 1,000 | 1,000 |
| Recording clerk | 1,000 | 1,000 |
| Stenographer | 800 | 800 |
| Copyist | 600 | 600 |
| Postage, express, and contingent fund | 1,400 | 1,400 |
| Totals | \$11,100 | \$11,100 |

To the Auditor of State:

| | 1904. | 1905. |
|---|-----------------|-----------------|
| Auditor of state | \$2,500 | \$2,500 |
| Assistant auditor of state | 1,600 | 1,600 |
| Chief clerk | 1,200 | 1,200 |
| Land-office clerk | 1,200 | 1,200 |
| Bond clerk | 1,200 | 1,200 |
| Bookkeeper | 1,200 | 1,200 |
| Stenographer | 800 | 800 |
| Contingent fund, postage, etc. | 1,000 | 1,000 |
| Assistants in making railroad, telegraph and telephone assessments, | 300 | 300 |
| Totals | \$11,000 | \$11,000 |

To the State Treasurer:

| | 1904. | 1905. |
|---------------------------------|-----------------|-----------------|
| State treasurer | \$2,500 | \$2,500 |
| Assistant state treasurer | 1,700 | 1,700 |
| Chief clerk | 1,200 | 1,200 |
| Bond clerk | 1,200 | 1,200 |
| Bookkeeper | 1,200 | 1,200 |
| Assistant bond clerk | 800 | 800 |
| Stenographer | 800 | 800 |
| Guard | 800 | 900 |
| Contingent fund | 1,000 | 1,000 |
| Totals | \$11,400 | \$11,400 |

To the Attorney-general:

| | 1904. | 1905. |
|---|----------------|----------------|
| Attorney-general | \$2,500 | \$2,500 |
| Assistant attorney-general | 1,800 | 1,800 |
| Second assistant attorney-general | 1,200 | 1,200 |
| Stenographer | 800 | 800 |
| Incidental and traveling expenses | 1,500 | 1,500 |
| Totals | \$7,800 | \$7,800 |

To the Superintendent of Public Instruction:

| | 1904. | 1905. |
|--------------------------------------|-----------------|-----------------|
| State superintendent | \$2,000 | \$2,000 |
| Assistant state superintendent | 1,600 | 1,600 |
| Bond clerk | 1,200 | 1,200 |
| Statistical clerk | 1,000 | 1,000 |
| Stenographer | 800 | 800 |
| Contingent fund | 800 | 800 |
| Traveling fund | 750 | 750 |
| Support of county institutes | 5,250 | 5,250 |
| Totals | \$13,400 | \$13,400 |

To the State Librarian:

| | 1904. | 1905. |
|---|----------------|----------------|
| State librarian | \$1,800 | \$1,800 |
| Two assistants in library at \$900 each | 1,800 | 1,800 |
| Two clerks at \$900 each | 1,200 | 1,200 |
| Postage, freight, express, and incidentals | 500 | 500 |
| For purchase of law books and reference books | 1,000 | 1,000 |
| For purchase of miscellaneous books | 400 | 400 |
| Totals | \$6,500 | \$6,500 |

To the Mine Industries:

| | 1904. | 1905. |
|---|----------------|----------------|
| Secretary of mine industries | \$1,500 | \$1,500 |
| Deputies' mileage and per diem | 4,000 | 4,000 |
| Expenses for secretary, for money actually paid out | 1,000 | 1,000 |
| Totals | \$6,500 | \$6,500 |

| To the State Insurance Department : | | 1904. | 1905. |
|---|--|-----------------|-----------------|
| Superintendent of insurance..... | | \$2,500 | \$2,500 |
| Assistant superintendent..... | | 1,500 | 1,500 |
| Chief clerk..... | | 1,200 | 1,200 |
| Stenographer..... | | 800 | 800 |
| Clerk hire..... | | 720 | 720 |
| Postage and contingent expenses..... | | 700 | 700 |
| Totals..... | | \$7,420 | \$7,420 |
| To the Bank Commissioner : | | 1904. | 1905. |
| Bank commissioner..... | | \$2,500 | \$2,500 |
| Two deputies (examiners) at \$1800 each..... | | 3,600 | 3,600 |
| One deputy, building and loan (examiner)..... | | 1,500 | 1,500 |
| One deputy and clerk..... | | 1,500 | 1,500 |
| Stenographer..... | | 800 | 800 |
| Traveling and incidental expenses, postage, and contingent fund..... | | 4,200 | 4,200 |
| Totals..... | | \$14,100 | \$14,100 |
| To the State Oil Inspector : | | 1904. | 1905. |
| Oil inspector..... | | \$1,500 | \$1,500 |
| Deputy inspectors..... | | 3,000 | 3,000 |
| Clerk and stenographer..... | | 600 | 600 |
| Expenses of inspector, for money actually paid out..... | | 1,200 | 1,200 |
| Expenses of deputies, for money actually paid out..... | | 1,200 | 1,200 |
| Totals..... | | \$7,500 | \$7,500 |
| To the State Historical Society : | | 1904. | 1905. |
| Secretary..... | | \$1,800 | \$1,800 |
| Assistant secretary..... | | 1,200 | 1,200 |
| Accession clerk..... | | 720 | 720 |
| Newspaper clerk..... | | 720 | 720 |
| Assistant newspaper clerk..... | | 600 | 600 |
| Stenographer..... | | 600 | 600 |
| Postage, freight, and contingent expenses..... | | 600 | 600 |
| Purchase of books..... | | 500 | 500 |
| Totals..... | | \$8,740 | \$8,740 |
| To the Bureau of Labor and Industry : | | 1904. | 1905. |
| Labor commissioner..... | | \$1,500 | \$1,800 |
| Assistant commissioner..... | | 1,200 | 1,200 |
| Stenographer..... | | 720 | 720 |
| Incidental and traveling expenses, which shall include expenses of commissioner attending national convention of labor-bureau officers..... | | 1,500 | 1,800 |
| Special agents and other assistants..... | | 800 | 800 |
| Postage and express..... | | 800 | 800 |
| Totals..... | | \$8,520 | \$8,520 |
| To the State Board of Agriculture : | | 1904. | 1905. |
| Secretary..... | | \$2,500 | \$2,500 |
| Assistant secretary..... | | 1,500 | 1,500 |
| Chief clerk..... | | 1,200 | 1,200 |
| Clerk..... | | 720 | 720 |
| Stenographer..... | | 720 | 720 |
| Postage, freight, express, and telegraphing..... | | 1,000 | 1,000 |
| Contingent fund..... | | 500 | 500 |
| Expense of members of board, delegates attending annual meeting.. | | 1,000 | 1,000 |
| Books of reference for library..... | | 100 | 100 |
| Totals..... | | \$9,240 | \$9,240 |
| To the State Horticultural Society : | | 1904. | 1905. |
| Secretary..... | | \$1,200 | \$1,200 |
| Clerk and stenographer..... | | 600 | 600 |
| Expense of members of board attending annual meeting..... | | 200 | 200 |
| Secretary's traveling expenses..... | | 200 | 200 |
| Postage, freight, and contingent fund..... | | 600 | 600 |
| Totals..... | | \$2,800 | \$2,800 |

| | | | |
|---|----------|----------|---------|
| To the Academy of Science : | | | |
| | 1903. | 1904. | 1905. |
| Secretary | \$500 | \$1,000 | \$1,000 |
| Contingent fund | | 300 | 300 |
| Totals | \$500 | \$1,300 | \$1,300 |
| To the Free Employment Bureau : | | | |
| | 1904. | 1905. | |
| Director | \$1,200 | \$1,200 | |
| Postage and express | 500 | 500 | |
| Totals | \$1,700 | \$1,700 | |
| To the Fish Warden : | | | |
| | 1904. | 1905. | |
| Fish-warden | \$1,000 | \$1,000 | |
| To carry out provisions of section 12, chapter 142, laws of 1899 | 400 | 400 | |
| Totals | \$1,400 | \$1,400 | |
| To the State Architect : | | | |
| | 1904. | 1905. | |
| State architect | \$2,400 | \$2,400 | |
| For State Grain Inspection : | | | |
| | 1904. | 1905. | |
| Chief inspector | \$1,500 | \$1,500 | |
| Chief clerk | 1,000 | 1,000 | |
| Collector | 900 | 900 | |
| Bookkeeper and stenographer | 900 | 900 | |
| Office clerk | 600 | 600 | |
| Contingent fund and necessary incidental expenses of maintaining said department | 1,500 | 1,500 | |
| Assistant inspectors, weighmasters, and helpers | 28,500 | 28,500 | |
| Totals | \$34,900 | \$34,900 | |
| To Forestry Stations at Dodge City and Ogallah : | | | |
| | 1904. | 1905. | |
| Commissioner | \$1,000 | \$1,000 | |
| Foreman | 480 | 480 | |
| Purchase of trees, seeds, and cuttings | 200 | 200 | |
| Labor, postage, freight, and incidentals | 1,200 | 1,200 | |
| Traveling expenses of commissioner | 220 | 220 | |
| Totals | \$3,100 | \$3,100 | |
| To the Live-stock Sanitary Commission : | | | |
| | 1904. | 1905. | |
| Per diem and general expenses of the three members of board, and contingent expenses of board | \$5,600 | \$5,600 | |
| Stenographer | 400 | 400 | |
| Expenses of the state veterinarian | 200 | 200 | |
| One inspector at Fort Worth, Tex., twelve months at \$100 | 1,200 | 1,200 | |
| One inspector to patrol the south line of Kansas between the Arkansas river and Missouri line, twelve months at \$100 | 1,200 | 1,200 | |
| Other inspectors, to be stationed when and where needed by the board | 1,400 | 1,400 | |
| Totals | \$10,000 | \$10,000 | |
| To the State Board of Health : | | | |
| | 1904. | 1905. | |
| Secretary | \$1,200 | \$1,200 | |
| Stenographer and clerk | 540 | 540 | |
| Special sanitary work | 800 | 800 | |
| Expenses of said board, and to carry out provisions of chapter 129, Session Laws of 1895, and postage and incidentals | 460 | 460 | |
| Emergency fund to carry out provisions of chapter 74, Session Laws of 1895, in relation to infectious and contagious diseases | 5,000 | | |
| Totals | \$8,000 | \$3,000 | |

No part of this latter amount shall be used except on the order of the State Board of Health and with the approval of the Executive Council, and any unexpended balance of the appropriation remaining June 30, 1904, shall be available for the fiscal year ending June 30, 1905.

To the State Board of Medical Registration and Examination:

| | 1904. | 1905. |
|--|----------------|----------------|
| Secretary | \$800 | \$800 |
| Postage and contingent fund..... | 300 | 300 |
| Per diem and traveling expenses of members | 1,200 | 1,200 |
| Totals..... | \$2,300 | \$2,300 |

To the State Board of Railroad Commissioners

| | 1904. | 1905. |
|---|-----------------|-----------------|
| Three commissioners at \$2500 each..... | \$7,500 | \$7,500 |
| Clerk | 1,500 | 1,500 |
| Stenographer..... | 800 | 800 |
| Contingent fund, incidental expenses, and court costs | 3,000 | 3,000 |
| Totals..... | \$12,800 | \$12,800 |

To the Supreme Court:

| | 1904. | 1905. |
|---|-----------------|-----------------|
| Seven justices..... | \$21,000 | \$21,000 |
| Reporter..... | 2,000 | 2,000 |
| Two assistant reporters at \$1000 each..... | 2,000 | 2,000 |

To the Court of Common Pleas:

| | 1904. | 1905. |
|---|---------|---------|
| One judge of the court of common pleas of Wyandotte county..... | \$3,000 | \$3,000 |

To the Stenographers of District Courts (except Third district, Shawnee county, and Twenty-ninth district, Wyandotte county, and court of common pleas, Wyandotte county):

| | 1904. | 1905. |
|---|----------|----------|
| Twenty-nine stenographers at \$1000 each..... | \$29,000 | \$29,000 |

I would call your attention to section 3040, General Statutes of Kansas, 1901, which fixes the salary of district court stenographers at \$1200 per annum; also

to section 5066 of the same statute, which fixes the salary of the stenographer of the board of railroad commissioners. I would suggest that, if the legislature sees fit to make the appropriations for the district court stenographers and the stenographer of the board of railroad commissioners as included in these estimates, the sections of the statute referred to should be amended.

The salary of the stenographer for each justice of the supreme court is estimated the same as that of the stenographer of the district court. I fail to find, however, any law in our statute fixing the salary of the stenographers of the supreme court.

|--|-----------------|------------------|------------------|
| Equipment of buildings, water-mains, fire protection, and sewer connections | \$14,500 | | |
| Eleven acres of land on the east side of land now owned by the state, the same lying between Twenty-sixth street and the state's land in the city of Parsons | 2,200 | | |
| Four lots in block 5, Park View addition, Parsons, for railroad switch to state grounds | 200 | | |
| Buildings and equipment, complete | | \$100,000 | \$100,000 |
| Totals..... | \$16,900 | \$100,000 | \$100,000 |

The estimates for buildings at this institution are large. I find the state owns 641 acres of land. The Board of Charities and Corrections inform me that it is much better for the insane, particularly the epileptics, to have outdoor work, and the land can be utilized to good advantage. The purchase of eleven acres of land is included in these estimates in order to keep private parties from building on the narrow strip of land facing Twenty-sixth street. It must have been an oversight on the part of the committee selecting the land for this institution

that this narrow strip was not included, so that the state's land would come to the street line.

Estimates of appropriations for buildings at the insane hospitals are more than those of other state institutions, for the reason there are between 300 and 400 insane persons in the state who have been refused admission to the state hospitals for want of room. These unfortunate insane are cared for in various ways. Some are at private insane asylums; some at county poorhouses; some are confined in cells in county jails; others are placed with local parties that will care for them. In almost every instance where these unfortunates are cared for by the county, the parties caring for them are not prepared to give them proper care. With the estimates for buildings included in this report, every insane person in the state can be provided for at the state hospitals.

| | 4,000 | | |
| Totals..... | \$6,500 | \$6,500 | |

At this institution a steel water-tank has been purchased, but the present brick tower has been condemned. Therefore, the new tank cannot be used, and for that reason an immediate appropriation is suggested for a steel tower and foundation.

The estimate of \$4000 for restoration of tunnel and protection of steam-mains is something that is needed. At the present time the steam-pipes are not covered, and the engineer informs me that at least one-fourth of the heat is wasted by reason of these pipes not being protected.

The walls of the buildings at this institution are badly cracked. The board has had a number of bolts put into the walls, so that they are, perhaps, now in a

safe condition. If the bolts have been properly placed, so as to make the walls secure and safe, restoration of some of the outside or face walls should be made, to prevent water getting into these cracked walls and still further damaging the buildings. I have made no estimate for this expense, being unable to ascertain the condition of the foundations and the full extent of the damaged walls.

| Improvement of grounds..... | | 1,000 | |
| Totals..... | \$6,700 | \$15,000 | \$4,000 |

I wish to call your attention to the needed appropriation for the stand-pipe. At this institution the only supply of water is small tanks in the attics of the buildings. The officers in charge inform me, as a rule, the water is completely exhausted in these attic tanks by three or four o'clock in the morning, and they

are without water for sanitary purposes or fire protection from that time until the pumps are started, some hours later. At this institution it is necessary to use a great deal of water during all hours of the day and night.

| Totals..... | 634,742 | \$34,742 |

Fire protection is needed at this institution. The water question is a serious one, as the reserve supply is now limited. The logical source of supply is the river, which is one-half mile away, and the altitude is so great that it would require a pumping station at the river in order to furnish a continuous pressure.

The officers of this institution are asking an appropriation to build an electric-car line from the railroad-track to the institution to convey the coal from the cars to the institution. The amount asked for is \$10,000.

I would suggest that, if the legislature could be convinced that water could be obtained, an appropriation be made for a stand-pipe.

To the School for the Blind, Kansas City, Kan.:

| | 1904. | 1905. |
|-----------------------------------|----------|----------|
| Maintenance and repairs..... | \$11,000 | \$11,000 |
| Superintendent..... | 1,800 | 1,800 |

| Lavatories and additional toilet accommodations..... | \$1,500 | |
| New generator for electric lighting, put in place, complete, together with asbestos for ceiling boiler-room..... | | \$800 |

State Charitable Institutions:

I have not included in these estimates appropriations for buildings at any of the state charitable institutions, except the Parsons State Hospital, a laundry at the Topeka State Hospital, and a kitchen, bakery and employees' quarters at the Winfield School for Feeble-minded, for the reason that I think by utilizing the rooms at the various institutions that are not now in continuous use by the inmates would obviate the necessity of new buildings for the next two years.

The estimates for maintenance and repairs at the state charitable institutions are made with the understanding that all moneys collected from any source at each of the institutions shall be paid to the state treasurer and re-appropriated for the maintenance and repairs for the institution making such payment; these funds to be paid out by the state treasurer on warrants issued by the auditor of state, on vouchers presented and properly approved, the same as all regular appropriations.

| To the State University, Lawrence : | | 1904. | 1905. |
|---|--|-----------|-----------|
| Current expenses..... | | \$140,000 | \$140,000 |

| Pump and motor..... | | 800 | |
| Wells..... | | 1,600 | |
| Library stacks..... | | 4,000 | |
| Total..... | | \$12,900 | |

The estimate of \$35,000 for current expenses each year is made with the understanding that the United States endowment, the interest fund and the tuition and incidental fees collected shall be paid to the state treasurer and reappropriated to the current-expense fund of said Agricultural College, to be paid out by the state treasurer on warrants issued by the auditor of state, on vouchers presented and properly approved, the same as all regular appropriations.

There is also a United States aid fund of \$15,000, to be used for experimental purposes. This is known as the "Hatch fund," and is paid direct from the national government to the officers of the State Agricultural College, and is not handled through the state treasury. This amount is not included in the United States endowment or any of the above estimates.

This institution is very much in need of the water-works system suggested for fire protection, as at the present time there is no water-pressure; the elevation is so great that the city water plant furnishes no pressure. If this appropriation for water-works is made, I would suggest the \$1000 for water-supply included in these estimates for the year 1905 be stricken out.

To the Experiment Station, State Agricultural College, on the Fort Hays military reservation:

| | 1903. | 1904. | 1905. |
|------------------------------------|----------------|-----------------|----------------|
| Current expenses..... | \$2,000 | \$4,000 | \$4,000 |

| Five fire bosses at \$720 each..... | 3,600 | 3,600 |
| Ten mine officers at \$720 each..... | 7,200 | 7,200 |
| Forty-nine guards, helpers, and night-watchmen..... | 30,000 | 30,000 |
| Totals..... | \$67,420 | \$67,420 |
| Maintenance and repairs..... | \$41,000 | \$41,000 |
| Convicts' earnings..... | 11,000 | 11,000 |
| Contingent fund..... | 5,000 | 5,000 |
| Totals..... | \$57,000 | \$57,000 |

This estimate for maintenance and repairs of \$41,000 each year is made with the understanding that all moneys collected at the penitentiary, except that collected from the binding-twine plant, shall be paid to the state treasurer and re-appropriated to the maintenance and repair fund of the penitentiary, to be paid out by the state treasurer on warrants issued by the auditor of state, on vouchers presented and properly approved, the same as all regular appropriations.

Moneys received and paid state treasurer by the warden for miscellaneous purposes for the fiscal year ending June 30, 1902, \$21,774.07; for care of Oklahoma prisoners, estimate \$35,259 per year, making a total of \$57,033.07, which would make the total amount for maintenance and repairs \$98,033.07. If not re-appropriated, then the appropriation for maintenance and repairs should be \$98,000 each year.

| <i>Special appropriations, State Penitentiary:</i> | 1903. | 1904. | 1905. |
|---|-----------------|-----------------|----------------|
| New tile or marble floor for prisoners' dining-room, with girders and columns..... | \$3,000 | | |
| Eleven closets, plumbing and sewerage, workshops..... | | \$500 | |
| New cell block for female prisoners..... | | 7,000 | |
| Columns, girders, joists and flooring, and strengthening of sisal and twine-plant store-room..... | 650 | | |
| Pump-house, generator, motor, electrical wires, and connection with present water-service..... | | 12,000 | |
| Water-mains from reservoir to institution..... | 6,500 | | |
| New machines for laundry in female section..... | | 500 | |
| Repairing elevator, administration building..... | 1,500 | | |
| Shower-baths and additional fixtures for prisoners' bath-room..... | | 1,000 | |
| Apple and peach trees..... | 220 | | |
| Refurnishing administration building..... | 500 | | |
| Flooring and general repairs for administration building..... | 1,000 | | |
| Erection of cottages on state grounds..... | | 2,000 | 2,000 |
| Murray Iron Works, balance due on old account for marine boilers..... | 1,250 | | |
| Totals..... | \$14,620 | \$23,000 | \$2,000 |

The floor in the prisoners' dining-room, being wood, is giving away so that it is in a dangerous condition, as well as the floors in the administration building.

The present water-mains are small and almost entirely stopped up, so that it is quite difficult to get water through them. This estimate is for new mains, to be much larger than the present mains. After the new mains are put in place, the old ones can be taken up and cleaned and used elsewhere at the institution.

The old machines at the laundry are in such a condition that they cannot be repaired, and tear the clothes when washed.

It is quite difficult for the employees to rent houses for their families at this place. The state has an abundance of ground on which small cottages could be erected, and the income for rents would soon pay the cost of erecting these cottages.

School District No. 75, Lansing:

| 1904. | 1905. |
|-------|-------|
| \$800 | \$800 |

To the Industrial Reformatory, Hutchinson:

| 1904. | 1905. |
|-------|-------|
|-------|-------|

| | | |
|--|-----------------|-----------------|
| Maintenance and repairs..... | \$16,000 | \$16,000 |

| Totals..... | \$30,200 | \$30,200 |

INDUSTRIAL REFORMATORY — concluded :

| | 1904. | 1905. |
|---|---------------|-----------------|
| <i>Special appropriations :</i> | | |
| Stand-pipe, 12 x 100, with foundation and connection. complete..... | 1903. \$6,000 | 1904. 1905. |
| Closets and wash-bowls in old cell-house..... | | \$3,000 |
| Stone-cutting shop..... | | 8,500 |
| Carpenter shop..... | | \$5,000 |
| Totals..... | \$6,000 | \$6,500 \$5,000 |

The stand-pipe is something that is needed at this institution for immediate fire protection as well as water-supply.

The per capita cost of maintaining this institution is the largest of any institution in the state, except the School for the Blind, and this is caused by its being practically a new institution; the number of inmates not being large would necessarily make the per capita cost much greater.

At this institution there are 640 acres of land. In addition to the appropriations made by the state, I am informed that all the produce raised on this section of land, together with the commodities sold from the institution, are used towards the support of the institution, but no money has been paid the state treasurer and reported to this office for the sale of produce or commodities. This would really increase the per capita cost over that given in this report, and this is one of the reasons why I suggest that all produce and commodities from the various institutions, other than that consumed at the institutions, be sold and the money paid to the state treasurer, and reappropriated to the state institutions, so that the legislature may know the exact cost of maintaining these institutions.

To the State Soldiers' Home, at Fort Dodge and Ellsworth :

| | 1904. | 1905. |
|--------------------------------|----------|----------|
| Maintenance and repairs..... | \$35,000 | \$35,000 |
| Clothing..... | 9,500 | 9,500 |
| Freight and hauling..... | 6,500 | 6,500 |
| Library..... | 200 | 200 |
| Contingent fund..... | 1,000 | 1,000 |
| Medical supplies..... | 1,100 | 1,100 |
| Home surgeon, Fort Dodge..... | 1,000 | 1,000 |
| Home surgeon, Bickerdye..... | 200 | 200 |
| Commandant..... | 1,500 | 1,500 |

| Teachers..... | 900 | 900 |
| Totals..... | \$59,000 | \$59,000 |

This estimate for maintenance and repairs of \$35,000 each year is made with the understanding that all moneys collected from any source shall be paid to the state treasurer and reappropriated to the maintenance and repair fund of this institution, to be paid out by the state treasurer on warrants issued by the auditor of state, on vouchers presented and properly approved, the same as all regular appropriations.

| | | | |
|---|-------------|-------------|-------------|
| <i>Special appropriations :</i> | | | |
| Cottage furnishings..... | 1903. \$500 | 1904. \$500 | 1905. \$500 |
| Water-works..... | 8,000 | | |
| Building and furnishing cottages, Fort Dodge..... | | 6,000 | 6,000 |
| Totals..... | \$8,500 | \$6,500 | \$6,500 |

The Soldiers' Home, at Fort Dodge, being located five miles from Dodge City, is absolutely without any fire protection whatever. I would ask that the governor call the attention of the legislature particularly to this fact, as it needs an appropriation for immediate use. An abundance of water can be obtained at a depth of twelve to twenty feet. They have a good location for a stand-pipe, or tower and tank, and, with this, they need water-mains, hydrants, and hose, which have been carefully estimated and can be installed for the amount asked for.

|--|-----------|-----------|-----------|
| Conveying prisoners to the penitentiary..... | | \$8,000 | \$8,000 |
| Interest on state bonds..... | | 13,300 | 10,120 |
| State bonds due July 1, 1903..... | | 220,000 | |
| State bonds due January 1, 1904..... | | 159,000 | |
| Legislative expenses..... | \$80,000 | | 80,000 |
| Presidential electors..... | | | 600 |
| Destitute insane (estimate)..... | 50,000 | | |
| Traveling library..... | | 3,000 | 3,000 |
| Asphalt covering of gravel walks and drives in the state-house grounds, 9010 yards, estimate \$1.75..... | | 15,767 | |
| Repairs executive residence, removing old furnace and installing hot-water or steam heat..... | | 3,500 | |
| Repairing and painting roof, executive residence..... | 300 | | |
| Lace curtains, pictures, furnishings, and wall-cleaning, executive residence..... | 1,000 | | |
| Building barn, complete, executive residence..... | | 3,500 | |
| Louisiana Purchase Centennial Exposition, to be held at St. Louis..... | | 75,000 | |
| Grand Army of the Republic, same as was provided by the legislature of 1901, as set forth in chapter 11, Session Laws of 1901..... | | 1,000 | |
| Totals..... | \$131,300 | \$502,067 | \$101,720 |

This estimate of interest on state bonds is made with the understanding that the bonds of \$220,000 due July 1, 1903, and \$159,000 due January 1, 1904, will be paid when due. In my judgment, these bonds should be paid when due.

This estimate of expense for the present legislature, coming out of the appropriation made for the fiscal year ending June 30, 1903, should have been taken into consideration in making the appropriations and levies in 1901, but was not. I have also included an estimate for the legislative expense of 1905.

I cannot give the definite expense for care of destitute insane cared for by the counties who have been refused admission to the state hospitals for want of room. I have estimated this from the best information I could get. The legislature of 1901 took this matter entirely out of the hands of the auditor of state and put it in charge of the State Board of Charities and Corrections.

Deficiency :

1903.

| | |
|--|----------|
| T. B. Gerow, director free employment bureau, for deficiency in salary, two-thirds of April, all of May, and June, 1901..... | \$286 80 |
| Fiscal year ending June 30, 1902..... | 1,200 00 |
| Fiscal year ending June 30, 1903..... | 1,200 00 |
| Expenses, postage, and express, fiscal year ending June 30, 1903..... | 500 00 |
| Geo. W. Wiley, fish-warden, for deficiency in salary for the fiscal year ending June 30, 1900, and June 30, 1901..... | 800 00 |

In section 53, chapter 36, Session Laws of 1901, an appropriation was made, as was supposed, to cover this deficiency, but it read "for deficiency for the fiscal years 1902 and 1903," therefore could not be paid, as there was no deficiency for the years 1902 and 1903.

Total..... \$3,986 80

| | Regular. | Building and special. | Total. |
|---|-----------------------|-----------------------|-----------------------|
| Appropriations 1903..... | \$221,751 60 | \$35,220 00 | \$306,971 60 |
| Appropriations 1904..... | 2,149,489 00 | 219,700 00 | 2,369,189 00 |
| Appropriations 1905..... | 1,828,022 00 | 142,500 00 | 1,970,522 00 |
| Totals..... | \$4,196,242 60 | \$447,420 00 | \$4,643,662 60 |
| Total appropriations made by the legislature of 1901..... | | | \$4,684,285 58 |

I would call your attention to the fact that I have made no estimate for private hospitals and homes, as they are not under the management of the state and have no reports on file in this office showing how many there are in the state at this time, and am, therefore, unable to make an estimate. The legislature has heretofore taken up this matter. I would state that the legislature of 1901 appropriated for private hospitals and homes \$32,800. Included in this is an appropriation of \$4000 to the Kansas Children's Home Society, as set forth in chapter 26, Session Laws of 1901. This last appropriation was made for the purpose of providing homes for and placing therein children from the Mother Bickerdyke Home, the State Soldiers' Home, the Industrial School for Boys, the Soldiers' Orphans' Home, and the Industrial School for Girls. This, I am informed by the officers in charge of the various institutions, has practically been a failure, and I think could be handled much more satisfactorily by the Trustees of Charities and Corrections, together with the superintendents of the institutions, and at a very much less expense.

The legislature of 1901 also appropriated \$1500 for each of the fiscal years ending June 30, 1902, and June 30, 1903, for the Industrial and Educational Institute, Topeka.

I would call your attention to the reappropriating of the \$150,000 twine-plant revolving fund for the next two ensuing fiscal years, and would suggest that the governor remind the legislature of needed amendments to the law relative to handling this fund. Under the present law, the warden draws his voucher for such an amount as he may wish on this fund, but no itemized reports or itemized vouchers are made showing the disbursement of this fund; also, that an appropriation be made to pay the superintendent, or whatever help is necessary in this department outside of convict labor, and that vouchers approved by the proper officers be filed the same as all other employees of the state, and that sworn statements be made to the auditor of state, at least once a month, in such a manner that the auditor of state would be authorized to pass upon all claims of said department, the same as all other vouchers.

Respectfully submitted.

GEO. E. COLE,
Auditor of State.

PART I.

1901.

The following resolution was adopted :

Resolved, That where town lots or lands are condemned for the right of way or depot reservations or terminal facilities, or purchased for said purposes, and so much of the same is used for said purposes as to render the remainder useless for other purposes, it is the purpose of this Board to assess the whole of such lots and lands to the railroad company in connection with its right of way, and the same should therefore not be assessed by the local authorities.

Railroad Assessments.

Schedule No. 1.—Showing average and assessed value per mile of right of way, main track side track, rolling-stock, materials, supplies, etc., and buildings, as assessed for the year 1901.

| No. of miles. | NAMES OF RAILROADS. | Value per mile. | Total. |
|--|-----------------------------------|-----------------|--------------------|
| Kansas City, Fort Scott & Memphis—Kansas City Division. | | | |
| 100.06 | Main track..... | \$8,667 | \$827,875 |
| 56.42 | Side track..... | 2,486 | 138,320 |
| | Rolling-stock..... | 3,137 | 313,888 |
| | Material, supplies, etc..... | 55 | 5,506 |
| | Buildings..... | | 39,305 |
| | Total..... | | \$1,324,688 |
| | Value per mile, all property..... | \$13,238 | |
| Kansas City, Fort Scott & Memphis—Springfield Division. | | | |
| 18.97 | Main track..... | \$7,000 | \$97,790 |
| 2.56 | Side track..... | 2,000 | 5,120 |
| | Rolling-stock..... | 3,137 | 43,525 |
| | Material, supplies, etc..... | 55 | 768 |
| | Buildings..... | | 2,670 |
| | Total..... | | \$150,173 |
| | Value per mile, all property..... | \$10,742 | |
| Kansas City, Fort Scott & Memphis—Joplin Division. | | | |
| 59.14 | Main track..... | \$5,800 | \$343,012 |
| 23.05 | Side track..... | 2,000 | 46,100 |

Proceedings of the State Board of Telegraph and Telephone Assessors, 1901.

The following assessment was made :

Telegraph lines:

| | |
|--|---------|
| First wire, including office fixtures, material and supplies, poles, and fixtures connected therewith, per mile..... | \$65 00 |
| Each additional wire, including fixtures, per mile..... | 10 00 |

Telephones, first class:

| | |
|--|---------|
| Poles, cross-arms, and first wire, per mile..... | \$40 00 |
| Each additional wire, per mile | 6 00 |
| Instruments, each..... | 7 00 |

Exchanges, first class:

| | |
|-------------------------------|--------|
| Poles, each..... | \$1 25 |
| Wire, per mile..... | 5 00 |
| Instruments, each..... | 5 00 |
| Switch-boards, per drop | 1 00 |
| Automatic instruments..... | 8 00 |

Toll lines, second class:

| | |
|--|---------|
| First wire, including poles, etc., iron, per mile..... | \$25 00 |
| Copper, per mile..... | 29 00 |
| Each additional wire, iron, per mile..... | 2 00 |
| Each additional wire, copper, per mile..... | 6 00 |
| Instruments, each..... | 7 00 |

Exchanges, second class:

| | |
|----------------------------------|--------|
| Poles, each..... | \$1 00 |
| Wire, iron, per mile..... | 2 00 |
| Wire, copper, per mile..... | 6 00 |
| Switch-boards, per drop..... | 1 00 |
| Instruments, each..... | 4 00 |
| Automatic instruments, each..... | 8 00 |

Toll lines, third class:

| | |
|--|---------|
| First wire, including poles, etc., iron, per mile..... | \$15 00 |
| First wire, copper, per mile..... | 19 00 |
| Each additional wire, iron, per mile..... | 2 00 |
| Each additional wire, copper, per mile..... | 6 00 |
| Instruments, each..... | 7 00 |

Exchanges, third class:

| | |
|----------------------------------|--------|
| Poles, each..... | \$0 75 |
| Wire, iron, per mile..... | 2 00 |
| Wire, copper, per mile..... | 6 00 |
| Switch-boards, per drop..... | 1 00 |
| Instruments, each..... | 4 00 |
| Automatic instruments, each..... | 8 00 |

Resolved, That the telephone plants of the state be divided for the purposes of assessment for the year 1901, as follows:

CLASS 1.

Missouri & Kansas Telephone Company.
Interstate Telephone Company.

CLASS 2.

Wareham & Dewey Telephone Company.
Galena Telephone Company.
Wareham & Wood Telephone Company.
Southwestern Telephone and Electrical Company.
Chetopa Telephone Company.
J. H. McMahan Telephone Company.
Kansas Telephone and Electrical Company.
Ellsworth Electric Light and Telephone Company
Smith & Flint Telephone Company.
Kansas Telephone Company.
Concordia Telephone Company.
Ottawa Telephone Company.
Brown County Telephone Company.
Jackson County Telephone Company.
Lindsborg Telephone Company.
Lyons Telephone Company.
McPherson Telephone Company.
Salina Telephone Company.
Downs Telephone Company.
Exchange Telephone Company.

CLASS 3.

Clyde Telephone Company.
Fairview Telephone Company.
Webb & Kelley Telephone Company.
Fred Koster Telephone Company.

Schedule showing distribution of telegraph and telephone property of the state to the various counties, as assessed for the year 1901.

ALLEN COUNTY.

| <i>Names of Counties and Companies.</i> | <i>Total valuation.</i> |
|---|-------------------------|
| Western Union Telegraph Co..... | \$7,764 00 |
| Missouri & Kansas Telephone Co..... | 1,108 00 |
| Kansas Telephone Co..... | 1,558 00 |
| Total..... | \$10,430 00 |

ANDERSON COUNTY.

| | |
|-------------------------------------|--------------------|
| Western Union Telegraph Co..... | \$10,799 00 |
| Missouri & Kansas Telephone Co..... | 352 00 |
| Kansas Telephone Co..... | 912 00 |
| Ottawa Telephone Co..... | 824 00 |
| Total..... | \$12,887 00 |

ATCHISON COUNTY.

| | |
|---|--------------------|
| Western Union Telegraph Co..... | \$5,739 00 |
| Postal Telegraph Cable Co..... | 1,552 00 |
| Burlington & Missouri River Railroad Co. telegraph..... | 324 00 |
| Missouri & Kansas Telephone Co..... | 7,489 00 |
| Interstate Telephone Co..... | 1,926 00 |
| Jackson County Telephone Co..... | 139 00 |
| Total..... | \$20,169 00 |

BARBER COUNTY.

| | |
|---------------------------------|------------|
| Western Union Telegraph Co..... | \$3,181 00 |
|---------------------------------|------------|

BARTON COUNTY.

| | |
|----------------------------------|--------------------|
| Western Union Telegraph Co..... | \$8,992 00 |
| Postal Telegraph Cable Co..... | 3,775 00 |
| Lyons Telephone Exchange Co..... | 689 00 |
| Lindsborg Telephone Co..... | 421 00 |
| Total..... | \$13,877 00 |

BOURBON COUNTY.

| | |
|-------------------------------------|--------------------|
| Western Union Telegraph Co..... | \$12,429 00 |
| Missouri & Kansas Telephone Co..... | 4,590 00 |
| Kansas Telephone Co..... | 1,163 00 |
| Total..... | \$18,182 00 |

BROWN COUNTY.

| | |

The following basis was used for the average value of personal property :

| | | | |
|----------------------|---------|------------|--------|
| Horses..... | \$13 50 | Sheep..... | \$0 83 |
| Mules and asses..... | 15 19 | Hogs | 2 05 |
| Cattle..... | 7 66 | | |

The Board, after a careful examination of the returns of the several counties, made the following changes, viz.:

The following counties were decreased :

| | | | |
|---------------|-------------------------|---------------|--------------------------|
| Allen | 19% per cent. | Morton | 46% per cent. |
| Barton | 28 " | Ness | 1% " on lands. |
| Cheyenne..... | 7 " on lands and lots. | Pawnee..... | 3% " " |
| Decatur..... | 7 " on lands. | Rawlins..... | 22 " on lands and lots. |
| Edwards..... | 35 " on lands and lots. | Rooks..... | 7% " " " |
| Ellis..... | 18% " " " | Rush..... | 13% " " " |
| Gove..... | 2% " on lands. | Sedgwick..... | 3% " " |
| Graham..... | 24 " " | Seward..... | 9 " " |
| Grant..... | 24 " on lands and lots. | Shawnee..... | 8% " on lands and lots. |
| Hamilton..... | 12 " on lands. | Sheridan..... | 9 " " |
| Haskell..... | 35 " on lands and lots. | Sherman..... | 8% " on lands and lots. |
| Hodgeman..... | 23% " " " | Stanton..... | 22% " on lands. |
| Lane..... | 5% " " | Stevens..... | 30% " on lands and lots. |
| Leon..... | 14% " " | Thomas..... | 14% " " |
| Mitchell..... | 3% " " | | |

The following counties were increased :

| | | | |
|-----------------|---------------------------------|------------------|--------------------------|
| Anderson..... | 18 per cent. on lands and lots. | Lincoln | 14 per cent. |
| Atchison..... | 27 " | Linn..... | 5% " on lands and lots. |
| Barber..... | 7 " " | Logan..... | 8% " on personal. |

| Totals..... | | | | | | | | \$632,000 00 |

DELINQUENT BONDS.

The statute provides that the auditor shall compare the register kept in his office with the bonds in the state treasurer's office, which is found in section 6397, General Statutes of Kansas, 1901, which reads as follows:

"That it shall be the duty of the auditor of state, on the first Monday in August of each year, to compare the register kept by him with the bonds in the treasurer's office, and shall at the time of comparing such register require the treasurer to produce all coupons and bonds remaining unpaid, which shall be compared with the register."

In compliance with this law, I submit the following report, which shows a list of delinquent bonds found in the state treasurer's office on examination made August 4, 1902:

DELINQUENT BONDS.

| Wichita..... | 20..... | 2..... | 100 | " 1, 1898. |

I also find that the state school-fund commissioners have compromised the following coupons belonging to the state permanent school fund:

Greeley County. Amount of principal, \$62,500. Amount of interest due July 1, 1900, \$14,790. Compromised for \$2465, with an agreement to accept one-sixth of the interest thereafter.

Seward County. Amount of principal, \$12,000. Amount of interest due July 1, 1899, \$3240. Compromised for \$540, with an agreement to accept one-third of the interest thereafter.

Wichita County. Amount of principal, \$35,000. Amount of interest due July 1, 1902, \$14,700. Compromised for \$3000, with an agreement that the interest be reduced from six per cent. to three per cent. thereafter.

Ness County, School District No. 14. Amount of principal, \$9500. Amount of interest due July 1, 1901., \$237.50. Compromised for \$118.75, with an agreement that the interest be reduced from five per cent. to two per cent. thereafter.

No part of the principal of the aforesaid bonds was compromised.

MUNICIPAL INDEBTEDNESS.

The following table presents an exhibit of the county, township, city, board of education and school-district indebtedness, on the 1st day of July, 1902, as returned to the auditor of state, under the provisions of chapter 90, Session Laws of 1877:

| Name of county, township, city, school district, or board of education. | For what purpose debt was created. | Date of issue. | Date of maturity. | Rate of interest. | Amount of each series of bonds. | Aggregate county indebtedness. | Amount of sinking-fund in treasury. |

Proceedings of the State Board of Railroad Assessors, 1902.

The board adopted a resolution by unanimous vote declaring valuations for rolling-stock, for the assessment of 1902, to be as follows, except as otherwise ordered:

| | |
|--|---------|
| Locomotives | \$3,500 |
| Passenger cars | 2,000 |
| Chair cars | 2,200 |
| Passenger and baggage cars | 1,500 |
| Passenger, mail and baggage cars | 1,500 |
| Mail cars | 1,300 |
| Baggage cars | 1,000 |
| Express cars | 1,200 |
| Baggage, mail and express cars | 1,300 |
| Dining cars | 4,000 |
| Pay cars | 4,000 |
| Official cars | 5,000 |
| Steam rotary snow-plows | 4,000 |
| Snow-plows | 150 |
| Steam-shovel cars | 3,000 |
| Steam-derrick cars | 3,000 |
| Steam wrecking cars | 2,500 |
| Pile-driving cars | 2,000 |
| Fruit express cars | 1,000 |
| Wrecking cars | 800 |
| Ditching cars | 600 |
| Fruit cars | 600 |
| Refrigerator cars | 500 |
| Hand-derrick cars | 1,000 |
| Furniture cars | 300 |
| Caboose cars | 350 |
| Box cars | 250 |
| Stock cars | 250 |
| Coal cars | 200 |
| Oil-tank cars | 400 |
| Flanger cars | 200 |
| Water cars | 250 |
| Platform cars | 150 |
| Tool cars | 150 |
| Flat cars | 150 |
| Dump cars | 200 |
| Boarding cars | 400 |
| Hand cars | 20 |
| Push hand cars | 10 |
| Velocipede cars | 15 |
| Standard sleeping cars | 6,000 |
| Tourist sleeping cars | 2,500 |

The board adopted a resolution that the Brighton & Lansing railroad be stricken from the assessment rolls of the board, as a showing was made that the railroad had been abandoned for years.

The board fixed the following valuations:

| | | ST. LOUIS & SAN FRANCISCO. | |
|--|--|---------------------------------------|-----------------------|
| | | <i>Miles.</i> | <i>Rate per mile.</i> |
| Main line: | | | |

| Kansas City to south line Leavenworth city..... | | 25.20 | 2,500 |
| Leavenworth city..... | | 9.00 | 3,000 |
| (Leavenworth city, 17 cars, at \$200 each.) | | | |
| KANSAS CITY, MEXICO & ORIENT. | | | |
| Graded right of way..... | | 23.858 | 300 |
| Ungraded right of way..... | | 3.748 | 150 |
| (Emporia city, 9½ acres, at \$20 per acre.) | | | |
| CHOCTAW & NORTHERN. | | | |
| Anthony to Oklahoma line..... | | 13.96 | 3,500 |

The board also adopted a resolution assessing 10.46 miles of the Union Terminal property, now owned by the Kansas City Southern, at \$8000 per mile, and 1.01 miles, outside of Kansas City, Kan., at \$3000 per mile.

The board fixed the following valuations for the Kansas & South-western railway :

| | |
|------------------------------|---------|
| Engines..... | \$1,500 |
| Combination coach No. 3..... | 800 |
| Combination coach No. 2..... | 1,000 |
| Caboose No. 1..... | 350 |
| Box cars, second-hand..... | 200 |

On motion, the following resolutions were adopted :

Resolved, That the valuation per mile which the board fixes upon main track of any railroad is held to include the value of the right of way, road-bed, track, and bridges, except that known as the St. Joe bridge, which is assessed by the local authorities of Doniphan county, as per decision of the courts; also excepting such other bridges as are assessed by the board, and made mention of in this report.

Resolved, That where the board assessed buildings used in the operation of any railroad, the same being located in the right of way or adjacent thereto, said valuation is intended to include the lot or tract of land upon which the same is located.

Resolved, That where town lots or lands are condemned for the right of way, or depot reservations, or terminal facilities, or purchased for said purposes, and so much of the same is used for said purposes as to render the remainder useless for other purposes, it is the purpose of this board to assess the whole of such lots and lands to the railroad company in connection with its right of way, and the same should therefore not be assessed by the local authorities.

Resolved, That the following lands owned by the Missouri Pacific Railway Company, situate in Wyandotte county, Kansas, are in the opinion of the Board of Railroad Assessors held by said company exclusively for railroad purposes, and therefore should be assessed by this board, and they are hereby assessed at the rate of \$700 per acre, to wit: Marked in the blue print filed in the office of the auditor of state May 21, 1901, and containing ten acres, described as follows: Lots 1 and 2, containing ten acres. Said land is assessed at \$7000.

Resolved, That the following lands owned by the Chicago, Rock Island & Pacific Railway Company, situate in Wyandotte county, Kansas, are in the opinion of the Board of Railroad Assessors held by said company exclusively for railroad purposes, and therefore should be assessed by this board, and they are hereby assessed at the rate of \$700 per acre, to wit: The north portion of Vickeroy park, containing 2.638 acres; also a tract of three acres lying east of Sixteenth street, in the city of Kansas City, Kan., upon which is situated the Chicago, Rock Island & Pacific elevator; also .83 of an acre lying west of the Kansas or Kaw river, and being part of what is known as the Shaunessey tract, as shown by blue print filed in the office of the auditor of state May 21, 1901, containing 6.468 acres, assessed value being \$4527.

Resolved, That the following lands owned by the Union Pacific Railway Company, situated in Wyandotte county, Kansas, are, in the opinion of the Board of Railroad Assessors, held by said company exclusively for railroad purposes, and therefore should be assessed by this board, and they are hereby assessed at the rate of \$700 an acre, to wit: Being descriptions designated as No. 4, containing 3.85 acres; No. 6, containing 18.10 acres; No. 7, containing 9.90 acres; No. 8, containing 10.90 acres; total, 42.75 acres, on plat filed by said railroad company in the office of the auditor of state on May 6, 1901, making a total of 42.75 acres, at an assessed valuation of \$29,925.

A resolution was adopted declaring the valuations of road-bed, mileage, rolling-stock, etc., of railroads operating in Kansas to be the same as in 1901, except as otherwise indicated.

Schedule No. 1.—Showing the distribution of the railroad property of the state to the several counties, as assessed for the year 1902.

Proceedings of the State Board of Telegraph and Telephone Assessors, 1902.

The following assessment was made:

Telegraph lines:

First wire, including office fixtures, material and supplies, poles, and fixtures connected therewith, per mile..... \$65 00

Each additional wire, including fixtures, per mile..... 10 00

Telephone lines:

CLASS I.

| <i>Toll lines.</i> | | <i>Exchanges.</i> | |
|--|---------|------------------------------|--------|
| Poles, cross-arms, and first wire, per mile..... | \$40 00 | Poles, each..... | \$1 25 |
| Each additional wire, per mile..... | 6 00 | Wire, per mile..... | 5 00 |
| Instruments, each..... | 7 00 | Instruments, each..... | 5 00 |
| | | Switch-boards, per drop..... | 1 00 |
| | | Automatic instruments..... | 8 00 |

CLASS II.

| <i>Toll lines.</i> | | <i>Exchanges.</i> | |
|--|---------|----------------------------------|--------|
| First wire, including poles, etc., iron, per mile..... | \$25 00 | Poles, each..... | \$1 00 |
| Copper, per mile..... | 29 00 | Wire, iron, per mile..... | 2 00 |
| Each additional wire, iron, per mile..... | 2 00 | Wire, copper, per mile..... | 6 00 |
| Each additional wire, copper, per mile..... | 6 00 | Switch-boards, per drop..... | 1 00 |
| Instruments, each..... | 7 00 | Instruments, each..... | 4 00 |
| | | Automatic instruments, each..... | 8 00 |

CLASS III.

| <i>Toll lines.</i> | | <i>Exchanges.</i> | |
|--|---------|----------------------------------|--------|
| First wire, including poles, etc., iron, per mile..... | \$15 00 | Poles, each..... | \$0 75 |
| First wire, copper per mile..... | 19 00 | Wire, iron, per mile..... | 2 00 |
| Each additional wire, iron, per mile..... | 2 00 | Wire, copper, per mile..... | 6 00 |
| Each additional wire, copper, per mile..... | 6 00 | Switch-boards, per drop..... | 1 00 |
| Instruments, each..... | 7 00 | Instruments, each..... | 4 00 |
| | | Automatic instruments, each..... | 8 00 |

The board adopted the following resolution :

Resolved, That for the assessment of 1902 the telephone property be divided and classified as follows :

CLASS I.

Missouri & Kansas Telephone Company.

Interstate Telephone Company.

B. F. Pankey Telephone Company.

CLASS II.

T. M. Dolan & Co.

Wareham & Dewey Telephone Company.

Brown Telephone Company.

McMahan Telephone Company.

Jackson County Telephone Company.

Lindsborg Telephone Company.

W. W. Dilworth Telephone Company.

Northeastern Kansas Telephone Company.

Exchange Telephone Company.

Belleville Telephone Company.

Smith & Flint Telephone Company.

Newton Telephone Company.
Ness County Telephone Company.
Lyons Telephone Company.
Ellsworth Electric Light and Telephone Company.
Hanover Telephone Company.
Logan Telephone Company.
Galena Telephone Company.
Miltonvale Telephone Company.
Kansas Telephone Company.
McPherson Telephone Company.
Downs Western Telephone Company.
Salina Telephone Company.
Concordia Telephone and Telegraph Company.
Fairview Telephone Company.
Kansas Telephone and Electrical Company.
Chetopa Telephone Company.
Pioneer Telephone Company.
Wareham & Wood Telephone Company.
Bennington Telephone Company.
Wellington Telephone Company.
Yates Center Telephone Company.

CLASS III.

Clyde Telephone Company.
Webb & Kelly Telephone Company.

Schedule No. 2.—Showing distribution of telegraph and telephone property of the state to the various counties, as assessed for the year 1902.

| ALLEN COUNTY. | |
|---|-------------------------|
| <i>Names of Counties and Companies.</i> | Total valuation. |

THIRTEENTH BIENNIAL REPORT

OF THE

ATTORNEY GENERAL

OF

KANSAS.

1901-1902.

TOPEKA:
W. Y. MORGAN, STATE PRINTER.
1902.

LIST OF ATTORNEYS GENERAL OF KANSAS.

B. F. Simpson, from 1861 to June, 1861. (Resigned.)
Charles Chadwick, from June, 1861, to November, 1861. (Appointed.)
S. A. Stinson, from 1861 to 1863.
W. W. Guthrie, from 1863 to 1865.
J. D. Brumbaugh, from 1865 to 1867.
Geo. H. Hoyt, from 1867 to 1869.
A. Danford, from 1869 to 1871.
A. L. Williams, from 1871 to 1875.
A. M. F. Randolph, from 1875 to 1877.
Willard Davis, from 1877 to 1881.
W. A. Johnston, from 1881 to 1885.
S. B. Bradford, from 1885 to 1889.
L. B. Kellogg, from 1889 to 1891.
John N. Ives, from 1891 to 1893.
John T. Little, from 1893 to 1895.
F. B. Dawes, from 1895 to 1897.
L. C. Boyle, from 1897 to 1899.
A. A. Godard, from 1899 to 1903.
C. C. Coleman, from 1903 to —.

ASSISTANTS, 1901 to 1903.

J. S. West, Kansas City, Kan. First assistant.
B. H. Tracy, Wamego, Kan. Special assistant. (Resigned, July, 1901.)
Clad Hamilton, Topeka, Kan. Special assistant. (Appointed, July, 1901.)
James Clayton, Great Bend, Kan. Second assistant.
Ernest R. Simon, Topeka, Kan. Stenographer.

THIRTEENTH BIENNIAL REPORT.

OFFICE OF ATTORNEY GENERAL, STATE OF KANSAS,
TOPEKA, November 20, 1902.

Hon. W. E. Stanley, Governor of Kansas:

SIR—I have the honor to report that my official work in connection with this office is about completed. During the past two years the cases pending in the supreme court have been attended to from this office, and it is again gratifying for me to report that no case has as yet been continued because this office was not prepared to present the same when it was regularly reached for hearing, and this notwithstanding the fact that the supreme court has been increased and now has seven judges instead of three, as formerly. The amount of labor necessary to take care of the business of the supreme court has been somewhat larger since the increase in the size of the court, but as state cases are given the preference on the docket, this increase of business is due principally to conditions in the state rather than to the situation of the court. The litigation outside of the supreme court has not been large, and yet some of the cases have been of grave importance.

THE STOCK-YARDS CASE.

In my last biennial report I mentioned the fact that the case of Charles U. Cotting and Francis Lee Higginson, Appellants, v. A. A. Godard, as Attorney General of the State of Kansas, the Kansas City Stock-yards Company, *et al.*, had been argued in the supreme court of the United States, and that a reargument had been ordered. This is the case that is known as the stock-yards case, and consists of two suits that had been consolidated. The case was argued first on November 14 and 15, 1899. On March 26, 1900, it was ordered for reargument, and was reargued January 23 and 24, 1901. The decision was handed down November 25, 1901. The opinion of the court is quite lengthy and may be found in volume 183, Supreme Court Reports, page 79. While much is said in the opinion, and various points involved are discussed at length, there was but one proposition of law upon which the court was unanimous, and that was that the statute of Kansas attempting to regulate stock-yards rates is void because in violation of the fourteenth amendment of the constitution of the United

States, as it applies only to the Kansas City Stock-yards Company, and not to other companies or corporations engaged in like business in Kansas, and thereby denies to that company the equal protection of the laws.

In the briefs and in my oral arguments, I claimed that the supreme court had no jurisdiction of the case as against myself, because the suit was in effect against the state of Kansas to prevent action on its part through its legal officer. This contention was sustained, and the decree of the court was that the suit be dismissed as to myself; consequently there were no costs adjudged against the state of Kansas or the attorney-general.

THE KANSAS-COLORADO CASE.

At the 1901 session of the legislature a resolution was passed, as follows:

"WHEREAS, It is a matter of common notoriety that the waters of the Arkansas river for some time past have been and are now being diverted from their natural channel by the state of Colorado and its citizens, to the great damage of the state of Kansas and its inhabitants; and

"WHEREAS, It is threatened not only to continue but also to increase said diversion: therefore, be it

"Resolved by the Senate, the House of Representatives concurring therein, That the attorney-general be requested to institute such legal proceedings, and to render such assistance in other proceedings brought for the same purpose, as may be necessary to protect the rights and interests of the state of Kansas and the citizens and property-owners thereof."

In the miscellaneous appropriation bill the sum of \$2500 was appropriated for the purpose of paying the costs, expenses and extra attorney's fees of any proceedings instituted under the foregoing resolution.

In pursuance of this resolution, and with the assistance of Hon. E. F. Ware, of Topeka, and Hon. S. S. Ashbaugh, of Wichita, I filed in the supreme court of the United States a motion for leave to present a bill against the state of Colorado to enjoin it from appropriating the waters of the Arkansas river, and from authorizing further appropriations by individuals and corporations within that state.

This motion was supported by a brief, and two briefs were filed in opposition thereto—one on behalf of the state of Colorado and one on behalf of interested parties in Colorado opposed to the suit. The motion for leave to file the bill was accompanied by a printed copy of the same, which set forth the reasons for the bringing of the suit. Briefly stated, they are as follows:

The state of Colorado is charged with being itself an appropriator of water from this river by reason of the construction of a ditch with

prison labor, at or near Canon City, Colo., through which the state claims the right to withdraw from the Arkansas river a large quantity of water for the purpose of selling the same, to be used in the irrigation of arid and non-riparian lands, from which the water cannot return into the river, and by reason of which it is wholly lost to the state of Kansas and its inhabitants.

The state of Colorado is also the owner of several large reservoirs constructed at state expense and used for the purpose of storing the waters of the Arkansas river, which are subsequently dispersed upon arid lands, from which they do not return to said stream.

The reasons why the suit is brought in the name of the state of Kansas, as set forth in the bill, are:

The state of Kansas is the owner of riparian land at Dodge City, Kan., which is injured by the diversion of water from the river. It is also the owner of another tract of land at Hutchinson, Kan., which, though not situated upon the banks of the river, is on the bottom lands adjacent thereto, and its fertility is diminished by the taking of water out of the river in Colorado.

The state of Kansas owns school-lands in the vicinity of the Arkansas river and abutting upon the stream thereof which are injured by the acts of the state of Colorado.

The state holds the title to the bed of the stream in trust for the inhabitants of the state, and it is its duty to maintain the flow of water in said stream for the benefit of the people of the state.

The state of Kansas secures its revenue by direct taxation, a large portion of which is derived from the taxes levied upon real estate. The injury to land in the Arkansas valley by the acts complained of depreciate its value and diminish the revenues of the state.

The acts of the state of Colorado and of others engaged in taking waters from the Arkansas river before it enters the state of Kansas constitute a great and irreparable injury to the people of the state residing in the Arkansas valley, and the state has the right to maintain this action on behalf of its people and for their benefit.

After taking the application for leave to file, and the arguments *pro* and *con*, under advisement, the court held that the bill might be filed, which was done, and thereafter the state of Colorado, by its attorneys, some five or six in number, including the attorney-general of that state, filed a demurrer to our bill. Voluminous briefs were filed for and against this demurrer, and the case was argued orally in the supreme court of the United States, at Washington, on the 24th and 25th days of February, 1902. Hon. E. F. Ware and myself appeared for the state of Kansas, Hon. Charles G. Post, attorney-general, ex-Gov. Charles M. Thomas, Hon. L. M. Goddard, and Mr. Platt Rodgers, of the Denver bar, appearing for the state of Colorado.

On April 7, 1902, the supreme court handed down its opinion, which is reported in 185 U. S., page 125, in which it was held that the state of Kansas has the right to maintain this action and that the bill filed stated a cause of action against the state of Colorado.

The questions involved in this case are very interesting and important to the jurisprudence of the United States, and while it is to be regretted that the court did not decide more of the questions involved, it is evident that enough has been determined to justify the state of Kansas in proceeding with this case, with the expectation of a favorable final determination. The opinion substantially holds that the state may maintain this action on behalf of its citizens as well as on behalf of its own rights in the premises. It is also decided that the flow of water in an interstate river is a matter of such vital importance to the states that it may become a subject of litigation in suits between states and that the power or authority of one state to take or authorize the taking of the water of such a river so as to prevent its flowing into another state raises a question of which the supreme court of the United States will take jurisdiction.

The contention of the state of Colorado has been that as the water flowing in this river before it enters Kansas falls within that state, and as the river and all the tributaries flowing into it before entering Kansas arise in Colorado, and as no question of the rights of navigation are involved, the state of Colorado has the supreme control over the water of the river, and neither Congress nor any state can interfere therewith; hence the supreme court has no jurisdiction over this case and no power to adjudge that the water of the river should flow as it had previously done. The decision of the supreme court indicates that that tribunal is adverse to the position of the state of Colorado, and is favorable to the theory upon which our suit is brought, namely, that the common law which gave every riparian owner an equal right to the flow of water in a stream was in effect in this country prior to the creation of Colorado as a territory and prior to the constitution of the state or any of its laws authorizing the appropriation of waters by inhabitants; hence the prior settlement of the state of Kansas under those conditions gave to the settlers who then acquired riparian lands and to their successors a right to the flow of water in this stream, which is such a property right that neither the constitution nor the laws of the state of Colorado can take it away.

My investigation of the conditions in Kansas leads me to believe that the taking of great quantities of water from the Arkansas river and using it for the purposes of irrigation great distances from the river in a dry climate and under a hot sun causes the loss of nearly all of the water so taken out of the river, and the result is a great in-

jury to the fertility and value of farm lands in the Arkansas valley in Kansas. There are 2,500,000 acres of bottom lands in this valley within the state. Those lands in the eastern half of the valley are the more highly cultivated and are better improved. These lands have felt the injury more than those in the west, as it is apparent that the underflow from the river must shrink in its downward flow as the water is taken up by plant life and by evaporation. I have talked with a considerable number of farmers in the eastern part of the Arkansas valley in this state who estimate the damage to the value of their lands and of all lands in the valley in their vicinity, on account of the taking of water in Colorado, at not less than twenty-five per cent. of the value of such lands. If this taking of water is continued or increased the damage will be continued or increased correspondingly, with the consequence that the loss to the people of our state will reach a vast sum.

The investigation which I have given the conditions in Colorado leads me to believe that it is feasible to there store great quantities of flood water which can be used as needed, and no necessity exists for taking water from the river at its ordinary stages or below to irrigate the lands now under cultivation. Already water is being stored in the mountains of Colorado by means of reservoirs recently constructed there, and then brought down the river, when needed, to a ditch, the head gate of which is near La Junta, Colo. There is no reason why vastly greater quantities of flood waters cannot be so stored, and be then permitted to flow down the river when needed. Great natural reservoirs have been utilized some fifteen miles north of Lamar, in Prowers county, Colorado, which, it is claimed, have a storage capacity aggregating more than 180,000 acre feet of water. These reservoirs consist of natural lakes covering an area approximating 13,000 acres. The storage of flood waters in these lakes is a simple proposition. According to the government survey, more natural reservoir sites exist in the vicinity of the Arkansas river and its tributaries, and the storing of the flood waters in these reservoirs should be sufficient to irrigate all of the lands now cultivated by irrigation in the watershed of the Arkansas.

The state of Colorado has recently filed an answer, which is substantially a denial of the allegations of our bill, and a contention that the state of Colorado and its inhabitants have the right to appropriate and divert these waters because of the universal custom of the arid regions and according to the fundamental law thereof permitting the same to be done. The answer avers, however, that the state of Colorado is not now taking any water out of the river in the state ditch above mentioned, and the waters used by the state reservoirs at pres-

ent consist exclusively of flood waters. These allegations, if true, may make it difficult to prosecute the case now pending successfully unless the bill is amended. I have, therefore, determined that the next step to be taken should be to ask leave of the supreme court to amend our bill by making additional parties defendant, and, if such leave is granted, as I anticipate, to name as such defendants the principal ditch-owners now engaged in taking water from said river.

After the issues are joined, the next step will be the appointment of a referee or referees to take the testimony. They will be appointed by the supreme court and their compensation will be fixed by the court. The expense of taking testimony to show the various diversions and appropriations of water in Colorado and the injury done thereby in the state of Kansas will be large, and, in my judgment, not less than \$10,000 should be appropriated to be used in paying actual and necessary expenses of carrying on this litigation. It will probably be well to place this sum under the control of the attorney-general the same as before. The appropriation should be broad enough to allow him to use it in the payment of attorney's fees as well as other necessary expenses, as the work involved in this case is of such magnitude that it will be impossible for the attorney-general and his assistants to do all the labor, in connection with the other duties of the office.

The moneys appropriated for the purposes of this suit by last legislature have been expended by me as follows:

THE ABANDONED FORT HAYS MILITARY RESERVATION.

By act of March 27, 1900, the Congress of the United States granted to the state of Kansas the abandoned Fort Hays military reservation, for the purpose of establishing an experimental station of the Kansas Agricultural College, a western branch of the Kansas State Normal School and a public park thereon.

By house joint resolution No. 1, approved February 7, 1901, the legislature of the state of Kansas duly accepted this donation from

the United States, and by chapter 220 of the laws passed at the same session provision was made for taking possession of the lands by the boards of regents of the State Agricultural College and of the State Normal School, respectively, with further provision and appropriation to meet the expenses of making certain improvements upon said property and for carrying out the intentions of the act of Congress appropriating these lands to the state; also, a proviso that no portion of the money appropriated by the act should be expended by such boards of regents until the attorney-general should first notify the governor and the boards of regents that the title to the lands in said reservation was unimpaired and the lands available under the act of Congress ceding the reservation to the state.

Prior to the acceptance of this donation by the state of Kansas, claims had been filed to all of the choice lands of this reservation and to nearly all of the lands therein. The local land-office had denied the right of parties to file on these lands, and appeals had been taken therefrom to the commissioner of the general land-office, who had sustained the rulings of the land-office at Wa Keeney. Further appeal had, however, been taken to the secretary of the interior, who had overruled the decision of the commissioner of the general land-office, and held that these lands were subject to entry at the time these claims were filed. The act granting these lands to the state of Kansas expressly reserved all lands to which settlers had acquired rights. I filed a petition for a rehearing of these questions before the secretary of the interior, and upon this rehearing new briefs and arguments were filed on both sides. The decision of the interior department was reversed, and the greater part of the entries were ordered canceled. Other appeals were taken, however, and other questions were raised, all of which had to be contested, so that it was not until March 26, 1902, that all of the claims were disposed of and I was able to certify to the governor and the boards of regents of the two institutions that the title to all of the lands in this reservation was unimpaired and that the proper time had arrived for the state to take possession of the property and carry out the purposes of the act of Congress.

In the conduct of the various matters before the interior department and general land-office at Washington and the land-office at Wa Keeney, Kan., I was assisted by Hon. W. E. Saum, of Hays City, Kan., whose ability and large experience in land-office matters enabled him to give much valuable aid. Mr. Saum was employed by citizens of Hays City to assist in securing the title to these lands.

SUITS INVOLVING SCHOOL FUND.

I am glad to report that all of the suits mentioned in my previous report as pending, in which the state of Kansas was endeavoring to

collect the interest or principal of bonds which the municipalities issuing them claimed were void have been decided in favor of the state, or have been compromised by the payment to the state, or the agreement to pay to the state, the entire principal invested in these bonds, with such rate of interest as the School-fund Commission believed the municipalities able to stand.

The work of compromising and adjusting the delinquent interest upon bonds held by the state has gone steadily forward during my second term, and there are now but a comparatively small number of bonds outstanding upon which the interest or principal is in default. I hope to have all of the county and township bonds now in default adjusted before my term of office closes. There are, however, a great many school-district bonds issued by sparsely settled districts in the western part of the state that are still in default, though, as stated above, the aggregate amount is not large. I have found it necessary to send one of my assistants to various counties, where he has met with the school-district boards and negotiated adjustments, which have been later approved by the Board of School-fund Commissioners. I find, however, that where school districts have been merged into larger districts there is no method by which the bonded debt can be refunded by the original territory held liable therefor. I have therefore prepared a bill to cover these cases, which will be submitted to the legislature at its coming session.

Should such a law be enacted, I am satisfied that very nearly all the bonded debt of western Kansas school districts can be adjusted so that the people can pay a moderate rate of interest thereon and eventually pay the entire debt, and that the state will suffer in a very slight way only for the investment of its moneys in these school bonds. I have uniformly found the people of these delinquent municipalities ready and willing to do all in their power towards the payment of their indebtedness in full, and to do whatever is necessary to be done to put such indebtedness into the best possible form. I have been glad to observe the integrity and honesty of purpose of these people, which has been manifested to me, as these settlements have been made directly with the officers of the school districts, townships, and counties, and not through agents. The disposition on the part of sparsely settled communities to pay their indebtedness has led the commission to be more liberal in buying bonds issued by school districts in western Kansas than we would otherwise have been. We have looked upon this fund as the property of the people, held for the purpose of assisting in the education of the children of this state. The amount distributed per capita semiannually from this fund is not so important in the old and wealthier parts of the state, as it is but

a small proportion of what is there expended for school purposes, but where the population is thin and the expense of keeping up the schools is a great burden is where the state permanent school fund does its greatest good, and when applications have been made to us to purchase bonds issued for the purpose of building schoolhouses by school districts which have such taxable property, area and population as have led us to believe that the debt will be paid, we have frequently accepted the bonds, if within the provisions of the law, notwithstanding the fact that they have been issued upon territory not considered good by investors and corporations seeking bond investments.

THE STATE SCHOOL-FUND COMMISSION.

This commission has up to this time been able to invest the moneys belonging to the permanent school fund and the other funds entrusted to it in municipal bonds issued within this state at rates which have not been lower than four per cent. per annum. By an act of the legislature, which took effect in 1887, it was provided that railroad-aid bonds might be redeemed at the expiration of ten years from the date of their issue. After the passage of this law a very large number of such bonds were issued by counties, cities and townships in this state. The bonds almost uniformly bore interest at the rate of six per cent. per annum. Nearly all of them have now been redeemed and the municipalities have issued in lieu thereof bonds bearing a much lower rate of interest, usually four to four-and-one-half per cent. per annum. The new bonds have been issued under the provisions of chapter 50 of the Laws of 1879 and amendments thereto. This law is what is known as the refunding act, and authorizes all municipalities to issue refunding bonds to take up outstanding bonded indebtedness which has been in existence for more than two years. The provision permitting the redemption of railroad-aid bonds has proved a great benefit to the people of this state, enabling them to reduce their interest charges very largely. It has also proved to be of great importance in the investment of the various school funds, as it is difficult to see where the state could have secured so advantageous investments of its moneys had not the refunding bonds issued to take up the railroad-aid bonds been on the market. Some acquaintance with the investments of school funds in various states in this portion of the United States leads me to believe that the state of Kansas is securing a higher rate of interest upon its school fund than any other state similarly located, in which the money is invested in similar securities. This is fortunate for the people of the state, unless, as is claimed by some, the prices fixed by the school-fund commission have tended to increase the rates which municipalities are obliged to pay generally, and I am loath to believe that any such effect has resulted from our action.

THE EXECUTIVE COUNCIL.

As a member of the executive council, I have been a member of the committee on state-house and the committee on grounds during my entire term of office. The state-house committee has done a large amount of work in connection with the completion of the building. All contracts for this work have been awarded by the executive council and prepared in my office. In this connection, I desire to say that all work has been done by contract, and all contracts have been awarded after publication of notice in the official state paper. Bids have always been opened publicly and the awards made in like manner, and, while the executive council have, in all cases, reserved the right to reject any and all bids, they have never found it necessary to reject any bid, but have awarded the contract to the lowest bidder, having found in each case that such bidder was, in the judgment of the council, responsible and able to give satisfactory bond. I do not believe any bidder has ever had ground to complain of unfair treatment in the awarding of contracts, and I have heard of no such complaint. The state-house committee has endeavored to assist the architect in the supervision of all work done, and to keep closely in touch with the work of each contractor. We have on several occasions found it necessary to condemn work and material furnished, and have been greatly aggravated at some of the delays which have occurred, as we hoped to have all the work of completing the state-house done before this time. We have, however, met with a great many obstacles which we judge are common with those having such work done under present trade conditions, and we have been delayed by strikes, by delays of material in shipment, and by delays occurring at factories unable to fill orders. At this writing, we still have hopes the work will be completed before we turn over the building to our successors, and are much in hopes that the work done under this administration will meet the approval of the people of the state of Kansas.

As a member of the committee on grounds, I wish to say that we have not been able to keep persons crossing the grounds off the lawn because of the rough condition of the gravel walks. I trust the legislature will appropriate sufficient to surface these walks with something better.

CHARTER BOARD.

The work of the charter board continues heavy. The number of new corporations created under the laws of this state within the past two years is very large. As the records concerning them are kept in the office of the secretary of state, I shall not attempt to give any data. I wish to again call attention to the fact that our corporation laws are

defective in stating the purposes for which corporations may be formed. We have a long schedule of purposes, and every lawyer who has attempted to frame a charter has discovered the awkwardness of our law. It specifies many things in language so uncertain and doubtful of meaning that it is difficult to know how corporations should be formed thereunder. ✕

✕An experience of four years as chairman of the charter board leads me to believe the law should be amended so as to authorize it to grant charters to corporations proposing to undertake any legitimate business enterprise. ✕The charter board should, however, be given greater latitude in denying the right of corporations to organize, whenever the members believe or have reason to suspect that such corporations are being formed in bad faith, or to carry on an illegitimate business or one different from that named in the charter, or for creating monopolies, or doing other things contrary to public interests. ✕In my last report, I stated that the supreme court had decided that the provision requiring foreign corporations to obtain permission from the charter board before engaging in business in this state did not apply to corporations which were doing business here when the law took effect. That court has since ruled, in the case of *The State, ex rel., v. The American Book Company*, decided July 21, 1902, that such corporations should apply to the charter board and should pay the fees required by statute. This decision has caused a good many applications to be made, and has brought a considerable sum of money into the treasury. Doubtless at some time in the near future steps should be taken to compel the payment of these fees by all corporations doing business in the state who have not fully complied with the law.

On November 15, 1902, a showing was made to the charter board that the Lake Koen Navigation, Reservoir and Irrigation Company had failed to file its annual report with the secretary of state, as required by law, and that it was in other ways guilty of violation of the laws of Kansas governing domestic corporations. The charter board thereupon passed a resolution forfeiting the charter of said company, whereupon it became my duty to commence an action in the district court of Barton county, the domicile of that company, to have a receiver appointed to take charge of its property and to wind up its affairs, which was done.

The Australian-ballot law was amended in many particulars at the last session of the legislature. These amendments have called for a large number of opinions from my office, at the request of county attorneys and others. I have appended hereto a few of these, expecting that they will be of some value in the future consideration of this act.

I am of the opinion that the law should be amended by striking out the provision for printing a square opposite the words "No Nomination" where they occur on the face of the ballot. There is no reason why such a square should be placed opposite these words when the making of a cross therein invalidates the entire ballot. I have held that it is necessary to place the square on the ballot after these words because this is done in the sample ballot which is made a part of the law and which the act says shall be used as a guide. I believe the law as printed requires this to be done, and that any other construction of the act will compel the omission of the squares opposite the spaces in the blank column at the right of the ballot. The printing of this square in a position where it cannot be voted, and under such circumstances as to endanger the entire ballot, savors too much of a scheme to catch the unwary or ignorant voter to be consistent with fair dealing and political honesty.

I am also of the opinion that this law calls for the printing of too many ballots and is, thereby, unnecessarily expensive.

Last year the warden and directors of the state penitentiary deemed it advisable to make an agreement for the purchase of a portion of what is known as "Stiger's island," in the Missouri river, opposite the penitentiary land, for the use of that institution, subject, however, to the ratification of such contract by the legislature and an appropriation to pay therefor. At the request of the board, I caused an examination to be made covering the title and the probable rights to said property which could be conveyed by the grantors to the state of Kansas. This was done by one of my assistants, who visited Leavenworth and examined the records there. He also visited the property and made some investigation of the records in Missouri. I have printed the report of this investigation, which was made in the form of a letter to the warden of the penitentiary, with the opinions appended hereto.

My opinions and correspondence, mostly in the nature of opinions emanating from this office, during the last two years, cover about 2500 pages of copying-books. It is impossible to include all of these opinions in the biennial report, and many of them would be useless therein, as they are of no value except at the passing moment. I have, however, selected a small number of opinions which relate to public questions and which I believe will be of some value hereafter, and have appended them to this report.

AMENDMENTS TO THE LAWS.

The statute makes it my duty to suggest such amendments to the laws as have come to my notice. There is one amendment which I deem of great importance, and the conditions which have given rise

to this necessity are new. The law with regard to building and loan associations places corporations engaged in business of that nature under the control of the bank commissioner, but this law is not applicable to individuals or copartnerships. Within the last few years there have sprung up a great number of investment companies of various kinds. Many of them are so fraudulent in their methods that they have been denied the use of the mails. Others are less objectionable, and no such action has been taken against them. The charter board has refused permission to all foreign corporations of this class seeking to do business in this state, and have denied charters to domestic companies sought to be incorporated for the same purposes. Nevertheless, individuals have been carrying on this business within the state under copartnership names. All of these companies whose business methods I have examined are promising more to investors and stockholders than they can possibly pay. The theory is that individuals will subscribe for stock in these companies or make contracts with them, agreeing to pay certain sums at stated periods, usually weekly or monthly, the company agreeing at the end of a certain period to return a certain amount in money or to make certain property returns. Nearly, if not all, of these companies are a detriment to the community in which they operate and must cause a loss to investors therein. The people who buy these stocks or make these contracts are those who can ill afford to lose their savings in this way. The bank commissioner has consulted me to ascertain whether or not he can bring them under his control. I have been compelled to advise him that he cannot, because the building and loan association law applies to corporations only, and does not apply to individuals or copartnerships. I hope the coming legislature will amend the building and loan association law so as to make it include copartnerships and individuals as well as corporations.

I believe an act should be passed making abstracters of title liable on their bonds to all persons for damages incurred by reason of errors in compiling abstracts. My attention has been called to this by the decision of the supreme court in the case of *Allen v. Hopkins*, 62 Kan. 175.

CONCLUSION.

My relations with the various state officers and state boards with whom I am thrown in frequent contact have been cordial and pleasant.

I believe I have been fortunate in the selection of my assistants. Hon. J. S. West has been with me during my entire term as the first assistant, very largely in charge of the court work of the state, which has been performed to my satisfaction. B. H. Tracy, who was special assistant in my office, resigned in the spring of 1901, for reasons of

his own not connected with myself or the office, and Capt. Clad Hamilton was appointed in his stead. I desire to commend their work, and also that of Mr. James Clayton, the third assistant, who has been with me during my connection with the office. Mr. Ernest R. Simon has been my stenographer and has faithfully performed the duties of his position during my second term.

The legislature of 1899, in making the appropriation for my office, made the first provision for a special assistant, and included in the appropriation act a recital to the effect that the salary provided should be in full for all legal work done in cases then pending or thereafter to be brought by my department. I am glad to announce that during both terms of my office the state has not employed other counsel to assist me in any case whatsoever, excepting in one small matter in which circumstances compelled it, and in the case of *The State of Kansas v. The State of Colorado*, above mentioned, and in that case an appropriation was made which anticipated and provided for such employment. I believe that the assistants now provided are absolutely necessary for the business of the office, and I most certainly recommend that my successor be allowed the same number. The appropriation made for this office by the legislature of 1901 to cover contingent expenses, postage, express, telegraph and telephone bills and the purchase of law books is liberal. During the fiscal year which closed June 30, 1902, about one-half of the amount appropriated was returned to the treasury, and during the half-year which has elapsed since that time I have used very much less than one-half of the appropriation for this fiscal year; but, notwithstanding this, I recommend an equal appropriation for the office for the succeeding two years. The amount of litigation which will reach the attorney-general's office in any one year or the expenses which will accrue to the office cannot be foretold with any degree of accuracy, and the necessities of one year are no certain measure for the appropriation for another year. I have no report to make upon the subject of moneys collected in or through this office, as there have been none. All financial transactions with which this office has been connected during the past two years have been such that all moneys have been paid directly to the state treasurer.

In conclusion, I desire to say that it is not without some regret that I retire from office.

My occupancy of this office has in the main been a pleasure. While the labor has been severe and often very wearisome, and many of the duties of a nature to call for the proverbial profane objurgation in either alternative, yet the congenial associations with the other tenants of the building, the new and pleasant acquaintances made, the

opportunities occasionally afforded for assisting friends, together with the favors usually extended to the occupants of such positions, are in a measure compensatory for the troubles and labors of the office, more nearly adequate than the warrant issued by the auditor of state on the last of each month for that purpose.

I wish to bespeak for my successor, Hon. C. C. Coleman, a successful official career. I have known him for more than twenty years as an honorable and upright man and a good lawyer, and I look for his administration of the office to be satisfactory in every respect.

Respectfully submitted.

A. A. GODARD,
Attorney-general.

OPINIONS.

MARCH 28, 1901.

Hon. W. E. Stanley, Governor of the State of Kansas, Topeka, Kan.:

DEAR SIR—Your request of March 27 for an opinion touching the construction and effect of senate bill No. 542 has received very careful attention.

A regent of the agricultural college is a public officer. Each act creating the position of regent has denominated it an office. It is so construed by the supreme court in *Limbocker v. McDowell*, 61 Kan. 265, and *Mechem on Public Officers*, section 61, says:

“The trustees and directors of state institutions, such as universities, . . . appointed or elected in pursuance of the statutes of the state, are public officers.”

The act of 1863 vested the government of the college in a board of regents, consisting of certain state officers, the president of the college, and nine others to be appointed by the governor and confirmed by the senate, who were to hold for a term of six years. This provision as to the term was clearly void by reason of the constitutional prohibition against the creation of any official term exceeding four years. (*Lewis v. Lewelling*, 53 Kan. 201.)

In 1897 chapter 46 was passed, and vested the government in a board of seven regents, all to be appointed by the governor and confirmed by the senate, whose terms were to be for four years, and repealed all acts in conflict therewith. When senate bill No. 542 was enacted there were three regents, who were to hold until April 1, 1903, and four had just been appointed and confirmed for the term of four years from April 1, 1901. The new act purports, by the express wording of its title, to repeal said chapter 46, and provides in the repealing section that all acts and parts of acts in conflict therewith are repealed; hence, it must be held that, upon its taking effect, March 15, the act of 1897 was repealed, and has no longer any force.

Under the plain provisions of the new act, the president of the college becomes a member of the board, and it is your duty to appoint, on or before April 1, next, three others, who will thereby become lawful members with him. The fact that four members had just been appointed and confirmed is no bar to this effect of the new act, because no incumbent of an office created by the legislature has any vested or property right therein which cannot be taken away by the power which created it. The salary may be reduced or taken away and the office abolished at the will of the legislature. (*Harvey v. Board*, 32 Kan. 159; *Division of Howard County*, 15 id. 194; *In re Hinkle*, 31 id. 712; *The State v. Hamilton*, 40 id. 323; *Aikman v. Edwards*, 55 id. 758.)

The most serious question arises in regard to the three remaining members. We have a rule of statutory construction requiring that

“The provisions of any statute so far as they are the same as those of any prior enactment shall be construed as a continuation of such provisions and not as a new enactment, unless such construction would be inconsistent with the manifest intent of the legislature or repugnant to the context of the statute.”

This rule operates when two statutes of different dates similarly cover in whole or in part the same subject matter, provided the manifest intent of the legislature is not to the contrary. But here the latter act expressly repeals the former

—expressly in its title and absolutely and clearly in its repealing clause,—thus evincing the manifest legislative intent to repeal and not continue the former act. It vests the government not in a board already wholly or partially appointed and confirmed, but in a board “six of whom shall be appointed by the governor and confirmed by the senate,” which language is not retrospective but prospective. The later provision requiring the appointment of three members on or before April 1, 1901, and three each two years thereafter, is likely to lead one to conclude that the intention was to allow three of the old members to hold over, and this conclusion is the more readily reached when it is considered that under existing conditions three would hold over until April 1, 1903. But these three were regents by virtue of chapter 46; it created their position and vested the government of the college in a board thus and then created. The new act not only repeals the act which is the sole source of their official position and authority, but it vests the government in a board “which shall be appointed,” and which is to be differently constituted. By the repeal of chapter 46 said chapter has spent its force. Judge Brewer, in discussing the rule of construction above referred to, in *Emporia v. Norton*, 16 Kan. 241, says:

“We think, therefore, that this may be stated as a general rule, that where the legislature enacts a law which is the same in terms as a prior statute, if such prior statute has wholly accomplished its purpose and spent its force, the latter law must be held, notwithstanding the rule of construction quoted, to be a new enactment and not merely a continuation of the former.”

Throop on Public Officers, section 304, says:

“The repeal of a statute or an ordinance creating an office abolishes the office.”

“And an office is abolished by implication when a statute transfers all of its functions to another officer.” (*Id.* § 316.)

(*People v. Brown*, 83 Ill. 95; *People v. Jayne*, 106 id. 237; *McGrath v. Chicago*, 24 Ill. App. 19; *State v. Covington*, 29 Ohio St. 102; *Bergan v. Powell*, 94 N. Y. 591, and *State v. Harris*, 45 N. W. 1101.)

In the Matter of Senate Resolution, 12 Colo. 339, the supreme court held:

“Where an act provides for the election of a mayor and complete board of trustees at the municipal election 1889 in incorporated towns organized for general purposes, and expressly repeals all inconsistent acts, etc., making no exception in favor of town trustees then filling unexpired terms, such trustees will not be entitled to serve out the full term for which they are elected.”

A vacancy in an office is said to exist “when there is no person lawfully authorized to assume and exercise at present the duties of the office.” (*Mechem on Public Officers*, 126.)

The remaining three regents are not authorized to act by any existing statute, as the statutory source of their authority has been repealed. The government is vested in a board which “shall be appointed” and not in one which has been appointed; and in view of this fact and the foregoing authorities it may be fairly claimed that their offices are vacant. While a continued performance of duty by them, together with their recognition, would place them in the attitude of *de facto* regents, there would still be doubt of their *de jure* character, and as the new act provides for appointments to fill vacancies, it will, in my opinion, be a safe and proper course for you to appoint the remaining three regents, who will hold under the double appointments until 1903, and thereby provide a board whose full legal power and authority cannot be questioned.

Yours very truly,

A. A. GODARD, Attorney-general.

FEBRUARY 14, 1901.

Hon. W. E. Stanley, Governor of the State of Kansas, Topeka, Kan.:

DEAR SIR—In response to your request for an opinion as to rule for computing time under the last sentence of section 14, article 2, of the constitution, I will say said sentence provides: "If any bill shall not be returned within three days (Sundays excluded) after it shall have been presented to the governor, it shall become a law in like manner as if he had signed it, unless the legislature, by its adjournment, prevent its return, in which case it shall not become a law." I understand your question to be whether this means three days after the day on which the bill is presented to you, or three days including the day of presentation to you.

In the short time I have had to look up authorities, I am forced to say that it is extremely doubtful whether you have three days after the day of presentation, and a construction about which there can be no question would be that the day of presentation should be included. While our statute provides for the rule excluding the day, this is a rule of statutory construction, and was enacted in 1868, some years after the adoption of our constitution.

New Hampshire has a similar rule of statutory construction and a constitutional provision identical with ours, except it gives five days instead of three, and the New Hampshire supreme court held that the statutory rule of construction, having been enacted long after the adoption of the constitution, would not apply to this constitutional provision.

The supreme court of the United States has within recent years announced that the rule for computing time is one of exceeding vexation, which has become mystified rather than cleared by the lapse of time, and each case must be determined according to the facts thereof.

Therefore, while I am not prepared to say that the day of presentation should be excluded, I am forced to believe that this is the only safe rule about which no vexatious question could arise, and would suggest, until I have time to find authorities, if any, sustaining a different rule, that the three days given by this clause of the constitution should be construed to include the day of presentation to you.

Yours very truly,

A. A. GODARD, *Attorney-general.*

MAY 24, 1901.

Hon. George E. Cole, Auditor of State, Topeka, Kan.:

DEAR SIR—I have yours of recent date, requesting a construction of the provisions of chapter 122, Laws of 1901, "An act requiring the auditor and treasurer of state to credit counties for uncollected taxes."

The first section of the act provides that, when the county commissioners of any county shall *hereafter* compromise the taxes due on lands or town lots, under the provisions of section 4 of chapter 110 of the Session Laws of 1893, the proceeds arising from such compromise shall be distributed to the several funds entitled to the same in proper proportion, as shown upon the tax-roll; and that any portion of the tax that may remain uncollected by reason of the redemption or assignment provided for in said section 10 shall be divided among and charged to the respective state, county, city and district funds, according to the tax levies of the various years for which the tax was delinquent and uncollected.

The provisions here made as to the disposition of taxes collected, and as to charging those uncollected to the various funds, are the same as those contained in section 2, chapter 199, Session Laws of 1885, relative to compromises under

chapter 43 of the Session Laws of 1879; and the only purpose or effect of these provisions is to prescribe a plain and uniform method for the debiting and crediting of realized and unrealized taxes on lands redeemed or for which the tax-sale certificates are assigned under said section 4 of chapter 110 of the Session Laws of 1893. Section 2 of the act in question provides as follows:

"The county commissioners and county clerk of such county shall, within six months after the passage and publication of this act, certify under oath to the auditor of state the amount of the proper proportion of state tax thus uncollected upon compromise heretofore made, and the county commissioners and the county clerk of such county shall, within sixty days after a compromise shall hereafter be made, so certify to the auditor of state such proportionate amount of state tax uncollected, and for which the county may be entitled to credit under this act, and the auditor and treasurer of state shall credit the county the amounts of the same."

The question is now presented as to whether by the crediting provided for in this section counties are to be relieved from all liability to the state for the amount of the uncollected state tax so credited, taxes to the amount of a half-million dollars, now due to the state, to be remitted, and the ordinary state revenue diminished in the sum of \$100,000 annually; or whether this provision is to be construed with and as supplementary to existing statutes, under which counties are liable to the state for the full amount of taxes levied for state purposes, with certain exceptions, and are required to raise the same by successive levies, if necessary.

Section 102, chapter 34, Laws of 1876, provides as follows:

"Each county is responsible to the state for the full amount of the taxes levied by law for state and other purposes, excepting such amount as is certified by the board of county commissioners, and attested by the county clerk, to be double or erroneous assessments, or returned by the sheriff 'Not found' and 'No property,' which certified amount shall be credited to the county by the auditor and treasurer of state."

This section is supplemented by section 6, chapter 199, Laws of 1885, which provides as follows concerning delinquencies in the payment of state taxes:

"If after the settlement by the county treasurer of any county in November of each year, as provided in section 99, chapter 34, of the Session Laws of 1876, there shall remain due from such county any portion of the state tax levied for the preceding year, the auditor of state, on the second Monday of July in each year succeeding the said November settlement, shall report to the county clerk of such county the amounts of such unpaid tax, and the county clerk shall determine the rate per cent. necessary to raise the said amount, and shall place the same on the tax-roll in addition to the regular levy for state purposes, and the same shall be collected by the county treasurer and paid into the state treasury as are other state taxes."

In the case of *A. T. & S. F. Rly. Co. v. Clark*, 60 Kan. 631, and also in the case of *County Commissioners of Harper County v. Cole et al.*, recently decided, the supreme court held that these two sections together declare the continuing liability of the counties to the state for the full amount of state taxes, and provide a method by which deficiencies shall be collected and paid into the state treasury. In the latter case the plaintiff sought to compel the state auditor and the state treasurer by mandamus to credit Harper county with certain amounts of state tax charged against it in the years preceding 1898, which, through compromises made under section 4, chapter 110, Laws of 1893, the county had failed to collect. The plaintiff contended that under section 3, chapter 199, Laws of 1885, the county was entitled to credit for the amount of state tax deficiencies resulting from such compromises. The court denied the writ, however, and held that said section 3 must be construed with other provisions of the same act, re-

quiring counties to make good all deficiencies in state taxes by subsequent levies; and that when so construed it was evident that the legislature had not intended by said section 3 to release counties from liability for such deficiencies, but that it had in contemplation an accounting between the state and the several counties as to the delinquent state taxes of 1883 and preceding years. In other words, in the opinion of the court, there was no inconsistency between said section 3 of the act of 1885, requiring the state auditor and state treasurer to credit counties the amounts of uncollected state tax, and the subsequent provisions of the act, making counties liable for all such uncollected state tax and providing a method for its collection. In the course of the opinion the court said:

"This crediting, as is evident from the provisions of the act, was intended to be provisional—was intended to provide for an accounting between the counties and the state as to uncollected state taxes, and was not intended to declare the non-liability of the counties."

Section 3 of the act of 1901 repeals "all acts and parts of acts inconsistent with this act"; but section 102 of the act of 1876 and section 6 of the act of 1885 are nowhere in terms repealed. They are still in full force and effect, therefore, unless repealed by implication and because they are inconsistent with the act of 1901. But implied repeals are not favored; and the intention to repeal will not be presumed unless the inconsistency is clear and unavoidable.

"It is not enough to justify the inference of repeal that the subsequent statute covers some or even all the cases provided for by the former, for it may be merely affirmative, accumulative, or auxiliary. There must be positive repugnancy; and even then the old law is repealed by implication only to the extent of the repugnancy. If, by fair and reasonable interpretation, acts, which are seemingly incompatible or contradictory, may be enforced and made to operate in harmony and without absurdity, both will be upheld, and the latter one will not be regarded as repealing the others by construction or intendment." (Sutherland on Statutory Construction, 152.)

If, as declared by the supreme court, there was no inconsistency between section 102 of the act of 1876, supplemented by section 6 of the act of 1885, and section 3 of the latter act, and the three should be construed together and given effect as declaring the continuing liability of the counties to the state for the full amount of state taxes, prescribing a method by which deficiencies shall be collected and paid, and providing for an accounting between the counties and the state as to uncollected state taxes, no reason appears to me why the force or effect of the two former sections should be destroyed or modified, or why a new or different construction of the three should arise upon the literal reenactment of said section 3 in the second section of the act of 1901.

It is my opinion, therefore, that section 102, chapter 34, Laws of 1876, and section 6, chapter 199, Laws of 1885, are still in full force and effect, declaring the liability of counties to the state for all taxes levied for state purposes, and providing for the collection of the same; that the crediting of counties required by section 2 of the act of 1901 is intended to be only temporary or provisional, and to provide for an accounting between the counties and the state as to uncollected state taxes, and does not relieve counties from their obligation to pay the full amount of delinquent tax so credited; and that whether such credits are claimed and allowed for deficiencies resulting from compromises heretofore or hereafter made, they are to be followed by proceedings under section 6 of the act of 1885, requiring county clerks to determine the rate of taxation necessary to raise the amount of such deficiencies and to place the same on the tax-roll in addition to the regular levy for state purposes.

Yours very truly, A. A. GODARD, *Attorney-general.*

MAY 15, 1901.

Hon. Geo. E. Cole, Auditor of State, Topeka, Kan.:

DEAR SIR—Yours of the 13th inst., inclosing letter from P. J. Upp, of Spearville, duly received. After careful consideration of the matters presented in Mr. Upp's letter, I am clearly of the opinion that under the law he is not entitled to "re-homestead," as he terms it, the school-land upon which he lives. It appears from his letter that in 1883 he settled upon this land, and that in 1885 it was appraised and he became the purchaser of the same by virtue of his settlement. After having kept up the payments under his contract a number of years, he allowed his payments to lapse, and the land was duly forfeited under the school-land law. When the forfeiture took place he lost all right to the land and the improvements thereon, the whole becoming the property of the state. After that time he was a trespasser upon the land, and should have been ejected by the county attorney by due process of law. He was not entitled to remain upon the land and gain any new rights therein. When a party who is a settler upon school-land files his application before the probate judge for leave to purchase, one of the allegations which it is necessary for him to make in his verified petition is "that he has not heretofore taken school-land to the amount of one quarter-section under the provisions of this act, or of the act of which this is amendatory." When Mr. Upp had procured his contract of purchase of the piece of school-land upon which he was living, he had taken the same under the school-land laws. It does not require a completed title to constitute a "taking" of a piece of school-land under these laws. If it had been so intended it would have been clearly provided in the law.

Mr. Upp himself seems to understand fully what the meaning of the law is in this respect, for he asks in two different places in his letter as to whether he has a right to "retake" this land.

Where a party settles upon a piece of government land as a homesteader and takes out his first papers thereon he has "taken" such land, and his right to take another homestead under the laws of the United States is thereafter lost, regardless of the fact as to whether he ever proves up on the land or not.

The legislature no doubt intended that a person should have but one chance at homesteading school-land in this state, and in this way to give more persons a chance to become homesteaders upon such land. To construe this law so that it is necessary for a party to procure a patent from the state, before his right to homestead other school-lands is lost, would open the way for persons to become speculators in homestead rights upon such lands. When a party had taken one homestead and improved it he could sell his contract and then take another one, and so on. The law clearly did not contemplate anything of this kind. The well-defined meaning of the word "taken" clearly gives no such right.

Mr. Upp has nothing to fear so long as his lease is in force upon this land. During the continuance of such lease no other person has a right to settle upon this land or get possession in any way except by his consent. If the land should be sold before the expiration of his lease under the provision of the law, it must be sold subject to his lease. In order that this land may be sold while the lease is in force, it is necessary that ten householders of his township petition the superintendent of public instruction of the county to expose the same for sale. When such petition is presented to the superintendent he notifies the board of county commissioners that he has received such petition, and then it is necessary for them to cause a notice of such petition to be published for three consecutive weeks in the official county paper. Then, after one year from the date of the first publication, the land covered by the petition is subject to be appraised

and sold in accordance with the provisions of the school-land law. I should think that this party would have no difficulty, if he so desires, in keeping this land from being sold until after the expiration of his lease.

As he clearly has no rights in this land, or to the permanent improvements thereon, except such as the lease gives him, it seems that the wise course for him to pursue is to have the member of the legislature from his county present this matter to the next session of that body, and get them to pass an act giving him the proper relief. No one else has any authority whatever to grant such relief.

Yours very truly,

A. A. GODARD, *Attorney-general.*

FEBRUARY 15, 1901.

To the House of Representatives :

GENTLEMEN—I am advised by your chief clerk that you desire my opinion as to whether house bill No. 532, entitled "An act to prescribe the time for holding elections for the election of all county officers except county commissioners, for the election of a clerk of the court of common pleas in Wyandotte county, and to repeal all acts and parts of acts in conflict therewith," is repugnant to any of the provisions of our state constitution.

In reply, I beg to say that I have given this matter as careful consideration as the brief time allowed will permit.

I have found no reason why this bill, if enacted, should be held void, unless it be because in violation of the provisions of section 2, article 4, of the constitution, which provides as follows:

"General elections shall be held annually on the Tuesday succeeding the first Monday in November. Township elections shall be held on the first Tuesday in April, until otherwise provided by law."

It will be observed that this bill proposes to repeal the provision of law requiring the election of county officers in the odd-numbered years, and, if it becomes a law, all county officers, except members of the board of county commissioners, will be elected in the even-numbered years. All state officers and members of the legislature are, under our present constitutional and statutory provisions, elected in the even-numbered years. If this bill becomes a law, the only officers to be regularly elected at the fall election held in the odd-numbered years will be the township officers and a county commissioner for each county, who is chosen by the voters of one commissioner district only, and in two commissioner districts in each county only township officers will then be elected.

Under the provisions of section 2 of article 4 of the constitution, quoted above, township elections are distinguished from general elections. It therefore follows that, under the provisions of this bill, no general election will be held in two commissioner districts in each county in the odd-numbered years, unless there are vacancies then to be filled. Is this a violation of the provision that "General elections shall be held annually on the Tuesday succeeding the first Monday in November"?

Section 3 of article 9 of the constitution provides, in part, as follows:

"All county officers shall hold their offices for the term of two years and until their successors shall be qualified, except county commissioners, who shall hold their offices for the term of three years."

As the constitution does not fix the time when the term of any county officer shall begin, that question is left entirely to the discretion of the legislature; as is also the question as to the year in which each county officer shall be elected.

Looking at the purpose for which the provision of section 2 of article 4 of the

constitution, regarding annual elections, were incorporated into the constitution, I find no good reason why this provision should be construed as requiring that some state or county officer should be elected each year, or as requiring the legislature to provide an office to be filled at each annual election. The term "general election" is defined as "the November election, whether few or many officers are to be elected." (The State v. Foster, 36 Kan. 506.)

The intention of the constitution is that officers appointed to fill vacancies shall hold their offices a comparatively short period only, and until the November election occurring more than thirty days thereafter. (The State v. Meecham, 31 Kan. 435.)

"It is the general policy of the constitution that the people shall elect the officers, and this policy is the one adopted by the legislature." (Hagerty v. Arnold, 13 Kan. 367.)

"The theory of our law is that officers shall be elected whenever it can be conveniently done, and that appointments to office will be tolerated only in exceptional cases." (Rice v. Stevens, 25 Kan. 302.)

The constitution provides that in the case of a vacancy in any of the constitutional state offices, except governor and lieutenant-governor, the vacancy shall be filled by appointment until the next general election occurring more than thirty days after such vacancy. A similar constitutional provision is made with reference to the judicial offices of this state. Like statutory provisions have been enacted as to county offices.

In construing these various provisions of the constitution and statutes with the decisions of the supreme court cited above, it is apparent to me that it was intended by the section of the constitution under consideration to fix the time when general elections should be held, and also the time when vacancies should be filled by election, and that every purpose and intention of the constitution is satisfied when our statutes are so framed that all elective state or county officers are chosen at the November elections, and an opportunity is given to fill vacancies occurring more than thirty days prior to the Tuesday succeeding the first Monday in November in each year.

I therefore beg to advise you that I see no constitutional reason why this bill may not become a valid law. The question is not entirely free from doubt, but in my judgment such a law will be valid.

Yours very truly,

A. A. GODARD, *Attorney-general.*

August 3, 1901.

To the Honorable Board of Railroad Commissioners, Topeka, Kan.:

GENTLEMEN—I have yours of August 2, enclosing copies of complaint and answer in the case of The Shawnee Milling Company *et al.* v. The A. T. & S. F. Railway Company, and asking whether or not you have the power under the law enacted at the last session of the Kansas state legislature to issue an order directing the defendant railway company to establish and put in force the rate prayed for in the complainants' petition.

The petition contains substantially the following allegations:

1. That the petitioners are now and have been for a long time engaged in the manufacture of flour at Topeka, and are compelled to ship to that point nearly all of the wheat used in their business.
2. That for many years the defendant railway company has carried wheat from western points to Topeka at a rate which has been five cents per hundred less than the Kansas City rates.

3. That on March 18, 1901, the Topeka differential rate was abolished and the regular distance tariff was made applicable to the shipment of wheat into Topeka.

4. That the new rates are greatly detrimental to the petitioners' interest and threaten to destroy their business.

I judge that the petition was intended to claim that the present rate is unjust and unreasonable, and that the former rate was reasonable and just.

The answer avers that at the time the Topeka rate was made the circumstances were different from those now existing. Various other averments are made concerning the claims of the petitioners, and reasons are urged why the present rate should be maintained.

Only one defense in the answer goes to the jurisdiction and power of your board to hear this case, and with this defense alone does this opinion deal.

It is claimed in the answer that the reason why the Topeka rate was abolished was because of the enactment of a long-and-short-haul clause contained in section 25 of the act creating your board and defining its power. The section to which I refer reads as follows:

"No railroad company shall charge, demand or receive from any person, company, or corporation, for the transportation of any property, or for any other service, a greater or less sum than it shall at the time charge, demand or receive from any other person, company or corporation for a like service from the same place, or upon like conditions and under similar circumstances; and all concessions of rates, drawbacks and contracts for special rates shall be open to and allowed all persons, companies and corporations alike; nor shall it charge more for transporting freight from any point on its line than a fair and just proportion of the price it charges for the same kind of freight transported from any other point; nor shall it be lawful to charge a greater freight-rate to haul any class of goods for a shorter distance than for a longer one in the same general direction under like conditions, and over the same system of road in Kansas, except by the consent of the commissioners."

It is claimed on the part of the defendant railway company that the rates on wheat from western points to Emporia and Osage City are higher than the rates sought to be established into Topeka, and, therefore, your board has no power to order the reduction of rates in such a case.

The question which is thus presented I take to be this: Has the board of railroad commissioners of Kansas the power to find that a rate is reasonable and to take the necessary steps toward putting the same into effect, when such action on your part, without an adjustment of intermediate tariff rates, or without further action on your part at the request of the railroad company, will work a violation of the long-and-short-haul statute quoted above. I believe this question to be of great importance in determining the power of your board, and after giving the same careful consideration I am of the opinion that this board has the power to find, and may, if the evidence justifies such action, determine, that a rate between two points is reasonable, notwithstanding the fact that such rate is less than the usual charge for a like carriage for a portion of the same distance, and the fact that the rate charged by the railroad company from western points to Emporia or Osage City are higher than the rates the petitioners are asking this board to find to be reasonable for Topeka does not deprive the board of jurisdiction of this case, or prevent it from finding that the rates asked are reasonable and just, if it so desires. My reasons for this view are as follows:

1. The limitations contained in the portion of section 25, above quoted, are restrictions upon the powers of railway companies, and not upon the powers of the Board of Railroad Commissioners.

2. It is not consistent with the manifest intention of the act creating your

board and defining its powers that it should be deprived of the power to determine whether or not a charge for any carriage wholly within this state is reasonable or unreasonable.

3. To construe the law otherwise would, in my judgment, seriously impair its efficiency, and throw obstacles into all or nearly all the rate cases which may come before you.

4. The effect of your action upon intermediate rates, if the prayer of the petitioners is granted, will not be direct but only incidental to the purpose of your determination, and, if intermediate rates are incidentally made illegal by your action, such illegality can be corrected by an adjustment of the same, or by your consent that they be maintained.

I am, therefore, of the opinion that you have the power to hear and determine the issues joined by the pleadings submitted.

Very respectfully yours, A. A. GODARD, *Attorney-general.*

JUNE 25, 1901.

To the Honorable Board of Railroad Commissioners, Topeka, Kan.:

GENTLEMEN—I have your letter of June 22, in which you state that complaint has been made to you that, in the shipment of grain to points within as well as without the state, an unreasonable shortage of weights is frequently claimed by consignees or elevators to which grain is delivered at its destination, and in which you inquire whether or not you are empowered to compel railroad companies carrying such shipments to protect shippers against such unjust shortage claims, either by requiring the carrier to superintend the weighing of the grain at its destination, or to make good to the shipper any loss he may incur through false weight shortage there claimed.

In reply to your questions, I desire to say that the provisions of the railroad law touching the powers of your board to act in such matters are found in the following sections, to wit:

"SEC. 7. Said commissioners shall have the general supervision of all railroads operated by steam within the state, and all express companies, sleeping-car companies and all other persons, companies or corporations doing business as common carriers in this state; and shall inquire into any neglect or violation of the laws of this state by any person, company or corporation engaged in the business of transportation of persons or property therein, or by the officers, agents, or employees thereof."

"SEC. 10. Whenever, in the judgment of the railroad commissioners, it shall appear that any railroad, corporation or other transportation company fails in any respect or particular to comply with the terms of its charter or the laws of the state, . . . or any change in the mode of operating its road and conducting its business is reasonable and expedient in order to promote the security, convenience and accommodation of the public, said commissioners shall inform such corporation of the improvements and changes which they adjudge to be proper by a notice thereof in writing," etc.

As general propositions, the duties of the railroad companies as common carriers in transporting grain consist in the receiving and carriage of such grain and its delivery to the consignee or to the elevator in which the same is to be delivered at the termination of the shipment; and the powers of the board with reference thereto, aside from the question of rates, are those found in the statutes above quoted, by which you are given authority to supervise such carriage and to make such directions in the mode of operating the road and conducting the business as is reasonable and expedient in order to promote the security, convenience and accommodation of the public.

The proper province for the exercise of the legislative power, which is the power conferred upon your board with reference to such shipments, is limited, in my judgment, to the shipment itself, including the facilities and mode of receiving the grain, the carriage of the same, and the facilities and mode of delivering. When the grain has been delivered the duties of the common carrier have ended. This is well established by numerous decisions. I am, therefore, of the opinion that, after the duties of the carrier are ended, the power of your board over the grain which has been carried is also terminated, and, therefore, any attempt on your part to compel any act by the carrier with reference to such grain, or to follow it after it has passed into the hands of the consignee, would be futile.

As a practical question, I do not see how it would be possible for the railroad companies, even under your direction, to enter upon the premises of an elevator company or other consignee of grain and observe the weighing of the same, to say nothing of the supervising or controlling such weighing, and, if an employee of the railroad company was present when the weighing was done and witnessed the same, the shipper would in all probability receive little or no benefit therefrom.

The powers of your board are limited to the state and it is utterly out of the question to think of making any order requiring railroad companies to supervise any weighing outside of the state limits; and for the reasons I have stated I do not believe it is within the power of your board, neither do I believe it to be practicable or feasible, to attempt to compel the railroad companies to supervise the weighing of grain after it has passed out of their hands. What I have said with reference to the weighing of grain applies to what is done after the grain is unloaded from the cars. If the public service demands the weighing of grain on track scales your board has the right to order the same to be done. But, in my judgment, you have no power over the subject after the grain has been delivered.

Any order attempting to make the railroad company, or which would have the effect of making it liable for grain lost through dishonest weights or other wrongful acts of the consignees, would be absolutely void, as no court or legislature would have the power to make the railroad companies stand responsible for the wrongful acts of others. If the grain is lost through the fault of the railroad company in any way the company is liable for the full amount of such losses, and if regulations are necessary to prevent the occurrence of such losses in the course of shipment, your board has power to make them. But your board does not possess the power to regulate the duties or charges of grain-dealers or elevator companies.

Yours very truly,

A. A. GODARD, *Attorney-general.*

MAY 6, 1902.

To the Honorable Board of Railroad Commissioners, Topeka, Kan.:

GENTLEMEN—I have yours of May 2, in which you make inquiry as to whether or not you have the power under the law to compel a railroad company to lease a portion of its right of way to a company or individual for the purpose of erecting a grain elevator thereon.

In reply thereto, I desire to say that if you possess this power it is by virtue of the provisions of paragraph 5967 of the General Statutes of 1901, which provides that "said commissioners shall have the general supervision of all railroads operated by steam within the state," etc.

Assuming that the power granted by this statute is broad enough in its terms to authorize an order of this nature, the question then arises as to whether such

an order will, if made, be valid. Questions of this kind are liable to arise in two classes of cases—one at stations where there are no elevators; the other, at stations where persons or corporations are operating elevators located on the right of way.

It is the common law governing common carriers that they must carry for all who present freight for carriage, charging equal prices to all, and furnishing each shipper equal facilities for loading and unloading his merchandise. Hence, from the standpoint of the shipper, it would seem proper that, in cases where elevator rights have been given on the right of way and further rights of that character are necessary for the public, the railroad company should be compelled to grant such necessary rights to erect and operate elevators; and the legal reason for allowing this to be done would be stronger at a station where elevator rights have been granted which are insufficient for the public accommodation than at a station where no such rights have been granted, as in the latter case there is no question but what all shippers are being treated alike. Of course, the needs of the public for an elevator are greater at stations where there is no elevator than if one were being operated there; but, as I have said, there is less of legal ground for compelling the granting of such right.

On the other hand, looking at the question from the standpoint and rights of the railroad company, it will be seen that such company is the owner of the right of way, and to compel the company to grant to an individual or corporation the right to erect and maintain an elevator on its land is to compel the railroad company to give a leasehold interest in its property to another; and that this leasehold interest is property, and the property of the railroad company, there can be no doubt. Neither can there be any doubt but what an order of the kind mentioned, if enforced, would take from the railroad company the right to use and control the land occupied by the elevator, and this raises the question as to whether or not such an appropriation of the ground of the railroad company is a taking of property without due process of law, such as is forbidden by the constitution of the United States.

This question has been answered in the affirmative by the supreme court of the United States, in the case of *The Missouri Pacific Railway Company v. The State of Nebraska*, 161 U. S. 403. The board of transportation of the state of Nebraska, under a statute almost identical in language with that above quoted, made an order directing the Missouri Pacific Railway Company to grant to certain persons the right to erect an elevator on the land of the railway company at a station at which similar rights had been previously granted by such company, and the elevators erected in pursuance thereof were admittedly inadequate for the accommodation of the public. The railway company refusing to allow the elevator to be built, an action of mandamus was commenced in the supreme court of that state by the board of transportation against the railway company, and a peremptory writ of mandamus was granted, from which an appeal was taken to the supreme court of the United States, where it was held that the order of the Nebraska board of transportation, requiring the railroad company to surrender a part of its land to private persons for the purpose of building and maintaining their elevator upon it, is a taking of the property of the company for the private use of such persons, and it was therefore decided that such taking was not due process of law, and a violation of the fourteenth amendment of the constitution of the United States. In the decision of the case, the court says:

"To require the railroad company to grant to the petitioners a location on its right of way for the erection of an elevator for the specified purpose of storing from time to time the grain of the petitioners and of neighboring farmers is to compel the railroad company against its will to transfer an estate in part of the

lands which it owns and holds under its charter as its private property for a public use to an association of private individuals for the purpose of erecting and maintaining a building thereon for storing grain for their own benefit, without reserving any control of the use of such land or of the building to be erected thereon to the railroad company for the accommodation of its own business or for the convenience of the public. This court, confining itself to what is necessary for the decision of the case before it, is unanimously of the opinion that the order in question, so far as it required the railroad corporation to surrender a part of its land to the petitioners for the purpose of building and maintaining their elevator upon it, was in essence and in effect a taking of private property of the railroad corporation for the private use of the petitioners. The taking by a state of the private property of one person or corporation, without the owner's consent, for the private use of another is not due process of law, and is a violation of the fourteenth article of amendment of the constitution of the United States."

I am, therefore, compelled to advise you that in my opinion you do not have the power to compel a railroad company to lease a portion of its right of way to a company or individual for the purpose of erecting a grain elevator thereon.

Yours very truly, A. A. GODARD, *Attorney-general.*

JULY 31, 1902.

To the Honorable Board of Railroad Commissioners, Topeka, Kan.:

GENTLEMEN—I have yours of July 30, enclosing letter from S. S. Reynolds, of Grainfield, Kan., asking my opinion on the question stated therein, and also as to whether this matter comes within your jurisdiction. It appears from his letter that some railroad is requiring passengers to sign a contract printed on the back of tickets waiving claim for damages, except in small amount, in case of injury or death to such passenger, although charging for such ticket at the rate of three cents a mile. Paragraph 5857, General Statutes of 1901, provides that railroads in this state shall be liable for all damages done to person or property when done in consequence of any neglect on the part of the railroad company. Paragraph 5980 provides that no railroad company shall charge more than three cents a mile for transporting adult passengers. Paragraph 5987 provides that no railroad company shall be permitted to change or limit its common-law liability as a common carrier, except as otherwise provided by regulations or order of the board of railroad commissioners. This is substantially the same provision as contained in the former railroad-commissioner law, which was held by the supreme court, in *Railway Co. v. Sherlock*, 59 Kan. 23, to prohibit railroad companies from changing or limiting their common-law liability, except by regulation or order of the board. The common-law liability is substantially a liability arising out of negligence or mismanagement on the part of the railroad company. Railroad companies cannot relieve themselves of this liability by contract, neither have they any right to require the purchaser of a ticket to sign a contract limiting the same.

I am unable to tell from the Reynolds letter just what this contract on the back of the tickets he mentions is, but from his statement it would seem to be one purporting to relieve the company from its common-law liability. Paragraph 5967 empowers you to inquire into any neglect or violation of the laws of this state on the part of any railroad company operating here, or on the part of its officers, agents, or employees, and section 5970 specifies how you may proceed when you find that any company is failing to comply with any of the laws of the state. I think, therefore, that the matter complained of by Mr. Reynolds comes properly within your jurisdiction.

Yours very truly,

A. A. GODARD, *Attorney-general.*

JUNE 21, 1902.

Hon. E. B. Jewett, Warden Kansas State Penitentiary, Lansing, Kan.:

DEAR SIR—Yours of the 20th inst., in regard to the case of George Tankersly, duly received. I understand the question you submit has reference to the time of the expiration of the sentence of this party. Our supreme court held, in the case of *Hollon v. Hopkins*, 21 Kan. 638, as follows:

"The time fixed for executing a sentence, or for the commencement of its execution, is not one of its essential elements, and, strictly speaking, is not a part of the sentence at all. The essential portion of a sentence is the *punishment*, including *kind* of punishment and the *amount* thereof, without reference to the time when it shall be inflicted. The sentence, with reference to the kind of punishment and the amount thereof, should as a rule be strictly executed. But the order of the court with reference to the time when the sentence shall be executed is not so material. In no case will a term of imprisonment be deemed to have commenced prior to actual imprisonment, unless the actual imprisonment has been prevented by some cause other than the fault or wrong of the convict. 'Expiration of time without imprisonment is in no sense an execution of the sentence.'"

It appears from the certified copy of the judgment of the court sentencing Tankersly that the sentence was "that he be confined in the state penitentiary of the state of Kansas and kept at hard labor for the period of four years," without specifying the date when the sentence should begin or when it should terminate. The judgment in this case is very clear, both as to the kind of punishment and the amount thereof. It appears that this party, after being conveyed to the penitentiary, and being confined for eighteen days, took an appeal to the supreme court and had an order issued staying execution, under which he was released from said penitentiary pending his appeal. The case was affirmed by the supreme court and the defendant, Tankersly, ordered to "forthwith deliver himself into the custody of the sheriff of Sedgwick county, Kansas, there to abide the further order of the district court of that county concerning him." The said court "ordered, adjudged and decreed that said defendant be taken by the sheriff of Sedgwick county, Kansas, to the penitentiary of the state of Kansas . . . and there be confined according to the terms of said judgment heretofore rendered by this court and affirmed by the said supreme court of the state of Kansas."

It seems to me very clear, under these circumstances, that Tankersly should serve four years from the time of his last commitment, less the eighteen days served under the first commitment, and such other time as he may be allowed under the rules of the penitentiary.

Yours very truly,

A. A. GODARD, *Attorney-general.*

SEPTEMBER 18, 1901.

Hon. E. B. Jewett, Warden Kansas State Penitentiary, Lansing, Kan.:

DEAR SIR—I have yours of the 17th inst., enclosing copy of the journal entry in the case of *The State v. John C. Williams*, which shows that he was on March 30, 1899, sentenced to the penitentiary for three years for the crime of perjury. You state that he was delivered to the warden on July 12, 1900, and that there is no record showing where he was between the 30th day of March, 1899, and the 12th day of July, 1900, and you request my opinion as to when his term of imprisonment will legally expire.

As a matter of fact, as shown by the records of the supreme court, Williams secured a stay of execution of his sentence on the 31st day of March, 1899, pending appeal, and on October 7, 1899, the supreme court affirmed the judgment of the

ATTORNEY GENERAL.

court below and ordered "that the appellant forthwith deliver himself up into the custody of the sheriff of Saline county, there to abide the further order of the district court of that county concerning him." It then clearly became the duty of Williams to surrender himself up to the custody of the sheriff, but other records of the supreme court will show that various schemes and certain litigation were had before this appellant was finally taken to the penitentiary. While, probably, the district court of Saline county should have made some further order in obedience to the mandate of the supreme court regarding the incarceration of Williams, yet it could not resentence him because the sentence theretofore pronounced had been affirmed by the supreme court.

Section 5541, Dassler's Statutes of 1899, provides that, on a judgment of affirmance against the defendant, the original judgment must be carried into execution as the appellate court may direct.

Sections 5508 and 5509 provide that, upon sentence, the clerk shall make a transcript of the entry and deliver it, duly certified, to the sheriff, who shall without delay cause the convict to receive the punishment to which he was sentenced.

Section 5533 provides that the execution of a judgment of conviction may be stayed by order of the supreme court, or any justice thereof, upon giving a certain bond. And, certainly, when a convict of his own motion procures an order of the supreme court staying the execution in his case, he cannot be heard to say that while it is thus stayed it is at the same time running and accumulating a credit of days or months in his favor.

Following the statutes above referred to, and the decisions in the case of *Hollin v. Hopkins*, 21 Kan. 638, the case of *Paschal*, 56 id. 123, and the case of *Henderson v. James*, 27 L. R. A. 290, my opinion is that Williams's term should be computed from the time he was actually received at the penitentiary. Certified copies of the order staying the execution and of the mandate of the supreme court can easily be obtained, and also certified copies of any further record which may have been made in the lower court. The statute is lame in not specifically requiring in such cases the full history to be furnished the warden; but as a matter of precaution, I would advise that in each case you call upon the authorities of the county from whence the convict comes for such a showing, in order that you may have something on file indicating when the term of each convict shall legally expire.

Yours very truly,

A. A. GODARD, *Attorney-general*.

March 2, 1901.

To the Board of Directors of the Kansas State Penitentiary, Lansing, Kan.:

GENTLEMEN—I have your communication of February 25, as follows:

"The board of directors of the Kansas Penitentiary desire an official opinion from you upon the question as to whether the twine factory at the penitentiary is a department of that institution, and comes under the provisions of the general laws relating to the management of the penitentiary, as set forth in sections 1, 9 and 36 of chapter 152 of the Session Laws of 1891. If such is the case, then does the board of directors have control of purchases for the twine department the same as other departments of the penitentiary?"

In reply to the first portion of your question, I wish to say that the twine factory is undoubtedly a department of the State Penitentiary, and that it comes under the provisions of the general law relating to the management of the penitentiary, except in so far as the statute of 1891 is modified by the provisions of chapter 24 of the Laws of 1899. This is true as to sections 1 and 9 of the act of 1891, but I am inclined to believe that section 36 of that act does not apply to the

twine plant. You will observe that section 34 refers to the letting of contracts for prison labor, provides for advertising for proposals of bills, etc. Section 35 evidently refers back to section 34, and also to sections 37, 38, and 39. It seems reasonable, therefore, to judge that section 36 must be construed with the context as relating only to the awarding of contracts for prison labor. If this is true it does not affect the twine plant. The act of 1899 must be construed with the act of 1891, as they both relate to the same subject-matter, viz., the penitentiary; and it is presumed that the act of 1899 was enacted upon the theory that its provisions should harmonize with those of the previous law upon that subject. The act of 1891 must also be construed so as to make all its provisions harmonize, if possible. In section 10 of this act, which refers to the duties of the warden, it is said:

"He may, under the direction of the directors, purchase such new materials as may be necessary to be manufactured in the penitentiary, and pay for the same out of any moneys in his hands belonging to the state."

The act of 1899 provides a revolving fund, to be used for the purpose of purchasing raw material to be used in the manufacture of binding-twine, and for the purpose of carrying, handling and marketing the manufactured product. Section 5 provides that this money shall be paid upon verified vouchers of the warden. Section 6 refers to the payment of warrants drawn against the same by the warden, and section 7 specifies that the warden's bond shall be conditioned that he shall "faithfully and promptly account for and pay over all moneys which may come into his possession by the sale of the manufactured product, or for use in the purchase of raw material."

The necessary conclusion to be drawn from all these provisions is that the warden shall purchase the raw material, which shall be paid for out of the revolving fund, and that the same shall be done under the direction of the directors. I am of the opinion that the statute contemplates that the moneys belonging to the revolving fund shall only be drawn out of the treasury by the warden.

As to purchases to be paid for out of other funds, I am of the opinion that the transactions should be made in the manner provided by section 9 of the act of 1891, and the moneys drawn in compliance with the provisions of section 3 of chapter 26 of the Laws of 1899.

Yours very truly, A. A. GODARD, *Attorney-general.*

DECEMBER 17, 1891.

Hon. E. B. Jewett, Warden State Penitentiary, Lansing, Kan.:

DEAR SIR—I have examined the abstract of title to lot 1 of section 8, lots 4, 5 and 6 of section 17, lots 1, 2 and 3 of section 16, all on Stiger's island, in the Missouri river, in township 9 south, of range 23 east of the sixth principal meridian, in Kansas, containing in all 229 $\frac{1}{16}$ acres, according to the official plat of the survey of said lands. The abstract shows title in Vinton Stillings, subject to some requirements which are made, as follows:

1. Quitclaim deed from Jacob Rodenhaus and wife.
2. Quitclaim deed from George Newsome and wife.
3. Quitclaim deed from John T. O'Keefe and wife.

The abstracter should be required to furnish a certificate to the state of Kansas similar to the one to Mr. Stillings, shown in the front of the abstract.

The conveyances shown on the abstract made by M. V. Cutler are not considered to have any bearing upon the title, as Cutler is not shown to have any right,

title or interest in the land, and more than forty years have elapsed since he has apparently made any claim thereto.

Some of the conveyances shown on this abstract have suggested inquiries concerning the title to this land. These have developed certain facts which should be placed before you in connection with this opinion. I do not assume to pass upon these facts, but simply call attention to them in order that the board may satisfy themselves as to which of several theories is correct. There is in my office a considerable collection of data respecting these facts which I shall be glad to place before the board in detail at any time.

There are three distinct theories respecting the formation of the land now offered to the state as Stiger's island, and doubtless evidence could be produced to sustain any one of the three.

STILLINGS'S THEORY.

Mr. Stillings bases his title upon a patent which calls for Stiger's island. When surveyed, in 1857, the island consisted of fractional parts or lots of the sections above set forth. The survey was made by the surveyor-general for Kansas, and at the same time as the Kansas land in Leavenworth county, but the island is shown by the map and field-notes to be very distinctly on the Missouri side of the channel of the Missouri river. The patents which were issued December 22, 1890, call for $229\frac{1}{10}$ acres. The land offered for sale amounts to 1000 or 1200 acres, and consists of a part only of the present island. This island is now distinctly on the Kansas side of the channel of the Missouri river. In fact, the branch of the river which now separates the island from the Kansas shore is not more than fifty yards in width; it is commonly called a "slough." The main channel, that part of the river which lies between the east side of the island and the Missouri shore, is about 1000 yards in width. It is claimed by Mr. Stillings that this island which is offered for sale is the original Stiger's island with accretions, and that he now has a good title to that part of the same which he offers to sell. He also claims that the main channel of the Missouri river has slowly and imperceptibly worked east of the island, since the survey of 1857, leaving only a slough on the west side of it.

WHITELY'S THEORY.

One Abner Whitely, of Beverly, Platte county, Missouri, has long claimed title to the land which has been offered to the state. After the issuance of the patent to Stillings, Whitely sued Stillings in Platte county, Missouri, and the litigation over this island continued for a number of years. Whitely's claim of title is based upon this hypothesis: Whitely owned land east of the river and south of Stiger's island. His land was nearly a mile from the river. West and north of his land the river made a turn west for a mile or more, then turned rather sharply and flowed in a southeasterly direction. This left a point of Missouri land projecting into the bend of the river. A slough ran from Burns's lake, in Missouri, southerly across this point and emptied into the Missouri river. It is claimed that there was another small island on the Missouri side of the river called "Spar island." During a period of high water, probably in 1880, the river worked eastward until it cut into the slough above the point. The main channel then suddenly or rapidly changed and ran through the slough, thus separating the point above described from the Missouri mainland. After the change in the location of the channel the river continued to work eastwardly, cutting out land on the east side and adding to Spar island and the point of land cut off as stated above. I am not advised as to whether or not Whitely was owner of the point of land and the island at the time when the channel changed, but at this time he claims title to both. It is further claimed that the accretions to Spar island

and the point finally caused these two bodies of land to become joined, and it is now claimed by Whitely that the land in question is simply the point above described and Spar island with the accretions thereto. It is claimed that after the channel swung around eastwardly of Spar island and the point, the old channel gradually diminished to what is now called the "Kansas slough"—that branch of the river which divides the island from the Kansas bank. Whitely claims that the original Stiger's island was completely washed away and obliterated.

NEWSOME'S THEORY.

George Newsome, of Leavenworth, also claims title to this land. He agrees with Whitely, in that both claim that the original Stiger's island was completely washed away. The theory of both is, in some degree, corroborated by the two Missouri river maps attached to the abstract. Neither of these shows any such a body of land as Stiger's island. Newsome says that after the island washed away, or while this obliteration was in progress, there was formed, at some distance down the river from the island, a sand-bar, which became known to hunters and fishermen as "Delaware bar." Delaware bar really consisted of two or three separate bars. This is shown by one of the Missouri river maps above referred to. Newsome claims that he settled on the easternmost of these bars about twenty-five years ago. The bar claimed by Newsome gradually developed into more or less permanent land: He claims that prior to 1890 his bar was separated from the bar on the north and west by a slough or fork of the river which was 250 or 300 yards wide and twelve feet deep. He denies that these bars were ever called or known as "Stiger's island," between the time when he settled thereon and the time when the patent was issued to Stillings's grantors. That the islands were commonly known and designated as "Delaware bar." That during the last fifteen or sixteen years the big slough between Newsome's island or bar and the one north and west of him has completely filled up, and that upon this "fill" is based the claim that the bar south and east of the big slough is an accretion to Stiger's island. Newsome's claim of title is based simply upon long possession. By an action begun and maintained in 1890, in Platte county, Missouri, Elisha Diefendorf, the patentee to Stiger's island, ejected Newsome from this bar or island. There is in this office an abstract of the record in that case.

LEGAL CONCLUSIONS BASED UPON EACH THEORY.

1. If we assume the Stillings theory to be correct, it must be held: (a) That the fee title to Stiger's island and the accretions thereto is, under well-understood principles, in Stillings, subject to the requirements set forth above. (*Fulmore v. Jennings*, 21 Pac. [Cal.] 536; *Cooley v. Golden*, 117 Mo. 33.) (b) That, assuming the map and survey shown by the abstract to be correct (and subject to any qualification involved in the legal principles hereinafter set forth), said island, being originally on the east side of the channel of the Missouri river and within the jurisdiction of the state of Missouri, is now within the jurisdiction of said state. (*Railroad Company v. Devereux*, 41 Fed. 14; *Degman v. Elliott*, 8 S. W. [Ky.] 10.) I know of no principle of law by which either the sudden or gradual change of a channel of water will change or affect either the title of an individual or the jurisdiction of a state to or over a body of permanent and unchanging land. (c) It must not be understood, however, that, under the doctrine of accretion, the title to Stiger's island will carry with it the title to independent islands originally separated from it by sloughs or branches of the river. Accretion, while it may be comparatively rapid, is a gradual accumulation of soil. (*Nebraska v. Iowa*, 143 U. S. 359.) "Formation by accretion must be imperceptible, and must be made to the contiguous land so as to change the position of the water's margin

or edge." (*Cooley v. Golden*, 117 Mo. 33.) As said by counsel in *Moore v. Farmer*, 156 Mo. 33, "the doctrine of accretion will scarcely admit of jumping a slough forty to sixty yards wide."

2. If the hypothesis of Whitely is correct, the conclusion must be: (a) That the fee to the existing island, with accretions (except a portion which he has deeded to Stillings by way of compromise), is in Whitely. (b) That the sudden change in the channel of the Missouri river, known in law as "avulsion," worked no change in the boundary between the states, but the same remained, and now is, in the center of the old channel of the river, west of the existing island. (*Nebraska v. Iowa*, 143, U. S. 359; see *State v. Garrison*, 147 Mo. 548.) (c) The remarks found in the preceding paragraph under subdivision "c" are applicable to Whitely's theory.

3. If Newsome's theory be adopted—that the existing island is a consolidation of two or more independent islands rising out of the bed of the river west of the center of the main channel, and gradually joined together by the filling of the slough separating them as the main channel gradually worked eastward, and denying that there has been any accretion to permanent and unchanging land—we must reach the following conclusion: (a) The title to the bed of the stream being in the state, the fee title to the existing island rests in the state of Kansas. (*Wood v. Fowler*, 26 Kan. 682; *Peuker v. Canter*, 62 id. 363, 63 Pac. 617; *Cooley v. Golden*, 117 Mo. 33; *McBaine v. Johnson*, 155 id. 201; *Moore v. Farmer*, 156 id. 33; *People v. Warner*, 116 Mich. 228; *Gould on Waters* §§ 42, 76, 77, 166; 17 Am. & Eng. Encycl. of L. 530.) (b) The middle of the present channel of the Missouri river is the boundary line between Kansas and Missouri, and the existing island is in Kansas. (*Nebraska v. Iowa*, and *Railroad Co. v. Devereux*, *supra*.) (c) Newsome has no title to the island, though the fact that he has energetically defended a lawsuit for possession thereof, and might do so again, makes it expedient to require a quitclaim deed from him and his grantee.

The boundary question involved in the consideration of this abstract should be given specific attention. The state of Missouri was admitted into the Union by act of Congress approved March 6, 1820. That part of the state which now borders on the Missouri river was not included within the boundary of the state when it was admitted. There was then a narrow strip of land lying between the western boundary of the state and the Missouri river. By act of Congress approved June 7, 1836, jurisdiction over this strip of land, known as the "Platte purchase," was ceded to the state of Missouri upon the extinguishment of the Indian title, and it was enacted that "the western boundary of said state shall be then extended to the Missouri river." By a proclamation of the president declaring the Indian title extinguished, dated March 28, 1837, the act of Congress became effective. The boundary so fixed by the act of 1836 has been construed by the United States circuit court to be in the center of the channel of the Missouri river. (*Railroad Company v. Devereux*, 41 Fed. 14, per Brewer.) And the "channel" is understood to be, not the deep water of the stream as followed in navigation, but the bed in which the main stream of the river flows. (*Bridge Company v. Dubuque County*, 55 Iowa, 558.) The organic act of the territory of Kansas defines the eastern boundary simply as the "western boundary of the state of Missouri." (Gen. Stat. 1901, § 54.) The act of admission is in similar terms. (Gen. Stat. 1901, § 262.)

In my judgment, the jurisdiction of Stiger's island became fixed by the act of 1836, if the island was then in existence. If it was then east of the center of the channel of the Missouri river it became Missouri territory; if it was west of the center of the channel it remained a part of the unorganized territory of the West.

If the island has maintained a permanent existence since that time, the shifting or changing of the channel from one side of the island to the other has in no manner changed or affected its jurisdictional status.

SUMMARY.

Regarding the title to the lands in question and the desirability of their purchase, I desire to say:

If you are satisfied that Stiger's island has not washed away since the patent thereto was issued by the United States, Mr. Stillings's title, after compliance with the above requirements, is good as to so much of the original island, if any, as lies within the tract offered to the state, and his title is also good as to so much of the land so included as has been formed by accretion; that is, by imperceptible additions to said original island. As to the jurisdiction of the state over the island and its accretions, this depends upon facts which should be ascertained and determined by you. If this island was on the Kansas side of the main channel of the Missouri river at the time the "Platte purchase" became a part of the state of Missouri, and such island has been in continuous existence ever since, then the same, with its accretions, are now Kansas soil.

If the Whitely theory is correct, and the land in question or any part thereof consists of land which was originally a part of the state of Missouri or of accretions thereto, such island is still under the jurisdiction of the state of Missouri.

As to so much of said land as has been formed by independent islands and sand-bars arising on the Kansas side of the Missouri river and the accretions thereto, Mr. Stillings has, in my judgment, no title, as the subsequent joining of such bars or islands with the lands owned by him or his grantors have not given him any title. Islands and bars so formed on the Kansas side of the river are within the jurisdiction of the state of Kansas.

As to all questions of fact concerning the advisability of purchasing the above land, I shall leave them for the determination of the board of directors of your institution, as I have only endeavored to state the law applicable to the situation. I wish to add, however, that in determining the advisability of this purchase your board should not overlook the fact that this land has never been taxed in Kansas; that the Missouri courts have exercised jurisdiction over it in quite a number of suits, and that the judge of the district court of Leavenworth county has held that the land is in Missouri, and that his court had no jurisdiction over it. Possibly I may be mistaken as to the last statement, and you should not accept it as true without verification.

Yours very truly,

A. A. GODARD, *Attorney-general.*

MAY 9, 1901.

Mr. T. C. Biddle, Superintendent State Hospital, Topeka, Kan.:

DEAR SIR—Replying to yours of the 7th inst., I have to say that the code of charities and corrections enacted by the recent legislature appears to revolutionize the law governing the state charitable institutions.

As to the manner of committing private patients to a state hospital or asylum, the former law required only that a certificate signed by at least one practicing physician, stating that he or they had examined the patient and believed him to be insane, should be presented to the superintendent, together with a certificate of the probate judge of the proper county showing that a guardian of the patient had been appointed; and that an obligation should be filed with the steward, running to the treasurer of the asylum, and conditioned that the obligors would

pay or provide for all requisite clothing or things necessary for the health and comfort of the patient, to remove him when discharged, and to reimburse funeral expenses in case of death, etc.

In order to commit such private patients no inquest or judicial determination as to his sanity was required. It appears, however, that under the new law the question of the sanity or insanity of the patient must be judicially determined in all cases before he or she can be committed to a hospital or otherwise restrained of his or her liberty. Section 51 of the new act provides that "No person who shall not have been legally adjudged to be insane shall by reason of his insanity, or supposed insanity, be restrained of his liberty."

Section 67 of the new act requires that at or before the time of the admission of such patient to a state hospital a bond with two good and sufficient sureties, approved by the probate judge, and running to the state board of charities and corrections, conditioned substantially the same as the bond required in such cases under the old law, shall be filed with the superintendent.

The act of 1901 provides that the question as to the sanity of a person may be judicially determined in either of two ways. A trial by jury may be had before the probate court, substantially the same as heretofore, or such inquest may be had by a commission consisting of two qualified physicians in regular and active practice, to be chosen by the probate judge. In either event, however, the probate judge shall preside, and the presence of the accused shall be indispensable. It appears that in case of a patient examined by such commission, the only papers necessary to be presented to the superintendent in order to entitle the patient to admission are the examining physicians' report, together with the approval of the probate judge attached thereto, and the bond heretofore mentioned. I take it that the report of the physicians constituting the commission, together with the approval of the same by the probate court, is to be considered a judicial determination of the insanity of the patient sufficient to satisfy the requirements of section 51 of the act.

In the case of a trial by jury before the probate judge, wherein the patient is adjudged to be insane, or in a case where an inquest is held by commission, sections 58, 59, 60 and 61 provide for the manner in which the trial shall be had, and also as to the steps to be taken by the probate court after verdict is rendered or upon the findings of the commission, in order to commit such patient to a state hospital.

Yours very truly, A. A. GODARD, *Attorney-general.*

OCTOBER 17, 1901.

Mr. B. P. Scott, Assistant Commissioner of Labor Statistics, Topeka, Kan.:

DEAR SIR—In response to your inquiry regarding the construction of the eight-hour law, I will say that I have given the matter sufficient attention to reach a conclusion.

It provides that eight hours shall constitute a day's work for all laborers, workmen, mechanics or other persons now employed or who may hereafter be employed by or on behalf of the state of Kansas, "or by or on behalf of any county, city, township or other municipality of said state," except in cases of extraordinary emergency, etc. Originally and derivatively a municipality had reference to a city or similar public body. But the word "municipality" has come to mean very much more.

In the syllabus of the decision in *Lewis v. Commissioners*, 12 Kan. 186, Judge Brewer, in speaking of the grant of power to a county to issue bonds, spoke of it as a grant of power to a municipality.

It is settled by a long line of decisions in this state that, while a city is a public corporation proper, counties, townships and school districts and boards of education are *quasi*-public corporations only, and that the constitutional prohibition upon conferring corporate power by special act does not apply to counties and similar *quasi*-public corporations. But it will be noticed that the eight-hour law, both in its title and each section, uses the words "county" and "township" as well as the word "city" as descriptive of what it evidently terms "municipalities," by using the expression "or other municipalities."

Hainer on Municipal Securities, section 3, includes within the term "municipal securities" bonds, etc., issued by cities, towns, counties, school districts and other subdivisions of the various states and territories in the United States.

Dillon on Municipal Corporations, section 22, states that all corporations intended as agencies in the administration of civil government are public as distinguished from private corporations; that an incorporated school district or county is a public corporation, but that the school district or county, properly speaking, is not, while a city is, a municipal corporation. In section 24 he states that more generally school districts are organized under the general laws of the state, and fall within the class of corporations known as *quasi* public corporations. In section 25 he states that a school district is but an instrumentality of the state, and that the state incorporates it that it may more effectually discharge its appointed duty.

Beach on Public Corporations, section 6, says:

"Counties, townships, school districts, road districts, and the like *quasi*-public corporations do not usually possess corporate power under special charters; but they exist under general laws of the state, which apportion the territory of the state into political divisions for convenience of government, and to require of the people residing within those divisions the performance of certain public duties as a part of the machinery of the state, and, in order that they may be able to perform those duties, vests them with certain corporate powers."

Section 2, article 3, chapter 122, Laws of 1876, provides that every school district organized in pursuance of this act shall be a body corporate, and shall possess the usual powers of a corporation for public purposes, may sue and be sued, and be capable of contracting and being contracted with, and holding such real estate as it may come into possession of by will or otherwise, or as is authorized to be purchased by the provisions of this act.

In *Beach v. Leahy*, 11 Kan., at page 29, the supreme court of this state used this language, in speaking of counties, townships, and school districts:

"They possess some corporate functions and attributes, but they are primarily political subdivisions, agencies in the administration of civil government, and their corporate functions are granted to enable them more readily to perform their public duties."

In *Eikenberry v. Township*, 22 Kan. 561, Chief Justice Horton, speaking for the court, said, in speaking of counties, townships, school districts, and road districts:

"The theory of these various decisions is, in effect, that such organizations, though corporations, exist as such only for the purposes of the general political government of the state; that all the powers with which they are entrusted are the powers of the state, and all the duties with which they are charged are the duties of the state."

And at the close of the decision he said:

"Cities, towns and villages are municipal corporations, while counties, townships, school districts and road districts are *quasi*-corporations. The difference between these two classes of corporations is well established, and a principle applicable to the one class is not necessarily applicable to the other."

In *Freeland v. Stillman*, 49 Kan. 207, the supreme court said:

"Although a school district possesses corporate capacity it does not fall within the definition of a municipal corporation. A school district belongs in the same class with counties and townships, which are denominated in the books and known to the law as *quasi*-corporations, rather than corporations proper. They possess some corporate functions and attributes, but they are primarily political subdivisions, agencies in the administration of civil government, and their corporate functions are granted to enable them more readily to perform their public duties."

It was there held that a statute providing that any elector of a county, township or municipal corporation might bring suit to enjoin the issuance of certain bonds did not authorize an elector of a school district to bring such suit. But it will be noticed here that the legislature did not use the words "municipal corporation," but the words "other municipalities," after naming "cities," which are municipal corporations, and "counties" and "townships," which are but *quasi*-municipal corporations.

In *Rathbone v. Hopper*, 57 Kan. 240, Justice Johnston, who rendered the decision last quoted from, held that the expression "municipal corporations" may include townships. The title of the act there in question was "An act to enable counties, municipal corporations, the board of education of any city and school districts to refund their indebtedness," and the body of the act made specific provision for the refunding of township indebtedness, and the following is the view expressed by the court:

"It was the manifest purpose of the legislature to confer authority upon townships to refund their indebtedness, and the question for decision is, whether the general term 'municipal corporations,' employed in the title, is sufficiently broad to cover these provisions. In this state each organized township is a body politic and corporate, with power to make all contracts that may be necessary and convenient for the exercise of its corporate powers, and in its proper name may sue and be sued. A township is generally spoken of as a municipality or municipal corporation, but, strictly speaking, every political subdivision of the state organized for the administration of civil government is a *quasi*-corporation. In this respect they are placed on the same plane as counties and school districts, and in this court, in determining the liability of this class of corporations for failure to perform some corporate duty, or for the neglect or misfeasance of its officers and agents, it has been held that counties, townships and school districts are not municipal corporations proper, and that their liabilities in this respect are not the same as incorporated cities, towns, and villages. . . . In the broader sense and in common usage the term 'municipal corporations' includes counties and townships. All public corporations, including counties, cities, and townships, are frequently referred to as municipalities and municipal corporations, to distinguish them from private corporations, and it is not uncommon to find them so designated in the state and federal courts and in the published reports of their decisions.

"Here, then, we have in the title a term which, if taken in the broader sense and popular signification, would include townships, and render the act valid; while, if taken in the more restricted and technical sense, it would render it invalid. What sense shall be imputed to the legislature, and which interpretation should be given to the term? No one can doubt that the legislature intended to make a title broad enough to cover the provisions of the act with reference to townships, and this is the more apparent from the amendments made to the act long after the passage of the original act, and after large amounts of township indebtedness had been refunded under its provisions. . . . The obvious intention of the legislature is entitled to great weight in determining the sufficiency of the title. In *Woodruff v. Baldwin*, 23 Kan. 494, it was held in a similar case to be more just and fair to say that the legislature used the title in its broadest sense—a sense broad enough to include the subject-matter of the act—rather than to apply the restricted meaning which would, to some extent, defeat the legislative purpose. The same view was taken in *In re Pinkney*, Petitioner, 47 Kan. 89. There, a term was employed in the title to an act which, if given the broader meaning,

would uphold the act, while by giving it the narrower and perhaps more common meaning would render it invalid, and it was held that the legislature having employed the word in its broadest sense and one which fairly covered the provision assailed, the court was not warranted in adopting the narrower meaning and thus holding the act invalid. It was said that the fact that general terms are employed in the title does not render it objectionable so long as the title to the act is such that neither the members of the legislature nor the people to be affected can be misled."

The court then refers to the case last above quoted from and finds no trouble in view of the position there taken. It will be observed that the Pinkney case, cited by the court in this decision, was a *habeas corpus* arising out of a criminal prosecution, and that the construction given to the statute there involved was given to it as a penal enactment.

Our rule for statutory construction laid down by the legislature is that, "words and phrases shall be construed according to the context and the approved usage of the language; but technical words and phrases, and such others as may have acquired a peculiar and appropriate meaning in law, shall be construed according to such peculiar and appropriate meaning."

I think, therefore, that the words "other municipality" should be construed in their popular, common and usual meaning, and also with reference to the context, and that, therefore, school districts and boards of education are properly included within the title and body of this act. It will be seen quite plainly from the foregoing citations that a school district is created by law for the administration of a portion of the affairs of the state, and is a sort of state agency, or agent for the state. It was held in the Dalton case by the supreme court that this eight-hour act is valid as applied to public work done for a county, as being a direction by the state to one of its agencies, which the state has a complete right to give. With this construction in view, there is the more reason why school districts and boards of education should be included within the meaning of this act, and I am, therefore, of the opinion that they are properly included therein.

Yours very truly, A. A. GODARD, *Attorney-general*.

JUNE 19, 1902.

Hon. Morton Albaugh, Bank Commissioner, Topeka, Kan.:

DEAR SIR—I beg to acknowledge yours of the 29th, 30th and 31st ult., making inquiries concerning various rights of building and loan associations. I shall consider these letters according to subject-matters, and answer them in one letter.

I. The inquiry respecting the practice of the Iola Building and Loan Association may be answered by stating that it appears to be following a wholly unauthorized practice with respect to the charging and collection of premiums. A premium upon a loan or advance must be collected in the manner pointed out in section 1398, General Statutes of 1901—that is to say, it may be deducted in gross at the time the loan is made, or it may be collected with the weekly or monthly instalments during the time when the loan is running. There is no right to charge interest on premiums. This seems to be done by the Iola association.

II. With respect to the gross deduction of premiums, this office holds that whether a premium is deducted in gross or paid by instalments it is only earned as indicated in sections 1403 and 1405, General Statutes of 1901. As to the manner in which the books should be kept and the interior administration of the company conducted, I think that must be left to the discretion and judgment of the bank commissioner.

III. I know of no law authorizing the bank commissioner to require a building and loan association to declare a dividend upon any amount of undivided profits. Section 1410, General Statutes of 1901, concerning dividends, seems to have been enacted wholly upon the theory that dividends may be declared when they are not authorized. The lawmaking power seems to have had no concern with the possible contingency that undivided profits might be accumulated to an undesirable extent.

IV. Respecting the right of the bank commissioner to limit the rate of fines charged, I find it difficult to advise you. It is said in *Thompson on Building Associations*, section 241, that "fines should be assessed in the exercise of statutory power, and must be reasonable." I suppose there is always power in a court to determine as to whether or not a fine is reasonable. Doubtless the bank commissioner may take it upon himself to declare a fine unreasonable and disapprove a particular association's method of doing business because of this fact. I am not prepared to say from your statement concerning the Columbus association that its method of fines is unreasonable. I am inclined to believe that the court would not hold it to be so. It has been held in one case (*Citizens' Mutual Loan Association v. Webster*, 25 Barb. 263), that progressive fines are not unreasonable. This case was decided in New York. Another court might hold entirely different. This is a matter in which you may, I think, use your own judgment as to what is reasonable.

V. I do not find upon examining the statute that you have any powers or authority as to the distribution of the assets of a liquidating association, where the liquidation is voluntary. I should think, however, that where an association liquidates, all stockholders who are paid up to date should receive equal benefit, subject to the condition that the priority of shareholders who have given notice of withdrawal shall not be disturbed. (*Thompson on Building Associations*, § 149.)

VI. My judgment is that membership fees and fines do not constitute a part of the fund from which a withdrawing stockholder is entitled to draw ninety per cent., under the terms of section 1397, General Statutes of 1901. That section of the statute seems to refer wholly to the capital which is derived from payments by its members in periodical instalments. In section 1399 fines and interest are treated as profits of the association. It seems to me that the theory of a fine is such that it cannot be considered to be paid by a member to himself. From the name itself it appears to be a sort of a punishment for delinquency. "If a member neglects his payments he does an injury to the other members who are faithfully observing their obligations; it therefore becomes necessary to compensate their injuries by compelling the delinquent to pay a small additional sum each week for the benefit of the association." (*Thompson on Building Associations*, § 240.) If a member should pay a fine and simply have it credited to his stock account he would in effect be merely making an additional deposit to his own credit. It seems to me that the theory of a fine is not consistent with such a practice.

Very truly yours,

A. A. GODARD, *Attorney-general*.

DECEMBER 11, 1901.

Mr. J. P. Root, Secretary State Board of Dentistry, Kansas City, Kan. :

DEAR SIR—Replying to yours of December 10, in which you inquire as to whether or not students who have not graduated may be licensed by your board or given a certificate authorizing them to practice dentistry before graduation, I desire to say that by the law of 1885 all persons not having received a

diploma from the faculty of some reputable dental college, school, or university department, duly authorized by the laws of this state or some other of the United States, or by the laws of some foreign government, and in which college, school or university department there was at the time of the issuance of such diploma annually delivered a full course of lectures and instruction in dentistry or dental surgery, are forbidden to practice dentistry. No exception was made to this requirement, save as to persons then engaged in the practice of dentistry or dental surgery, which exception was, in 1887, extended until six months after March 10 of that year. By the act of 1891 your board was authorized to examine any person desiring to practice dentistry not holding a diploma, and to grant certificates for such persons to practice.

I find nothing in the statutes which authorizes any person to practice dentistry except such as were engaged in the practice in 1887, and such as possess a lawful diploma, and those which have been duly examined by your board and authorized to practice.

I am of the opinion that persons employed by other dentists, who treat patients in the dental line and receive pay therefor, are engaged in the practice of dentistry, and am, therefore of the opinion that your board has no right or authority to permit students to do this or to engage generally in practice without a diploma, unless they have passed an examination before your board and received a certificate that in the opinion of the board the person so examined has a sufficient knowledge of practical dentistry to entitle him to engage in said practice.

I am reluctant to give an opinion which will have the effect of hindering students in their efforts to obtain the means wherewith to pursue their studies, but I can see no escape from the conclusions above stated, and no reason why students of dentistry should be permitted to practice that profession before completing their studies any more than students of law or medicine should be permitted so to do.

Yours very truly,

A. A. GODARD, *Attorney-general.*

JULY 19, 1901.

Dr. Henry W. Roby, Secretary State Board of Medical Registration and Examination, Topeka, Kan. :

DEAR SIR—In reply to your letter of the 10th inst., relating to the demand of E. Burfield for registration upon the presentation, in lieu of diploma or evidence of seven years' practice of medicine, of a certificate of membership issued prior to the 22d day of March, 1901, by the Physio-medico Society, my opinion is that the board has acted correctly in refusing compliance with the demand. While such certificate was probably sufficient under the law as it existed prior to March 22, 1901, it is not sufficient now. Doctor Burfield obtained no vested rights under the certificate of the Physio-medico Society. Under the inherent police power which the state undoubtedly possesses, it may alter or modify regulations concerning the practice of medicine whenever alteration or modification becomes essential to the protection of the public health. The legislature is not barred by any provision of the state or federal constitution from making additional requirements for the practice of medicine to those heretofore existing. The legislature may prohibit the practice of medicine in this state in cases where such additional requirements are not complied with.

"No one has any right to practice law or medicine except under the regulations the state may prescribe. To practice in the courts or to practice medicine is not a privilege of citizenship, and is therefore neither given nor protected by

or under the civil-rights act of Congress or the new amendments to the constitution. The privilege may be given to one sex and denied to the other, and other discriminations equally arbitrary may doubtless be established." (Cooley on Torts, p. 289.)

Following a long line of decisions, many of which are hereafter cited, the supreme court of the United States, in the case of *Frank M. Dent v. State of West Virginia*, 129 U. S. 114, upon a statute substantially similar to the act passed by our last legislature, fully upholds legislation of this character. In deciding this case the court say:

"It is undoubtedly the right of every citizen of the United States to follow any lawful calling, business or profession he may choose, subject only to such restrictions as are imposed upon all persons of like age, sex, and condition. This right may in many respects be considered as a distinguishing feature of our republican institutions. Here all vocations are open to every one on like conditions. All may be pursued as sources of livelihood, some requiring years of study and great learning for their successful prosecution. The interest, or, as it is sometimes termed, the estate acquired in them—that is, the right to continue their prosecution—is often of great value to the possessors, and cannot be arbitrarily taken from them any more than their real or personal property can be thus taken. But there is no arbitrary deprivation of such right where its exercise is not permitted because of a failure to comply with conditions imposed by the state for the protection of society. The power of the state to provide for the general welfare of its people authorizes it to prescribe all such regulations as in its judgment will secure or tend to secure them against the consequences of ignorance and incapacity as well as of deception and fraud. As one means to this end, it has been the practice of different states, from time immemorial, to exact in certain pursuits a certain degree of skill and learning upon which the community may confidently rely, their possession being generally ascertained upon an examination of parties by competent persons, or inferred from a certificate to them in the form of a diploma or license, from an institution established for instruction on the subjects, scientific and otherwise, with which such pursuits have to deal. The nature and extent of the qualifications required must depend primarily upon the judgment of the state as to their necessity. If they are appropriate to the calling or profession, and attainable by reasonable study or application, no objection to their validity can be raised because of their stringency or difficulty. It is only when they have no relation to such calling or profession, or are unattainable by such reasonable study and application, that they can operate to deprive one of his right to pursue a lawful vocation.

"Few professions require more careful preparation by one who seeks to enter it than that of medicine. It has to deal with all those subtle and mysterious influences upon which health and life depend, and requires not only a knowledge of the properties of vegetable and mineral substances, but of the human body in all its complicated parts, and their relation to each other, as well as their influence upon the mind. The physician must be able to detect readily the presence of disease, and prescribe appropriate remedies for its removal. Every one may have occasion to consult him, but comparatively few can judge of the qualifications of learning and skill which he possesses. Reliance must be placed upon the assurance given by his license, issued by an authority competent to judge in that respect, that he possesses the requisite qualifications. Due consideration, therefore, for the protection of society may well induce the state to exclude from practice those who have not such a license, or who are found upon examination not to be fully qualified. The same reasons which control in imposing conditions, upon compliance with which the physician is allowed to practice in the first instance, may call for further conditions as new modes of treating diseases are discovered, or a more thorough acquaintance is obtained of the remedial properties of vegetable and mineral substances, or a more accurate knowledge is acquired of the human system and of the agencies by which it is affected. It would not be deemed a matter for serious discussion that a knowledge of the new acquisitions of the profession, as it from time to time advances in its attainments for the relief of the sick and suffering, should be required for continuance in its practice, but for the earnestness with which the plaintiff in error insists that by being compelled to obtain the certificate required, and prevented from continuing in his practice without it, he is deprived of his right and estate in his pro-

fession without an intention of the legislature to deprive one of any of his rights. No one has a right to practice medicine without having the necessary qualifications of learning and skill; and the statute only requires that whoever assumes, by offering to the community his services as a physician, that he possesses such learning and skill, shall present evidence of it by a certificate or license from a body designated by the state as competent to judge of his qualifications."

In the case of *State v. Webster*, 150 Ind. 607, the court says:

"Statutes similar to the one under consideration, denying to all physicians in the state, lawfully engaged in practice, the right to continue such practice until they conform to the requirements of the statute, and restricting the practice of medicine to persons who are able to demonstrate their qualifications, have been held constitutional as a proper exercise of the police power of the state in nearly every state of the Union, and in the supreme court of the United States.

Cohen v. Wright, 22 Cal. 293.

Ex parte Yale, 24 Cal. 242, 85 Am. Dec. 62.

"In every one of these cases it has been held that it is within the power of the general assembly to prescribe qualifications for the practice of the professions or trades named, and to regulate and control these professions, even to the point of taking away the right to practice from persons lawfully engaged in the practice who may be deemed insufficiently qualified in the judgment of the board or official to whom the examination for the applicant has been entrusted."

Yours very truly, A. A. GODARD, *Attorney-general.*

OCTOBER 15, 1901.

Dr. H. W. Roby, Secretary Board of Medical Registration and Examination, Topeka, Kan.:

DEAR SIR—I have your request for a construction of that part of section 3, chapter 254, Laws of 1901, which provides that an applicant for examination must show by satisfactory evidence that he or she has devoted not less than three periods of six months each, no two within the same twelve months, or, if after April 1, 1902, four periods of not less than six months each, no two in the same twelve months, to the study of medicine and surgery. The question is as to whether these periods of study must necessarily be pursued in a medical college. My judgment is in the negative. The law does not provide that these periods of study are to be put in at any sort of school. I therefore advise you that if any applicant presents himself who can satisfactorily show that he has devoted to the study of medicine and surgery the requisite number of periods of not less than six months, and no two within the same twelve months, then the board must grant him an examination, and if his qualifications are found sufficient, he will be entitled to a certificate. Yours very truly,

A. A. GODARD, *Attorney-general.*

OCTOBER 15, 1901.

Dr. H. W. Roby, Secretary Board of Medical Registration and Examination, Topeka, Kan.:

DEAR SIR—You have requested an opinion as to what an osteopath may be required to show in the way of periods of study in order to qualify the applicant for examination by your board.

The medical act leaves the matter of the examination of an osteopath in a somewhat uncertain condition. But I observe that, even where a person claiming the right to practice osteopathy is a graduate of a legally chartered school,

he must show that the requirements for the giving of a diploma include a course of instruction of not less than four terms of five months each, in two or more separate years. I would think that where the legislature requires such periods of study from one who has actually graduated from a school of osteopathy it would be safe for the board to demand a showing of like periods of study, either in or out of a legally chartered school. In any case where the legislature has fixed the periods of study which are deemed to be a proper qualification of any particular applicant, I should say that the board could not properly lower this qualification.

Yours very truly,

A. A. GODARD, *Attorney-general.*

APRIL 12, 1902.

Hon. W. V. Church, Superintendent of Insurance, Topeka, Kan.:

DEAR SIR—I beg to acknowledge your request of March 28 for an expression of opinion as to the right of an association to guarantee insurance to members under the insurance laws of this state. You enclose letter from Mr. C. F. Hutchings, of Kansas City, Kan., dated March 27, from which I quote the following paragraph:

“Section 3372 of the act establishing an insurance department provides that it shall not apply to ‘mercantile associations which simply guarantee insurance to each other in same lines or trade but do not solicit insurance from the general public.’ It is the purpose of certain mercantile and manufacturing concerns in this city, if they may lawfully do so, to form an exchange through which they will guarantee insurance to each other to a limited amount, and I would like, if you have no objection, if you would express an opinion as to whether this may be done without infringing the statutes, rules or decisions of your department.”

The first comprehensive insurance law in this state was chapter 93 of the Laws of 1871, which took effect on March 24, 1871. That act provided that insurance companies should transact business only under the supervision of the insurance department, and penalties were provided for the violation of the act. Section 23 of chapter 93 provides that the act shall “apply to individuals and partners, and to all companies and associations, whether incorporated or not, now or hereafter engaged in the business of insurance.” By this section, it was provided that “any corporation, company or association violating the provisions of this section, and any individual, company, association or corporation aiding in any manner, either as agent or otherwise, in such violation, shall be liable to a penalty of \$500. From this section, I take it, that it was the intent of the legislature to subject *the business of insurance*, whether carried on by individuals, partnerships, incorporated companies, or incorporated associations, to legal regulations and restrictions, and to place such business under the supervision of the insurance department.

Sections 7, 8 and 11 of chapter 93 authorized the superintendent of insurance to investigate insurance companies and revoke their authority to do business under certain conditions. By these sections provision was made for the expenses of such investigation.

Chapter 131, Laws of 1885, relates solely to the organization and control of mutual life insurance associations in this state. Sections 22 and 23 of that law make provision for investigation and suspension of such companies and provide for the expense of the investigation. These two sections are not dissimilar in terms to sections 7, 8 and 11 of chapter 93, Laws of 1871. By chapter 357, Laws of 1901, the above-mentioned sections of chapter 93 of the Laws of 1871 and

chapter 132 of the Laws of 1885 are amended and superseded and said sections are repealed.

Section 4 of chapter 357, Laws of 1901, is as follows:

"Nothing contained in this act shall apply to grand or subordinate lodges of any fraternal society wherein the only benefits provided for are sick or funeral benefits, not to exceed two hundred dollars in any one case, nor which limits its membership to a particular trade or calling, or to the employees of a particular person, firm, or corporation, not to mercantile associations which simply guarantee insurance to each other in same lines of trade, do not solicit insurance from the general public, and which are not subject to the general insurance laws of the state of Kansas, and are not under the supervision of the insurance department of the state."

Mr. Hutchings evidently bases his question upon an implication from the second clause of section 4, above quoted, providing that chapter 357 shall not apply to mercantile associations.

Chapter 357 was evidently passed with the purpose of extending the authority of the superintendent of insurance to make examinations and to specifically prescribe the fees therefor. Section 4 of the act evidently presupposes a condition of law under which some sort of insurance associations cannot be included within the regulative features of the law existing at the time of the passage of the act. It does not purport to create, and it is doubtful if it could create, any new rights to transact insurance business. As to the first part of section 4, it can be clearly understood. It excludes from the operation of the act the same class of societies which are mentioned and exempted from the operation of the general insurance laws by chapter 148, Laws of 1899. From a careful examination of the insurance laws, it is somewhat difficult to determine what class of associations or societies the last part of section 4 refers to.

It seems not improbable, however, that this relates to insurance under chapter 132, Laws of 1885, which provides for the organization and regulation of mutual fire-insurance companies. This act is one which provides for inter-insurance upon prescribed classes of risks. The mutual-fire-insurance act provides that the general insurance law of 1871 shall not be construed to apply to companies organized under the mutual-insurance act. (§ 28.) By section 24 of the mutual-insurance act, a special mode of examination by the superintendent of insurance is provided, and the expenses thereof are limited. The fact that the law of 1901, which seems to have been enacted for the special purpose of providing for investigation, repeals the investigation sections of the general insurance law and the similar sections of the mutual-life-insurance law, would seem to indicate that the investigation section of the mutual-fire-insurance law still remains operative. And section 4, above quoted, lends color to this view.

Under the circumstances, I am not disposed to advise you that any person can engage in the business of writing insurance or writing contracts substantially amounting to insurance free from the supervision of your department. Section 23 of chapter 93, Laws of 1871, seems to be very sweeping in its effect. The matter of inter-insurance among persons associated together for that purpose seems to be very fully covered by chapter 132, Laws of 1885. Evidently the legislature intended to cover this ground fully, and such insurance is provided for under such regulations as were deemed just by the legislature, and such insurance business was distinctly relieved from the operation of the laws relating to the regular old-line insurance companies. If any person, partnership or association is or can be discovered to be engaged in what substantially amounts to an insurance business in this state without submitting to the regulations made by law, I suppose it would be your duty to begin proceedings for the recovery of the statutory penalty.

Yours very truly,

A. A. GODARD, *Attorney-general.*

JULY 3, 1902.

Mr. W. B. Brownell, County Attorney, Lawrence, Kan.:

DEAR SIR—Yours of the 2d inst. duly received. I have carefully considered the question you submit, as to the right to have the annual census retaken in your county, or at least in certain portions thereof, after the township and city assessors have filed their returns with the county clerk, and have reached the conclusion that it cannot be done. The assessors, after having made their census returns and verified the same as required by law, certainly have no right of their own authority afterwards to withdraw such returns and make a new enumeration. The board of county commissioners of a county have no authority to order this to be done, because that body has not been given any such power or authority by the legislature. The legislature has provided who shall take the census, where it shall be filed, and what action shall be taken with the returns after they are filed with the county clerk. The board clearly would not have the right to review the returns of the assessors so far as the same has to do with the enumeration of the inhabitants, unless authority was given to them by statute to do so. If the assessor has no right to retake the census after he has once made his verified returns to the county clerk, and the board of commissioners have no right to review his returns and order a new census taken, then I know of no authority which would have the power to cause it to be done.

Yours very truly, A. A. GODARD, *Attorney-general.*

NOVEMBER 23, 1901.

Mr. W. G. Bissell, County Attorney, Phillipsburg, Kan.:

DEAR SIR.—I beg to acknowledge receipt of yours of the 22d inst. Below I state your questions, followed by the answer which I desire to give:

"1. What is a regular meeting of the board of health, as contemplated by section 6382, General Statutes of 1899?"

Answer. The board of county commissioners is not the board of health contemplated by the health statute. The individual members of the board of county commissioners are the persons who constitute the health board. By regularly organizing the board of health and adopting lawful rules and regulations a regular time for meeting may be fixed. The laws providing for the regular meetings of the board of county commissioners as such do not determine what shall constitute a regular meeting of the board of health. But if no rules and regulations have been adopted fixing the time for regular meetings of the board of health, and if by customary usage the regular meeting time of the board of county commissioners has heretofore been adopted and employed as a regular meeting time for the board of health, such custom or usage will fix the time of the regular meeting. A regular meeting may be distinguished from a special meeting by the fact that it is held in obedience to an unvarying custom or law, whereas a special meeting is held irregularly, in response to some special motion or action of a member or of the board.

"2. Would the refusal of the county commissioners to make any allowance to the health officer beyond his regular salary of \$12.50 per annum, and their neglect to investigate without delay a reported case of smallpox, be a violation of section 3, chapter 285, Laws of 1901, that would lay them liable criminally?"

Answer: This question must be divided. (a) The refusal of the commissioners to make any allowance to the health officer beyond his regular salary, if done in good faith, would not lay them liable criminally. (b) If, upon obtaining knowledge of a case of smallpox within their jurisdiction, the commissioners

should fail to immediately exercise and maintain a supervision over such case during its continuance, and to otherwise follow the direction of section 3, chapter 285, Laws of 1901, they would be liable to a fine under such statute.

"3. Could the county board of health compel the health officer of the county, who is employed for a salary of fifty dollars per annum to do 'the routine work' of the office, to look after and maintain quarantine without additional compensation?"

Answer: I think the county health officer must perform such duties as are enjoined upon him by law, and such as his local board or the state board of health may require of him. As to compensation, that must depend upon the contract in each particular case, and where there is no contract, then upon what a jury shall determine to be "reasonable compensation." I would say that a contract to perform "routine work" does not cover the performance of services incidental to the control and management of an epidemic of smallpox.

Yours very truly, A. A. GODARD, *Attorney-general.*

JUNE 10, 1901.

Hon. H. C. Bowman, County Attorney, Newton, Kan.:

DEAR SIR—I have your favor of June 7, in which you ask my construction of the statute with reference to the powers and duties of coroners and the necessity of holding inquests in cases where the means of death are known and undisputed.

In reply to your question, I desire to say that the answer depends upon the construction to be placed on section 158 of chapter 25, General Statutes of 1899, which reads as follows:

"The coroner shall hold an inquest upon the dead bodies of such persons only as are supposed to have died by unlawful means or the cause of whose death is unknown. When he has notice of the dead body of a person supposed to have died by unlawful means, the cause of whose death is unknown, found or being in the county, it shall be his duty to summon forthwith six citizens of the county to appear before him at a time and place named."

The first sentence of this paragraph seems to require the holding of an inquest upon the bodies of all persons who are believed to have died by unlawful means, or in all cases where the cause of the death is unknown, but this sentence must be construed in harmony with the second sentence in this section, which limits the power of the coroner to summon juries for inquests to cases in which the person is supposed to have died by unlawful means, where the cause of the death is unknown, as an inquest can only be held after a jury has been summoned. The last sentence must be held to control the first, if there is any conflict between them. I do not believe, however, there is such conflict, but rather that the word "supposed" should be construed as meaning suspected or believed, and not as including cases where the cause of death is known.

I am, therefore, of the opinion that, in cases where the cause of death is known or is so apparent from the circumstances of the case that no reasonable doubt as to the cause of death exists, no inquest should be held, and that this applies to cases where the death is the result of a crime; as, for instance, if a party is shot in the presence of witnesses, the occasion of the death is too well known to require the holding of an inquest. But in all cases where it is suspected that a crime has been committed, or if the cause of the death is unknown and doubtful, then a jury should be summoned and an inquest held.

Yours very truly, A. A. GODARD, *Attorney-general.*

MAY 24, 1901.

Mr. T. C. Turner, County Attorney, Eureka, Kan.:

DEAR SIR—Yours of the 20th inst. duly received. Under the old law in regard to the trial of insanity cases, it has been considered to be the duty of the county attorney to represent the interests of the state in the hearing of such cases before the probate court. I see nothing in the law passed at the recent session of the legislature requiring a change in this rule. I do not find any particular difference in the nature of the proceedings, so as to make it any less a quasi-criminal proceeding than it was before. Provision is made for the appointment of counsel to appear on behalf of the party alleged to be insane, in all hearings before a jury. No direct provision is made for counsel on the other side. I think it very clear that the legislature acted on the theory that it was the duty of the county attorney to represent the interests of the county and state in the proceedings. The state is interested in seeing that parties who are insane are properly cared for, and both the state and the county are interested in the question of expenses attendant on the hearing of the inquisition and the care of the persons thereafter, if they are adjudged insane. It is the duty of the county attorneys to appear in the several courts of their respective counties in all proceedings in which the state or their county is a party or interested. I am clearly of the opinion that it is the duty of the county attorney to appear in hearings of this nature, and that it would be improper in any case for him to accept an appointment to defend the person alleged to be insane, on an inquisition of insanity.

Very respectfully yours,

A. A. GODARD, *Attorney-general.*

MARCH 7, 1901.

Mr. Asa M. Smith, County Attorney, Colby, Kan.:

DEAR SIR—Answering in their order the questions submitted in your letter of the 21st ult., I will say:

1. The state of Kansas is the proper party plaintiff in an action brought upon an official bond of an ex-county treasurer to recover delinquencies belonging to the state, county, cities, towns, townships, and school districts, since the statute makes the state of Kansas the obligee in such bond. (24 Kan. 152.)

2. In any action upon the official bond of a county officer, brought in the name of the state, if the state is the obligee, to recover any funds retained by such officer which should have been covered into the county treasury or deducted from the quarterly receipts of such officer at the end of each quarter, the statute of limitations will run against such action, unless the sum sought to be recovered is actually due to the state of Kansas, or the state is the real party in interest. The rule that the statute of limitations never runs against the state only applies to claims in which the state is the real party, and has no application in cases where, although a nominal party to the record, it has no real interest in the litigation, but its name is used to enforce a right which inures solely to the benefit of an individual or a corporation, municipal or otherwise. (Wood on Limitations, § 52, and cases there cited.)

3. The statute of limitations will preclude an action for the recovery of delinquent school-land fees at the end of five years from the time the officer was required by law to cover such fees into the county treasury.

4. In an action brought by the state on a defaulting county treasurer's bond to recover township, school district, railway condemnation or individual redemption funds, the state is not such a party in interest that the cause of action would

not be barred at the expiration of five years from the time when such cause of action arose.

5. The same as last above stated is true as to an action brought by the state to recover into the county general fund any moneys collected for state purposes, where the county has always paid the state in full the amount levied against it for such state purposes, and where the county is, therefore, the only real party in interest.

6. The same answer applies to land-sale funds not accounted for by the treasurer, where the state has been settled with in full by credits or otherwise and would, therefore, have no interest in the recovery.

7. Sureties on a county treasurer's official bond for the first term cannot be held liable for his defaults during a second and successive term unless their intention so to obligate themselves is clearly expressed in the bond. Sureties are favored subjects of the law, and their contracts must be strictly construed.

8. Under the law as it stood on the 5th day of January, 1887, I see no reason why the county board was not authorized to make its order of that date allowing the county clerk to retain all fees derived from school-lands in any manner, provided, however, his salary received from any and all sources did not exceed the sum of \$1000, which was the maximum salary fixed by law at that time, and which he was to receive as full compensation for all services in any county having more than 2000 and not more than 5000 population.

Yours very truly, A. A. GODARD, *Attorney-general.*

JANUARY 18, 1902.

Hon. J. H. Curran, Secretary People's Party State Central Committee, Topeka, Kan.:

DEAR SIR—Yours of the 16th inst., submitting the following questions, duly received:

First. "Would it be legal for the peoples party and the democrat party, having called their conventions at the same time and place, and having agreed on a ticket to be voted on in common, to resolve themselves into a joint convention, nominate the ticket agreed upon and to have same placed upon the official ballot under any other name, such as 'Union Ticket' or 'Fusion Ticket'?"

Under the Australian-ballot law in this state, there are but two ways provided in which a ticket may be placed on the official ballot: (1) Where such ticket has been nominated by a political party possessing a state or national organization, after having adopted an emblem as required by law. (2) Where a ticket has been nominated by petition.

The ticket nominated by a political party must be placed on the official ballot in a column headed by the party name. Where the ticket is nominated by petition, it must appear on the official ballot in a column headed "Independent Ticket." The provisions of law in regard to this matter are so clear that there is no room for any question.

Second. "Can a state political party resolve not to put up a ticket in any state election without forfeiting its right to a place on the official ballot thereafter in succeeding elections?"

Where a political party having a state or national organization, and having duly selected its emblem as required by law, meets in convention and resolves not to nominate any ticket for a given year, that party does not, in my opinion, thereby forfeit its organization or its right thereafter to nominate a ticket at the next general election and have a place on the official ballot under the party name.

The only effect of such action would be to forfeit its representation on the election boards, and its right to claim any special position on the official ballot at the next succeeding election.

Third. "If a regularly called and properly elected delegate state convention of a state party should resolve not to put up a ticket in any state election, could any other man or set of men, not the duly authorized officers of such party, call a succeeding convention under the same name, and, by nominating a ticket, have it placed on the official ballot under the name of the party which had so resolved?"

Where a political party having a state or national organization, and having filed its emblem as required by law, holds a regularly called delegate state convention, and at such convention decides by a majority vote not to place any state ticket in the field for that year, and where subsequently another delegate or mass convention of members of the same party is held which undertakes to nominate a ticket and use the emblem, and objection is made thereto, then the question would be finally determined by the tribunal provided by section 10 of the Australian-ballot law. A political party having a state or national organization, and having chosen the name for such party and selected its emblem as required by law, is entitled, while it maintains such organization, to the sole use of its name and emblem, and such party name or emblem cannot be otherwise used.

Yours very truly, A. A. GODARD, *Attorney-general.*

OCTOBER 25, 1902.

Hon. J. H. Ready, County Attorney, Wellington, Kan.:

DEAR SIR—I have your letter in which you submit the following question: "Will a cross X mark in the square opposite 'No nomination' on the official ballot render the entire ballot void?" Under section 14 of the ballot law, it is provided that "when no nomination has been made by a political party for an office to be filled at the election, . . . the title to such office shall be printed in such party column, and underneath such title shall be printed, in briefer capital type, the words 'No nomination.'" In section 22 of the same act, it is provided that "It shall not be lawful to make any mark upon an official ballot other than the cross X mark used for the purpose of voting, with a pencil having black lead, and that only in the circle at the top of the ticket or in the voting squares at the right of the name of the candidates," etc. Both of these provisions were unquestionably taken by the legislature from the New York ballot law. It will be found that they are similar, on examination, except that in that state the square is to the left of the name of the candidate, and hence they used the word "left" instead of "right," as contained in the last quotation from our statute above made. Now this being true, any decision of the court of appeals of the state of New York construing these provisions, made before the time that the same were enacted into the laws of this state, will probably be followed by our supreme court. It is the policy of our court, where a statute is adopted from another state, to follow the decisions of the court of last resort of that state in construing such statute after its adoption into our own state. The question you submit was before the court of appeals of New York in the year 1898 in the case of *People, ex rel. Feeny, v. Board of Canvassers*, reported in 156 N. Y., commencing at page 36. Justice O'Brien of that court, on page 52, used the following language, viz.:

"There are a few ballots that are affected by the fact that the voting mark was placed in the voting space before the words on the ticket, 'No nomination.' Several of the tickets upon the ballot did not contain a full list of the candidates to be voted for at this election, and in the spaces intended for candidates so omitted were printed the words 'No nomination.' Four of the ballots in ques-

tion contained K marks in the voting spaces before these words; they are Nos. 64, 93, 165, and 178. The following language of section 105 precludes the counting of these ballots, viz.: 'It shall not be lawful to make any mark upon the official ballot other than the cross X mark used for voting, with a pencil having black lead, and that only in the circles, or in the voting spaces to the left of the names of the candidates.' It is manifest that marks made in this way before blanks under the words 'No nomination,' could not have been made in any legal sense for the purpose of voting, and that they were not made in the voting spaces to the left of the names of candidates. It might be a convenient way of facilitating identification of the ballots after being deposited in the box, but plainly it is not permitted by the statute."

Six of the seven judges agreed upon this construction of the statute. The other judge dissented from the opinion of the court in the case, but on a question other than the one affecting the validity of the ballots.

In view of this decision, I am compelled to hold that where a voter makes a cross X mark in the square to the right of the words "No nomination" on the official ballot, such mark will render the entire ballot invalid and no vote thereon can be counted.

Very respectfully yours,

A. A. GODARD, *Attorney-general.*

NOVEMBER 17, 1902.

Hon. C. A. McNeill, Columbus, Kan.:

DEAR SIR—In reply to yours of recent date inquiring as to whether or not justices of the peace are to be elected in cities of the second class at the coming spring election, I beg to say:

Section 2 of article 4 of the constitution reads as follows: "General elections shall be held annually on the Tuesday succeeding the first Monday in November. Township elections shall be held on the first Tuesday in April, until otherwise provided by law."

Assuming that the biennial-elections amendment to the constitution, which was submitted to the voters of this state, has been carried, the section above referred to has been supplanted by a new section, which provides, among other things, as follows: "General elections and township elections shall be held biennially on the Tuesday succeeding the first Monday in November, in the years bearing even numbers. All county and township officers shall hold their offices for a term of two years and until their successors are qualified. . . . All officers whose successors would, under the law as it existed at the time of their election, be elected in an odd-numbered year shall hold office for an additional year and until their successors are qualified."

Under the former constitutional provision, it is apparent that the election of township officers might be held at any time prescribed by the legislature. The constitution provides that the judicial power of the state shall be vested in a supreme court, district courts, probate courts, justices of the peace, and other courts inferior to the supreme court. It also prescribes that two justices of the peace shall be elected in each township, whose term of office shall be two years and that the number of justices of the peace may be increased in any township by law. General section 7814 of the General Statutes of 1901 reads as follows: "No city of more than 2000 inhabitants shall be included within the corporate limits of any township; but each of such cities shall constitute a township for the purpose of electing justices of the peace and constables, as provided in this act, and for the exercise of the powers and jurisdiction of such officers as prescribed by law. In such cities said officers shall be elected at the regular city election."

It is apparent that the office of justice of the peace as now known to our statutes is a constitutional office, and the officers holding these positions are township officers. (*A. T. & S. F. Rld. Co. v. Rice*, 36 Kan. 593, 596.) In the case of *Ward v. Clark*, 35 Kan. 315, it was held that, as the legislature had prescribed for the election of justices of the peace in cities of the first class at the spring election thereof, that the office could not be filled at the general election in November in such city. The court says (beginning on page 317):

"Nothing in the constitution requires that justices of the peace shall be elected at a general election, nor that all justices of the peace shall be chosen at the same election. The legislature has full power to classify the cities and townships of the state, and to prescribe that the election of justices of the peace in cities of the first class shall be held at one time, in cities of the second class at another time, and in townships outside of such cities at still another time, or to make any other like classification of the townships which it may deem proper. A law fixing the time for the election of justices of the peace in any such class as has been done by said section 48, and which operates alike upon all townships coming within that class, is a general law, and not obnoxious to the constitutional requirement that all laws of a general nature shall have a uniform operation throughout the state."

In *The State, ex rel., v. Parry*, 52 Kan. 1, the court, in deciding that women were ineligible to vote for justices of the peace at city elections, said:

"Article 3, section 9, of the constitution, ordains that two justices of the peace shall be elected in each township. If the legislature cannot make a city a township for the purpose of the election of justices of the peace, there can be no such constitutional officers for cities, as the constitution provides for justices of the peace in townships only.

"Within the provisions of the constitution, the statutes of the state, and the decisions of this court, we do not think that a justice of the peace is strictly a city officer, and therefore we do not think that the election of a justice of the peace in a city comes within the term of chapter 230, Laws of 1887. Not only is a justice of the peace a constitutional officer, but, although elected in a city, he is a township officer, and his official duties are not limited to the boundaries of the city in which he is elected. In civil actions, the jurisdiction of justices of the peace is coextensive with the county wherein they may have been elected and reside. (*Civil Proc. before Justices*, § 1.) In all cases of misdemeanor in which the fine does not exceed \$500 and the imprisonment does not exceed one year, the justices of the peace have concurrent original jurisdiction with the district court, coextensive with their respective counties. (*Crim. Proc. before Justices*, § 1.)"

It is apparent, therefore, that justices of the peace are township officers, and the conclusion necessarily follows that township officers should be elected at township elections, and this compels the conclusion, as township elections are to be held on the Tuesday succeeding the first Monday in November in the even-numbered years, that justices of the peace can only be legally elected at that time. I am, therefore, of the opinion that the adoption of this constitutional amendment has changed the time of electing justices of the peace in cities of the second class to the general elections, and that under the latter provision of this amendment, quoted above, the justices of the peace now holding office in such cities will continue to hold after the expiration of the term for which they were chosen.

Yours very truly,

A. A. GODARD, *Attorney-general.*

MARCH 28, 1901.

Mr. Al F. Williams, City Attorney, Columbus, Kan. :

DEAR SIR—I have received yours of the 27th inst., requesting an opinion concerning the law governing the nomination of city officers.

In order to answer your inquiries fully, it is necessary to construe certain provisions of chapter 129 of the Session Laws of 1897, known as the Australian-ballot law.

Section 4 of this act provides the manner in which candidates shall be nominated by a convention, primary, caucus or meeting of a political party, and also the method by which such nominations shall be certified to the proper officers. Section 5 provides for nominations by petition, and prescribes the necessary steps to be taken. Section 6 makes provision as to what the certificate of nominations or nomination papers shall set forth. Section 7 provides the time within which certificates of nominations and nomination papers shall be filed, and requires that in cases of city nominations the certificates and nomination papers shall be filed not less than ten days previous to the election. Section 8 makes provision for the withdrawal of candidates, and requires that nominations for city offices shall be withdrawn not less than eight days previous to the day of election.

Section 9 provides for the filling of vacancies in nominations, and in view of the character of your inquiries, an interpretation of its provisions is called for. This section provides in part as follows:

“In case a candidate who has been duly nominated under the provisions of this act dies before election day, or declines the nomination as in this act provided, or should any certificate of nomination be held *insufficient or inoperative* by the officers with whom they may be filed, the vacancy or vacancies thus occasioned may be filled by the political party or the persons making the original nomination; or, if the time is insufficient therefor, then the vacancy may be filled, if the nomination was by convention, primary, or caucus, in such manner as the convention, primary or caucus had previously provided; or, in case of no such provisions, then by the regularly elected or appointed executive or central committee representing the political party or persons holding such convention, primary meeting, or caucus.”

The section provides also what shall be set forth in the certificates of nominations or nomination papers made to supply such vacancy, and these provisions must be strictly followed.

The question now arises as to whether, in any case where candidates have been nominated in the manner provided by the act, and either through neglect or for any other reason the certificate of nominations or nomination papers are not filed with the proper officer within the time required by the act, a vacancy in such nominations occurs by reason of the fact that such certificate of nominations or nomination papers, not being filed within time, are insufficient or inoperative.

It is my opinion that, if such certificate of nominations or nomination papers are not presented to the proper officer to be filed within the time required by law, they are not entitled to be filed, and are “insufficient or inoperative,” or both. For that reason vacancies in such nominations thereupon arise, and they are such vacancies as may be filled at any time before the election by a compliance with the provisions of said section 9; and, when such vacancies are so filled, it becomes the duty of the clerk to cause the names of candidates so nominated to be placed on the official ballot; and the same is true as to all vacancies caused by the withdrawal of a candidate under the provisions of the act.

In the case of *Rathburn v. Hamilton*, 53 Kan. 471, the supreme court, in construing the provisions of said section 9, said:

“As will be seen, the limitations of time have no application to the filling of

such vacancies by the supplying of nomination papers that have been held insufficient or inoperative. It may be done at any time before election day; and other provisions of the statute show that, after the vacancy is filled or the defect corrected, new ballots should be printed, if it is practicable to do so. This provision prevents the frustration of the purposes of a party or a section of electors who desire to have the name of a candidate upon the official ballot. Neither the death nor the declination of a nominee deprives them of having a candidate to vote for. It prevents the accomplishment of a wrong through an inadvertent mistake or wilful action of an officer or committee, or by the withdrawal of a nominee at a late day, made in the interest of an opposing candidate, or for any other reason."

In consideration of the views already herein expressed and of the authority above quoted, it is my opinion that, by a compliance with the provisions of sections 6 and 9 of said chapter 129, vacancies in the nominations of city officers whether occasioned by the withdrawal of the nominees or by a failure to file the certificate of nominations or the nomination papers within the time required by law, can be filled at any time before the election; or, at least, at any time so that the ballots can be printed and delivered to the judges of election not less than twelve hours before the time fixed by law for the opening of the polls, as provided in section 15 of said chapter 129.

Yours very truly,

A. A. GODARD, *Attorney-general.*

MARCH 22, 1901.

Mr. W. A. S. Bird, City Attorney, Topeka, Kan.:

DEAR SIR—Yours of the 21st inst., requesting an opinion as to whether a married woman of foreign birth, whose husband has been naturalized, but who has not herself been naturalized, has the right to vote at city elections, is at hand.

Section 1904, United States Revised Statutes, being the act of February 10, 1855, provides that "Any woman who is now or may hereafter be married to a citizen of the United States, and who might herself be lawfully naturalized, shall be deemed a citizen."

Our constitution permits any white male person of twenty-one years and upwards, who has resided six months in the state next preceding any election, and thirty days in the township or ward in which he offers to vote, to cast his ballot, if he is a citizen of the United States, or a person of foreign birth who shall have declared his intention to become a citizen conformable to the laws of the United States on the subject of naturalization.

The municipal-suffrage act of 1887 permits women to vote in the cities for the election of city or school officers or for the purpose of authorizing the issuance of any bonds for school purposes, under like restrictions and qualifications as men.

Hence, women foreign born, who might lawfully be naturalized, and who possess all other necessary qualifications, may vote if their husbands are fully naturalized citizens.

But such women whose husbands have taken out only their first papers and have not foresworn allegiance to their sovereigns and been clothed with full citizenship must either begin the process of naturalization themselves, by filing the proper declarations of intention to become citizens, or else wait until their husbands are fully naturalized, before they can lawfully vote.

Filing the declaration of intention and taking out the first papers does not make an alien a citizen, nor does it make his wife a citizen. Section 2164, United States Revised Statutes, provides that when such a man dies before being

naturalized, and after filing the declaration of intention, his widow and children shall be considered citizens upon taking the oaths prescribed by law. Except in such special cases—and then, only by virtue of this express provision, citizenship comes to the wife only upon the full naturalization of her husband; and as a man who is not a citizen cannot vote until he has declared his intention to become one, neither can a woman, not a citizen, vote until after declaring such intention, or until her husband has become a citizen.

As authorities, I would cite: *Headman v. Rose*, 63 Ga. 458; *Kreitz v. Behrensmeyer*, 125 Del. 141; *Kane v. McCarthy*, 63 N. C. 299; *Leonard v. Grant*, 5 Fed. 11; *United States v. Kellar*, 13 Fed. 82; *Kelley v. Owen*, 7 Wall. 496; foot-note to *Comitis v. Parkson*, 228 R. A. 148; *Webster on Naturalization*, pp. 54, 76, 77.

Yours very truly,

A. A. GODARD, *Attorney-general*.

DECEMBER 31, 1901.

Mr. E. A. Berry, County Attorney, Marysville, Kan.:

DEAR SIR—In reply to your inquiry, I desire to say that I have already held that it is the duty of the board of county commissioners to pay for the printing of ballots under the Australian-ballot law on the basis of the whole number of ballots printed for use in the county, and not on the basis of each township separately. On the 16th of this month I wired J. A. Broughton, at Marysville, to this effect. I had an inquiry from him regarding the matter on behalf of the board of county commissioners of your county. I had, previous to that time, officially passed upon this question. In my opinion, it is the duty of the board of county commissioners to contract for the ballots to be used as a whole. This would seem to be the clear inference of the law, and there is no provision giving them authority to contract for each township separately. If each township simply paid the expense of the ballots printed for that township and for the other expenses under the law made by it, without any regard to the other townships of the county, then there would be a reason for holding that the law contemplated that when the contract was made for the printing of the ballots for use in the county it should be on the basis of each township by itself. However, under section 1 of the Australian-ballot law "the printing and distribution of ballots and all other expenses connected with or growing out of the provisions of this act, or that are necessary to provide for the elections thereunder, shall be paid by the townships and cities of the first and second classes; and it shall be the duty of the county commissioners to apportion such expenses to the townships and cities of a county in proportion to the votes cast at the last preceding general election in each township and city. It shall be the duty of the county clerk to charge such expenses, as apportioned by the board of county commissioners, to the general fund of the several townships and cities of the first and second classes."

Under this provision of the law, it is clearly the duty of the board of county commissioners to ascertain the total amount of expenses growing out of the elections held under the Australian-ballot law in a county and pay for the same; then the expense is apportioned among the various townships and cities and they are to reimburse the county for such expenses. Taking all the provisions of the Australian-ballot law together that have reference to this matter, I do not see how it is possible to reach any other conclusion than that stated by me above.

As to what effect a contract entered into by your board of county commissioners with some person for the printing of the official ballots for the county in some previous year, I desire to say that I do not think such contract should be taken into consideration this year. Even if the contract referred to was entered

into with the purpose of its being a valid contract until changed by the board, I do not think that would alter the situation. Under the decisions of our supreme court, it is very doubtful indeed whether the board has any right to make a contract for work of this kind one year which shall be binding on the board in any subsequent year. If the contract referred to was entered into prior to the changes made in the Australian-ballot law by the last legislature, then it clearly would be binding no longer, as that contract was made when all the different tickets, both county and township, and all officers and questions to be voted for, were printed on one ballot.

Under the law now a separate ticket is printed for state and county officers, another one for township officers, and another one for constitutional amendments. Under this law, some of the tickets will always be very small, and the law certainly does not authorize nor intend that the board of county commissioners will pay as much for printing them as for printing a single ballot required under the old law. One of the ballots printed in your county this year simply contained the names of the candidates for county commissioner, the biennial-election law having wiped out any election of county officers for this year except the county commissioner. It seems to me to be clearly the duty of your board of county commissioners to pay for the printing of these ballots simply what is a reasonable and fair compensation for such work, and no more.

Yours very truly, A. A. GODARD, *Attorney-general.*

OCTOBER 18, 1902.

Mr. W. S. Roark, County Attorney, Junction City, Kan.:

DEAR SIR—In reply to your questions as to the method of voting to be followed by railroad employees desiring to vote away from home, I desire to say that section 1 of chapter 180 of the Laws of 1901 provides that any employee of a railroad company, being a qualified elector, unavoidably absent from his township or ward because of his duties or occupation or business, may vote for county, district or state officers, members of the legislature, members of Congress and electors of president and vice-president of the United States in any voting precinct where he may present himself on the day of election, under the prescribed regulations.

The statute further provides that after taking the oath prescribed he shall be given a blank official ballot, as in case of a resident voter.

It is apparent that if he be at a voting place outside of the congressional district, or legislative district, or judicial district, or county in which he resides, the general ballot furnished him will not supply his needs. The number of such congressional, judicial or legislative district will be wrong, and the names of candidates for county officers to be voted for will also be wrong. He must not, therefore, under any circumstances, mark his ballot in the circle at the head of the column. He should vote for the state officers of his choice by making a cross in the square at the right of their respective names. He should write the names of the county officers for whom he desires to vote in the blank column at the right of the ballot and make a mark opposite their names. I am also of the opinion that he should write the names of the candidates for Congress, representative and district judge in the proper places in the blank column and make a cross opposite their names.

The question which now arises is, whether the numbers of these districts as printed on the ballots should be changed by the voter. It is provided in section 10 of chapter 177 of the Laws of 1901 that it shall not be lawful to make any

mark upon an official ballot other than the cross-mark used for the purpose of voting, or to erase any figure or letter or word therefrom. It is again provided, in section 11 of the same act, that no ballot upon which there shall be found any other mark except the cross-mark for the purpose of voting, or upon which there shall have been erased any figure, or letter, or word, shall be counted. These provisions must be considered in harmony with the provisions of section 1 of the act first above referred to, which permits such voter to vote for these officers at any voting precinct in the state. There is no provision of law for printing ballots to fit such occasions; hence the voter has the right to vote for these officers upon the ballot which is furnished him, and to have such vote counted, and the question which then arises is, whether or not a vote cast in one county to be counted in another, which shows upon its face that the person voted for is mentioned as the candidate of a different district from that in which the vote is to be counted, can be held a proper vote in the district in which it is received.

The evident purpose of the law in prohibiting the placing of marks upon the ballot except the cross used for voting, or the erasing of letters or figures or words therefrom, was intended to prevent the voter from making the identification of his ballot possible. It would seem that if the voter changes the number of a congressional, judicial or legislative district from that printed on the ballot given him for his use to the proper number of the district in which he resides, and for which his vote should be counted, that, as a matter of equity and justice, the courts should hold the ballot good, and that unless other objections existed it should be counted in its entirety. It would also seem that, if a voter casts his vote for member of Congress, judge, or representative, it should be considered and counted as a vote for the election of such person to that office in the district in which the voter resides, regardless of the fact that the ballot given him is printed with the number of a different congressional, judicial or legislative district.

The last method of voting is, in my judgment, less in conflict with the election law of this state than the former, and it is therefore my opinion that the railroad men voting in precincts other than their own should not make any change in the form of the ballot given them, but should write the names of their candidates in the blank column at the right of the ballot in all cases in which such names are not printed on the ballot, and vote for them by making the proper cross mark.

Yours very truly,

A. A. GODARD, *Attorney-general.*

**A KANSAS SCHOOL PRODUCT,
1902.**

ADVANCE PAGES

OF THE

THIRTEENTH BIENNIAL REPORT

OF THE

DEPARTMENT OF PUBLIC INSTRUCTION

STATE OF KANSAS,

FOR THE

YEARS ENDING JUNE 30, 1901, AND JUNE 30, 1902.

TOPEKA:
W. Y. MORGAN, STATE PRINTER.
1902.

STATE OF KANSAS,
DEPARTMENT OF PUBLIC INSTRUCTION, }
TOPEKA, December 1, 1902.

To the Teachers of Kansas:

I am glad to submit herewith the advance pages of the Thirteenth Biennial Report of the Department of Public Instruction. These advance pages contain everything that will appear in the complete report, with the exception of the various statistical tables. I have, however, inserted a condensed statistical table containing the summaries of the tables of the complete report.

I hope the teachers of the state will find something of interest and value in these advance pages.

Yours for the cause of education,

FRANK NELSON,
State Superintendent of Public Instruction.

SUPERINTENDENTS OF PUBLIC INSTRUCTION, 1858-1903.

TERRITORIAL SUPERINTENDENTS.

JAMES H. NOTEWARE, March, 1858, to December, 1858.

SAMUEL WILEY GREER, December, 1858, to January, 1861.

JOHN C. DOUGLAS, January, 1861, and February, 1861.

STATE SUPERINTENDENTS.

WILLIAM WILEY GRIFFITH, February, 1861, to February, 1862.

SIMEON M. THORP, March, 1862, to January, 1863.

ISAAC T. GOODNOW, January, 1863, to January, 1867.

PETER McVICAR, January, 1867, to January, 1871.

HUGH DE FRANCE McCARTY, January, 1871, to January, 1875.

JOHN FRASER, January, 1875, to January, 1877.

ALLEN BORSELEY LEMMON, January, 1877, to January, 1881.

HENRY CLAY SPEER, January, 1881, to January, 1885.

JOSEPH HADDEN LAWHEAD, January, 1885, to January, 1889.

GEORGE W. WINANS, January, 1889, to January, 1893.

HENRY NEWTON GAINES, January, 1893, to January, 1895.

EDMUND STANLEY, January, 1895, to January, 1897.

WILLIAM STRYKER, January, 1897, to January, 1899.

FRANK NELSON, January, 1899, to January, 1903.

I. L. DAYHOFF, January, 1903, to —.

STATE TEACHERS' ASSOCIATION.

JOSEPH HILL, *President*, Emporia.
BERTHA MARLATT, *Secretary*, Concordia.
W. C. LANSDON, *Treasurer*, Fort Scott.

“**H**OWEVER much the subject of education is discussed, it cannot be discussed too much or too earnestly. We must remember that the constitution itself is only a means for our common protection. That which imparts to its efficiency—that which gives to it an all-penetrating vigor—is the instructed spirit of the people. We owe it, then, to ourselves and to our posterity, as our first and highest duty, to spread the means of education before the youth of our state; to make parents feel it a necessity; to cause the public to demand it as a duty and a right.”—Annual message of Governor THOMAS CARNEY, January 13, 1884.

“If there be one thing more than any other to which the whole energy of the state should be directed, it is the education of the rising generation, that they may be well informed on all subjects of importance, and the public policy of the country guided by wisdom and truth.”—Message of Governor SAMUEL J. CRAWFORD, January 11, 1885.

“Only in so far as you provide for keeping knowledge abreast with our development in other respects do you secure the state from detriment.”—Annual message of Governor JAMES H. HARVEY, January 12, 1889.

REPORT OF THE SUPERINTENDENT.

STATE BOARD OF EDUCATION.

The State Board of Education has held meetings as follows: March 15, 1901; June 21, 1901; August 2, 1901; October 7–11, 1901; October 28, 1901; November 4, 1901; December 28, 1901; March 6, 1902; June 21, 1902; October 10, 1902.

On September 1, 1901, the resignation of Dr. F. H. Snow as chancellor of the State University caused a vacancy in the membership of the board. This vacancy was filled by the appointment of W. C. Spangler as acting chancellor. Mr. Spangler served as a member of the board until August 1, 1902, when Dr. Frank Strong assumed the duties of chancellor of the University of Kansas, and by virtue of that position became a member of the State Board of Education.

June 4, 1901, Dr. A. R. Taylor resigned as president of the State Normal School, and by reason of this resignation severed his connection with the State Board of Education. Prof. J. N. Wilkinson succeeded him.

No other changes in the membership of the board has occurred during this term of two years.

STATE EXAMINATIONS.

Examinations in the professional and academic subjects for state teachers' certificate were held, during the biennial period covered by this report, at times and places as follows:

May 15, 16, 1901: Holton, Salina, Baldwin, Lawrence, Ottawa, Topeka, Great Bend, McPherson, Lindsborg, Sterling, Lecompton, Winfield, Nickerson, Wichita, Emporia, Manhattan, and Olathe.

August 30 to September 7, 1901: Topeka, Lawrence, Manhattan, Emporia, Holton, Beloit, Lyons, Wa Keeney, Fort Scott, Columbus, Salina, Paola, and Hutchinson.

May 21, 22, 1902: Topeka, Lawrence, Manhattan, Emporia, Holton, Beloit, Wichita, Winfield, Great Bend, Salina, Lindsborg, Ottawa, Leocompton, Hays City, Nickerson, and Baldwin.

August 25-30, 1902: Topeka, Lawrence, Manhattan, Emporia, Holton, Beloit, Salina, Paola, Hays City, Wichita, Anthony, and Fort Scott.

Rules and Regulations Governing the Issuing of State Certificates, Life Diplomas, and Conductors' and Instructors' Certificates.

QUALIFICATIONS FOR STATE CERTIFICATE.

To be entitled to a three-year certificate, the candidate—

I. Must pass a satisfactory examination in the following branches:

- (1) *English*.—Spelling, reading, penmanship, composition, and grammar, including the structure of words, rhetoric, and literature.
- (2) *Mathematics*.—Arithmetic, bookkeeping, algebra, and plane and solid geometry.
- (3) *Geography*.—Physical and political.
- (4) *History*.—United States history, general history, and civil government, including the government of Kansas.
- (5) *Physiology*.
- (6) *Natural Philosophy*.
- (7) *Botany*.
- (8) *Zoology*.
- (9) *Drawing*.
- (10) *Music*.
- (11) *Mental Science*.
- (12) *Professional Subjects*.—Philosophy of education, history of education, school law, school management, and methods of instruction.

II. Must have taught one year.

III. Must produce satisfactory testimonials from reputable persons in regard to temper, manners, moral character, and professional standing.

IV. A candidate for the three-year certificate may substitute for any two of the branches numbered 7, 8, 9, and 10 (previously mentioned), any two of the following branches required for the diploma: Political economy, chemistry, Latin.

QUALIFICATIONS FOR STATE DIPLOMA.

To be entitled to a state diploma on examination, the candidate—

1. Must pass a satisfactory examination in all the branches required for a three-year certificate, together with geology, political economy, and Latin. German or French may be substituted for Latin.

2. Must have taught five years, two of which must have been in the state of Kansas.

3. Must present testimonials as required of the candidates for certificates.

The attention of candidates is invited to the following

RULES.

1. Each candidate will be required to present the requisite testimonials and

make out application on blank furnished by examiner before commencing the examination.

2. The examination questions in each branch will be given to candidates at the beginning of the time allotted to the examination in that branch, and at the expiration of that time the written answers will be collected.

3. During the examination the candidates shall be seated as far apart as possible, and they will not be allowed to communicate with one another.

4. Answers should be brief, but must be complete in logical exposition and in grammatical structure. The answers in mathematics must show the *process* as well as the *result* in each case.

5. In grading candidates, due weight will be given to the character of manuscripts in regard to penmanship and neatness of arrangement of answers.

6. The standing of candidates in spelling, composition and penmanship will be determined in part by the character of their respective manuscripts.

7. One hundred per centum will denote perfection.

8. An average standing of eighty-five per centum, with not less than seventy in any topic, will be required for a certificate. An average standing of eighty-five per centum, with not less than seventy in any topic, will be required for a state diploma. Grades of the required average may be carried for two years.

9. Candidates are required to write with ink, upon legal-cap paper of standard size, and deliver the same unfolded.

10. The examinations in advanced subjects will comprehend the matter embraced in text-books used in the collegiate departments of first-class colleges.

11. These certificates and diplomas supersede the necessity of any and all other examinations of the persons holding them by county, city or local boards of examiners, and are valid in any county, city, town or school district in the state for the term of years therein set forth.

12. State examinations will be held the last week in August, at Topeka, Lawrence, Manhattan, Emporia, Holton, Beloit, and at such other places as may be requested. Requests must come from county superintendents, who will agree to conduct the examination according to the rules of the board, and at points where not less than six persons are known to desire to take the examination. Examinations in the professional subjects will be held at the accredited colleges of the state on the third Wednesday and Thursday of May in each year.

13. Graduates of the arts course of any accredited institution of learning whose course shall have included the course in pedagogy as prescribed by the law of 1899 will be granted a state certificate, valid for three years. At the expiration of that period, the holder will be granted a life diploma, upon furnishing satisfactory evidence of having taught successfully at least two years out of the three.

14. Graduates of the normal course of approved institutions of learning, approved under the law of 1899, will be granted a three-year state certificate without examination. This certificate is not renewable, but the holder thereof may pass the examination in the five professional branches given by the State Board of Education under the law of 1893, and receive certificate therein provided.

15. Graduates of accredited institutions located outside of the state must pass an examination in the five professional branches before receiving the three-years state certificate. The same rule applies to graduates of accredited institutions located in the state whose college course does not include the teachers' course or whose normal department does not maintain a training school offering at least twenty weeks of work in actual teaching.

16. The holder of a state certificate from another state may receive a state

certificate from the State Board of Education in recognition of such certificate ; provided, that the requirements upon which such certificate was granted equal the requirements for a state certificate in Kansas.

17. If three consecutive years elapse in which the holder of a life certificate or life diploma is not actively engaged in school work, the certificate or diploma becomes void. In order to secure recognition for any year, at least fifteen weeks of school work must have been done in that year.

RULES REGULATING INSTITUTE CERTIFICATES.

Requirements of Instructor.

1. He shall have attained the age of twenty-five.
2. He shall have taught five years successfully.
3. He shall be the holder of a state certificate or a life diploma granted by the State Board of Education or the State Normal School, or shall furnish satisfactory evidence of having instructed successfully in one normal institute in Kansas, or shall be a person whose professional fitness for institute work is such as entitles him to special recognition by the State Board of Education.
4. He shall furnish satisfactory evidence of a good moral character.
5. The first certificate shall be granted for one year.
6. Persons holding an instructor's certificate issued by the board, and having instructed successfully in one normal institute in Kansas, may be granted a certificate good for three years.

Requirements of Conductor.

1. He shall have attained the age of twenty-eight.
2. He shall have taught seven years successfully.
3. He shall furnish satisfactory evidence of having instructed successfully under certificate issued by the State Board of Education in three normal institutes, not more than two of which shall have been in one year; provided, that the board may waive this rule in the case of applicants of high professional standing and long experience in educational work.
4. He shall furnish satisfactory evidence of good moral character.
5. The first certificate shall be granted for one year.
6. Persons holding a conductor's certificate issued by the board, and having conducted successfully one normal institute in Kansas, may be granted a certificate good for five years.
7. The state superintendent is instructed not to sign any contract granting the right to conduct a normal institute to any one who is not the holder of a conductor's certificate in force at the time of making the contract.

Requirements for Renewals.

1. At least two of the three previous years must have been spent in active school work. The board interprets this to mean that at least fifteen weeks of school work shall have been done in each year in order to secure recognition of that year's work.
2. Certificates of institute instructors and conductors shall, even though their limit has not expired, become void if three consecutive years have elapsed without as much as fifteen weeks of school work each year.

A PIONEER KANSAS SCHOOLHOUSE. 1860-1870.
In contrast with this, see frontispiece; also, opposite page 32.

HIGH SCHOOL. Rossville, Shawnee county.

NORMAL INSTITUTES.

The county normal institute, after a thorough test of its usefulness, covering a period of more than twenty years, has become an important and indispensable part of our educational system.

Many of the young people who expect to enter the teaching profession need to supplement their academic knowledge with a course in methods of teaching and the institute offers an opportunity for this work.

Until the time comes when those who offer themselves for the important position of teacher in our public schools have had a more thorough academic training, covering at least a good high-school course, and supplemented by a good normal-school training, the county institute must continue to perform this important work.

I am fully aware of the difficulty in arranging a course of study which will give proper emphasis to both the academic subjects and the professional work. Experience would seem to teach that the desired result can best be secured by some system of gradation in the institute. Let those who have just entered the work of teaching be classified in a grade by themselves. In this grade much time should be given to the study of subjects as presented in the regular textbooks. Attention should also be directed to normal-training work.

In the next grade more time should be devoted to purely pedagogical training, and less to academic subjects. A third grade, still more advanced, could be organized, where all the time might be devoted to professional training and a study of pedagogical principles. To carry out a program of this kind will require additional teaching force for the institute. I believe, however, that if the public interest is awakened to the benefits that would thus be derived, sufficient revenue could be secured by proper legislation to enable the institute to do the work with a thorough system of gradation. Since so small a per cent. of our teachers enter the professional schools, something must be done to organize the work of the normal institute along broad professional lines. The institute must not be allowed to develop into a machine for the mere preparation for the county examination.

COURSE OF STUDY FOR COMMON SCHOOLS.

We have an excellent course of study for the common schools of the state. This course has received the careful attention and the best thought of the State Board of Education and other educators of the state. The course of study is, however, in constant need of revision in order to meet the new conditions that come about as a result of the development of our educational work. Our present course should be revised, in order to meet the requirements of the newly adopted state texts. This work will undoubtedly be performed by the incoming State Board of Education.

COMMON-SCHOOL GRADUATION.

The custom of graduating those pupils of our public schools who complete the common-school course has become quite general. The plan is, indeed, becoming very popular. These graduating exercises emphasize the importance of the common-school work, and become the means of causing a large number of pupils to finish the prescribed course of study:

The practice of common-school graduation, however, should not be allowed to lead the graduate to underestimate the need and value of higher education. Those who finish the common-school course should be encouraged to take up the work offered by the high schools and the higher institutions of learning. The common-school course should be regarded as the minimum of work required and not by any means the end of school life. It should serve as an incentive to still higher and better efforts. We must look to the teachers and patrons of the schools to educate the boys and girls to this broader appreciation of the work of the public schools.

READING-CIRCLE WORK.

The introduction of systematic courses in reading for teachers and pupils is one of the important educational movements of recent years. These courses, conducted through the agency of reading circles, aim at a uniform course of reading and study.

In this state the work of the teachers' reading circle is thoroughly organized. During the last few years many valuable works on pedagogy and general culture have been systematically studied by the teachers. In almost every instance a part of each county teachers' examination is based upon the work of the reading circle. This recognition by the State Board of Education has increased the interest in the study of pedagogical books and has been the means of giving the teachers a measure of professional training, such as they would not have received but for this course of reading.

It has been found more difficult to thoroughly organize the work of the pupils' reading circle. In this field it is quite difficult to provide books. The schools are beginning to build up school libraries which, in many cases, are more effective than the course offered by the reading circle. However, a great deal has been done in cultivating among the pupils the habit of reading good books. I am a firm believer in good libraries and in giving the teachers and pupils good books. It is not enough to teach the pupils how to read, but we must also teach them what to read.

LOSSES AND REINFORCEMENTS.

During the past year Kansas has lost by death three of her leading educators.

President C. E. Arnold, of McPherson College, died May 31.

President J. D. Droke, of Lane University, died June 23.

Acting Chancellor W. C. Spangler, of the State University, died October 24.

Each one of these men made valuable contributions to the educational work of the state, and is mourned by a host of sympathizing friends.

Dr. Frank Strong was inaugurated chancellor of the State University last October. The inaugural exercises, October 16, 17, and 18, were attended by leading educators from many of the universities and colleges of the country. It was in many respects the most important educational event in the history of the state during recent years.

Prof. W. F. Hoyt assumed the duties of the presidency of the Kansas Wesleyan University, at Salina, at the beginning of the present school year.

Prof. Edward Frantz succeeded the late President Arnold to the head of McPherson College, at McPherson.

Dr. P. O. Bonebrake was elected to succeed Doctor Droke at Lane University.

Dr. Norman Plass is the newly elected president of Washburn College, Topeka. The installation exercises of this institution were very elaborate and marked a new epoch in the history of Washburn.

The main building of Ottawa University was destroyed by fire during the early fall, on the very day that it was to have been dedicated. It is gratifying to observe, however, that plans are already under way to rebuild, and from the ashes of the old will surely arise a new and larger university.

Bethany College, at Lindsborg, celebrated its twenty-first anniversary during October of this year. The exercises were largely attended.

PIONEER DAY.

On the 29th day of September, this year, I sent the following circular letter to the school people of the state:

"Kansas is only forty years old, and yet she has a history of great interest and value. The founders of our state and the pioneers in the different counties and communities live in the commonwealth which they helped to rear, and we of to-day do well to learn anew their lessons of devotion and sacrifice. The pioneers are the advance agents of civilization. They lay the foundation; they endure hardships; they build homes and churches and schools, and their children enjoy the rich fruitage of their labor.

"Every community in Kansas has a history. Every institution of learning has some heroic chapter. Every school district is the center of some important

event. I believe the school children of Kansas and the students of our higher institutions of learning would appreciate more fully the opportunities which they enjoy to-day if they were made familiar with the hardships and devotion of the pioneers who made possible these opportunities. For this reason, I have thought it appropriate to set aside Friday, October 31, as Pioneer day, to be observed by the schools and the higher institution of learning of the state. It is also earnestly requested that the American flag be displayed from the schoolhouse upon this day.

"An interesting program can easily be prepared. Let the members of the school participate with appropriate essays, declamations, and music. Invite some of the older members of the community to speak in broad and definite terms of the history of the school and the community.

"While the program should deal somewhat with the historic characters of the state, yet special attention should be given to the history of the county and the community. A striking comparison could easily be made of the school work of to-day and that of pioneer days. Attention could be called to the comforts of home and the superior means of intelligence and communication, and the progress that has been made along the different lines of honorable pursuit. Information of this kind comes within the range and observation of the pupil, and will be readily understood and appreciated.

"I trust that this suggestion of observing Pioneer day will meet with the hearty support and cooperation of all friends of education and good citizenship. By observing this day with appropriate exercises, we preserve and promote the spirit of devotion to the state and its institutions, and in so doing we make a positive contribution to good government and to the public welfare."

I was gratified to learn that Pioneer day was observed in a great many of the schools. The exercises fully served the purpose for which they were intended, and more than met the expectations of those who had them in charge.

Exercises of this kind intensify the interest in the school work and serve to make the boys and girls more appreciative of the opportunities which they enjoy. We need to be reminded from time to time of the noble sacrifices made by the founders of our state, and of the splendid privileges which are ours in these early days of the twentieth century. Encouraged by the success of Pioneer day, I feel warranted in recommending that it be made a permanent event in the schools of the state.

THE BIENNIAL REPORT.

The law provides that 1500 copies of the biennial report of the state department of education shall be published and distributed each year. This is too small a number. In the early days of the state this number was no doubt sufficient, but to-day we have over 12,000 school-teachers in Kansas, and each one is entitled to a copy of this report, the only official report of the educational work of the state. The teachers and people are desirous of having copies of this report, and the supply at the present ratio is altogether too small to meet the demand. I would therefore recommend that the law be modified, au-

thorizing the publication of at least 15,000 copies of the biennial report. This will be a good investment for the educational interests of the state.

INSPECTION OF SCHOOLS.

The State Board of Education has made a number of tours of the state inspecting the colleges accredited under the Grattan certificate law.

A state certificate should represent mature experience, broad scholarship, and sound views on pedagogical problems. In order to give the candidate for a state certificate this thorough training, it is important to exercise great care in the character of the course of study and in the methods of instruction. We lower the standard of teaching if we issue state certificates to those who are not competent to do first-class work. The State Board of Education has endeavored to maintain a high standard and has sought the support and cooperation of the accredited schools along this line. The board has emphasized the need of good libraries, laboratories, museums, and has urged that special attention be given to the professional subjects. The Grattan certificate law has proven very successful, and under its operation the accredited schools are making valuable contributions to the profession of teaching.

HIGHER INSTITUTIONS OF LEARNING.

In another place will be found the official reports of the state educational institutions. The State University, the State Normal School and the State Agricultural College are great institutions of learning. Each is doing excellent work along its particular line. Each of these state institutions merits the confidence of the people and the hearty support of all friends of higher education.

The denominational colleges are doing good work. These institutions are obliged, in many cases, to struggle with financial problems, and the question of endowment and financial support is often one of supreme importance. Established as they are upon a broad, Christian foundation, they are worthy of the most earnest support in their efforts to broaden and uplift the educational work of the state. In taking an inventory of our educational work, we must recognize the great worth and value of our church colleges. They are making positive contributions to good citizenship and to the upbuilding of our great state.

THE SALARY OF THE STATE SUPERINTENDENT.

The teachers of Kansas will ask the state legislature this winter to raise the annual salary of the state superintendent of public instruction from \$2000 to \$2500. This will place the salary of this official on the same basis as that of secretary of state, state treasurer, state auditor,

and attorney-general. This is the way it should be. There is not another state officer, with the possible exception of governor, who is called upon to do so much travel and field-work as the state superintendent. The educational work of the state is not clerical in its nature; it is evolutionary. There is constant growth and development along all lines of educational work and new problems pressing for solution. To meet these large requirements, it is necessary to do a great deal of field-work and put forth hard and faithful efforts. It is eminently just, therefore, that the state superintendent should be paid at least as much as the state officers above mentioned. There is every reason to believe that the legislature will look with approval upon this proposition.

PERMANENCY IN EDUCATIONAL WORK.

We are beginning to realize that the educational work of the state must be conducted upon sound business principles in order to give the people the best possible service. No great business institution would think for a moment of turning out the head of the institution at the time he has become thoroughly familiar with the details of the work. And yet, that is just what the state is doing in its educational work under our present rotary system.

The state department of education comes in official touch with 105 county superintendents, several hundred city superintendents, thousands of teachers and school officers; passes upon the requirements for institute and state certificates; renders official opinions of a purely non-political nature; assists in supervising and investing the money of the school fund, and the work in all its different branches is so complex that it requires at least three years for the most competent official to acquaint himself with the details of the department and the educational forces of the state. This leaves but one year, under our present plan, for positive and efficient work. In other words, when the state superintendent has reached the point where he can be of real service to the people and the schools of the state, he is obliged to step out, and a new man comes in and goes through the same process of experimentation. Under such a flexible system of school supervision, it is difficult to work out pressing educational problems or to add to the efficiency of our schools. It is difficult to inaugurate needed reform. It is difficult to outline and execute plans for the improvement of the schools. It is difficult to unify and enlarge the educational forces of the state.

We would not think for a moment of attempting to develop our state educational institutions by changing the head of the institution every two or four years. We would not encourage such a plan for our denominational colleges, academies, or county high schools. Why,

then, should the state maintain such a rotary policy of supervision with the department of education, which represents the highest educational interests of all the people?

There is no greater work in which the state is engaged than that of educating the people. This is the supreme function of free government. The schools belong to the people, and should be conducted for the welfare and advancement of the people. The schools are founded upon the broad principle of equality; they are non-political in their purpose and administration, and should be conducted without any tinge of partizanship. The same degree of permanency that exists in the judiciary should obtain in the state department of education. We recognize that the judge upon the bench of the supreme court becomes valuable to the state by reason of his continued service, and every argument in favor of permanency in the judiciary applies with equal force to the state department of education.

It is encouraging to observe that the idea of permanency in educational work is growing in popular favor and is receiving the indorsement of the people. We have one county superintendent serving the sixth term; several serving the fifth term; a number four terms; and many three terms. In our city schools, it has been found that the best results are secured by retaining the superintendent for a long period of years, and wherever this is done the best educational results are obtained.

The educational thought of the country at large is also in favor of longer tenure of office in educational work. Many of the states of the Union have inaugurated this plan, with the very best results. The following data is interesting as showing the length of term of the state superintendent in some of the states of the Union: Nineteen years, seventeen years, sixteen years, thirteen years, twelve years, eleven years, ten years, eight years, six years. It is also a noticeable fact that wherever this element of permanency has been introduced the most satisfactory results have been obtained.

I have had some correspondence with the state superintendents of the country in regard to permanency in state educational work, and submit the following as indicative of the trend of public opinion upon this important question:

State Superintendent Walter E. Ranger, of Vermont, says: "A superintendent can hardly accomplish large and permanent results except by a long term. The office cannot exercise its highest function except it be an office of power, dignity, and a reasonable tenure."

State Superintendent Barrett, of Iowa, declares that "Thorough knowledge of educational conditions can be had only by years of actual observation and experience."

State Superintendent Olson, of Minnesota, says: "It takes at least one or two terms to become thoroughly acquainted with conditions within the state and by addresses and personal contact throughout the state to secure the confidence and cooperation of the public. The right kind of a state superintendent, after becoming acquainted with the needs and conditions in his state, will have definite ideas and plans for giving a distinctly upward trend to educational movements. These necessarily take time to work out—more than two or four years. To secure the best results, a progressive man should be given ample time to work out large plans."

State Superintendent Baxter, of New Jersey, writes: "Only through permanency in office can a high order of qualification and efficient service be secured. Frequent changes in the official head result in general disturbance and confusion and prevent the carrying out of a distinct and well-conceived policy."

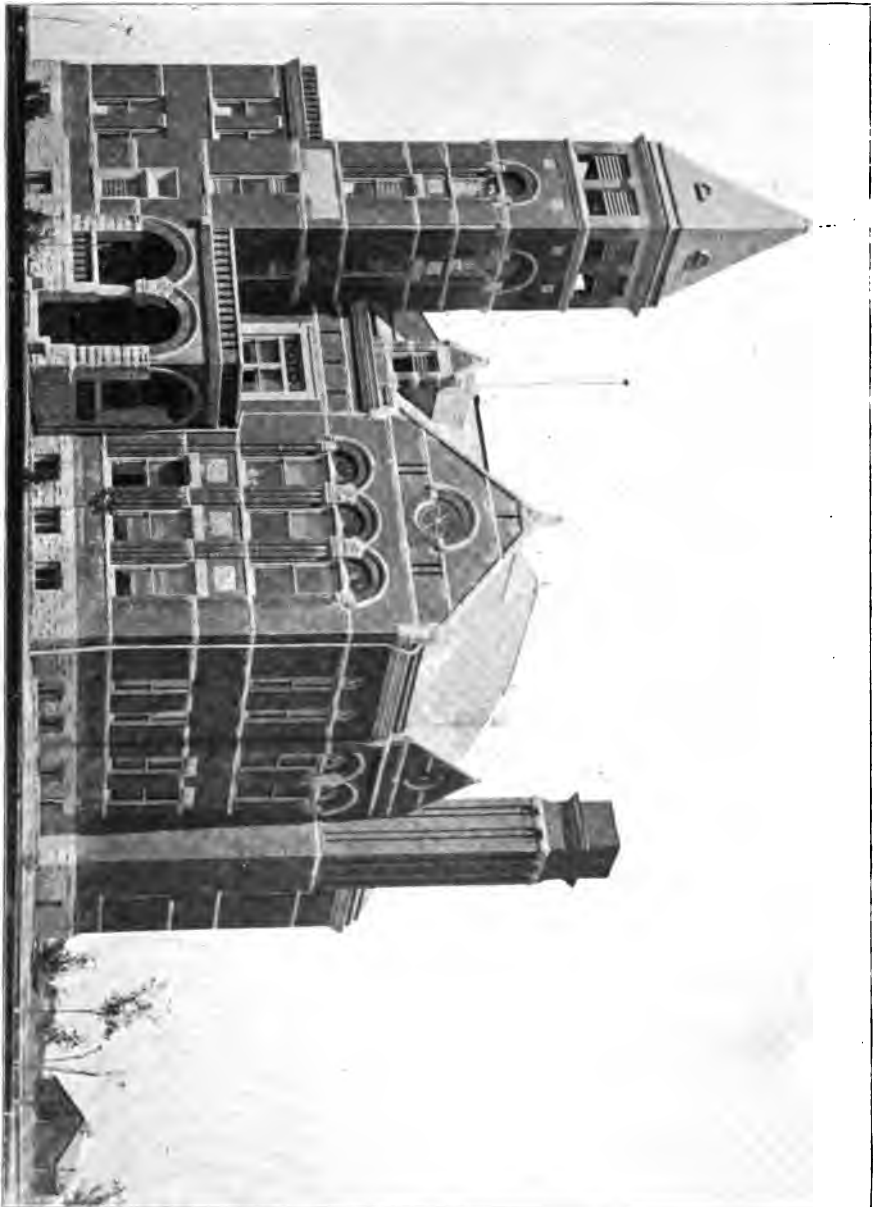

State Superintendent Bayliss, of Illinois, says that "Terms of service should be of sufficient length to allow the incumbent to get something done and to avoid frequent change in the general educational policy of the state. The disadvantage of the rapid-rotation plan is that it practically neutralizes whatever there is of value in a state superintendent's services outside of collecting and preparing the historical material. There must be mutual acquaintance and confidence between a superintendent and the school public before the former can do anything worth while. Confidence is a plant of slow growth."

State Superintendent Skinner, of New York, writes: "It takes at least three years to institute any change in the public-school system, and before results are attained the state superintendent is out of office, or at least liable to be, and a newcomer faces the problems where he commenced, and so short a time does not give any one officer opportunity to institute changes and demonstrate their efficiency before being supplanted by another."

It takes time to lift the educational system of a great state up to a higher plane of usefulness and we should not be discouraged at temporary defeat or at the length of time required for a principle to be incorporated in the policy of the educational work. It is the duty of all who have the welfare of the schools at heart to help shape public opinion in favor of a more perfect system of school organization and supervision.

THE ELECTIVE SYSTEM IN HIGH SCHOOLS.

One of the important educational movements of to-day finds expression in an effort to adapt the course of study of the high school to the duties of practical life. A very large per cent. of the school population of the state never get beyond the high school, and the

ATCHISON COUNTY HIGH SCHOOL, Effingham. See page 71.

conviction is growing that the high school should, so far as possible, prepare the student for his life work. The question of making the course of study in the high school practical, so as to keep the pupils in school, is no longer a debatable one.

I have secured opinions from a number of the city superintendents on the question of electives in the high school, which I am sure will be read with interest. The opinions submitted may safely be taken as an index of the educational thought of the state on this question.

"We believe in the elective system and are practicing it in our high school. We consider that there are foundation studies that must be taken in any complete course of high-school work. These foundation studies comprise about two-fifths of the number of branches taught. After the foundation work is completed, the superstructure depends wholly upon the child's natural ability and his future occupation. To force a child through a fixed course may give him general culture, but not power and position to enter into life in such a way as to make him independent and happy."—M. E. PEARSON, Superintendent City Schools, Kansas City, Kan.

"We offer four courses of study—the Latin-scientific, English-scientific, college-preparatory, and an elective. The Latin-scientific course requires of each graduate eight terms' work in Latin, six terms in sciences, four terms in history, six in mathematics, and eight in English, or seven in mathematics and seven in English. Thirty-two points or terms' work of eighteen weeks each are required in this course. The English-scientific is the same with the exception of Latin. In this course twenty-four points are required. The college-preparatory course requires twenty-eight terms' work. The subjects selected must meet the requirements of the college to be entered and also of our State University. In the elective course, the graduate must have credit for twenty-seven terms' work.

"In addition to the branches indicated above we offer three years' work in German, two in French, six terms in Greek, and four in commercial branches.

"The elective course offered in our school is not purely elective, as eight terms out of the twenty-seven must be in the English department. In branches requiring two or more terms for their completion we give no credits leading to graduation for less than two terms' work. With the limitation just named, a pupil may add to the eight points in English the remaining nineteen points selected from any branches he may have elected and receive a legalized diploma from our school. The permission of an elective course does not seem to conflict with our regular courses, nor do we find the school in any wise hampered by the arrangement. We have found many proofs of the wisdom of this arrangement to meet the needs of special students, and we know that it has met with nothing but the hearty approval of both patrons and pupils. The popularity of such a course is best shown by the large number of students that have elected it, and the increased attendance. It has added over twelve per cent. to the enrolment in the school. This number would be out of school were it not for the privilege of electing studies.

"There are many avenues open to graduates or those having taken four years of preparatory work, provided it is of the right kind. There is scarcely a governmental position that requires proficiency in the third term's work in algebra, or a knowledge of solid geometry, but there is a demand for Spanish, French, international law, etc. If the student spends his time taking the regu-

lar course he is barred from all such places. A regular graduate of a high school may be admitted to the military academy at West Point without examination and still be unprepared to live through the year's work. Had this same student made a judicious choice of studies under the elective system, he could have met both requirements. As to the elective course interfering with college requirements for admission to institutions of higher education, it is now held by many university men that the inability to provide a place for any candidate that has taken four years' work in the preparatory school, regardless of his course, is a fault of the university rather than of the school from which he came.

"Our experience so far has been most decidedly in favor of the elective system in the school, and so long as it meets the personal requirements of the patrons and works no hardship to other courses we can see no reason why it should not receive a hearty support.

"Many of our leading universities are undoubtedly anticipating the universal adoption of elective courses by the secondary schools, as they are making far more elastic entrance requirements. The University of California and the University of Chicago are leading in this country. Even old Oxford, England, is limbering up, after centuries of stubborn resistance."—GEO. W. KENDRICK, Superintendent City Schools, Leavenworth.

"If our high schools and academies are to give mainly general knowledge and the power of correct thinking, it seems that they should have well selected and definite courses—courses not dependent upon the whims of immature minds. Pupils whose ages range from thirteen to seventeen years are not capable of selecting, as a rule, the studies best suited to develop their mental powers, nor are they competent to choose what they will most likely need in the future. I do not believe that the common schools should, at present, become special schools. The backbone of every high-school course ought to be three or four years in English, the same in mathematics, two years in natural science, and about the same in history. Other subjects might be made optional, but few or no elective studies in the first two years."—N. McDONALD, Superintendent City Schools, Parsons.

"I am opposed to the elective system when proper restraining influences are not present to direct and control the choice. Like all other good things, it can easily be abused, as I believe it frequently is. It is not adapted to weak hands. When I find a student "sounding" all the student body to ascertain whether or not certain courses are "hard," and then taking great care to avoid the "hard courses," then I know that the system is being abused. When I hear that Professor A. has small classes because he makes his students work, and that Professor B. has large classes because his courses are "snaps," then I know that the system is abused. When I learn that the college of "Sham" permits students to elect anything, and take any number of courses, and guarantees a fine salary to all its graduates, and confers degrees for two years' work, then I know the system is a failure. When the elective system leads to "short cuts" it is dangerous. *"First the blade, then the ear, and after that the full corn in the ear."* He who would eliminate the time element in an education is a dangerous counselor. When students are permitted to take anything to which their fancy or prejudice happens to direct them, even though the study have no dependence upon former work nor any correlation with present work, then the system is working an injury.

"But I am usually in favor of the most liberal elective system possible:

"1. Because it enables us to supply the demands of our civilization. It is a well-established principle of life that the more advanced it is the more complex it becomes and the more differentiated its parts. This being admitted, it must follow that the course of study that is best adapted to modern life in America must be correspondingly diversified. We have, in our high school at Salina, approximately 100 boys, seventy-five of whom are reasonably certain to become tradesmen, merchants, salesmen, commercial men, tillers of the soil, etc.; twenty-five will probably follow some profession. We are now giving more attention to the twenty-five than to the seventy-five, both in the high school and in the university. President Hadley, of Yale, spoke pointedly and wisely on this phase of our subject at the recent inauguration of Doctor Strong when he said:

'A university, like any other large enterprise, must study public demands. But, to a greater degree than other enterprises, it must also see which of those demands should be encouraged, and what sort of output, besides satisfying the immediate exigencies of the market, will be most beneficial to the country in the long run.

'As I understand it, the country wants three things from our universities. It desires, first, that they should furnish men who have the necessary training and habits to enable them successfully to pursue those callings in life which require book knowledge as their basis. It desires, in the second place, that they shall make discoveries which shall enable the business of the country to be conducted in a more intelligent manner in the future than it has been in the past. It desires, in the third place, that they shall give to their students a training in public spirit which shall make them not merely producers or discoverers, but good citizens.

'The danger in the immediate future is not that our universities shall underrate the importance of training expert lawyers, or doctors, or engineers. The danger is rather that we shall overrate it. Commercial ambition runs so high that anything which enables a man to make money for himself is in these days apt to be unduly emphasized, to the neglect, if not to the detriment, of things which shall do less for the individual and more for the country.'

"It will be noted that the first two of President Hadley's 'public demands' are economic in character, while the third is socialistic and political. This last I should put first in importance. Professor Blackmar has well said: 'Our happiness, our misery, our life, our all, are fast becoming dependent upon general society, and it is the province of the state to forward those studies that best fit its citizens for service in a free country. All general culture must subserve to give to the town, the community, the state or the nation the benefit of individual study and investigation.' This country and this civilization are demanding that its people be given such an education as will best prepare them 'to promote the general welfare and secure the blessing of liberty to ourselves and our posterity.' True, we are to educate so that none become 'dependent paupers or discontented incapables, always a menace to society'; but we are to educate men and women 'who their duties know, but know their rights, and, knowing, dare maintain.' What are the necessities, or even the material luxuries, of life, if life itself be narrow and vicious? Surely, 'life is more than food or the body more than raiment.' This age is demanding that *all* the youth be given such knowledge and culture as will free them from poverty, vice, and degradation, and give them virtue, nobility, and a competency. This it demands whether a pupil follow a profession, a trade, or neither.

"2. I am in favor of the elective system, because it will certainly be the means of evolving both our high school and university out of medieval linguistic ruts. If the three years' Latin now required for university entrance were removed, fully half the high-school students of the state would drop it at once and spend the same three years on history, economics, sociology, biology, chemistry, ethics, philosophy, mechanics, commercial geography, commercial arithmetic, physics, constitutional law, and English, all of which are far more profitable to the non-professional man or woman, as well as to the industrial and political well-being of the state. Great fields of useful knowledge are now, for the first time, open

to students. The result is that they must specialize more. This specialization should be carried on during the last two years of the high school as well as through the entire university course. Present conditions prevent this. The student cannot specialize in the high school, for, if he does, he is excluded from the college and the university. One-third of all his work in both the high school and university must be devoted to a subject possessing only little economic, social or political value. Present conditions demand a change, and it will come. High-school patrons and pupils demand an elective course, and at the same time they demand that the knowledge and culture of the university be open to those who do not choose from five to eight years of foreign language. Their demands should be granted at once. Leading educators everywhere now hold that the study of the historical, economic and natural sciences furnish as ample means for mental discipline and give as valuable a culture as do the languages, while their commercial, sociological and political value is infinitely greater.

"3. I am in favor of the elective system because it enables us to adapt the work to the pupil's endowment; because I believe in high-school extension, which gives us an opportunity to utilize the whole educative force of the community; because it enable us (when outside work is accredited, as I think it should be) to give the prestige of the school trade-mark to all education that is wholesome and helpful.—GEORGE R. CRISSMAN, Superintendent City Schools, Salina.

"I assume that the experience of high-school authorities is common with reference to the marked difference between the number of students who enter high school and the graduating class. Possibly not all of this decrease is due to our trying to force every pupil through the same course of studies, but a large part of it is. I grant the cases due to immaturity, lack of capacity, and the absence of the proper correlation between the grades and the high school.

"Observation and experience in high-school work have converted me to a belief in the advisability and expediency, yea, the necessity, of electives in the high school.

"Is it after all true that the human mind cannot be developed logically beyond the elementary stage without the aid of Latin and algebra? In constructing a course of study for the high school, why not act with the same prudence we commonly do, and work along the lines of least resistance? Education is not so much the learning of any given set of facts, but is rather a process of awakening and stimulating the mind to activity along some line of thought. God did not cast all minds in the same mold. We have too long been proceeding upon the theory that He did. It is as useless as it is destructive. We must recognize diversity of talents, tastes, and dispositions, and respect them, at school just as we do elsewhere.

"But I realize that the validity of all this depends upon the idea one has of the function of the high school. If that function is primarily to fit pupils for the university—if it is to make of the more favored and gifted an intellectual aristocracy, my point of view is absurd.

"However, I deem it time for the high schools of Kansas to declare their independence of this ancient bondage and rise to the broad aim of raising the masses to a higher level of life and usefulness; to help the dull as well as the bright; to do the real work characteristic of our democratic institutions. From this point of view the plan of elective studies is sane and wise.

"Is it not true that pupils will pass by the commonly accepted 'disciplinary' studies and choose the so-called easier ones? That their education would be a farce? The elective course, maybe, makes this possible. But are we not mis-

taken in assuming that our high-school pupils will make such a choice? Is it right to assume a pupil a shirk until it is proven? It certainly is a mistake to proceed upon the assumption that those tasks are the most profitable that we compel our pupils to perform. It is an impelling force, not a compelling force, that develops a child. It is the work a pupil does because he wants to do it that contributes most largely to his growth. When this impelling power is developed, is not the problem of the pupil's education largely solved? Moreover, if I cannot maintain the interest of my pupils under the ordinary course of study, ought I not rather change the conditions than attempt to force the pupil—which generally means forcing him out. I think I rightly assume that every day I can keep a pupil at work, under the helpful and inspiring influences of the school-room, that pupil is being helped in his development. It is not so much a question of the integrity of the course as it is a question of the salvation of the pupil; not so much a question of meeting university requirements as it is meeting the needs of the individual. Again, it is urged that boys and girls of high-school age are not competent to choose their studies. Grant it; are you ready to assert your competency? As teachers, we rightly assume to know the educational value of the subjects in our courses—but do we always know the boys and girls? My plea is this: Had we not rather adapt our course of study to our pupils' needs and tastes rather than adapt our pupils to the course of study? To ignore the capacity and type of mind in the education of children is to render our efforts futile and our best-intended work a failure rather than a blessing.

"The elective course of study necessitates a choice on the part of the pupil. He thus assumes responsibility and it steadies him, sets him to thinking, leads him into an attitude of confidence towards parent and teacher. I need not note the effect of this confidential relation of pupil and teacher. The latter becomes what he should be—and that, too, at the invitation of the pupil—an adviser and a friend, not a mere recorder of grades. Moreover, the parents are brought into this relation and the tendency is to bring them rightfully to share the responsibility in the education of their children.

"The best argument, however, for the elective course in the high school is that the blessings of the secondary school are widely extended. It reaches a large class of children who would otherwise not think of entering high school; and, although many may not master or even attempt Latin and geometry, they will be inspired and developed by their training in literature, history, science, or the commercial branches. Let us have more life and less machine; more heart and fewer cold laws and immutable courses of study. Let us remember that the school is instituted for the child and not the child for the school.—W. S. HAUSER, Superintendent City Schools, Junction City.

"The value of a school to the child depends much upon the efficiency of outer forces in calling into exercise the inner forces of the child. A course of study is the principal outer force thus acting, and the end sought through it should be the nourishment and building up of the inner life of the child.

"Most of our high schools provide two courses of study—one fitting for the college or university, and the other providing liberal instruction in those subjects comprising a fair scientific English education. These courses of study have engaged the earnest attention and consideration of the ablest minds of the age, and it is safe to say that the education of the whole child—mentally, morally, and physically—has been carefully and quite fully provided for.

"The average age of pupils entering the high school is: For girls, about fourteen years; for boys, about fifteen years. Doctor Pickard says: 'As the child

approaches the high-school stage, he understands better his possibilities; he sees the parting of the ways; he chooses a line of study which ends in the shop, the counting-house, the farm, or any of the ordinary industries, or the line which stretches on beyond the high school into the college or professional school.'

"The statement of Doctor Pickard is quite true of a goodly number of those entering the high school, but my observation is, that very many have given very little, if any, consideration to the question of what they are best designed for, and but little instruction is given in the high school to the individual student that would lead to the discovery of his peculiar bent or inclination. As a rule, high-school teachers are better fitted to teach Latin, mathematics, etc., than they are to guide pupils in introspection and self-analysis.

"The high-school student is not competent to elect his course, unaided, but should elect after counseling with teacher, superintendent, and parent. Elective courses too often end in a little bookkeeping and commercial law, and then a dip into business, a failure, and a recruit to the already great army of incompetents."—WM. M. SINCLAIR, Superintendent City Schools, El Dorado.

"We have always permitted our pupils to choose between an English and a Latin course, but having once chosen they must take the full course unless they are excused, and then they must make up everything that they have missed in the course first chosen before being allowed to graduate in it. In the eleventh grade they may substitute German for a part of the work. We are considering allowing more freedom next year. Perhaps we have been a little too strict, but I do think that at least one-half of the work ought to be required. The average high-school student in the ninth and tenth years is not competent to judge what is best for himself, and will choose certain subjects because some friend is taking them, or because they are easy. After they reach the eleventh and twelfth grades they are older and will choose with more judgment. In these grades they might with safety be allowed to select their work. I do not believe that the high school is the place to specialize. There are certain subjects that are necessary to form a foundation for a broad and fully rounded education, and high-school pupils ought to be required to take these and do their specializing in college.—MISS CLIFFORD A. MITCHELL, Superintendent City Schools, Iola.

"The movement to place the work of the high school on an elective basis seems to be growing in favor. Its strength is due to the fact that it seems to provide a satisfactory response to the popular demand for a broader field of instruction in the secondary school, and that it apparently provides for the pupil such work as appeals to his interests and best cultivates the capacities he possesses in the greatest degree. The advocates of the elective system claim for it other and subordinate advantages, such as a fuller attendance in the high school and a better support in the community for the school, growing out of its enlarged attendance, but the two advantages first named are undoubtedly the basis of the movement for the adoption of the system.

"The great and, to my mind, fatal defect in the plan is that it requires or permits the pupil or his parents not only to choose his course, but also to construct it. For purposes of analysis, we may classify the pupils entering the high school into two classes—those who have chosen for themselves, or had chosen for them, a more or less definite purpose for the future; and those who have no definite purpose for the future whatever, but are entering the high school from a very wide variety of motives. To both classes alike, with but very few excep-

tions, it is necessary that the school should stand in the relation of a guide. The pupil who comes with his ultimate destination more or less clear in his mind asks of the school the best way to the realization of that purpose. He is about to journey through an unknown country and the school should point the way. The advice of the school should be crystallized into a fairly well-defined course leading to or toward the goal sought by the pupil. This is just what he asks, and just what he should be given. The pupil who comes with no definite purpose in mind is most assuredly in no fit condition to choose his studies from the large list offered by any high school of considerable size. He is almost entirely without guiding knowledge and inevitably chooses at random, hoping, in the absence of other desires to be attained, to find something pleasing and easy. Rather than this, it is better that he should follow some good general course marked out by the school till the time arrives at which he is ready to adjust his work more closely to his probable future.

"But it has been my experience that, in almost every case, it is possible to learn, either from the pupil or from his parents, enough of his probable future to enable the school to point out to him his most advantageous course. It can nearly always be ascertained whether or not the pupil will attend school after being graduated from the high school. If he is intending to do so, it can be further ascertained what kind of school he desires to enter—a college, a polytechnic school, a school of law or medicine, or a normal school. If he does not expect to enter any other school after leaving the high school, it can be learned whether he wishes to enter business or to learn a trade, or whether he is simply a student seeking the best general education attainable. These matters having been learned, the school cannot go far astray in pointing out to the pupil the course he should follow. If the future of the pupil has not been considered to the extent of deciding thus far upon his probable course, it is high time that it should be, and teachers and principal should urge that it be given the attention that it deserves.

"Rather than election of studies let us have election of courses, and let us have these courses as flexible as may be consistent with strength and efficiency. This may be attained by placing alternative or optional studies in the latter part of the course, and by so coordinating the work of the various courses that pupils who find that they are not in the most profitable course for them may be permitted to change the line of their work and to receive credit for such work as they have successfully accomplished in the schedule of the new course.

"It will undoubtedly be objected to this plan that it calls for an equipment that the average town of the state can scarcely afford, yet it is surely true that no election worthy the name can be offered on a less expensive equipment. The objection, therefore, holds equally against both plans. It is possible, even in the small high school with only one or two courses, to offer to a limited extent a choice of studies in the latter part of the courses, care being taken that the studies so offered are as nearly equal as may be in educative value. Alternative or optional studies offered in this way constitute a very different thing from an elective system, serving, as they do, to strengthen the interest of the pupil, and possibly to arouse him to independent thinking upon the value of these studies to him, but stopping short of permitting him unwittingly to do violence to his educational training.

"I desire to say one thing more. This question of the elective system in high schools is so closely related to the demand for a broader field of instruction in secondary schools that I cannot easily consider them apart from each other. The people are finding that the education furnished by the common schools is

not sufficient for the needs of the times. The college is remote from the home, and costly in both time and money beyond the resources of the many. The people are turning to the high school to meet their needs. The great increase in late years in the number of students in the high schools of the country attests this. If the community cannot maintain the school that the needs of the people demand, then the state should assist in so doing. The state of Kansas has every reason to be proud of the energetic spirit of her people, and of the devotion and enthusiasm of her teachers, but she has very little reason to be proud of her school system. Is it not time to cease boasting of a school system in spite of which we have attained the results we have in education?"—W. A. STACEY, Superintendent City Schools, Burlington.

"Our course contemplates that the student carry four studies for the full four years. As our school is divided into two terms, you see we require thirty-one points for graduation. Of these thirty-one points, eighteen are required and thirteen are elective. The requirements cover five terms of mathematics, four terms of English, five terms of history and civics, one term of elocution, and three terms of science. The electives consist of Latin, university requirements, several terms of English, history, science, German, and French. Also, we offer drawing, bookkeeping, physiology, Greek, commercial arithmetic, and review of common branches.

"By observing this classification, we have our work about equally divided between requirements and electives. We have liked this arrangement very well, for the reason that it gives the student some latitude in adapting himself to his imaginary preferences. On the other hand, it still makes certain foundation lines of work obligatory. And, too, situated as we are, it gives opportunity for students to prepare for special lines of work at the university—the different engineering schools, the schools of arts, fine arts, pharmacy, medicine, etc.

"It may be argued that an elective course requires a larger force of teachers. This is perhaps true if you offer a large list of electives and few requirements. The larger the list of electives, the greater is the liability of having some small classes. And it may be argued that the average high-school student is not sufficiently mature to be trusted to make his own selection. But our experience has proven that wise and discreet counseling will do much toward overcoming any ordinary notion or fancy that the student may have.

"Another great argument favoring an elective system lies in the fact that people, old or young, are happiest when they are conscious of having had something to say in the selection of their work. It is also true that minds do differ not only in aptitude and strength, but also in inclination, tact, and real fitness, or quality of mind. If this is at all true, the individual student should have some voice in selecting his lines of study, if not the order and time in which these subjects should be taken up. Especially is this true of single-term and non-related subjects for study.

"I take it that the school exists for two main purposes, one of which is principal, and the other subordinate: (1) Thorough, full, rounded and systematic development; (2) in its flexibility, to give opportunity for the exercise of individual preference, choice, and needs. No other excuse can be made for its existence. Does not a reasonable list of electives best serve these purposes?"—F. P. SMITH, Superintendent City Schools, Lawrence.

HIGH SCHOOL, Junction City, Riley county.

"When this state established a system of public schools and a university, it was evidently supposed that the one would connect with the other. The weld has taken place in the high school; hence it was only natural that the high school should have been looked upon as a preparatory school for the college or university. The high school is still regarded as such by many people, and among the number are some high-school teachers.

"The reaction against this view has resulted in an error, serious, though not so pathetic as the attempt to fit each high-school student for university work. This new view looks upon the high school as a kind of cheap college. Hence, every subject taught in the university must be miniaturized in the high school. If the university has elective courses so must the high school. Now the question is: How far may the high-school course be selected by the student and retain or secure the best function of the public school? Very few now oppose the selection of some subjects by the pupil. On the other hand, practically none are willing to leave everything to the pupil's wishes. This latter view is certainly a wise one because a very small number of students entering the high school have formed any positive idea of what line of life-work to take up, and of this number a small per cent. hold to that idea. This is so because the age of high-school students is an age of changing interests and ideals—necessarily changing, because of the rapidity of change in the body itself as well as the mind content.

"It is my opinion that certain lines of requirement should be established, and that among these lines pupils ought to be permitted to choose. The lines should each lead toward fitting the pupil—first, to make his own living and control his own acts; second, to make his work an aid to better living and better control; third, to elevate and maintain the ideals of Americanism; fourth, to enlarge in the lives of others the highest standards of culture and refinement; and fifth, to live the best life. If the public maintains a high school, it does so, not from mere sentiment, but from the standpoint of a good business proposition. The terms of the contract require that the students of the high school give something to society. They must not only relieve society of their maintenance, but they must be among those who give healthful inspiration to the higher things—noble aims, clear thinking, and right conduct. Along these lines I heartily favor elective courses in high schools."—T. S. JOHNSON, Superintendent City Schools, McPherson.

"The elective system of studies has taken an assured, and apparently a permanent, place in our American colleges and universities. The process of fitting pegs of all sizes and shapes into holes of a uniform caliber has been relegated to the limbo of exploded educational ideas, and in its place has come a wise adaptation of the curriculum to meet the varying needs of students who may differ widely in temperament, intellectual ability, and taste, as well as in the careers for which they are severally preparing themselves. That the introduction of the elective system into colleges has resulted, on the whole, in a gain, there will be few to deny; but it is just as incontrovertible that there has been some loss. We have gained in breadth of culture but have lost in thoroughness. The system which has produced the specialist has also produced the dilettante. Nevertheless, the consensus of opinion is that the good far outbalances the evil in the elective system of our colleges.

"The question now under discussion is whether or no the elective system should also be introduced into high-school work. That system began at the top, in the universities. Shall it be allowed to extend downward into the high schools, or shall it be considered as the special attribute of the university?

"In my opinion, no dogmatic answer can be given to the question stated above. Much depends on the size and the financial resources of the particular school. But, speaking generally, I am of the opinion that a really elective system has no place in high-school work. By this I do not mean that there should be no choice given to high-school students of what they shall take; but the choice should be rather between courses than between particular branches. Nearly all high schools offer two or more complete courses of study: one which is classical and preparatory for college, and one or more which aim directly at business and commercial pursuits. A choice on these broad lines is the only one that the average high-school student is capable of making with any degree of wisdom. That this is generally recognized is proven by the fact that even in the colleges which grant the privilege of election certain branches are *required* in the freshman year, and the elective system is not in full force until the junior year. Even then, most colleges require that the work be divided in a certain proportion between different departments of study—a direct limitation on the power of choice.

"All this merely goes to show that in the opinion of educators the freshmen of our colleges are not capable of exercising wisely the privilege of electing their studies. If that is true of the freshman class in our colleges, *a fortiori*, how much more true it is of high-school students. Under an elective system the average high-school student, instead of choosing intelligently and with an eye to a future career, would be too likely to follow the line of least resistance, and thus to avoid entirely branches of the greatest disciplinary value. Too often this would be done with the direct consent and connivance of an over-indulgent parent. The students themselves are too young to use the right of election with discretion. If this right be granted to high schools, why not also to the grades? Where draw the line, and why? In my judgment the line is very properly drawn now, between the high school and the college.

"Even if the elective system were thought wise for high-school work, there are practical difficulties in the way. Such a system calls for a larger corps of teachers—freedom of choice is useless unless there be a number of branches to choose from. This would be possible only in the larger schools. Moreover, one course at least would have to be maintained intact without any choice of branches. That is the course which prepares for entrance into the State University, a course which must be rigidly maintained, because university requirements are prescribed and not elective.

"For all the above-mentioned reasons, I am of the opinion that high schools should use a system only partially elective—that is, that there should be provided two or more complete courses, as distinctly differentiated as possible, but all providing a broad basis for the future activities of life; and that the student should be permitted to elect a course, but should have no choice of the branches that compose that course."—RICHARD R. PRICE, Superintendent City Schools, Hutchinson.

"A high-school course should be comprehensive enough to give the student a perspective in the field of learning. All knowledge is related, but the relations seen depend upon the point of view. The course should test the student's power as well as discover his taste. Quantity as well as quality must measure his work. Without a degree of continuity there is neither logic nor training. In the performance of the task lies the value of the choice. The mind is a unit but has manifold activities. Studies differ in the degrees in which they develop these activities. These general considerations form the basis of the following opinions:

"In order that the student shall have an intelligent outlook upon the several

branches of knowledge, the course of study should include typical studies in each. By common classification there are four general divisions of knowledge: Language, history, mathematics, and science. Throughout the course the student should pursue a study in each. No electives should be offered as to the general divisions, but only as to the studies in each. Within the divisions election should be free, subject only to logical order. With such an arrangement choice becomes rational, being founded upon the student's knowledge, power, and predilections. Thus the demands of citizenship and social order, the humanities and the callings, are alike conserved. I would not question the genius of choice. The history of the intellect is overwhelming evidence. The world's economy requires obedience to aptitudes. Native differences express themselves early, and youth is the period of ideals.

"But the elective principle, as too often applied, is but a makeshift for the weak—the number of failures possible to choice—the studies that may be dropped rather than finished. Instead, the privilege of election should be for the faithful. Industry is the first proof of talents. Power, method, training, are the comprehensive products of all true work. They are universal in their application, and the artist needs them no less than the common worker.

"At each step in educational progress there is an increasing demand upon the schools. Knowledge widens and the interests of life are multiplied. Learning and livelihood come into more practical relations. To meet these conditions, courses of study are extended, equipments enlarged, and electives become a necessity—only, let equal emphasis be placed upon the doing and the selection of the work.—R. F. KNIGHT, Superintendent City Schools, Wichita.

"Our high-school course covers four years of work. Each year is divided into two terms of four and one-half months each. In the first year pupils are required to take three studies each term, and thereafter four studies per term. A term's work in any one subject constitutes a unit of credit. Thus, thirty credits, or units of work, must be covered by pupils who complete our high-school course. Of the thirty units of work, fourteen units are required of all pupils; the remaining sixteen units are elective, under wise limitations. Our required units are: Elementary algebra, two units; higher algebra, one unit; geometry, three units; English (American authors), four units; English (rhetoric), two units; general history, two units; total, fourteen units. Our electives include: (1) Languages—Latin, eight units; German, four units; Greek, four units; (2) sciences—elementary science, one unit; physiology, one unit; physics, two units; chemistry, two units; zoology, one unit; botany, one unit; geology, one unit; (3) English—English authors, four units; technical grammar, one unit; (4) history—English history, one unit; United States history, one unit; United States constitution, one unit; (5) trigonometry, one unit; (6) psychology, one unit; total, thirty-five units. From the above thirty-five units of work the pupil must elect and complete sixteen units by the end of his fourth year in the high school.

"We do not claim for our plan that it is ideal; indeed, our course has been a matter of growth, and we hope still further to improve and strengthen it. There are possibly one or two subjects in our required list which should be elective, and one or more subjects in our elective list which should be transferred to the required list—notably, American history and civics. To my mind, these two branches should be required studies in every high school. On the other hand, there are doubtless some subjects on our elective list which we might drop altogether, substituting therefor French and Spanish (certainly the former), po-

litical economy, a course in domestic science, manual training, and the practical branches usually found in the course of study of a commercial high school—bookkeeping, typewriting, and commercial law, arithmetic and geography, as well as industrial history. All these so-called commercial branches should, in my judgment, be placed in the last two years of the high-school course, in order to prevent pupils from cutting their high-school training to less than four full years of work.

“While we give a large elective list, still we throw around the pupil sufficient safeguards to protect him against his immature judgment and the unfortunate influences which, perchance, may lead him to determine on an unwise choice. For we recognize that many pupils will be influenced in their choice by the temporary popularity of some teacher or subject; by the desire to recite in the same class with some pupil friend; by some advanced pupil's like or dislike of certain subjects; by a desire to elect what they imagine to be the ‘easy’ subjects; and last, but not least, by their desire to ‘get out of’ what they find after a term's work to be a ‘hard’ subject.

“Thus, in order to counteract some of these influences, we require that Latin, when elected at the beginning of the course, shall be pursued by the pupil for four full years (unless he be excused or “dismissed” from that study.) In like manner, we require that, if a pupil elect German or Greek, he shall pursue each language for one year; and if he elect the subjects of physics or chemistry, he shall complete the full course in each of those branches. We also require of the third-year pupils (in which year they elect three full studies for the first time), that one of the three subjects elected must be a science and another must be English literature, Latin, or German; all of which constitutes our prescribed limitations—and we believe them to be wise limitations on the choice of the pupil.

“But over and above all these prescribed safeguards, there appears the will-power of the principal, intelligently and surely directing the election of each individual pupil in the school. Herein lies the unwritten and the unseen limitation. Were it not for the presence of this influence and the watchfulness of a strong principal, aided by wise teachers, the whole elective system in secondary schools, to my mind, would prove a sorry failure. Choice, under guidance, is the true underlying principle governing the whole question of electives in our high-school course.—W. M. DAVIDSON, Superintendent City Schools, Topeka.

SCHOOL WORK AT THE STATE PENITENTIARY.

It is interesting to observe that the state is emphasizing the importance of school work at the State Penitentiary. I am glad to quote the following from the biennial report, this year, of the warden, E. B. Jewett. He says:

“There is no question in my judgment as to the good results which will follow by the employment of a principal teacher to take charge of the school. If education develops and strengthens the character of men, and thus enables them to resist those influences which tend to make them criminals, then most certainly ought the state to give to the men in its prisons who do not have even a primary education the opportunity to acquire one. If the establishment of a school at the penitentiary would, through its influence, prevent young men who go out from there from following a criminal life, it would accomplish much; it would be an economical proposition, and certainly a moral one—an economical one, for the

arrest, trial, conviction and maintenance of the prisoner in the penitentiary is expensive. Schools are maintained in nearly every penitentiary in the United States, and in many of these a teacher is employed. While it is not claimed that these penitentiary schools exercise so great an influence as to keep all men who go out from there from following a criminal life and thereby returning again, I believe that they are a factor tending in that direction."

The statement of the chaplain of the penitentiary, J. D. McBrien, in regard to the educational work of the institution, is suggestive and interesting. He says:

"The school is run for nine months in the year, but only on Sundays, and then for about one hour and a half. It will be remembered that we have no means for running the school, except an appropriation of \$100 each year for school-books only. And that is not enough to supply the school with all the books that are needed. The chaplain is the nominal superintendent of the school, but he has the regular Sunday chapel services and the Bible school to attend, and it is impossible for him to give the school his personal attention. The guards, about twelve in number, are on extra duty during school hours, and the superintendent and teachers who have the personal charge of the school are all convicts. And yet, under all these circumstances, the school has been a remarkable success. The last examination was conducted by Professor Hall and his assistants, of the Lansing district school, at my request. . . .

"I cannot consistently close this report without offering a suggestion which, in my judgment, would be a practicable and valuable improvement upon the present prison-school management. I believe that the school work should be placed in charge of a superintendent employed by the board of directors, and not otherwise connected with the prison; and that there should be a night school of two hours each evening, for nine months in the year; that guards ought not to be required to do the extra work necessary to successfully carry on the school without pay for their time and work. If this plan should be adopted, and the legislature would make the necessary appropriations to carry it out, I feel confident that no prisoner who serves a term of two years or more ought to go out of here without a sufficient education to enable him to carry on any ordinary business in which he would likely engage; and the result would more than repay all the additional expense in its economical effects upon the discipline of the prison, and would be of incalculable benefit to those who are sent here. The education of the people is the best preventive of crime, and in my judgment we would not have more than one-fourth of the second-term prisoners here if this policy should be adopted."

In another place in this report will be found some interesting statistics relative to the character and amount of educational work done at the state penitentiary. I am under obligations to Warden Jewett for this information.

RELIGIOUS AND MORAL TRAINING IN THE SCHOOLS.

The tragic death of President McKinley aroused the popular mind to a truer appreciation of religion, morality and patriotism as factors in our national life. Under our form of government, religious instruction must necessarily be entrusted to the home and the church. If we had more religion in the home we would not need so much in the

school. The school, however, should plant itself squarely and firmly on the side of moral and religious influences. We need not apologize for the teachings and ideals of the Great Teacher. The law in this state provides that teachers may read the Bible in the schools without comment, and every teacher should exercise this right. The National Educational Association, at its annual convention at Minneapolis, Minn., last July, adopted the following resolution, which is suggestive of the trend of public opinion on the question of religious training:

"We regard true education as inseparable from morality, and believe that the public school is the recognized agency to make this relation binding. We urge public-school authorities of this country, teachers and parents, to give strict attention to moral instruction in our schools as the true foundation of character and citizenship. Every consideration of good public policy and healthful social conditions points to the necessity of such instruction; the testimony of educational leaders justifies it, and an overwhelming public opinion demands it. We plead not for sectarian training of any kind, but for that moral instruction which must underlie true life and character."

It is encouraging to observe the growth of the Christian spirit at our higher institutions of learning. Kansas is fortunate in having among her teachers and educators men and women whose Christian character is an inspiration to the youth of the state. The forces of organized evil always stand together, and we need to urge the supreme importance of a union of those mighty civic and religious forces that constitute the hope as well as the preservation of our civilization.

The Young Men's Christian Association and the Young Women's Christian Associations at our state, denominational and private institutions are making valuable contributions to good citizenship. These associations emphasize the spirit of helpfulness—the most beautiful spirit in our modern educational life. They also exert a far-reaching influence for good, not only upon the individual student, but upon the student body as a whole.

PATRIOTISM IN THE PUBLIC SCHOOLS.

Regarding the question of patriotism, it is a matter of supreme pleasure to record that the red flag of anarchy has never found a place in the American schoolhouse and it never will. Anarchists are not the products of the school, but of the dark dens of the streets and the ignorant and lawless homes. The school stands for law and order, and for social and civic righteousness. It is the twin companion of free government. The influence of the school is felt in every noble sentiment and in every just decree.

MUSIC IN THE PUBLIC SCHOOLS.

The people of Kansas are lovers of music. In the attention given to high-class music, Kansas occupies a prominent place. She is far in advance of many of the states. The annual rendition of the "Messiah"

at Bethany College, Lindsborg; the musical jubilee at Hutchinson; the rendition of "Joseph" by the Musical Union at McPherson; the high-class entertainments of the Topeka choral union; the musical work at four summer Chautauquas in the state, together with the excellent musical departments at many of our state and denominational institutions of learning, bear positive testimony to the interest taken by the people of Kansas in the subject of music.

Music is also finding its way into the public schools. It is taught in at least forty-five per cent. of the schools of the state. This is encouraging. The voice should be trained not only to read, but to sing. It is becoming apparent that the influence of good music has a practical value to the state, in that its moral, esthetic and patriotic effect upon the pupil makes for a better citizenship.

It is hardly wise that a subject which enters so largely into practical life should be left to a promiscuous development. Already the demand for teachers qualified to teach vocal music in public schools far exceeds the supply. Since this demand exists, it would seem proper that some means should be devised to protect the pupils from unskilful if not pernicious teaching by persons wholly lacking in preparation for work in school music. No great hardship would be wrought upon any one having the spirit of the true teacher if all teachers should be required to show a reasonable knowledge of the rudiments of vocal music with reference to the demands of the school-room. It would also seem proper that special teachers of music in schools and institutes should be required to show a degree of familiarity with other lines of school work, to the end that all work covered by a course of study might be done without friction.

At this time most of the larger cities in Kansas are pursuing the study of music under competent supervision. The greatest need for competent teachers of music is in village and rural schools, where close supervision is impracticable. The humblest child in the remote district is entitled to tread the same educational paths as those of the more favored. Right conditions will exist only when this is made possible.

The province of the public school in music, as in other branches, is not to develop specialists, but to prepare the masses to specialize if they so desire. It were better that a people as a whole be taught to sing reasonably well, than that a few be trained to a high degree of proficiency. Happy is that nation in whose homes are heard the songs which are the outgrowth of its national life! The breath of treason was never yet made vocal in patriotic song, and anarchy is ever songless!

It is for the purpose of encouraging song in the homes of our people—the development of the practical side of music through the

medium of the public schools of our state—that I ask a most respectful consideration of this subject by the state legislature.

COUNTY HIGH SCHOOLS.

Kansas stands alone in her splendid system of county high schools. We now have twelve county high schools in the state, and each one is doing good work. These schools give to the pupils of the entire county a chance to secure a good high-school education, and enable parents to give their children a thorough education right at home. They build up a strong educational sentiment throughout the county. This plan of school organization is a decided success, and should be encouraged.

INTERIOR OF SCHOOLHOUSE.

I have had occasion to visit a good many schoolhouses during the past few years, and would earnestly urge upon teachers and school officers the supreme importance of decorating the walls of the schoolhouse with choice and appropriate pictures and mottoes. It is gratifying to note that in many school districts of the state the esthetic sentiment is quite pronounced, and as a result the schoolhouses are neat and attractive. Public sentiment should be thoroughly educated along this line. The child spends the most important years during its formative period in the schoolhouse, and hence the surroundings should be suggestive of the highest ideals of correct living and doing. Make the school life of the child full of sunshine and hope. Add inspiration to the work of the text-book, by making the schoolhouse attractive and inviting. The pupil will respond to this generous impulse to a higher and cleaner life, and the work of the school will become a positive force in the life of the community.

It is wrong to allow pupils to sit from month to month and from year to year in a dark and dirty schoolroom. It is poor economy. It costs but very little to decorate the walls of the schoolhouse. Money invested for this purpose will bring good results. There is not a school district in Kansas but what can afford to add some improvements from year to year to the decoration of the walls of the schoolhouse.

SCHOOL GARDENING.

It is equally important to make the exterior of the schoolhouse conducive to the child's comfort and well-being. This includes the condition of the schoolhouse, the outhouses and fences, and the playgrounds. I am glad that the county superintendents are urging school officers to keep the playground in the very best possible condition, and I heartily indorse every suggestion made along this line.

The time has come in Kansas when we must give attention to school gardening as a means of beautifying the schoolhouse

grounds. The plan is very simple and can be carried out without difficulty. The children delight to do the work, and there is a great educational value in the training which they receive in caring for the plants in the little school garden. I would suggest that a part of the playgrounds be set aside for garden plats. Here the pupils should be taught the practical growing and caring for at least a few plants. The immediate effect of such work would be to make the pupils acquainted with at least a few flowers, and to teach them to love and appreciate the beauties of nature. I am fully convinced that training along this line would do much to create a wholesome interest for the making of gardens at home, and ere long many of the bleak and barren places in our towns and rural communities would become beautiful. This plan of school gardening is of special importance to the pupils in our cities. We can do much in this simple, practical way to create a clean public sentiment and a strong civic pride which will eventually lead to neater and more attractive streets and yards of dwelling-houses.

AGE LIMIT FOR TEACHERS' CERTIFICATE.

Some modification of the law should be made in regard to teachers' certificates. Under present conditions, a sixteen-year-old person who secures a third-grade certificate can teach in the schools of the state. This is not conducive to the best interests of our educational work. Teaching is important work. It is character-building. A child cannot teach a child. A child should not be permitted to experiment upon the intellectual life of a child. I call a sixteen-year-old teacher a child in educational work. The criticism is just, so far as the educational and professional phases of the question are concerned. The early education of the pupil is of supreme importance. It has a direct bearing upon the future life of the child. This training should, therefore, be of the very best, and in line with sound pedagogical principles. When the child enters school, it should have the very best teacher. There are more pupils in the lower grades than in any of the other grades. Here, then, is where the best teachers should be employed. As a rule, however, we find the beginners, the holders of a third-grade certificate, those who have never had any experience in teaching, doing this supremely important work. In the cities, of course, the primary teacher does the work. A good primary teacher is a blessing to the community, but there are few, if any, primary teachers in the rural schools. One teacher has all the work, and hence should be thoroughly qualified.

To remedy this evil, the age limit of the teacher should be raised. At least seventeen years should be required for a third-grade certificate. The age limit for the second- and first-grade certificate should also be advanced proportionately.

REVENUES FOR SCHOOLS.

We should have a more equitable system of revenues for the support of our schools. I earnestly hope that the coming legislature will enact a law of such a character as to give the schools of the state an equitable tax system. The schools belong to the people and represent the only industry in which the whole state is interested. Why, then, should they not have the most loyal and generous support of the state? It is well for the legislature to be liberal in its support of the higher institutions of learning, but we should remember that the public schools constitute the foundation of our educational system. Here we educate more than forty per cent. of the children of the state and a great many of them never get beyond the public schools. The state can, therefore, well afford to be liberal in its support of the public-school system. The teachers of Kansas have pleaded during all these years for a more equitable basis of school revenues, and in the interests of the boys and girls of to-day, and of the children of the future of our commonwealth, we ask that this question be fully and fairly considered. Give us a better system of school taxes and the means of supporting schools will be increased and enlarged. This will give us better teachers and better schools. What we do for the teacher we do for the school; what we do for the school we do for the community; and what we do for the community we do for the state.

THE RELATION OF THE HIGH SCHOOL TO THE COLLEGE.

It seems to me that we should give more attention to the work of the high school. A well-equipped high school is a great educational power in the community and in the state. In this day, when tremendous efforts are being made along all lines of human endeavor to bring the larger privileges of life nearer to the people, it would be well to educate public sentiment to a broader appreciation of the value and scope of the high school. By establishing strong graded schools in rural communities by means of consolidation, and by enlarging the city high school, we make it possible for young men and women to secure a good education right at home.

At present, a number of our state institutions and denominational colleges are compelled in too large a measure to do secondary work — work that should be done before the pupils seek admission to these higher institutions. This is not a criticism upon the higher institutions of learning. It is the result of the limited educational conditions which exist in the smaller towns, which make it necessary for the higher institutions to do part of the work which ought to be done in thoroughly graded schools. I am encouraged to believe that all of our higher institutions, both state and denominational, are in favor of making our common-school system broader, stronger, and more thor-

ough. This would bring to the higher institutions better and more mature students. It is a well-known fact that many of the students who enter the preparatory department of our higher institutions are not prepared for the work because of a lack of training in graded schools. The conviction is growing that the graded and high schools should be enlarged, so that the state institutions and the denominational colleges would not find it necessary to do the work that properly belongs to the high school. The day is not far distant when the secondary schools will supplant the preparatory departments of our higher institutions of learning. With a more perfect organization and a closer union of all educational agencies, the higher institutions of learning will become stronger and broader because of the larger opportunities that will be given for the enrichment of the collegiate course of study. This will in time bring to these institutions more and better students. The secondary schools will be the natural and happy feeders of the higher institutions.

The time has come when we should stand together for a closer union between the public schools, the high schools, and our state and denominational institutions. The spirit of helpfulness should be stimulated in our educational work. Education is not an isolated thing. It is a world problem. All efforts for the education of the people should be, as far as possible, along a common line and for a common purpose. I plead for a close and sympathetic cooperation of the different institutions of learning. Each institution has its place. Each will serve the cause of education best by filling its place. The higher institutions should encourage the lower. The lower schools should aim to articulate with the higher.

MANUAL TRAINING.

Manual training and industrial education are surely coming in Kansas, and coming soon. No phase of education is receiving more careful attention at the hands of the very best educators of the country than this phase, which is destined to touch so intimately the industrial life of the republic. Whether it comes on account of the demands of those who believe in its "culture value," or on account of the demands of those who believe in its "industrial and practical side," matters but little. The best consensus of opinion agrees that these two views of manual training are tending in the same direction.

The time is coming when manual training will be a part of every school curriculum. It will not displace, but supplement, the present splendid school purposes already in operation. The establishment of well-equipped manual-training high schools in so many important cities of our country and the rapid introduction of manual training in the grammar, primary and kindergarten grades is one of the remark-

able signs of the times. Kansas certainly will not be behind in this important work. A manual-training department already established in our State Normal School for the training of teachers, the several departments in splendid working order in our State Agricultural College, the finely equipped Fowler shops at the State University, the department of manual training at Bethany College, Lindsborg, are but a magnificent promise of what we may look for in the future educational history of this state. Already Kansas City, Pittsburg, Topeka and other places have taken an initiative in this matter. In the two former cities manual-training departments have already been established, and Topeka proposes to erect in the immediate future one of the finest manual-training high-school buildings in the West.

In connection with the discussion of manual training, too, it should be understood that all arguments in support of manual training apply with equal force in support of the establishment of domestic-science and domestic-economy departments in connection therewith. The education of the boy for manual labor is important, but the education of the girl for the work and care of the home is equally important.

COMPULSORY-ATTENDANCE LAW.

The educators of the state are united in their request to the legislature for a better compulsory-attendance law. Our present law, enacted in 1876, is practically a dead letter. In fact, we have outgrown it. The committee appointed by the State Teachers' Association two years ago prepared a compulsory-attendance bill embodying the strongest features of the best compulsory laws in other states. The legislature, however, failed to pass the bill, but this did not discourage the teachers. The bill which had been prepared with so much care and deliberation was filed away and will be presented to the legislature at its coming session. We hope that it may secure the hearty support of our lawmakers and that it may replace the worthless law which we now have.

A compulsory-attendance law, to be effective, must provide for truant officers in each city with a certain population and in each county. These truant officers should be provided with a complete list of all the children of school age in the territory over which they have supervision and regular reports should be made to the teachers and superintendents. An investigation made by this department reveals the alarming fact that in many cases pupils are absent from school and parents are so indifferent in regard to the school work that they do not care to ascertain whether or not their children attend school. With a practical and efficient compulsory-attendance law, many of the school

children who are now out of school will be brought under the wholesome and healthful influence of our educational work.

Gov. James M. Harvey spoke wisely in 1872, in regard to the duty of the state to enforce attendance at school, when he said: "We cannot avoid the consequences of the neglected children; dire results will follow, not only to the neglected, but to society guilty of the neglect. An ignorant multitude is always dangerous; education is, therefore, a measure of public safety; a state has the same right to require the growing boy to be so educated as to fit him for good citizenship that it has to require him when grown to take his place in the ranks for the public defense, or to sit in the jury-box to assist in the determination of the rights of his fellow citizens. The true theory of our government is that it is the creature of society, arising from a common desire for public defense and personal protection; that the people are the source of power, and are ultimately responsible for the manner of its exercise." We commend these earnest words to the legislators of to-day. The lost boy is the expensive boy. In many cases the boy who turns his back upon the school turns his face to the jail. The more, therefore, that the state does for purely constructive education, the less it will need to do for corrective education. The state enforces the collection of taxes for the support of schools. It has the same right to enforce attendance at school.

THE ST. LOUIS EXPOSITION.

The international exposition to be held in St. Louis in 1904 will be of special interest to Kansas. This exposition is designed to exemplify the achievements of man in the different departments of human endeavor. It will also serve to emphasize the wonderful progress that has been made in the great West—the original Louisiana territory. Kansas is a part of this territory, and hence a creditable exhibit should be made at the exposition of all her resources. There has been a disposition to minimize the importance of educational work as a factor in the development of the state at the expense of the purely material resources. We are apt to believe that the true greatness of Kansas consists in her material products. It is true that the material resources are of great value, but they become living forces in the life of the community and the commonwealth in the degree in which they are associated with the highest possible intelligence. The school-house is the motive force in the growth and development of the state. The educational work of the state is, therefore, justly entitled to a fair consideration, and the legislature is respectfully urged to make such liberal appropriation as will enable us to present a true exhibit at the St. Louis fair of the educational resources of the state.

THE CONSOLIDATION OF RURAL SCHOOLS.

One of the most important problems for our rural communities is how best to secure the benefits of a graded-school system so as to enable the farmer to give his children instruction in the higher branches of learning without being obliged to leave the farm. It is found that many farmers do not find it desirable to change their place of residence, and consequently the larger educational privileges are limited to a very few of the boys and girls upon the farm.

It is thought that the consolidation of rural schools will solve the problem. This plan of school organization contemplates the disorganization of small districts and uniting them into one good, strong, well-graded school. Consolidation can, in some cases, be made with adjoining rural schools, and, in others, with the schools of the village, where, in many cases, the nucleus of a graded school exists.

In each case where consolidation is effected provision is made for the transportation of pupils to and from school by means of wagons prepared for this purpose. The wagons go over a specified route, collecting all the children living on that route, conveying them to and from school with a promptness which cannot be secured under the old system. In most cases the wagon is scheduled to arrive at the schoolhouse ten minutes before the opening of school. At the hour of dismissal the wagons are in waiting, and take the children to their homes without delay. Wherever transportation has been inaugurated this particular feature has proven the most popular and the most conducive to the educational work of the community.

The contract for each route is let by the school board to the lowest responsible bidder. The board should exercise great care in the selection of the driver for the wagon. In fact, the driver should be a man of good moral character, and his personal influence in his association with the pupils should be in perfect accord with the teachings and precepts of the schoolroom.

By consolidation all the children of a large territory can be brought together in one school building, thus giving them the benefit of a graded school and the inspiration that comes from numbers. Larger classes can be organized, thus calling forth the best efforts of all the members of the school. Longer recitation periods, better courses of study, better teachers and a more thorough gradation will give better and larger opportunities for instruction. With transportation to and from the central school, there are no wet feet and clothing, no frozen toes and fingers, and the children are much better cared for during the time of bad roads and stormy weather. The consolidation of schools concentrates the community wealth in one good school, thus giving to the community larger and better educational advantages. This plan

of school organization will also give us better-prepared and better-paid teachers. Under present conditions, there is little inducement to prepare thoroughly for teaching in the rural communities, with only the prospect of being able to earn twenty-five or thirty dollars per month for a few months of the year. If we hope to secure good teachers we must build good schools and offer good salaries. The better the pay the better the service. The better the position the greater the inducement on the part of the teacher to prepare thoroughly for it. By building up strong graded schools in rural communities we create a condition which will require those who expect to teach to make thorough preparation in the way of high-school, normal and university training. I have such an abiding confidence in the consolidation movement, that I believe it will do more than any one other factor to make teaching a profession.

The last legislature enacted a law authorizing the consolidation of schools. A very excellent school has been organized under this law at Pearl, in Dickinson county. Another consolidated school exists at Lorraine, in Ellsworth county. Indications are that a number of consolidated schools will be established during the coming year. This department has sent out about 15,000 circulars setting forth the advantages of this plan of school organization. A great many addresses have also been delivered on the subject in various sections of the state, and public sentiment has been quite responsive to the movement.

I would suggest, however, that the present law be modified so as to enable a majority of the votes cast at any election to decide the question of consolidation.

Provision should also be made for refunding the bonded debt of disorganized districts that have been consolidated.

SENTIMENT ON CONSOLIDATION.

In order to ascertain the actual conditions throughout the state in regard to the question of consolidation of rural schools, I have secured an expression from a number of the county superintendents, which I submit herewith. They are very suggestive and interesting.

MARSHALL COUNTY. "The subject of the 'Consolidation of Rural Schools' has been quite generally discussed in Marshall county. School patrons have discussed it through the county papers; teachers have discussed it at their local, district and county meetings; and the subject has been discussed by the county superintendent and school patrons at various public meetings. These discussions have not only been helpful to a better understanding of the law providing for consolidation and transportation, but as to the advantages and disadvantages of the system as well. At least a dozen *good* reasons have been advanced in favor of the system, and as many reasons given, perhaps, against it. It is the opinion of the writer that the two most tenable objections offered are: (1) The expense of maintaining a consolidated or union school would be increased over

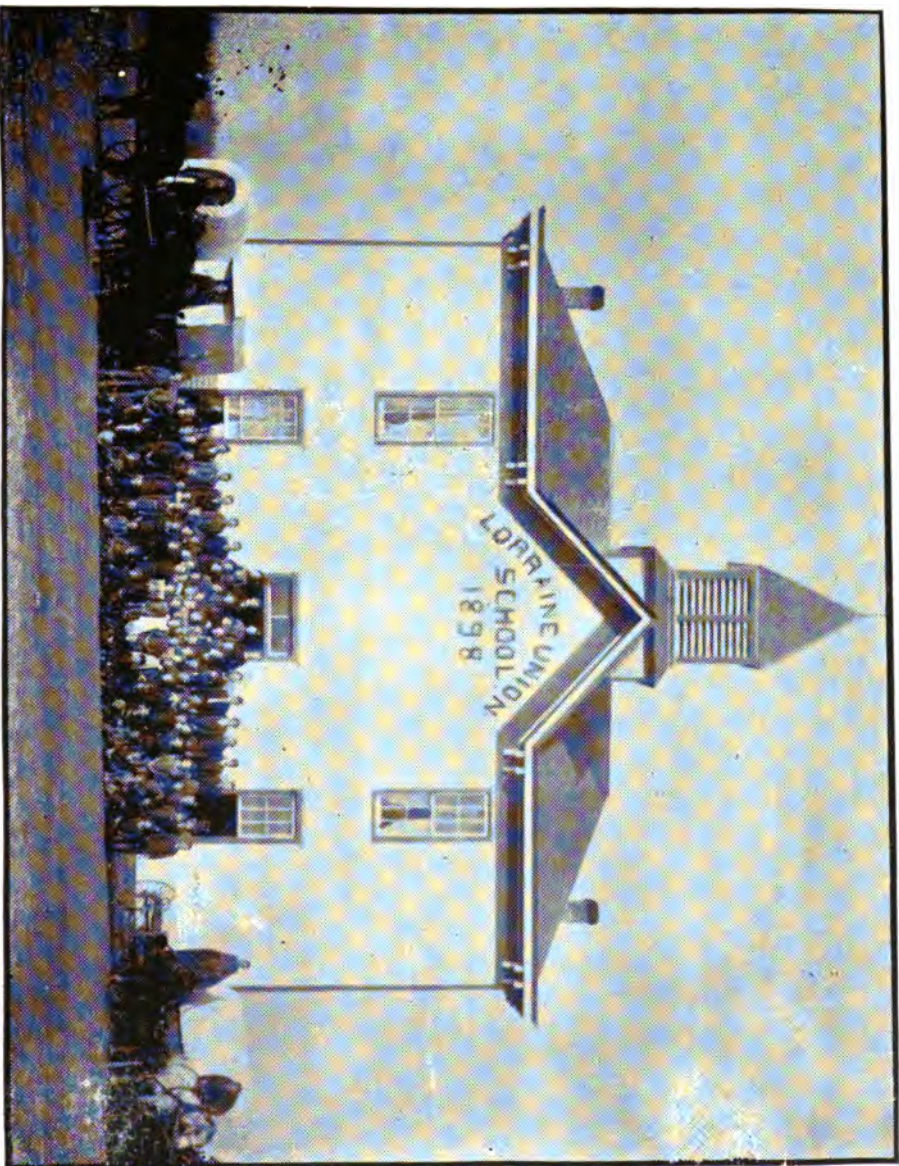

the expense of conducting these same schools separately (under the present system), by an amount necessary to pay for transporting the children, two or more miles from school, to and from the central school. Taxpayers must 'be shown' that the benefits claimed for consolidation are sure to follow before they are willing to increase the tax levy. (2) Many patrons favor consolidation, but are opposed to it according to the present law, objecting especially to that clause relating to 'transporting scholars.' The proposition to unite four districts in this county failed; and, primarily, because the law does not make it mandatory upon the directors of the union district to provide for transportation of pupils living two or more miles from the central school.

"The directors are *authorized* to provide transportation, but not *compelled* to furnish it. The writer believes that the school officers and school patrons of this county, who know the true condition of our schools, realize that the average school is not accomplishing all that is desired; that it has not kept pace with its surroundings. The extension of the mail routes and the rural telephone have been important factors in awakening the rural population to a larger life. Our country cousins are fast getting the notion 'that the best is none too good for them.' The rural school, then, must advance; must improve in a material way, and in the manner, method and thoroughness of work done. Results must be better, even though it cost more. 'If these too, too many districts would thaw, melt, and resolve themselves into a few,' and, if school patrons could be assured that the strong central school would bring about a larger good and better results commensurate with any increased expense, consolidation would come about rapidly, except in communities where the people are extremely conservative—where the people are so prone to follow in 'the trodden path' that they are a half-century behind the advance guard of civilization."—GEO. K. THOMPSON, County Superintendent.

RICE COUNTY. "There is strong talk of consolidation in many parts of the county. Four of the five districts of Rockville township voted on the question of consolidation last April. In one district the vote was unanimous for consolidation; in another, three or four voted against the proposition; in the third the vote was sixteen for and fifteen against; in the fourth, nine for and twenty-six against. The friends of the plan claim that the defeat resulted from a neighborhood trouble. There is probably some truth in the claim, as the district that defeated it seemed strongly in favor of uniting when it was first proposed.

"We have four districts in the county that closed their schools last year and sent the pupils to adjoining districts maintaining graded schools. They were so well satisfied with the results that all four are following the same plan again this year, and another district is doing the same.

"One of the hardest arguments we have to meet here is that the districts would not unite on an equality financially. For instance, in one township in which there is a strong sentiment for union one district has a new schoolhouse, finely finished and well equipped—one of the best in the county; an adjoining district has a very poor house and practically no equipment. One favors consolidation; the other would probably oppose it. The same feature entered into the election in Rockville township. The district that voted so strongly against the proposition has a stone building which would be almost a total loss to the district in case of consolidation. The two districts that voted almost unanimously for the proposition must soon build new houses. There must be a change in the law before we can hope to do much in this county. Our people are nearly all agreed that the results would be much better with consolidated schools. The

CONSOLIDATED SCHOOL. Lorraine, Ellsworth county. See pages 48 and 69.

matter of conveyance meets with some opposition, but I believe that could be overcome in most instances. With the exception of two or three townships, the roads are good."—FRANK LENNEN, County Superintendent.

DICKINSON COUNTY. "The consolidated school district which was organized in this county last April has about completed its new stone structure. When completed, the building will comprise a basement, two schoolrooms on the first floor, and a large hall room on the second. The upper room is so arranged that it may be used for classrooms at any time it may be required. The basement will contain living rooms for the janitor, or principal, as the case may be. The building is thoroughly modern in appearance, and will be heated by furnace throughout.

"This year the school will have an enrolment of about sixty, in eight grades, under two first-grade teachers, receiving fifty-five dollars and forty-five dollars, respectively. At the present time there are no pupils for the ninth grade, but it is believed, however, that as the pupils advance an additional grade can be maintained with the present force of teachers. If this proves true, more thorough work will be done in the seventh and eighth grades than under the old system, and an extra year's work will be brought within the reach of these pupils. But this is not all. The lower grades will receive better instruction than under the old plan, because the primary teacher will have about thirty pupils in four grades, whereas before they had thirty in eight grades. When the successful working of this plan has been fully demonstrated by practical results, and the surrounding towns are organized on the same plan, enough territory can be added to this district to make it necessary to employ three teachers.

"This movement is being watched with great interest by school patrons all over this county. At Moonlight there is situated a creamery and country store, so located that the tributary territory includes the greater part of five school districts. These pupils could be placed under three teachers in a consolidated school, receive a more thorough training, under more favorable conditions, in pleasant schoolrooms, presided over by teachers especially adapted for the work of their respective grades, at a cost of about the same to the parent. Pupils can drive five miles in a modern rig with less exposure than they can walk one and one-half miles. At Acme the conditions are about the same as at Moonlight. Talmage, Carlton, Elmo, Detroit and Woodbine are each so situated that, by the addition of adjacent territory, enough pupils might be added to make it profitable to employ three teachers instead of two. This would result in better work in each grade, and an additional grade to each school.

"I believe that this plan will help the county high school, in this, that it will secure older and better-trained pupils at admission. Personally, I do not think it a good plan to send children only twelve or thirteen years of age away from home. Consolidated schools will make it possible for them to remain under the home influence at least one or two years more.

"To summarize: To the pupils, consolidated schools mean pleasant schoolrooms, uniform heat, large classes of the same grades, and teachers thoroughly trained to teach those grades; to the parent, they mean the advantages of a city school in the country, with the vices of the city removed—it will mean obedient, healthful, moral, educated children at home, at about the same price they are now paying; to the teacher, they mean longer terms, better wages, and the most favorable conditions for successful teaching; to the superintendent, they mean larger enrolments, in fewer school buildings, a better class of teachers, by reason of the fact that the higher wages will retain the best, fewer cases of discipline,

because the changed conditions will result in better-trained boys and girls; to the future, they mean a more thoroughly educated class of young men and women among the masses of our people.

"The old fords and wooden bridges every eight or ten miles of the early '70's were useful, but have given way to beautiful structures of iron on every section line. The stone churn and the busy housewife working butter by hand are no more. The creamery and skimming station have proven better economy. The farmer who spent at least one day of each week to go to town for the mail now has it brought daily to his door. The log schoolhouse of our childhood days has passed. The neat one-room school of the present has fitted many a young man and woman for successful citizenship; but the consolidated union graded school in the country is a blessing that the future holds in store."—R. V. DYER, County Superintendent.

CLOUD COUNTY. "In union there is strength.' To get best results, efforts and interests must be centralized. Each of our district schools represents fragments of disjointed efforts, each working out its own salvation without definite plan or system. As a result, our boys and girls are found drifting with the current of indifference, and have no definite object in view of completing the work that should be done. Is it any wonder that fifteen-year-old Fred says that he does not care to go to school longer? He feels there is nothing there worth his while, and this is probably correct.

"A young teacher goes to an isolated school with few pupils in attendance. She does not have much enthusiasm, and the district has less, as they are all intensely occupied with their home affairs. In a few weeks the teacher loses what interest she has, and so school is too often 'kept' until the close of term. The present system presents too great an opportunity to neglect the work. There is every chance of poor teaching for those who wish to take advantage. The present system encourages unqualified people to begin the work, and well qualified to either not begin or quit; as a result, we have 33½ per cent. new and untried teachers, about 50 per cent. who stay with the work three or four years, 10 per cent. give their entire time and attention, and the remainder farm and teach, but mostly farm. No teacher can be much interested in the work under three or four years' service; hence we must do something to keep our best teachers in the service and get others to enroll who are well qualified.

"Cloud county has as fine schools as can be had under our present system, but we must change our system to keep abreast with the times. The schools are not keeping pace with commercial interests. They are yet in the last century, and we must unite to bring them up to the present. Centralization is the only thing that can do it. We are spending much force, with meager results. I have in mind seven districts in which all pupils are within six miles of the center. Average length of term is seven months; average wages for the year is \$238; number of pupils for each teacher is nineteen. Now, where is there a preacher or editor who can live on \$238 a year? Four teachers could do this work and each receive \$416 a year. A teacher who is not worth \$400 a year is not ready to be a teacher; yet we cannot pay this amount under our present system. Many people will not enter the work who should, because there is no just compensation. We cannot have better schools until we get better teachers; we cannot have better teachers until we have better pay; and we cannot have better pay until we have better teachers, etc.

"Under consolidation, the county superintendent would have closer supervision, as he should spend an hour in each school at least once a month. As it is, he cannot make but two visits in a year. The county superintendent must

waste too much precious time traveling. Last year I traveled 3000 miles. Allowing one hour's time for each six miles traveled, we have 500 hours wasted, and no one is benefited. A superintendent will make some necessary suggestions or plans to each school, but he cannot see that they are executed; hence his supervision cannot have much weight. Under consolidation, he would be able to execute his plans. I have spoken to many with whom I have come in contact the last two years in regard to consolidation, and find that all but two or three are enthusiastic over it.

"Condition of Schools under Present System: Too many poorly qualified teachers. Great opportunity for neglect in isolated schools. No permanency. A constant change of teachers. Not sufficient interest. Irregular attendance. Petty troubles of community. No place for a teacher to board (in many districts). School board not thoroughly organized. Carelessness on the part of board in transacting business of the schools. Poorly equipped and poorly kept schoolhouses. Must wait till the wheat is gathered to get the necessary supplies. John Smith has the privilege of attending but six months each year, and has an inexperienced teacher each year; his cousin, James Brown, who lives in a wealthier district, may go eight months, and always have an experienced teacher.

"Schools Under a System of Consolidation: Closer supervision. Better teachers. More thoroughly organized. A graded school and country home, which is the best combination. Longer term of school. Boys and girls will not quit school at fifteen. Could have a music supervisor. Could have lectures. Country people would have what they move to town to get. Closer interest in community. All children would have equal school privileges.

"We claim justice to all, special privileges to none. This is an 'iridescent dream' in the schools, since they are scattered. Consolidation of schools will bring about the greatest reformation Kansas has ever had. This is one of the most important questions of the day for Kansas to solve. All honor is due to our present state superintendent, Hon. Frank Nelson, who has worked early and late to bring it about. This is a great monument he has erected to his memory, and every child and every parent directly interested in our schools owe him a lasting debt of gratitude. Cloud county will be in the foremost ranks when this great wave comes."—BERTHA MARLATT, County Superintendent.

DOUGLAS COUNTY. "In 1880 the population of Douglas county outside the city of Lawrence was 12,781, in 1900 it was 13,900, showing a gain during the twenty years of 1119 people. During the same period the city of Lawrence increased from a population of 8410, in 1880, to 11,436, in 1900, showing a gain of 3026, or nearly three times the gain of the country. In 1880 the school population of the county outside the city of Lawrence was 4850; in 1900 it had decreased to 4684; thus showing a net decrease of 166 pupils. The school population of the city of Lawrence for the year 1880 was 2768, for the year 1900 it was 3715, showing a net increase of nearly 1000 school children, as against a net decrease of 166 children in the country. The population of Lawrence increased 3000 and the school population increased 1000, while the country increased 1000 in population and decreased 166 in school children. To this, if we add the net increase of school population in Baldwin, Eudora and Leecompton of 186, it will make a total decrease of school children in the rural districts of 352, as against a net increase of 1350 in the city or graded schools.

"The great problem, then, is how to keep the boy on the farm—how to prevent this movement of the people from the country to the city, which is depriving

the country of her children. It is leaving so few pupils in the country that a profitable school cannot be maintained, either because of financial or social reasons. 'The great evil of the small rural school lies in its non-social character.' One of the greatest educative influences comes from the association of many pupils of the same age and same degree of advancement. Competition in class-work is very necessary to arouse enthusiasm. In order to arouse a pupil to put forth a great effort, he must be placed in a position to come in contact with his fellow pupil; he must cross swords, so to speak, with his playmate. What can be more monotonous than a one-pupil recitation? Yet we have many of them in the schools of this county. With such a condition of affairs, not only the mental work of the pupil is impaired, but the lack of enough pupils to organize a game upon the playground prevents adequate exercise, and tends to make morbid, selfish and pessimistic all who live in its atmosphere. There are eight districts in Douglas county that will not average one pupil per grade, and sixteen more that will average less than two to the grade. No teacher can do first-class work in these schools.

"Grant township is divided into four school districts, having a combined valuation of \$240,000, and a school population of 121. District No. 61 has 48 children, district No. 62 has 45 children, district No. 63 has 16 pupils, and district No. 79 has 12 pupils. The two large districts are adjacent; so that it would be an easy matter to consolidate the four districts and transport those pupils living at some distance from the central building. Also the districts adjoining the city of Baldwin might consolidate with great advantage to themselves. District No. 2 has 8 children, all of whom are living within three miles of the city. District No. 78 has 26 children, none of whom are to exceed three miles from Baldwin. District No. 45 has 11 children within four and one-half miles of Baldwin. In both these localities the roads are good. It would result in no hardship for any child to be transported, nor would there be any risk of injury encountered in making the trip to and from the central school. As it now is, many of the children living in these districts attend school but little of the time, and some of them not at all, because of a lack of interest taken where there are so few pupils at the same school. A compulsory law cannot, or at least does not, secure the attendance of these children. I see no other solution for these small districts than to get the children in some central location where they can be systematically instructed together."—A. H. KING, County Superintendent.

COFFEY COUNTY. "Probably the greatest question before the educational public to-day is the 'Consolidation of Rural Schools.' It is important because it offers a solution for many of the vexing questions which the county superintendents are forced to meet. These questions—*unequal taxation, perfect gradation, and higher instruction for the boys and girls*—are worthy of close study and the application of any remedy that will furnish a better condition of affairs. The tax system is unjust, yet our legislature fails to furnish a direct remedy. To illustrate the injustice, note the conditions in Coffey county: We have 100 districts, that enroll 4640 children; the valuation per pupil ranges from \$10,000 to \$450; the tax levy ranges from four mills to twenty mills; the average length of term ranges from four months to nine months; one district is able to employ an experienced teacher at fifty dollars per month, while an adjoining district can only pay twenty-five dollars to a child sixteen or seventeen years of age; and this is a condition existing in the *model educational system of Kansas*.

"We talk about grading the rural schools; we do grade them in a way; but what county superintendent can keep in touch with 100 schools, scattered over

648 square miles of territory, having as his working force at least forty new or beginning teachers, and with probably one-half of his force under eighteen years of age, and without professional training? The gradation of the rural school is not yet.

"We need the higher education for the country boy and girl. It holds them in the school—encourages them to attend college. Nine-tenths of our rural boys and girls never look beyond the rural school. A taste of something out of the regular routine would bring results valuable to state and country, as it would raise the standard of our citizenship.

"I believe the above vital questions can be solved only through the consolidation of the rural schools.

"During the past year I held fifteen township educational meetings, and at each meeting a patron of the rural school addressed the meeting on the subject of 'Rural Consolidation.' Of the fifteen addresses, fourteen were favorable to the plan. The people were greatly interested, and many asked for literature and further information. There were two principal objections offered: First, the additional cost; second, the roads and distance some would be forced to travel. The first objection is easily explained away, but the second is truly a serious obstacle to the plan. All evidence goes to show that children on the outlying boundaries of the district must be absent from home from seven in the morning until six at night, and be forced to ride in a wagon from three to four hours each day. Of course the portion of children thus fatigued would be small—probably one-fifth—but the objection is binding just the same. Space will not permit me to deal with advantages and disadvantages in detail, but I have given simply a few facts as I see them."—C. T. SHERWOOD, County Superintendent.

ANDERSON COUNTY. "The consolidation of rural and village schools is receiving a great deal of consideration in this county, especially among the districts in which the valuation is low. We have held one election for the purpose of consolidation, and it resulted almost unanimously in favor of the union district. There is a general tendency on the part of pupils and patrons to patronize the village schools in order to get the benefits of a high-school course, if located within a reasonable distance. One village with a four-room school, carrying a two-years high-school course, has twenty-five tuition pupils from four adjoining districts, whose aggregate attendance is forty-eight pupils. One more additional room in this village school would accommodate all pupils of the adjoining districts and would enhance the valuation of the union district \$150,000, thus giving all pupils of these four districts the advantage of a high-school training instead of only a few fortunate ones whose individual circumstances enable them to take advantage of their location."—J. B. Cox, County Superintendent.

HARPER COUNTY. "The subject of school consolidation has received a good deal of attention in this county, but as yet no schools have been consolidated. A vote was taken in two districts a few weeks ago, with the result that one district favored consolidation by a large majority, while in the other there was a light vote and a majority of one against consolidation. The question is being discussed in a number of districts at the present time and it seems probable that some of these schools will consolidate in the near future. We have in this county a number of large tracts of grazing land, where residence houses are far apart and only a few families reside in each district. In many cases the taxpayers in such districts oppose long terms of school and high salaries of teachers. It is

difficult to make some of them understand that the children in those sparsely settled regions need as many months' school in the year as do those who live elsewhere. Many of the parents are now beginning to think that the remedy for this condition is in school consolidation, whereby better schools may be maintained with little or no increase of expense. School consolidation is also favored by our best teachers, for while the number of teachers would be reduced, those who remained in the profession would have better positions and receive better wages. The demand for better schools is increasing rapidly."—LEE B. WILSON, County Superintendent.

REPUBLIC COUNTY. "In Republic county no rural schools have yet been consolidated, although the question has been agitated in at least three portions of the county. The question has been discussed in our county associations for the past year or so, and it has a prominent place on the program for the meetings this year. Persons, other than teachers, interested in the movement are asked to discuss the question.

"The first attempt made looking toward consolidation was in the town of Courtland and the four surrounding districts. Courtland maintains a school of two rooms and a number of the pupils are from the country. It was thought that, if the four districts whose territory is contiguous to the Courtland district could be induced to unite, an excellent high school might be maintained. The proposition met with considerable favor in at least three of these neighboring districts at first, but the matter was never brought to a vote. Later, White Rock township, north of Courtland, began to discuss the question. Five different districts were interested, and several public meetings were held to forward the movement. Considerable sentiment in favor of the consolidation of the five districts was created, but in this case, as well as in Courtland, the stumbling-block proved to be the matter of the transportation of pupils. The friends of consolidation, finding that they would be outnumbered if the matter were brought to a vote, did not ask for this privilege.

"At the time of our teachers' institute, the school boards and others of the county were asked to meet and hear something of consolidation. Owing to the very busy season at that time, only a limited number could attend.

"At present the matter is being agitated in a quiet way in Albion township. There are six school districts in the township, and the town of Narka is located in the center of the township. The condition of roads is superb and the other conditions necessary for consolidation are almost ideal. It is not probable that the question will be brought to a vote at this time, but if the necessary sentiment can be awakened it is possible that a consolidated district consisting of an entire township, may be effected.

"Other localities in Republic county favor the plan of consolidation, if it can be shown that the total expense of school is not greatly increased. The one thing that seems to most persons the least feasible is the transportation of pupils. Could this objection be met by practical experience with similar conditions, Republic county would have, within a year or so, a number of these strong centralized districts."—E. E. BAIRD, County Superintendent.

ELLSWORTH COUNTY. "It may appear strange to many that the sentiment in favor of consolidation of schools has not "taken" this entire county, since our single consolidated district was organized in the spring of 1898. But other districts in the county waited for this school to prove the success that was claimed for it. It has done so; but it still requires time for new ideas to take root and

grow. I believe there is a wide-spread sentiment in this county in favor of consolidation; in fact, I know there is. But in each district there are some parties who are opposed, and those who look with favor on the plan are not willing to take hold of such a movement and push it to a successful conclusion or to defeat; and until influential taxpayers in the individual districts are willing to do this, nothing definite can be done.

"If pushed by the county superintendent or other outside parties, no matter how disinterested they may be, the people are inclined to look upon it as a scheme. Two years ago we had a county-high-school proposition. Well, that proposition is *just five times dead*, which explains some of the danger of outside influence being brought into any school proposition.

"As for the Lorraine school, it is proving very successful. I think it would be impossible to find more than one man in the district who would be willing to go back to the old district plan. I am sure you could not find a boy or a girl in the school who would not object. The attendance last year was eighty-five per cent. of the enrolment; this was ten per cent. higher than the average for the entire county, and fifteen per cent. higher than the average attendance for the country schools. Of the total number of county graduates forty per cent. was from the Lorraine school. A two-years high-school course has been adopted. Last year there were two graduates from this course. This year's class in the high-school work numbers eight. The school year was longer and the teachers' salaries higher than the average for the county. The tax levy of 13 mills is but 1.2 mills higher than the average levy for the county.

"Ellsworth county schools (village and city included) cost \$20.16 per capita on the average daily attendance. The Lorraine school on the same basis costs \$22.44 per capita. This includes all expenditures. The school is a success in every respect. The slightly increased cost of maintenance is so small as to be unworthy of consideration. The taxpayers are unanimous in their approval of the plan. Of three adjacent districts, one has not maintained school for three years; the others have been sending the older pupils to Lorraine, and now talk of uniting with Lorraine. I assure you that consolidation so far adopted in this county is an unqualified success."—W. W. MAZE, County Superintendent.

RUSSELL COUNTY. "We have no union graded schools in Russell county at present, but I see no reason why we should not soon have two or three. Many of us are in favor of the plan, and we have several places where it would work admirably. I favor the consolidation plan, because it would be the means of putting better teachers in charge of our schools, and those teachers would be much better paid for their services than they are at the present time. Fighting and the use of vulgar and profane language by pupils on the way to and from school would no longer be the cause of so much trouble. Tardiness would be practically wiped out and attendance greatly stimulated. No longer would half-frozen children be seen crouching and shivering around the stove each morning, and no wading to school through slush and mud and sitting all day with wet, cold feet. School-rooms would be larger, better furnished, better ventilated and kept cleaner than under the present system. Literary and debating societies, so much needed by our boys and girls, could be organized to better advantage on account of larger numbers taking part in the work, and, being under the direct supervision of the teacher, the low order of exercises so common in the old-fashioned evening lyceum would not long exist. A taste for the good in literature would take its place.

"At present, many of our schools, especially in the western part of the state, have an enrolment of but three or four pupils. Supposing two of those are small,

the others can't even get up a game of "two old cat," to say nothing of baseball, basket-ball, and football, which our boys and girls like so well and should have an opportunity to enjoy. Neither can there be any great amount of enthusiasm in the preparation or reciting of lessons where one pupil is in a class by himself or with a single classmate. The little ones would have a better opportunity to learn to sing, and in every way our country boys and girls would have the same advantages, and on account of their quiet surroundings would do perhaps better work than those who live in the city and attend the city schools. And, if rightly managed, the cost of maintenance need not exceed what it is at the present time."—P. C. SMITH, County Superintendent.

FRANKLIN COUNTY. "The question has been thoroughly discussed at our teachers' meetings. Superintendent Nelson delivered an address before the normal institute on the question, and also addressed a public meeting at Lane. The county papers have printed articles on the subject. Wellsville sent representatives to the adjoining districts on the annual-meeting day and the question was thoroughly discussed. The citizens in the vicinity of Richmond and Williamsburg are becoming interested in the question. No vote has been taken yet at any of these places, but a general interest is being awakened, which is shown by the number of inquiries made as I make my visits to the schools."—E. E. SMITH, County Superintendent.

JEWELL COUNTY. "In Jewell county, the plan of rural graded schools is receiving much consideration. Several enthusiastic meetings have been held in two or three different localities. Superintendent Nelson has addressed two of these. There is no thought of disorganizing the present schools by wholesale, but to establish two or three of the graded schools in different localities. The success of these will lead to the organization of others. The three best graded schools in the towns of this county are furnishing their children nine months of good schooling, with six or seven teachers and three or four years of high school, for about fifteen dollars per child, while in many of our smaller one-room district schools six or seven months are costing two or even three times as much.

"Our graded schools are all getting larger. Most of our country schools are becoming smaller. Three of these have no school this year. District No. 84 is transporting its seven pupils to the Ionia two-room school in a covered wagon, driven by one of the older pupils, a distance of four and one half miles. The cost of tuition and transportation is about sixteen dollars per month. It would be thirty-five or forty dollars if run as last year. The plan is giving good satisfaction. During a rainy week other schools had very poor attendance, but these children were regular and punctual. Parents felt that they could ride to school four miles in a covered rig better than to walk through mud and rain less than half the distance. The consolidated school is the school for the future country child. It gives all the advantages of the city graded school with none of the disadvantages of the street. With the improvements of machinery and agriculture, rural mail delivery, the rural telephone, and the rural graded school, we can have the ideal country life, with the children in good schools by day and around the family fire by night. Success to the movement. Push it along."—O. M. CHILCOTT, County Superintendent.

THE UNIVERSITY OF KANSAS, Lawrence. See pages 49 and 132.

THE UNIVERSITY OF KANSAS.

The following is taken from Chancellor Frank Strong's report (1902) to the board of regents of the University:

In presenting the thirteenth biennial report of the chancellor of the University to the board of regents, I wish to express my gratification at the prosperous and stable condition of the University. The work of the University in the years past has been done in an excellent manner, and broad foundations have been laid for larger growth and more extensive university development. In fact, if adequately supported, the University is now ready in a larger degree than ever before to occupy the real university field. It seems clear that the real advantage to Kansas, as far as this University is concerned, lies in its filling the university and not the college field; in making the university the center of the higher educational development of the state; of extending its advanced courses so as to supplement, as far as may be, the work of other educational institutions of the state. At the same time it is necessary to make the college work of the University, especially in the years that supplement the work of the other institutions, very strong and thorough. It is upon the basis of a vigorous college life of general culture training that graduate and technical schools can be most advantageously developed.

This higher work is more expensive and calls for a greater per capita cost than the work in any other department of education. It requires smaller classes, more instructors, larger laboratories and libraries. It is on this account, for one reason, that the need of a large increase of funds for the University is so imperative. It is of the greatest importance, too, that the salaries of full professors who have served in the University for a considerable number of years shall be high enough to keep in Kansas men of the highest grade in instruction. It is clearly false economy for the University of Kansas to train men until they have reached the point where they are most valuable to the state and then have them go to other institutions. Kansas needs and can afford just as able and well-qualified men as any other state. The cost of living has increased very largely over the same cost four or five years ago, and a return to the salaries of some years ago would be reasonable and justifiable.

There is large need for an increase in the number of instructors in several departments. It is a manifest injustice to students to have any considerable amount of instruction handed over to young student instructors who are without experience in teaching, and the number of instructors ought to be sufficient to care, in a fair and reasonable manner, for all of the students applying at the University. The numbers in many classes are entirely too large. The experience of many years has definitely shown that it is impossible to do the highest grade of educational work as it should be done where the classes are so large that individuals cannot receive adequate attention.

The University should also broaden its functions somewhat and undertake work for the teachers of the state, and in other lines, which the good of the schools and of the state makes necessary. The broadening of its functions is necessary in order to provide for the sons and daughters of the state without their leaving its confines. It is probably not wise that all the children of the state should be educated here, but it is certainly wise that the most of them should be. It is a great economic loss to the state to send out of its borders the large number of students that are now receiving their instruction elsewhere. It is an economic loss in two ways: First, because of the money which is spent in necessary ex-

penses abroad; and because, in the second place, many of those trained abroad, and who become specially efficient and therefore of great economic advantage, fail to return to the state.

The number of students at the university is increasing, and can be confidently expected still more rapidly to increase. The number registered during 1901-'02 was 1233 in all departments. Careful estimates, based on the number already registered in the University, together with the number who entered last year after November 1, indicate that the total number of students for 1902-'03 will be close to 1350. The first college year of the new biennium will be 1903-'04, and the University must expect to care for more than 1500 students during that year. For the year 1904-'05 it must plan to care for 1700 students.

The new natural-history building is nearing completion. It is a handsome building and one well adapted to its purpose.

The inauguration exercises held here October 16, 17 and 18 were carried out by the various committees of the faculty in a very efficient manner. A large number of representatives from the greatest educational institutions in the country were present, and the number of citizens of Kansas who gathered at the celebration was large and representative.

There have been several changes in the faculty in the past two years: Dr. Francis H. Snow, chancellor of the University, resigned on account of failing health, and was appointed professor of natural history. His resignation took effect September 1, 1901, and Hon. W. C. Spangler, a member of the board of regents, was appointed acting chancellor. He remained in charge until the new chancellor assumed the duties of the office, August 1, 1902. Mr. Spangler's death, which occurred October 22, was a great loss to the University to which he had given the best of his life.

Dr. Samuel W. Williston, dean of the school of medicine and professor of historical geology and vertebrate anatomy, was called to the University of Chicago as head of the department of paleontology. The inadequate funds of the University of Kansas made it impossible for us to retain him. Dr. George H. Hoxie is now giving the courses in anatomy that were formerly given by Doctor Williston.

Dr. E. D. Adams, professor of European history, accepted a call to the Leland Stanford Jr. University, the inadequate funds of the University making it impossible to retain him also. Prof. Wilbur C. Abbott, of Dartmouth College, succeeded him.

Walter K. Palmer, associate professor of mechanical engineering, resigned to take up practical engineering work, and Hugo Diemer, M. E., was chosen in his stead.

Charles Vickrey, associate professor of elocution and oratory, resigned to engage in commercial work, and Edgar G. Frazier was appointed in his stead.

H. Foster Jones, assistant professor of English, resigned to accept a position on the faculty of Tabor College, Iowa. Frank E. Bryant was appointed to succeed him.

Florence E. Parrott resigned her position as assistant professor of German at the close of the school year 1901, and Alberta Corbin, Ph.D., a graduate of the University, was appointed to fill the vacancy.

The vacancy caused by the resignation of Hugh S. Carr, assistant professor of electrical engineering, was filled by the appointment of R. M. Freeman.

Emery H. Powell, professor of mechanical drawing, resigned to accept a position on the faculty of the International Correspondence School, of Scranton, Pa., and George J. Hood was chosen to fill the vacancy.

Hugo Kahl, systematic entomologist, resigned to accept a more lucrative po-

sition in the University of Illinois, and is now curator in the Carnegie Museum. E. S. Tucker was placed in charge of the work formerly done by Mr. Kahl.

Edwin M. Hopkins, professor of English language, was granted a leave of absence for one year, beginning September 1, 1901, which he spent abroad.

During the present year three lecturers in the school of law have been removed by death. Ex-Chief Justice David J. Martin, lecturer on evidence, died in March; Judge C. L. Dobson, lecturer on corporations, early in August; and Judge W. C. Spangler, lecturer on real property, passed away late in October, as heretofore noted.

The following members of the faculty have received promotion during the past biennium:

Miles Wilson Sterling, from assistant professor to associate professor of Greek.

Raphael Dorman O'Leary, from assistant professor to associate professor of English.

William Edward Higgins, from assistant professor to associate professor of law.

Charles Morgan Sterling, from instructor in microscopy to assistant professor of pharmacognosy.

Frank E. Ward, from associate professor of shops to superintendent of Fowler shops and shop instruction.

Clarence Erwin McClung, from assistant professor of animal morphology and histology to associate professor of zoology and histology.

William Livezey Burdick, from associate professor to full professor of law.

Additions have been made to the faculty as follows:

Dr. M. Summerfield, of Lawrence, was engaged to give a special course of lectures on medical jurisprudence during the spring term, 1901.

Marguerite Wise, A. B., Kansas University, 1901, was appointed instructor in botany and entomology.

Dr. Emerson E. Evans, formerly a special student in the school of medicine, was elected demonstrator in anatomy. Doctor Evans afterward resigned, on account of ill health.

John N. Van der Vries, Ph. D., Clark University, was elected assistant professor of mathematics.

Fred N. Raymond, A. B., Kansas University, 1896, and A. M., Columbia University, was elected assistant professor of English.

Margaret Lynn, A. M., University of Nebraska, was elected assistant professor of English.

Carl Lotus Becker, Ph. D., Columbia University, was elected assistant professor of European history.

Alfred Ewington, McKendree College and University of Missouri, was elected assistant professor of Romance languages.

In April, 1901, five teaching fellowships were established, which were held by the following-named graduate students during the year 1901-'02: Mathematics, Helen B. Brewster; French, Clementine Creager; sociology, James E. Boyle; German, Esther M. Wilson; education, Charles A. Shively.

The following-named graduate students were appointed fellows for the school year 1902-'03: Education, Charles L. Robbins; mathematics, Frederick W. Owens; German, Henry Otto Kruse; sociology, Charles E. Carpenter.

On account of the serious illness of Acting Chancellor Spangler, which took him away from Lawrence, and my recent arrival, it has been impossible to make as full a report as I shall hope to make in coming years.

THE STATE NORMAL SCHOOL.

The following is taken from President J. N. Wilkinson's report (1902) to the board of regents of the Normal School:

In making the usual report, preliminary to your official report to the governor, I beg a personal word, because half the period covered in this report was in the administration of my predecessor. To him, much more than to any other person, belongs the credit for any commendable and encouraging features to be mentioned in this report, for his planning and his spirit still shape the policy of the school, and will for years to come be a potent influence in all the educational affairs of the state. He left a large, harmonious, united and enthusiastic body of friends in the faculty and students, and I record here my sincere appreciation of the continuation of that same loyalty and good feeling in the institution during the period since he left us. I desire to express to the board my deep sense of personal obligation for the wise counsel and generous support they have given me during my first year in the duties of this office. The relief from all class work was especially helpful in the discharge of the increased executive cares that came with the opening of the branch school, which is made by law an added responsibility for the board and the president of the main school.

The statistics given in this report for the two years ending June 30, 1902, will not include the Fort Hays auxiliary, no teaching having been done there during this period, except the first week of the summer session.

The following is an epitome from catalogue summaries:

| DEPARTMENTS. | 1900-'01. | | | 1901-'02. | | |
|--------------|-----------|----------|--------|-----------|----------|--------|
| | Males. | Females. | Total. | Males. | Females. | Total. |
| Normal..... | 652 | 1,286 | 1,938 | 614 | 1,219 | 1,833 |
| Model..... | 99 | 98 | 197 | 82 | 119 | 201 |
| Totals..... | 751 | 1,384 | 2,135 | 696 | 1,338 | 2,034 |

In the table of attendance by counties, the grand total of each county for the past sixteen years is shown, that being as far back as the footings are now available. In that time every county in the state except one has been represented, and all but six have been represented in the past two years.

| COUNTY. | 1901. | 1902. | 1887-1902. | COUNTY. | 1901. | 1902. | 1887-1902. |

* It must always be borne in mind that, as younger children make up the classes in the primary and intermediate departments of the model school, the pupils listed in it are largely from Emporia or from the immediate vicinity. Many pupils, both in the normal and model school who are enrolled as from Emporia belong to families residing here temporarily for the purpose of educating their children. It is also to be remembered that those who go through the model school are counted in eight consecutive years, and are likely to continue through the entire normal course, thus very greatly swelling the numbers beyond the total of individuals.

There have been more than 1700 graduates in the whole history of the school.

Your attention is called to the fact that the graduating class of 1902 numbers more than ever before. The filling up of the more advanced classes will give to the state greater benefit from the Normal School than if its students were massed in the lower classes. The size of the class in the first term of normal work, commonly called the A class, was considerably smaller in the second year than in the first of this biennium. The announcement that students who had been failing in their work and had no prospect of success could not continue was made at the beginning of this year. The result was a decided raising of the tone of the school. The music department shared with the A class in the reduction of the enrolment. It is possible that the necessity of keeping satisfactory standing in the regular studies may have diminished the number taking extra work. A decrease from shutting out unsatisfactory students will be only temporary; strong students will flock to a school where weak ones are known to have been excluded.

The enrolment for the year 1902-'03 shows, at the time of the writing of this report, a greater number of names for the next catalogue than were ever before on the roll so early in the year.

The faculty are striving as never before to see that each student has personal attention. Each teacher has for this purpose an assignment of from twenty to thirty students, who receive their permits for classes from him, and who meet with him once a week in what is known as the class-teacher hour. There is, in this school, none of that college class spirit which arrays sophomores against freshmen, or seniors and sophomores against juniors and freshmen. The rule of the board against class rushes is not a burdensome restriction.

The standard of the Normal School has constantly risen. In 1884 was issued the last life certificate from a two-year course. In 1902 was the end of the academic course, which had allowed a graduation without taking the professional work and without receiving a state certificate. The establishment of that course, while anomalous in a normal school, had been wise as long as the school was small, and was attempting to carry both a three-year and a four-year professional course. The last year of the academic course not being required for any except the few who were taking the four-year course, the classes in subjects of this year would have been too small for satisfactory work without those finishing the academic course. During the recent years the numbers graduated each year from the four-year course have been in the neighborhood of thirty, and quite enough to keep the proper spirit without any who are not preparing to teach.

Your order that in the near future we issue no diploma except for the completion of a four-year professional course is in the line of that simplification of the state certificate which is desirable. The giving of several courses, each of which leads to a life certificate, seems unnecessary when the repetition of the life certificate does not add any privilege. With fewer kinds of life certificates, the general public can feel more sure of knowing what constitutes a life certificate. The State Board of Education is required by law to issue a very great variety of state certificates; the normal board, in the exercise of its discretion, does a very great service for the schools of the state in simplifying its issuing of certificates, while at the same time raising the standard. A single form of life certificate, the evidence of four years of work beyond what is given in the common schools, will, when submitted from the Normal School along with the booklet furnished each graduate showing his record, be regarded as the most trustworthy credential a candidate can furnish.

The changes in the course of study made in the past year promise a training more efficient for teaching. Professional work is now open regularly to students who enter the normal classes without advanced standing. It seemed necessary to bring some such work into the first two years, in view of the statute making the diploma of the auxiliary school a state certificate, and making the course of that school the first two years of the course of the main school.

The library economy lessons offered for a ten-weeks course in that subject promise to be very popular. The cities of the state are in great need of teachers who know how to organize and manage a library by the most approved methods. The using of the typewriter for catalogue work in our library will enable us to set for library students the example of the most rapid methods of doing cataloguing. Students learning cataloging with us will be of great assistance in the cataloging of our books.

The whole history of this institution shows a study of the needs of the schools. In the days when the secretary of the present board of regents was serving as the

first president of the institution, he made a tour of inspection among the eastern normal schools, extending his travels as far as the famous old normal at Salem, Mass. An interesting statement of the position of the Kansas State Normal in the educational system of this state is shown by the following from his report on his return, copied here without his consent:

"The true place of the Normal School in our educational system does not seem to be clearly apprehended by many of its friends. It is, by some, classed in the college or university system. The Normal School is thus thought of as an institution similar to the university at Lawrence, Baldwin, and other places. In the minds of others, the Normal School occupies something of an intermediate place between the common school and the college—higher than the one, not so high as the other. It is looked upon as an academy, or preparatory school, where young men and women can be fitted to enter college. Neither of these is correct. The Normal School occupies a position distinct from that of any other institution of learning in the state. It is neither an academy nor a college, and ought not to be confounded with either. Its aims and aspirations are entirely different. Its course of study has little in common with either grade of institutions. Where the studies are the same, the methods of instruction differ widely. Its design is, not to prepare its students for general business, but for a special vocation, that of teaching. But while the connection of this institution with the college system of the state is remote, with the common-school system it enters into near and permanent relationship. Everything that is done, every lesson learned and recited within its walls, every lecture delivered, every teaching exercise conducted, is with direct reference to the wants of the public schools, and is intended for their improvement. The true place of the Normal School is therefore in and at the head of the common-school system."

The trend of the institution has been more and more toward special training for teaching in the public schools. There was a time in the '70's when Greek as well as Latin was taught. The modern demands of the public schools have added a call for teachers of living foreign languages, and the Greek is omitted from the normal course because it is believed that the work in Latin will furnish enough training in methods of teaching the dead languages. The demand for manual-training teachers has only recently justified the giving of special attention to that part of the first legislation which provides for instruction in the mechanical arts. When, with the elimination of the three-year course, the present non-professional year of work is taken by all who get the life certificate, it may be expected that some professional work will be transferred to that year. As the course now stands, quite a little professional work must be taken before the third year is reached, and no one can long remain regular in the school without doing work that he would not care for if not intending to teach. It therefore seems feasible, since this change in the course, for the board to exercise its option in regard to declaration of intention to teach, and to omit that pledge.

The increased efficiency of the public schools in general will enable students to finish the four-year course in the near future with as little time in the Normal School as was recently required, on the average, for the three-year course. Credits on a part at least of almost every subject in the course outside of the professional work may be earned in any good high school. The preparation on the subjects for admission can be made in any good district school, so that a student coming from any part of the state may be expected to be able to pass examination on any of the subjects required for a first-grade certificate. While admission to the normal department is conditioned on a knowledge of the common branches only, admission to the classes on the other subjects of the first-grade examination will demand that knowledge of the rudiments of these subjects be shown, even though this knowledge be acquired in special classes or in teachers' institutes after entering the normal proper.

With the making of a high-grade professional school, the legislature acted

wisely in removing all tuition charges from those in the normal department. The demand for trained teachers in the schools of the state is greater than the normal can supply, notwithstanding its constantly increasing enrolment. From many years of full knowledge as to the calls for teachers, I am sure that the demand is now reaching down to our undergraduates as never before.

The demand that the public schools be improved comes from all worthy interests and from all classes of society. The best teacher possible is needed to give inspiration and encouragement to children who are liable to find school life and work unattractive. Every reader of this report can call to mind some case of the turning of a child against school because of the bungling work of an incompetent teacher. How many promising careers are checked by poor teaching!

The best teacher is needed to make a wise use of the money invested in other school expenses. Buildings, library and apparatus have no efficiency in themselves. This explains Garfield's saying, that Mark Hopkins with a boy under a tree is a college. The good teacher is cheap at the highest price; the poor teacher is dear at the lowest price. The best teachers will get great benefit from professional training. Whatever the state seeks to introduce into the public schools, she can introduce more economically and effectively through the normal schools. As West Point and Annapolis are necessary to the efficiency of the army and navy, so are normal schools to the state's giving of universal education to her citizens. We need special training for those who are to teach the children as universally as for those who are to train soldiers and sailors.

The best teachers are likely to continue in the business if they have been trained so that they feel that they have more invested in the teaching profession than they could hope to invest in any other; the normal schools will put into the teaching profession those who are better fitted for that business than for any other.

The best teachers are so essential to the success of the schools that the state could afford, if necessary, to shorten the school year, or economize on school buildings and equipments, in order to furnish good training for the teachers. The cost per student in giving training in the Normal School is less than in any other school save the common school, and the returns of this instruction go directly to the state's own enterprise, the public schools.

The chief earthly concern of each generation is to prepare its young for life; the chief concern of the state is the preparation of its future citizens; the chief agent of both the parent and the state is the teacher, and he needs the very best equipment that can be given for his work. The greatest educational need of Kansas is an abundance of good teachers, and the Normal School is the one institution properly expected to give teachers the highest degree of professional training.

For its highest success, the Normal School needs more nearly the equipment and the teaching force now furnished to colleges and universities. If students of the Normal School are to teach by laboratory methods, they must learn laboratory methods in the normal. There is no more reason for loading down the normal school teacher with large classes than there is for giving the university professor larger classes than he now has. Ten students to a recitation is regarded as a typical number for a college class, and the teacher of a class in a normal school has as much need of freshness and vigor, and as much need of time for original work, as does any other teacher. In proportion to the number of students, the teaching force here is relatively larger than it has been for years, but there are not nearly so many teachers as there should be to set proper ideals and to do the best work for the state. Under these circumstances, a proper frankness must

STATE NORMAL SCHOOL. Emporia. See pages 52 and 134.

confess that we look far into the future for the attainment of the ideal that shall give to all the teachers of the state the training that will make them worthy of the very important work for which the Normal School is the distinctive means of preparation.

THE STATE AGRICULTURAL COLLEGE.

The following is taken from President E. R. Nichols' report (1902) to the board of regents of the Agricultural College:

Herewith is submitted my report as president for the biennial period ending June 30, 1902.

Changes in Employees. Of the large number of changes in the faculty and assistants you are familiar. I trust that you will urge upon the legislature the necessity of a liberal appropriation, that you may pay such salaries as the importance of the work demands and stop our teachers from being drawn away by the offer of better salaries elsewhere.

Changes in the Courses of Study. Five years ago the course of study was divided into four courses—agriculture, mechanical engineering, domestic science, and general science. Three years ago these courses were revised, and a course in electrical engineering added. At the revision three years ago the courses were made alike the first year, except such differences as sex requires. Many young men undoubtedly go to college to learn something besides farming—they go to college prejudiced against farming. It was thought by giving each young man one term of scientific agriculture the first year, before the selection of a course need be made, that many would see some of the beauties and opportunities of farm life and be led to select that course. The figures below bear out this conclusion. The increase in students from 1899 to 1902 was sixty per cent., while the increased number of young men taking agriculture during the same period was 220 per cent. Not only has the actual number of young men taking the agriculture course greatly increased, but the strengthening of the agriculture course and the addition of agriculture to the first year's work has led to a much greater increase in the actual amount of agricultural work done. Many comments regarding the division of the courses were made at the time, many believing that the agriculture course would be neglected. The following table shows how the students have selected:

STUDENTS IN THE DIFFERENT COURSES.

| YEAR. | Total. | Men. | | | | | | Women. | | | |
|---------------|--------|--------------|-----------|--------------|-----------|------------------|-----------|------------------|-----------|-------------------|-----------|
| | | Agriculture. | | Engineering. | | General science. | | General science. | | Domestic science. | |
| | | No. | Per cent. | No. | Per cent. | No. | Per cent. | No. | Per cent. | No. | Per cent. |
| 1898-'99..... | 870 | 127 | 22.1 | 160 | 27.8 | 287 | 50.1 | 193 | 65.4 | 103 | 34.6 |
| 1899-'00..... | 1,094 | 257 | 34.1 | 201 | 28.7 | 296 | 39.1 | 170 | 50.0 | 170 | 50.0 |
| 1900-'01..... | 1,321 | 378 | 39.6 | 293 | 30.7 | 284 | 29.7 | 109 | 29.8 | 257 | 70.2 |
| 1901-'02..... | 1,366 | 407 | 40.0 | 367 | 36.1 | 243 | 23.9 | 83 | 21.9 | 296 | 78.1 |

In connection with the above, it should be noted that all young men have the same work during the first year, which includes one term each of agriculture botany, physics, woodwork, blacksmithing, and foundry work; and all young women take, during the first year, one term each of cooking, botany, and physics, and three terms of sewing.

If the number of students in each class in agriculture be multiplied by the number of hours the subject was taught, and the sum of all these products taken, the number thus obtained will tell better than any other method the actual work done in agriculture. The following figures were thus obtained:

| Year. | Hours. |
|---------------|---------|
| 1896-'97..... | 12,500 |
| 1897-'98..... | 8,930 |
| 1898-'99..... | 15,462 |
| 1899-'00..... | 76,234 |
| 1900-'01..... | 112,808 |
| 1901-'02..... | 123,186 |

If all the subjects directly related to agriculture, such as horticulture, veterinary science, etc., had been included, the difference in favor of the last three years would have been still more marked.

The above figures show an increase of nearly 700 per cent. for 1901-'02 over 1898-'99.

Large Classes.—The following table gives the number and size of classes during the last two years:

| TERM. | Number in class. | | | | | | Total classes. |
|--------------------|------------------|--------|--------|--------|--------|----------|----------------|
| | 1-10. | 11-20. | 21-30. | 31-40. | 41-50. | Over 50. | |
| Fall, 1900..... | 25 | 45 | 26 | 23 | 24 | 11 | 154 |
| Winter, 1901..... | 26 | 41 | 38 | 47 | 24 | 8 | 184 |
| Spring, 1901..... | 31 | 38 | 38 | 21 | 5 | 5 | 138 |
| Fall, 1901..... | 26 | 32 | 21 | 26 | 22 | 13 | 140 |
| Winter, 1902..... | 27 | 42 | 39 | 64 | 16 | 14 | 202 |
| Spring, 1902..... | 34 | 51 | 40 | 26 | 8 | 1 | 160 |
| Total classes..... | 169 | 249 | 202 | 207 | 99 | 52 | 978 |

Most institutions fix the maximum size of classes at thirty. There were 358 classes having a membership of over thirty. In order to do the best work, the teaching force should be increased nearly fifty per cent. With the limited means, it has not been possible to increase the instructors as fast as the students have increased. The following table shows the enrolment, number of instructors, amount paid for salaries, and the amount paid for work in agriculture as compared with all other departments. The last two columns do not include salaries:

| YEAR. | Students. | Instruct- ors. | Salaries. | Department expenses. | |
|---------------|-----------|-------------------|-----------|----------------------|----------------------------|
| | | | | Agriculture. | 23 other de- partments. |
| 1896-'97..... | 734 | 33 | \$35,215 | \$2,098 | \$13,387 |
| 1897-'98..... | 803 | 34 | 37,064 | 1,549 | 17,767 |
| 1898-'99..... | 870 | 37 | 37,737 | 2,279 | 23,798 |
| 1899-'00..... | 1,094 | 45 | 38,417 | 4,179 | 11,147 |
| 1900-'01..... | 1,321 | 48 | 42,071 | 6,348 | 15,349 |
| 1901-'02..... | 1,396 | 51 | 42,936 | 10,665 | 12,354 |

The amount available for department expenses for the three years 1896-'99 was \$60,870, while for the three years 1899-1902 it was only \$60,040, notwithstanding the number of students had increased sixty per cent. in that time. It has been necessary to decrease the appropriations in all departments to give proper attention to agriculture, the growth in this department being shown in the previous part of this report.

Attendance.—The rapid growth of the college has been referred to else-

where. The following tables show the attendance by classes and by counties for the last two years, with a comparative statement of the attendance for the past twenty four years:

| CLASSES. | 1900-'01. | | | | 1901-'02. | | | |
|-------------------------------------|-----------|--------|---------|--------------|-----------|--------|---------|--------------|
| | Men. | Women. | Totals. | Average age. | Men. | Women. | Totals. | Average age. |
| Graduate | 16 | 24 | 40 | 25.12 | 15 | 17 | 32 | 25.05 |
| Senior | 38 | 36 | 74 | 22.41 | 42 | 23 | 65 | 23.74 |
| Junior | 56 | 24 | 80 | 22.59 | 81 | 39 | 120 | 21.80 |
| Sophomore | 122 | 61 | 183 | 20.62 | 130 | 76 | 206 | 20.76 |
| Freshman | 237 | 111 | 348 | 19.66 | 230 | 116 | 346 | 19.62 |
| Preparatory | 256 | 62 | 318 | 20.39 | 229 | 59 | 288 | 20.59 |
| Special | 14 | 7 | 21 | 24.31 | 7 | 12 | 19 | 24.45 |
| Hospitants | 2 | | 2 | 27.91 | | | | |
| Dairy | 72 | | 72 | 23.44 | 66 | | 66 | 23.71 |
| Farmers' short course | 109 | | 109 | 21.73 | 124 | 1 | 125 | 22.05 |
| Domestic science short course | | 47 | 47 | 21.27 | | 41 | 41 | 22.46 |
| Apprentices | 78 | 1 | 79 | 22.32 | 84 | 3 | 87 | 22.21 |
| Counted twice | 45 | 7 | 52 | | 51 | 8 | 59 | |
| Totals | 956 | 366 | 1,321 | 21.03 | 1,017 | 379 | 1,396 | 21.08 |

SUMMARY OF ATTENDANCE BY COUNTIES.

| | | |
|-----------|---|-------|
| 1900-'01. | From eighty-five counties of Kansas | 1,261 |
| | From twenty other states | 60 |
| | Total | 1,321 |
| 1901-'02. | From ninety counties of Kansas | 1,334 |
| | From sixteen other states | 62 |
| | Total | 1,396 |

Degrees.—The degree of bachelor of science was granted to fifty-nine students in 1901. The degree of master of science was granted to seven students. In 1902 the degree of bachelor of science was granted to fifty-one students, and the degree of master of science to two students.

Farmers' Institutes.—During the year 1900-'01 156 institutes were held, and for the year 1901-'02 102 were held, with a total attendance of 32,450. It was necessary to refuse many requests for institutes on account of lack of means. The college should have sufficient means and teachers to carry on this work.

Christian Associations.—The Young Men's and Young Women's Christian Associations have maintained large memberships throughout each year, rather more than half the students being members of these organizations. They aid very materially in the welfare of the students, both morally and socially. They hold weekly meetings, with joint monthly meetings, and give several entertainments during the year, the ones given at the beginning of each term being especially useful in bringing old and new students together. They have committees to meet all trains at the beginning of each term and aid students in finding rooms and boarding places and in giving general directions. They also aid in the care of the sick when necessary.

General Duties.—Owing to the increased attendance and the consequent increase of executive work, as well as my necessary absence frequently from college, I have done no teaching. I have attended several meetings of the State Board of Education each year, prepared questions for the state and county examinations, and graded papers on the former. Several trips were made visiting various accredited colleges in the state.

There have been no serious cases of discipline. A few students were suspended for a short time on account of ten or more unexcused absences. The faculty have felt that since the state and nation furnish education free to all who

apply, the students should be willing to attend regularly, unless absent for a good and sufficient reason. A few students were denied assignment for a half or a full term on account of failure in studies through lack of proper attention to duties. It is not the intention of the faculty to deprive any one of the privileges of the college who shows a willingness to attend classes and apply himself properly. The best of feeling has prevailed, and I have had the hearty cooperation of students and faculty in all matters affecting the welfare of the college.

WHY PUPILS LEAVE SCHOOL.

I have been interested in conducting an investigation with the view of ascertaining the causes which keep pupils of school age from attending school, causes which prevent pupils from graduating from the high school, and the causes which prevent pupils from entering college.

In order to make the investigation as thorough and comprehensive as possible, I sent the following questions to about 200 of the representative school men of the state:

- "1. How many pupils are there now in the lowest class of your high school?
- "2. How many are there in the graduating class of your high school?
- "3. How many of those who graduated last year are now in college?
- "4. How many of those who graduated last year are now in some preparatory school preparing for college?
- "5. What per cent. of those who complete the grammar school enter the high school?
- "6. What per cent. of those who enter the high school graduate therefrom?
- "7. What per cent. of those who enter the primary grade finish the high-school course?
- "8. What are the principal causes that prevent children who have completed the course below the high school from continuing their studies?
- "9. What are the principal causes that account for the difference between the number entering the high school and the number graduating therefrom?
- "10. What are the principal causes that account for the difference between the number graduating from the high school and the number entering college?"

One hundred and twenty-five replies were received, and from these it was found that 3186 pupils are enrolled in the lowest grade of the high school. The number of pupils in the graduating class of the high school was represented to be 1193. Of those who graduated last year, as reported by these schools, 358 are now in college, while 15 are in some preparatory school preparing for college. The per cent. of those who complete the grammar school and enter the high school is 80. The per cent. of those who enter the primary grade and graduate therefrom is 42, while the per cent. of those who enter the primary grade and graduate from the high school is 17. On the basis of the reports received, 33 per cent. of those who enter the high school graduate. The same per cent. holds true of those who graduate from the high school and enter college. A few samples from the reports received will serve as a forcible illus-

tration. One high school enrolls 31 in the lowest class and graduates 9. Another enrolls 26 and graduates 22; another 256 and graduates 79; another 183 and 68 graduates; another 30 and only 2 graduates; another enrolls 15 and has no graduates; another 150 and 53 graduates, and still another enrolls 15 and graduates 15. It will be seen, therefore, that the per cent. of graduation of those enrolled ranges from about zero to 100 per cent.

In regard to the per cent. of those who complete the grammar school and enter the high school the reports received show diversified conditions. One school, for instance, reports that 35 per cent. of those who complete the grammar school enter the high school, and of this number 30 per cent. graduate from the high school. Another reports that 85 per cent. of those who complete the grammar school enter the high school, and 25 per cent. graduate. Another shows 100 per cent. entrance and 50 per cent. graduation; another 100 per cent. entrance and 35 per cent. graduation; another 100 per cent. entrance and 25 per cent. graduation; another 90 per cent. entrance and 25 per cent. graduation; while another reports 25 per cent. entrance and 90 per cent. graduation.

From the reports received it is found that an average of about 17 per cent. of those who enter the primary grades graduate from the high school. In other words, 17 out of every 100 pupils go out into the world with a good high-school education.

More than thirty different school men report that pupils leave school on the plea that they must earn a living either for themselves or their parents. There are no doubt cases where this, unfortunately, is a necessity. But in most cases parents are apt to give this as an excuse because of a failure to appreciate the advantage of educational training. To earn a living is important, but to prepare to live a complete life is more important. A high-school education is one of the best investments offered our young people to-day. A boy's chance for success in life is lessened by taking him out of school. The boy who continues in school and graduates stands the best chance of making a living.

Another fact brought out in this investigation is that parents, teachers and school boards are greatly at fault. They do not encourage pupils to stay in school. The parent should cooperate with the school. One-fifth of the answers received indicate that pupils leave school because of a lack of parental interest in school work. This indifference on the part of parents leads to a lack of educational spirit, and under such environments it is no wonder that children drop out of school. Members of the school board should visit school often and encourage pupils and teachers. I am quite sure that if encouragement and help were received from these sources, many pupils would

remain in school who now drop out because of a lack of attention and encouragement. The school does not only offer a privilege; it imposes a duty. It is the duty of parents to educate their children.

The answers received also indicate that many pupils who enter the high school fail to graduate because of the social demands made upon them. Social culture has its place, but it should not crowd out the work of the school. Right here mothers can do much good for the school. Teach the pupils the golden rule. This is the essence of social etiquette. Social frills and empty compliments can come later. They should not be allowed to disorganize the student mind.

Almost one-half of the replies show that the high-school graduate fails to enter college because of a lack of means. It is unfortunate that in these days of prosperity and plenty so many worthy young people should be forced to stay out of college for lack of money. Statistics show that the college graduate captures the best positions in life, and with the least expenditure of time and labor. Each one of us should encourage pupils to take an advanced course of training at some recognized college or university.

The investigation also reveals the fact that many pupils leave school because of a desire to make money. Those who declare that the highest success in life can be secured without a college education either do not understand the conditions that make for success, or else they put a wrong interpretation upon educational training. Young people should not be in too great a hurry to go into business. In the final analysis the man who takes time to thoroughly prepare himself is the one who gets the most pleasure and profit out of life. Education is the best foundation upon which to build a successful career.

The following replies in answer to the eighth question are interesting as showing some of the causes that prevent children from continuing their studies after completing the course below the high school: Lack of appreciation of higher education; the desire to make money; lack of ambition; indifference of pupils and parents; restlessness of children from thirteen to eighteen years of age; excessive emphasis placed upon commercial training by parents; distaste for hard mental work; too rapid promotion in the grades; many pupils are required to make a living for dependent ones; lack of educational spirit; hurry to engage in work for themselves; need of money for family; a desire to be freed from restraint of school; too much Latin in the course; lack of appreciation of the value of school training; the Edward Bok doctrine; articles written aiming to show that our wealthiest men quit school early and went into business; few regard education for its own sake, but are wholly imbued with the "business idea"; necessity of taking up life work; lack of public sentiment in favor of free higher education; faulty high-school course; pupils

needed at home; many parents do not see the necessity of a high-school course; changing of teachers; cigarette habit; parents allow children to spend evenings on the street; irregular attendance; defective methods on the part of teachers; failure on part of schools to have manual training; children are not trained at home as they should be; indifference to opportunity; our high-school courses are not practical; boys who never expect to enter college do not like to study Latin, and will quit school before completing on account of this; we need two courses in all our high schools—one preparing for university, one a manual-training, science-business course—this will hold our boys; standard for county certificates too low; higher education not appreciated; idleness.

The following are some of the answers received in reply to the tenth question: Lack of funds; want of thorough work in lower grades; financial condition of the parent; desire to make money; lack of desire for higher education; the faulty notion that pupil has finished education in the high school; haste in getting out into the world; college course seems too long; lack of interest; lack of encouragement on part of teacher; reluctance to leave home; lack of public sentiment; colleges lack uniform entrance requirements; home influence against higher education; afraid of Latin and Greek; fraternities keep some out; stress of circumstances.

STATE AID TO HIGH SCHOOLS, GRADED AND RURAL SCHOOLS.

The next step in the improvement of our public school system must be state aid to high schools, graded and rural schools. The state board of education should be empowered by law to appoint a high-school inspector and a graded-school inspector. These inspectors should be paid a regular salary and expenses while inspecting schools.

The high-school inspector should visit each high school in the state from time to time and report the result of his inspections to the state department of education.

The graded-school inspector should visit graded schools and report in a like manner.

The purpose of this thorough and systematic inspection should be to organize the schools along broad and progressive lines, with a view of making it possible for them to secure state aid within certain prescribed conditions.

With this end in view, the schools should be divided into four classes:

1. High schools.
2. Graded schools.
3. Semi-graded schools.
4. Rural schools.

The conditions upon which a high school would become entitled to state aid should include at least nine months of school each year, a course of study articulating with the State University, a good library, and a certain amount of school apparatus. The school should be open at all times for visitation and inspection by the state high-school inspector. To each school thus organized the state should appropriate \$1000 for a period of two years.

The conditions of state aid for a graded school should be along similar lines. A graded school to be entitled to state aid should maintain at least nine months of school each year; it should have not less than four departments; the principal and teachers in charge should be the holders of the highest grade of certificate, supplemented with mature experience in teaching. The course of study should be broad and comprehensive. The school building should be constructed in line with modern ideas of school architecture. A good library and a sufficient supply of apparatus should be supplied. Any school meeting requirements of this character should receive the sum of \$500 from the state for a period of two years. Whenever a graded school would advance to a high school it should receive aid as such.

A semigraded school with eight months of school each year, two departments, a regular course of study, suitable school buildings, library, and apparatus sufficient to do good work, and proficient teachers with first-grade certificates, should be entitled to a state aid of \$200 for two years.

A rural school maintaining eight months school during the year, having a good schoolhouse, with library and apparatus, and employing a teacher holding a first-grade certificate, should receive \$100 as state aid for two years.

In each case provision should be made by law for regular reports from the state-aided schools to the state superintendent of public instruction. The State Board of Education should be given power to grant state aid when the prescribed conditions are complied with. The board should also be authorized to exercise, in conjunction with the state superintendent, legal jurisdiction in the enforcement of the law so far as meeting the requirements for state aid are concerned.

I am fully convinced that a plan of state aid of this kind would give us better high schools, better village schools, and better country schools. It would increase the length of school term; better teachers would be secured. Encouragement of this kind from the state would become an incentive to the people to build up good graded schools. In each instance the people would be the gainers because of the better school facilities secured. It seems to me that the state can well afford to invest money judiciously for the upbuilding of these schools, where by far the greater per cent. of the boys and girls of the state are educated.

WILLIAM C. SPANGLER,
Late Acting Chancellor of the
University of Kansas.
Page 66, 3rd

CHARLES E. ARNOLD,
Late President of
McPherson College.
Page 67.

When we reflect that a great majority of those who graduate from the high school go no farther, the question of improving our public-school system becomes one of supreme importance. The state is liberal in its appropriation for the higher institutions of learning, and rightly so; but we must remember that the public-school system is the foundation of our educational work, and when we make it strong it becomes easy for the higher institutions to grow and prosper.

Add to our law providing for the consolidation of rural schools one of state aid, and in less than ten years Kansas will have the best public schools of any state in the union. More than that, a larger per cent. of our youth will stay in school, and more of our people will be educated with Kansas money in Kansas schools.

PRESIDENT ROOSEVELT'S TRIBUTE TO THE TEACHER.

In his address at the dedication of the new Central High School for Boys, in Philadelphia, November 22 of this year, President Roosevelt paid the following tribute to the American school teacher. He said:

"Nothing like our present system of education was known in earlier times. No such system of popular education for the people by representatives of the people existed. It is, of course, a mere truism to say that the stability, the future welfare of our institutions, depend upon the grade of citizenship turned out from our public schools. No body of public servants, no body of individuals associated in private life, are better worth the admiration and respect of all who value citizenship at its true worth than the body composed of the teachers in the public schools through the length and breadth of this Union. They have to deal with the citizenship in the raw, and to turn it out something like a finished product, and I think that all of us who have endeavored to deal with that citizenship in the raw in our own homes appreciate the burden of responsibility."

NECROLOGY.

William C. Spangler.

William Cornelius Spangler, born at Peotone, Ills., August 7, 1859, died at Lawrence, Kan., October 22, 1902. His father, Jacob R. Spangler, after removing from Pennsylvania to Illinois, came from that state with his family to Crawford county, Kansas, in 1870. Here he has remained, and is to-day a successful farmer.

The grandfather of the subject of this sketch was John C. Spangler, who died in 1887, at Jefferson Borough, Pa., aged seventy-seven years. He was a son of Bernhard Spangler, who was a member of the Sixth company, Seventh battalion, of the York County Militia, in the war of the revolution. He was a son of Jonas Spangler, who was born in 1715, at Weyler, in the Palatinate on the Rhine, and was brought to America in 1727 by his father, Caspar Spangler, the pioneer Spangler on this continent. The latter was a master and craftsman of the linen-weavers' guild of Weyler.

The Spangler emigrants of America were reformers, with the courage of their religious convictions, and refused to subscribe to a religion to which they could not conscientiously give their allegiance. They accordingly accepted William Penn's invitation to settle in his province. They were not peasants, but belonged to the well-to-do, thrifty and intelligent classes.

With such an inheritance of manly independence of character, William C. Spangler strengthened his natural endowments by seeking the best educational advantages to be obtained in the state of Kansas.

On the 6th of June, 1883, Mr. Spangler graduated from the school of arts of the University of Kansas, having completed the full preparatory and collegiate courses. On the 10th of June, 1885, he received the degree of bachelor of laws from the same institution, and for fifteen years conducted a very successful law practice in Lawrence. During the six years of his student life at Lawrence he maintained a high standard of scholarship. On account of his excellent attainments and manly qualities he was elected to membership in the Phi Beta Cappa Society. His scholarship was not that of a bookworm, for he was thoroughly interested in and took a prominent part in all university affairs. He was, indeed, a representative student, and on more than one occasion acted as marshal of the student body. Having served as secretary in the chancellor's office during a portion of the administration of Chancellor Lippencott, he was fully conversant with the executive work of the university, and it was to the great gratification of the friends of the university that he was appointed a member of the board of regents in 1889. He was made acting-chancellor at the close of Doctor Lippencott's administration, during the interregnum, when only thirty years of age, taking entire charge of the business affairs of the university. In this position he exhibited good judgment and splendid business ability. He again came to the relief of the university as vice-chancellor during the year following the administration of Chancellor Snow. In this capacity he became a conspicuous example of heroic sacrifice of self for the institution he so dearly loved. He gave himself—he gave his life to obey the call of his *alma mater*. The preeminent quality of his character was self-sacrifice for others. His whole life illustrated the most eminent Christian virtues, and showed conclusively that to be a Christian is “to love justice, to long for the right, to love mercy, to assist the weak, to forget wrongs, to remember benefits, to love the truth, to be sincere, to utter honest words, to love liberty, to love wife and children and friends, to make a happy home, to make others happy, to receive new truths with gladness, to cultivate hope, to see the calm beyond the storm, the dawn beyond the night.” Mr. Spangler abundantly incor-

porated into his useful life "whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report."

Charles E. Arnold.

Charles E. Arnold, president of McPherson College, died May 31, 1902, after a brief illness, of cancer of the kidney. Though suffering greatly at times for several months, he continued at his work until about four weeks before his death, when he was compelled to seek relief. A surgical operation revealed a very malignant form of internal cancer, for which the best medical skill could do nothing. With the same calm, peaceful spirit which characterized his whole life, he awaited the inevitable end.

His early life was spent on a farm in Mineral county, West Virginia. It was his youthful ambition to become a teacher, perhaps some day in a college. With this end in view, his rainy days and noon hours of "rest" were spent in study. At seventeen he was a successful teacher in the public schools. He received his higher education at Bridgewater College, Virginia, Ohio Normal University, and Illinois Wesleyan University. After his graduation he taught two years in the Botetourt Normal, Virginia. In 1893 he was elected professor of mathematics in McPherson College. This position he filled very acceptably for three years. In 1896 he was elected president of the college, and was transferred to the chair of pedagogy and philosophy. At that time the college was deeply indebted and very much disorganized. To his undaunted courage and inspiring leadership is largely due the fact that these difficulties were surmounted.

President Arnold was a man of large plans, high ideals, and tireless industry. He undertook and accomplished tasks from which many would have shrunk in the midst of so many routine duties. He was constantly pushing forward his own preparation for greater usefulness. A hearty supporter of every movement which promised to increase the sum of human liberty and happiness, he was most interested in the study of educational and theological problems. With the modern tendency to reexamine the foundations of religious belief he was in hearty sympathy, believing that the truth could not suffer from investigation. He took great interest in the state and international Sunday-school movements, and at the time of his death was secretary of the executive committee of the State Sunday-school Association.

Though but thirty-six years of age he was already recognized as one of the leading educators of the state. A great career seemed to be just opening before him. He was an able preacher, lecturer, and writer. His services were sought for normal institutes and convention programs. But his greatest public service was the leading part

which he took in raising McPherson College to the rank of an educational institution worthy to stand beside the best in the state.

Perhaps the most conspicuous element in President Arnold's character was his remarkably even temperament. Nothing disturbed him. Some men live in the clouds to-day and in the mire tomorrow, but he moved steadily along in the plain, level road. Some men's religion is crowded into occasional ecstatic experiences; his permeated every act and thought of his daily life. That character determines destiny was a fundamental article in his creed, and with calm confidence that there was a glorious future before him, he passed beyond our sight.

J. D. Droke.

Jacobus D. Droke was born at Morris Chapel, Tenn., August 9, 1857; died at Tullahoma, Tenn., June 23, 1902.

"Life is not measured by the time we live," was never more significant than when applied to him. Left fatherless during the civil war, responsibilities were early thrust upon him. From boyhood his was a strenuous life—a continuous struggle with the poverty and poor facilities amid which the New South was born.

In 1880 he entered the East Tennessee Wesleyan University, at Athens, Tenn., but was compelled to leave at the end of two years on account of serious trouble with his eyes. He, however, continued his studies so soon as his health permitted, and later received the A. M. degree from the same institution, now known as U. S. Grant University.

Upon leaving college in 1882 he entered upon the active ministry of the M. E. church, to which he had previously been ordained. In 1884 he was married to Miss Anna Elizabeth Scott, a former class-mate. He first became actively identified with educational work in 1890, while pastor of the Methodist church in Greeneville, Tenn. He had for three years a number of private students, and being urged to take others, he opened a high-grade private school, known as the Greeneville Collegiate Institute, which in two years obtained an enviable reputation throughout eastern Tennessee.

Later, three years were spent in travel and study. During this time he wrote "From the Old South to the New," and also won success as a lecturer and platform speaker.

Upon his return to Tennessee, in 1896, he was elected principal of Edwards Academy, at White Pine, Tenn., which position he filled with great credit for five years, winning the love and admiration of students and patrons.

In 1898 he received the doctor of divinity degree from the American Temperance University, of Harriman, Tenn. In May, 1901, he represented the Southland in the general conference of the church of

the United Brethren in Christ at Fredericksburg, Md., replying to the address of welcome in his usual winning manner. In June of the same year he was elected to the presidency of Lane University, at Leocompton, Kan.

Soon after assuming his new duties his health began to decline, and before the year was half gone it was apparent to his many anxious friends that his end was near. However, amid the difficulties incident to failing health, he so wisely directed the affairs of the institution that it took on new life. Lane University owes much to Doctor Droke. The students and patrons of the school were bound to him as with a band of steel. He will live long in their hearts and lives.

"The work he tried to do shall live as tho' 't were done;
God finishes the work by noble souls begun."

EDUCATIONAL INSTITUTIONS.

I have endeavored to make this report thoroughly representative of the educational resources of Kansas. Through the cooperation of the county superintendents, it was possible to secure a complete list of the educational institutions in each county of the state. Last July I sent the following letter to each institution of learning:

"It is now more than forty years since Kansas became a state. During this time great progress has been made in our educational work. The people have responded to every effort put forth for the education of the youth of the state, and as a result we have a splendid public-school system. The higher institutions of learning have also received loyal support and to-day occupy a prominent place in the educational system of the state.

It seems to me appropriate to give to the people a brief history of the origin and development of our educational institutions. I should be glad, therefore, to receive from you at your earliest convenience a statement, containing not more than 600 words, giving the history and growth of your institution. Your statement will be incorporated in my forthcoming biennial report. I believe this information will be of interest to the people and will serve as a true index of the educational resources of the state.

I also enclose herewith copy of blank annual report, which please fill out and return with your statement.

The reports, and historical sketches which follow herewith will, I trust, be of value and interest to the people of the state.

CONSOLIDATED SCHOOLS.

LORRAINE UNION CONSOLIDATED SCHOOL.

W. S. BEAN, Principal.

Lorraine, Ellsworth county. Founded, 1898. One professor. Three teachers. Four departments. Total enrolment last year, about 110. Number of graduates last commencement, 2. Total number of graduates since organization, 2. Land owned, one-fourth block. Value of buildings, \$3000. Value of apparatus, about \$300. Volumes in libraries, about 75. Value of libraries, \$25. Total receipts for the current year, \$2087.51. Total expenditures for the current year, \$1874.59. Rates of tuition per annum, \$1.75 per school month (to non residents). Average total annual expense per student, \$17.95.

HISTORY.—This school is located in Green Garden township, Ellsworth county, Kansas, and was the first consolidated school organized in the state. In the neighborhood where this school is located there had been some dissatisfaction for several years regarding the condition of the rural schools. Nearly all the taxpayers are enterprising, thrifty farmers, who desired to give their sons and daughters better educational advantages than these schools were furnishing; at the same time they did not feel able to bear the expense necessary to send them elsewhere while obliged to maintain school at home. Various remedies were suggested, but the idea of bringing the graded school home instead of moving the home to the graded school seemed to please them best. Accordingly, a special law was enacted by the legislature in 1897, enabling the districts in the above-named townships to disorganize for the purpose of forming a consolidated district. The disorganization of four rural schools followed, and, in accordance with the provisions of the act, were organized into one district. A new building, 32x48 feet, and two stories high (containing four rooms), was erected. A term of eight months was decided upon, and three departments (primary, intermediate, and grammar) maintained until the end of the second year, when a two-years high-school course was added and an additional teacher employed.

The question of transportation of pupils was settled by dividing the district into three divisions and laying out a route in each. Three drivers were employed by the district, and during the first year transportation was furnished to pupils residing more than two miles from the building; since that time it has been furnished to all. The vehicles used are ordinary farm wagons (provided with springs), and are enclosed during severe weather by a canvas cover. The expense of such transportation is fifty-two cents per school month per pupil. Last year an additional route was established and a fourth driver employed.

This school has been in operation since October, 1898, and is no longer regarded by its patrons as an experiment. From the beginning it has been a decided improvement on the rural schools, and continues to show its points of superiority. The enrolment in the territory now included in the union district has increased from 95 pupils (rural) to 107 (first year), and to 112 and 115 succeeding years. Before consolidation, the average daily attendance was 62½ per cent. of the enrolment; since that time it has increased to ninety per cent. Tardiness has been eliminated. Without additional cost, this school offers its pupils the advantages of a two-years high-school course. A county diploma is required for admission to the high school. From the fact that two-thirds of the high-school pupils are country boys, it will readily be seen that this plan of school organization reaches a class of pupils who are usually deprived of these advantages.

MANUAL-TRAINING SCHOOLS.

KANSAS CITY HIGH SCHOOL, MANUAL-TRAINING DEPARTMENT.

GEO. E. ROSE, Principal.

Kansas City, Kan. Number of teachers, 5. Total enrolment last year, 180. Value of apparatus, \$1200.

HISTORY.—The industrial work in the Kansas City, Kan., high school is of three kinds: woodwork, drawing, and typesetting. Each department is in charge of a specialist. Prof. A. M. Bumann, of the manual-training school of Washington University, St. Louis, has charge of the shop. The course, at present, for lack of room, is limited to one and one-half years of work, instead of being four years in length, as it should be. This work was begun September, 1900. The benches and tools cost \$1200, while the cost of material per school year is about fifty dollars. Eighteen benches are in place and they accommo-

date 106 pupils. The recitation periods are each forty-five minutes in length. The following summary of exercises will give some idea of the work that the pupils do in this department: The first is a sawing exercise, which involves the squaring-up of the wood used, sawing ends to a knife line, laying out knife lines at right angles, and, also, at angles at 35° , 45° , and 60° , and the practice in sawing to these lines, and also practice in using the marking gauge. Then follow ten other exercises in this term, which bring into play all of the simple tools. Pupils learn to make mortises of various kinds, cross halve together two pieces of wood, construct mortise and tenon joints, chisel various angles, and round wood with chisel. They acquire the use of the rip-saw, make table legs of two rails, showing two methods of construction. They master the one-half dovetail and the single dovetail joints. The last exercise in this term is the glue joint, used in constructing fancy gavels, T squares, etc. During the second term, in addition to the tools already mastered, they use the brace and bit in making dowel joints, dowel pins, dovetail corners, oil-stone boxes, card cases, and simple forms of wood-carving. The third term is devoted to wood-carving and constructing of various articles, such as knife-and-fork boxes, handkerchief boxes, glove boxes, footstools, towel-racks, easels, and carving decorations; also some work in pyrography. Some of the benefits resulting from this work are: The training of the hand and eye; a knowledge of tools, how to keep them in working order, and the proper methods of employing them; how to make working drawings of anything they wish to construct, and how to interpret the working drawings that others have made.

The drawing department is in charge of Miss May F. B. Harman, a graduate of the Kansas State Agricultural College. The value of the present equipment is about \$300. The equipment includes plaster casts, easels, drawing-boards, and drawing-tables. The department accommodates forty pupils per hour, or 240 pupils per day. Various kinds of work are done in this department, and many of the pupils take a four-years course in drawing. The plaster casts represent geometrical solids, architectural ornaments, vases, animals, parts of the human body, heads of historical characters, and draped figures. The work required enables the pupil to master the elementary principles of perspective; the habit of accurate seeing; and helps to develop artistic taste, appreciation of beauty, individuality, and invention. Pencil, charcoal and crayon are the mediums used.

The type work was introduced January, 1902, and is in charge of Prof. W. W. Douglass, a graduate of the Kansas State University. The equipment consists of an 8x12 Gordon press, worth \$130, and type, cases, etc., worth \$100. There are thirty pupils in this department, and the printing done is such as will be helpful to the several departments of the high school, namely: Outlines in history, exercises in English, questions in civics, short sets in bookkeeping, outlines in grammar, physiology, psychology, etc.

All of the industrial departments are crowded, and many students are turned away each term for lack of room. Industrial studies are elective and are open to boys and girls alike. A credit of but one-half point per term is given in these departments, as no home study is required. Since manual work has been put into the school no change has been made in the amount of academic or book work required of each student. The boys and girls regard forty-five minutes in the workshop or art room a pleasant relief from the more severe mental work of the classroom. In many cases, the more attractive manual work holds a pupil in school until he becomes interested in book studies.

PITTSBURG MANUAL-TRAINING SCHOOL.

Manual training in the Pittsburg schools is optional, but the pupils are given credit for this work just the same as for any other branch. For the boys there is a room furnished with eight work-benches, each bench being supplied with two sets of tools. The work for the boys is a systematic course in joinery, supplemented with sloyd and hand-carving. Each pupil is required to make a working drawing before attempting to make the object. Rooms are now being equipped in the new building for wood-turning, iron-turning, and forging; thus the boys will have a four-years course in this work.

The girls manual-training department consists of domestic art, or sewing, in which a systematic course is pursued, beginning with the simplest stitches and progressing until the complete dress is made. A course of models of hand work is the first taken up, including the following: Basting, running, back and half-back stitches, overcast and French seams, overhanding, hemming, gathering, stroking, putting on bands, making of gussets and placket, hemstitching, making of button-holes, eyelets, and loops, sewing on buttons, catch-stitching, weaving, darning, patching, blind-stitching, slip-stitching, and joining of lace.

When the introductory work has been finished, an application of this knowledge and training is made in the cutting and fitting of garments. The simplest pieces, as handkerchiefs and aprons, are made first. Then follows the drafting and making of underskirt, drawers, night-dress, underwaist, and finally the complete dress. The drafting of patterns is an important feature of the work. Accuracy and skill are required in the taking of measurements and the reproducing them on paper in the form of patterns. In cutting garments the least possible material is used. The individuality of the students is encouraged by allowing them, as far as possible, to plan the making of the garments. Each girl is required to keep a note book containing a complete set of models with explanatory notes. The course also includes the study of materials. The students do some original work, preparing papers on the different materials, as cotton, wool, linen, and silk. Written examinations are held, testing the girls' knowledge of how and why to do, while their ability to do is judged from the work done. A room for cooking is also a part of the new building. The work in this department consists of the study of the chemistry, cookery and comparative value of different foods, thus completing a four-years domestic-science course for the girls.

The introduction of manual training three years ago in this high school came about by the desire of the Pittsburg people to give their boys and girls the best possible education. The manual-training work in the high school has more than met the expectation of the citizens and teachers. Some of the direct benefits are: Increased attendance, training in accuracy, and a stimulus in literary work.

TOPEKA INDUSTRIAL AND EDUCATIONAL INSTITUTE.

WILLIAM RICHARD CARTER, President.

Topeka, Kan. Founded, May, 1895. Non-sectarian. Property deeded to board of trustees, who hold it in trust for negro education. Trustees receive no compensation. Nine teachers and instructors. Number of lecturers, 2. Number of departments, 4. Industrial department subdivided into ten departments. Total enrolment last year, 134. Number of graduates last commencement, 4. Total number of graduates since organization, 12. Land owned: Eight lots in city, value, \$2000; farm of eighty acres (partly purchased), value, \$2400. Value of buildings, \$6200. Value of apparatus, \$4125. Supported by donations. Number of volumes in libraries, 2000. Value of libraries, \$1371. Total receipts for

MANUAL-TRAINING HIGH SCHOOL, Pittsburgh, Crawford county. See page 12.

the current year, \$3655.36. Total expenditures for the current year, \$3655.36. Rates of tuition per annum: Regular, \$13.50; industrial, \$9; music, \$9; business course, \$45. Average total annual expense per student, \$68.50, board and tuition. The annual expense per student is placed at \$50. Fifty dollars supplies an annual scholarship.

HISTORY.—In the spring of 1895 Mr. Edward Stephens and Miss Izie Riddick (who has since become Mrs. Stephens) came to Topeka for the purpose of establishing an industrial school for the negroes of this city and state. Industrial schools had been successfully operated in the South; consequently the friends of the freedman in this section of the country gave the promoters of the work hearty encouragement and financial support. The work began as a kindergarten in a rented shanty in the eastern part of the city. In the fall of the same year the school was removed to the brick building at the corner of Tenth and Washington. The work here was quite successful, owing to the arduous efforts of Mr. and Mrs. Stephens. The work continued to prosper so, it became necessary to find a more central location; so the school was removed to a brick building on lower Kansas avenue.

In the fall of 1896 the friends of the work thought it advisable to secure a permanent home; consequently a portion of the present property was secured. The futurity of the institution thus being secured, friends in many sections of the country came to its assistance. The following year a frame building to be used as a trades building for boys was erected. Later during the same year a two-story brick addition, to be used as a girl's dormitory and industrial building, was built to the main building. Up to this time the work was under the supervision of Mr. Edward Stephens and his wife.

In 1900 the board of trustees, in order to make the work more practical, requested Mr. Booker T. Washington, principal of Tuskegee Normal and Industrial Institute, Tuskegee, Ala., to send them a principal for the work. Mr. Washington recommended William R. Carter, of the class of 1893 of that institution. Mr. Carter, having had signal success in industrial-school work in the South after graduating from the Tuskegee institute, was eminently fitted for the place. His coming to the institution brought new life, new ideas, new methods, and since his advent the success of the work has been marvelous. The work has been patterned directly after the work at Tuskegee. The students devote one half-day to literary work and the other half-day to industrial training. The literary work embraces a four-year normal course and a three-year preparatory course. The industrial department is a special feature of the work. This department has been subdivided and the several subdivisions placed in charge of competent instructors. The young men are taught carpentry, painting, printing, book-binding, and tailoring. The young women are taught plain sewing, dressmaking, millinery, laundering, and domestic science. Both young men and young women receive instruction in agriculture. While the school is primarily a normal and industrial institute, considerable auxiliary work is being done. A business-course department comprising courses in stenography, typewriting and bookkeeping and business practice, and a very thorough musical department, consisting of instrumental, vocal and brass band music are successfully maintained.

The moral life of the students receives most careful attention. The school is strictly a non-sectarian, charitable institution, and is supported by donations. What Tuskegee is to the South, the friends of negro education hope that the Topeka Industrial and Educational Institute will be to the negroes of the West. The majority of teachers are graduates of Tuskegee. The others are from some of the best institutions in the West. The Tuskegee idea is being carried out as

far as possible. Three objects are constantly kept in view, namely: 1. To teach the dignity of labor. 2. To teach students how to work, giving them a trade when thought best. 3. To enable students to pay a portion of their expenses in labor.

COUNTY HIGH SCHOOLS.

ATCHISON COUNTY HIGH SCHOOL.

JOHN W. WILSON, Principal.

Effingham, Kan. Established by vote of people, 1888. School opened, 1891. Under auspices of Atchison county. Number of professors, 7. Number of departments, 4. Total enrolment last year, 161. Number of graduates last commencement, 17. Total number of graduates since organization, 158. Land owned, eight acres. Value of buildings, \$30,000. Value of apparatus, \$1500. Amount of endowment fund, none. Number of volumes in libraries, 3000. Value of libraries, \$3500. Total receipts for the current year, \$9053. Total expenditures for the current year, \$7130.67. Free tuition. Average total annual expense per student, \$80.47.

HISTORY.—In the fall of 1888 the voters of Atchison county decided to locate a county high school at Effingham. In accordance with the law of 1886, the county commissioners appointed the first board of trustees, who qualified the 1st of January, 1889. The school was not opened until nearly two years after this date.

The high school was equipped and conducted the first year on a three-mill levy, and is now maintained by one and one-half mills of taxation. The county high school, wherever established, has had a fight for supremacy. That it is a necessity, and fills the gap between the country schools and the university, is shown by the fact that in every case it has been vindicated and liberally supported by the people. Kansas has the honor of first supplying this missing link in our educational system. The building is situated on "College hill," a slight elevation in the northeast portion of the city, and is visible from every prominence in the county. The campus consists of eight acres. The eastern half is set apart for an athletic field. The western portion, surrounding the building, is set out in trees and shrubbery.

The first entrance examination was held in the summer of 1891, and the first term of school opened September 1, 1891. The building was destroyed by fire on the night of November 6, 1893. The loyalty which has ever characterized the board of trustees caused the building to be replaced by a much better one, which was ready for use the next September. The new building ranks among the finest educational edifices in Kansas. In the basement are a laboratory, two recitation rooms, a botany room, printing-office, the heating and ventilating apparatus, and dark room, containing a complete photographer's outfit. On the first floor are the principal's office and four large classrooms. The assembly-room, seating 400, with a gallery having a seating capacity of 200 more, library, music rooms and the rooms occupied by the department of commerce occupy the second floor. The building is heated and ventilated with the Smead system. The department of commerce is in charge of a specialist, employed by the county. In this department free instruction is offered in shorthand, typewriting, book-keeping, banking, commercial geography, history of industries, history of commerce, and all subjects taught in a business college. This curriculum contains the essential subjects of the other courses, and is four years in length. A conservatory of music has been built up in connection with the school. Manual training is now a prominent feature of the school. Lathes and tools for working

in wood and metal, a carpenter shop, an outfit for photography and a complete printing plant are among the features in this department.

The classical curriculum is the most prominent feature of the school. It now meets the requirements for entrance to Chicago University and Harvard. The following have served as principals of the school: S. J. Squires, two years; S. J. Hunter, three years; John W. Wilson, seven years.

CHEROKEE COUNTY HIGH SCHOOL.

C. S. BOWMAN, Principal.

Columbus, Kan. Founded, 1900. Under auspices of Cherokee county. Number of teachers, 7. Total enrolment last year, 260. Number of graduates last commencement, 15. Total number of graduates since organization, 67. Value of buildings, \$15,000. Value of apparatus, \$600. Number of volumes in libraries, 500. Value of libraries, \$600.

HISTORY.—The Cherokee county high school was established by a vote of the people of the county at the election in November, 1899. The first board of trustees consisted of L. J. Haines, of Galena; C. A. Gibbs, of Hallowell; Phil. Keener, of Scammon; Andrew Shearer, of Columbus; Emerson Hull, of Columbus, and Walter Merrick, of Lawton. The board, together with County Superintendent C. F. Cool, selected the site for the building, which consists of ten acres beautifully situated in the western part of the city of Columbus. The land was donated by the city. The building was completed about the 1st of January, 1900. It is a beautiful and commodious two-story brick structure, costing \$14,500. The building is heated with furnaces and supplied with water and electric lights, and completely equipped throughout with the latest improved school furniture. The chemical and physical laboratories are well supplied with apparatus. About \$600 is invested in this material. The library has over 500 volumes of carefully selected reference books. The first faculty consisted of E. L. Enloe, principal, C. F. Cool, C. S. Bowman, Lucy D. Mulley, and Mrs. C. S. Powell. Mr. Enloe's health failed and C. S. Bowman was elected principal, which position he still holds. Otto C. Baker was added to the faculty.

The new building not being completed, the school opened September 10, 1900, in one of the buildings of the city schools, with an enrolment of 175 pupils. This was increased during the year to 230. The enrolment the second year was 242, and the indications are that the attendance this year will be 260. Of the 242 students attending last year, 180 lived outside the district in which the school is situated. Three-fourths of the school districts in the county were represented. The school carries the three courses required by law, and in addition a commercial course. The graduating class the first year numbered twenty-two, the second year fifteen, and the present senior class consists of thirty-eight. The faculty has been increased to seven members. The school is firmly established in the confidence of the people and is in a flourishing condition.

CLAY COUNTY HIGH SCHOOL.

S. A. BARDWELL, Principal.

Clay Center, Kan. Founded November, 1900. Under auspices of county board of trustees. Number of professors, seven. Number of departments, seven. Total enrolment last year, 230. Number of graduates last commencement, 42. Total number of graduates since organization, 42. No building owned; have leased city building for five years. Value of apparatus, \$225. Number of volumes in libraries, 130. Value of libraries, \$140. Total receipts for the cur-

rent year, \$8523.55. Total expenditures for the current year, \$8135.14. Rates of tuition per annum, \$38 for non-resident pupile; pupils resident in county, free. Average total annual expense per student, \$35.37.

HISTORY.—In accordance with the law of 1886, the Clay county high school was established by the voters of the county at the regular election in November, 1900. In December of the same year the county commissioners appointed the first board of trustees, consisting of J. G. Cowell, Charles H. Perry, Dr. H. E. Potter, Grant Chapin, Geo. W. Hanna, and G. M. Stratton. These men, together with the county superintendent, D. O. Hemphill, organized the school, equipped the building, and selected the first set of instructors. At the fall election all of these men, with the exception of Geo. W. Hanna, who refused to be a candidate, were reelected. R. C. Miller was elected to fill the vacancy. The county high school is located in Clay Center, the county-seat and geographical center of the county, and is easily accessible from all parts of the county. The Clay Center high school was disbanded, and the building, including the piano, library, and apparatus, was leased to the county for a period of five years free of charge. Four courses of study have been provided—the three regular courses required by law, and a business course. The faculty consists of seven instructors, each having a separate department of work: S. A. Bardwell, principal; C. A. Murphy, sciences; Margaret Mack, history; R. W. Bahner, mathematics; Nettie Manley, English; Harriet Kemp, languages; and Jennie Knowles, commercial branches. The enrolment last year was 230, representing every one of the eighteen townships of the county. Of this number, over one half are from outside of Clay Center.

DICKINSON COUNTY HIGH SCHOOL.

HOMER S. MYERS, Principal.

Chapman, Kan. Founded, 1889. Under auspices of Dickinson county. Number of professors, 7. Number of departments, 7. Total enrolment last year, 190. Number of graduates last commencement, 14. Total number of graduates since organization, 216. Value of buildings, \$30,000. Value of apparatus, \$2000. Number of volumes in libraries, 2600. Value of libraries, \$2500. Total receipts for the current year, \$7900. Total expenditures for the current year, \$6808.69. Rates of tuition per annum, \$18. Average total annual expense per student, \$70.

HISTORY.—The county high school is the idea of Dr. James H. Canfield, now librarian of Columbia University. During the '80's, Doctor Canfield was the aggressive spirit of the Kansas State University. He was ambitious that the university should be second to none. As a first step in raising the standard of the school, it was desired to do away with the preparatory department. There were then few high schools that thoroughly prepared their students for the university. Doctor Canfield proposed that each county establish such a school. The legislature of 1886 indorsed his idea and enacted the necessary law. The measure was discussed in several counties but was not approved. In Dickinson county, peculiar local conditions gave the minority a chance to secure the coveted institution. At the election of 1888 the decision was made, and the school located at Chapman. Even then many desired that no buildings be erected until it should be demonstrated that the school was a success. However, a site was chosen and a \$12,000 building provided for. This was completed in 1889, and in September work begun with sixty students.

Prof. S. M. Cook, then of the Solomon schools, was selected as the first principal. It was largely due to his wise selection that the movement for county high schools has been successful. Professor Cook united wonderful enthusiasm

with rare organizing ability. He traveled in all parts of the county, setting forth the advantages of the school, and inviting young people to attend. The plans he made for the Dickinson county school have been followed with little change by all the county high schools since established. The lecture course and the library were given especial attention. A strong religious sentiment was also encouraged. Associated with Professor Cook in the first faculty were Mrs. Cook, D. F. Shirk, now superintendent of the Newton public schools, and H. N. Gaines, of the *Farmers Advocate*. The county superintendent, J. S. Ford, also gave considerable attention to the new institution. Professor Cook remained at the head of the school for nine years, when he resigned to enter business. D. E. Lantz was then the principal for two years. Next came J. W. Hullinger for the same length of time. In June of the present year Homer S. Myers, formerly superintendent of schools at Cherryvale and at Garnett, was chosen to guide the destinies of the high school. The institution was a success from the start. By the close of the first year 137 students had been enrolled. The second year there were 175. The average for the thirteen years has been 202. Before the end of the first year the faculty was increased by the employment of a music teacher. For several years there have been seven instructors. In 1893 the building was increased to double its original size. It is now one of the handsomest school buildings in Kansas. The library has grown until it numbers 2600 volumes. The reading table is supplied with all the leading magazines. The laboratories are well equipped.

More than 200 have graduated from the school. About one-third of these are teaching. Others are successful bankers, lawyers, physicians, and clergymen. Many have graduated from the colleges of the state. The marked success of these graduates has had much to do with the high esteem in which the school is now held. The elevating influence of the county high school is a subject of comment by all residents of the county. It has spread a love for the best things in life wherever its students have gone.

LABETTE COUNTY HIGH SCHOOL.

W. M. KYSER, Principal.

Altamont, Kan. Founded, 1893. Under auspices of county board of trustees. Number of professors, 6. Number of departments, 4. Total enrolment last year, 163. Number of graduates last commencement, 28. Total number of graduates since organization, 199. Land owned by institution, seven acres. Value of buildings, \$25,000. Value of apparatus, \$300. Number of volumes in libraries, 500. Value of libraries, \$600. Total receipts for the current year, \$6015.89. Total expenditures for the current year, \$4618.65. Rates of tuition per annum, \$20 (non-residents). Average total annual expense per student, \$28.34.

HISTORY.—The Labette county high school was established by a special act of the state legislature of 1893. This special act located the school at Altamont, and the first of its kind granted in the state. Immediately after this act became a law, an injunction was served on the county commissioners, restraining them from making the tax levy. The school won its case both in the district and supreme courts of the state. The high-school building is built of pressed brick, with beautiful stone trimmings. It contains three large and five small recitation rooms, and an assembly-room with a seating capacity of 600. The building, including heating apparatus and necessary furnishings, cost \$24,000.

The school opened in September, 1893, with an enrolment of eighty-four; this number increased to 147 by the end of the year. The school started with four

teachers, and now has six teachers and an enrolment of 183. This enrolment, in all probability, will exceed 200 before the end of the year.

The school has a library of over 600 volumes, and a good chemical and physical laboratory.

The school has 193 graduates, 36 of whom have attended or are attending higher institutions of learning in the state. The institution has not only grown in the scope of its work, but has also grown in favor and popularity among its many patrons. The work of the first year disarmed those who had confidently asserted that the experiment would be a failure, and to-day those opponents are its firm and enthusiastic supporters.

LANE COUNTY HIGH SCHOOL.

HERMAN GILLETTE, Principal.

Dighton, Kan. When founded, May, 1902. Under auspices of county commissioners. Number of professors, 1. Number of other teachers, 1. Number of lecturers, 2. Four-years course. Land owned by institution, five acres. Value of buildings, \$18,000. Value of apparatus, \$2000. Number of volumes in libraries, 500. Value of libraries, \$300. Rates of tuition per annum, \$20.

HISTORY.—The high-school law passed by the legislature of 1886 did not affect counties of less than 6000 inhabitants. Observation soon showed that counties with a less population need the advantages offered by such a school even more than more populous counties, because very few of the smaller counties are able to support a city high school. Accordingly the legislature of 1897 passed a law giving to counties having a population of 2000 or less the right to establish a county high school at the county-seat. Pursuant to the provisions of this act, at the regular June meeting of 1902 of the Lane county commissioners, it was ordered to establish a county high school at Dighton. An agreement was entered into between the county commissioners and the school board of the city of Dighton whereby the latter agree to furnish and maintain, free of cost, a certain part of the public-school building, sufficient for high-school purposes, and to admit all qualified pupils in the county into such school. On the other hand, the county agrees to furnish the necessary teachers. This agreement was entered into June 6, 1902, and continues for a period of five years.

The county high school opened September last with an attendance far beyond the expectations of its most sanguine supporters. Since its establishment no thought has ever been entertained of giving it up. It promises to be one of the best patronized and supported institutions in the county. Over fifty per cent. of all the students in the county are in attendance, while a number of the teachers of the county have entered and are better preparing themselves for their work. Of the total enrolment, seventy-five per cent. come from outside the city of Dighton; while perhaps twenty-five per cent. would be out of school had the county high school not been established.

A four-years course of study has been adopted, which, when completed, admits the student into any of our state educational institutions.

MONTGOMERY COUNTY HIGH SCHOOL.

S. M. NEES, Principal.

Independence, Kan. Founded, 1897. Under auspices of board of trustees, county. Number of teachers, 7. Number of departments, 7. Total enrolment last year, 224. Number of graduates last commencement, 33. Total number of graduates since organization, 77. Land owned by institution, one block. Value of buildings, \$33,000. Value of apparatus, \$2000. Number of volumes in libra-

ries, 1000. Value of libraries, \$1200. Total receipts for the current year, \$8233 84. Total expenditures for the current year, \$8594.59. Rates of tuition per annum, \$18, for students outside of county. Average total annual expense per student, \$38.

HISTORY.—A special act of the legislature to establish and locate the Montgomery county high school at Independence, Kan., was approved March 5, 1897. In accordance with the provisions of the act, the county commissioners, on the 14th day of April of the same year, appointed E. A. Osborn, Revilo Newton, William Dunkin, J. A. Moore, Thomas Hayden, and M. L. Stephens, who, with Co. Supt. J. N. Dollison, constituted the first board of trustees of the Montgomery county high school. The board held its first meeting April 22, and organized by electing Revilo Newton secretary, and William Dunkin treasurer, the county superintendent being president *ex officio*. On the 28th day of May the board accepted a site for the building, which site, having been purchased for \$5000, was donated by the city, and upon the following day agreed upon a six-mill levy for construction and approved plans for the building. On the 28th of October, 1897, a contract for the construction of the building was awarded, and, on the 6th of June, 1899, the building was formally accepted by the board.

The school is located in the northwestern part of the city, on Tenth street, in the center of a block of ground 300 feet square. The ground is high, the drainage good, and the surroundings attractive, healthful, and pleasant. The building is a handsome and substantial structure, 115 by 85 feet, and three stories high, including the basement. It is built of pressed brick and native sandstone, with steel roof, and is equipped with all modern improvements and appliances, including a thorough system of ventilation, steam heat by direct and indirect radiation, abundance of light, plenty of water on each floor, natural gas for fuel and lights, excellent sewerage and telephone connection. The lower floor contains the gymnasium, physical laboratory, two recitation rooms, two toilet-rooms, the boiler-room, and three fresh-air rooms. On the next floor are the principal's office, the library, three classrooms, the main floor of the assembly-room, and dressing and property rooms. The upper floor includes three recitation rooms, the chemical laboratory, the apparatus room, and the gallery over the assembly-room. The assembly-room occupies the entire west end of the building and has a seating capacity, including the gallery, of 500. It is furnished with handsome oak opera chairs and contains an excellent piano. The school has one of the best laboratories in southern Kansas. The library is growing rapidly and already contains more than 1000 carefully selected volumes. The total cost of building, grounds, furniture and fixtures, library, scientific and other apparatus is about \$40,000.

The school opened September 4, 1899, with the following faculty: S. M. Nees, principal; T. B. Henry, mathematics; W. E. Ringle, sciences; Richard Allen, history and civics; Georgia Cubine, rhetoric and German; Lura Bellamy, literature and elocution. A business department, in charge of T. S. Underwood, has since been added. Mr. E. J. Castillo now has charge of the work in the sciences. The other members of the faculty are the same as at the beginning of the school. Over 200 students were in attendance at the opening. The enrolment each year has been over 200, the highest enrolment being 232. Three classes have graduated from the institution, the first consisting of twenty-two members, the second of twenty-two, and the third of thirty-three. Four courses of study are maintained—business, general, normal, and collegiate. Each of the first three requires three years for completion; the collegiate requires four years.

The institution has received loyal support and liberal patronage from all parts of the county. It is doing much toward the preparation of the young men and

young women of the county for their life's work, and instilling in them a desire for that broader culture which can be secured only in the higher institutions of learning.

NORTON COUNTY HIGH SCHOOL.

W. G. RISTE, Principal.

Norton, Kansas. Under auspices of board of trustees elected by county. Number of professors, 3. Number of other teachers, 2. Number of departments, 4. Total enrolment last year, 126. Number of graduates last commencement, 11. Total number of graduates since organization, 37. Land owned by institution, one block. Value of buildings, \$18,000. Value of apparatus, \$400. Number of volumes in libraries, 500. Value of libraries, \$300. Total receipts for the current year, \$8000. Total expenditures for the current year, \$4550. Rates of tuition per annum, \$18, for those from outside the county. Average total annual expense per student, \$110.

HISTORY.—In 1899, Senator Dan Hart and Representative M. B. Pogue introduced a bill in the legislature authorizing the commissioners of Norton county, upon a petition of a majority of the voters of the county, to establish a county high school. It was due to the untiring efforts of Prin. H. M. Culter, who had been principal of the Norton city schools for six years, that such a petition was circulated and presented to the commissioners containing 1180 names. The school was established, and the following temporary board was appointed by the commissioners: M. F. Garrity, J. C. Brown, R. A. Richmond, F. B. Rumsey, I. N. Cope, and L. A. Sproul. This board employed teachers and secured rooms for a temporary location for the county high school. The school opened the following year with an enrolment of 70, which has since increased to 127.

At the general election in 1899, the following permanent board was elected: M. F. Garrity, R. A. Richmond, B. F. Rumsey, J. F. Wray, Julius Bridegroom, and I. P. Burke. This board made a six-mill levy, three being for building purposes. The following year, H. J. Milz and Wm. Howe were elected to fill the places of Messrs. Bridegroom and Burke. The board this year levied a four-mill tax, two mills being for building purposes, and let contracts for a modern \$15,000 building, which is now completed and unencumbered with debt. The present board, with Co. Supt. F. R. Snyder as chairman, have done an excellent work for the county in the liberal provisions afforded to the school. A college preparatory, a normal, a business and a general course are offered to students. In September of 1899, H. M. Culter was elected principal, and Theodore Moore, C. D. Long, Laura Branson and May Whims assistants.

The following year the faculty was the same, with the exception that Miss Sundstrom was elected director of music in Miss Whims's place. The faculty in 1901 and 1902 was Prin. A. G. Chaffee, T. B. Moore, C. D. Long, Alta M. Housel, and Myrtle Sundstrom. The faculty for 1902 and 1903 is: Prin. W. G. Riste, who first organized a county high school by special enactment and petition; Miss Ida M. Case, English and history; Miss Alta M. Housel, Latin and German; C. D. Long, commercial department, and Miss Catherine Jones, director of music.

The school was located at Norton by a vote of the people at a general election, and is now governed by the statutory law providing for the control of county high schools. The school has almost doubled its enrolment in the three years of its existence.

MONTGOMERY COUNTY HIGH SCHOOL. Independence. See page 71.

SCOTT COUNTY HIGH SCHOOL.

E. A. WYATT, Principal.

Scott City, Kan. Founded, July, 1901. Under auspices of board of county commissioners. Number of professors, 1. Number of departments, 1. Total enrolment last year, 34. Value of apparatus, \$250. Number of volumes in libraries, 50. Value of libraries, \$180. Total expenditures for the current year, \$900. Rates of tuition per annum, \$10. Average total annual expense per student, \$30.

HISTORY.—The law of 1886, which established the county high school in Kansas, did not affect counties of less than 6000 inhabitants. Observation, however, soon showed that the less populous counties needed the advantage of these schools even more, as very few had city high schools. Accordingly, the legislature of 1897 passed the act entitled "An act amending sections 3 and 4 of chapter 222 of the Session Laws of 1895, and repealing said original sections." In pursuance of this law, and upon presentation of a petition signed by a majority of the qualified voters of Scott county at the regular July, 1901, meeting of the board of county commissioners, a motion prevailed to establish a county high school according to the provisions of said law. Negotiations with the school board of district No. 1, in which Scott City is situated, secured a large and convenient room in the city school building for the high school. This was furnished by the county commissioners, and E. A. Wyatt, a graduate of both the Illinois and Kansas State Normal Schools, was elected principal.

The school opened September, 1901, with an enrolment of thirteen in the high-school department and twenty-one in the preparatory class. The total expense for the year was about \$900. The course of study consists of four years' work including the minimum of requirements for admission to the State University. At the June, 1902, meeting of the county commissioners Prof. E. A. Wyatt was reelected, and school is progressing very nicely, with classes in the freshman and sophomore grades.

SHERMAN COUNTY HIGH SCHOOL.

S. V. MALLORY, Principal.

Goodland, Kan. Founded, 1901. Under auspices of the county. Number of teachers, 2. Number of departments, 3. Total enrolment last year, 64. Number of graduates last commencement, 5. Total number of graduates since organization, 5. Value of apparatus, \$100. Number of volumes in libraries, 225. Value of libraries, \$100. Total receipts for the current year, \$2300. Total expenditures for the current year, \$1740. Rates of tuition per annum, \$18, for non-residents.

HISTORY.—The Sherman county high school was founded by special act of the legislature in 1901. It has an enrolment of sixty-four pupils. There are but few more young people in the county who are prepared to enter this school, except those who are teaching or otherwise employed. The school affords a higher aim for young people who are now in the country schools and the grammar department of the city schools. Several young people in the senior and junior classes, who before never had a desire for higher education or thought it beyond their means, are now looking forward to a college education. Many of the teachers of the county enter the county high school at the close of their term of school. They find it very helpful. Two courses of study are pursued: The one, a college preparatory course, fits for the freshman year at the university; the other, a normal course, fits for teaching. Its diploma is equivalent to a two-years teachers' certificate. Besides the formal instruction within the school, high-grade entertainments are given under the auspices of the school.

SUMNER COUNTY HIGH SCHOOL.

THOS. W. BUTCHER, Principal.

Wellington, Kan. Founded, 1897. Under auspices of board of trustees. Number of teachers, 9, including principal. Total enrolment last year, 344. Number of graduates last commencement, 23. Total number of graduates since organization of institution, 80. Value of buildings, \$15,000. Value of apparatus, \$500. Number of volumes in libraries, 800. Value of libraries, \$1000. Total receipts for the current year, \$9018.97. Total expenditures for the current year, \$7809.85. Rates of tuition per annum, \$18. Average total annual expense per student, \$22.

HISTORY.—The Sumner county high school, located at Wellington, was established by special act of the legislature in 1897. The act empowered the board of education of the city of Wellington to lease, for a period of twenty-five years, to the county commissioners of Sumner county, a building, free of rent, to be used as a county-high-school building. In July of the same year a lease was executed, by the terms of which Sumner county came into possession of the Fourth ward school building in the city of Wellington. Seven teachers were chosen, and the school opened in September with an enrolment of over 200, which number increased to 350 before the close of the year. At the opening of the second year, the faculty was increased to nine—the present number. The annual attendance has averaged over 350 for the five years the school has been in operation. Three-fifths of these students come from the country. In addition to the three courses required by law, this school offers a teachers' review course, which opens after the close of the country schools. Fully sixty per cent. of the teachers of the county have at some time attended the county high school, and as a result are better prepared for their work. The school has a good library, plenty of physical and chemical apparatus, and one of the best museums in the state.

THOMAS COUNTY HIGH SCHOOL.

W. E. RAY, Principal.

Colby, Kan. Founded, 1897. Under auspices of board of trustees. Number of teachers, 4. Number of departments, 3. Total enrolment last year, 123. Number of graduates last commencement, 8. Total number of graduates since organization, 24. Value of buildings, \$10,000. Value of apparatus, \$300. Number of volumes in libraries, 300. Value of libraries, \$300. Total expenditures for the current year, \$3300. Free tuition. Average total annual expense per student, \$25.

HISTORY.—The Thomas county high school, located at Colby, was organized by a special act of the state legislature in 1897. Three courses of study are sustained—the college preparatory, meeting fully the requirements of the State University for admission; the normal, running parallel with the college preparatory for the first two years, then branching off and requiring a careful study of psychology, methods and management, school law, and history of education; the business, running parallel with the other two for the first two years, with the exception that no Latin is required, but German is substituted; for the normal branches above named bookkeeping, shorthand, commercial law, typewriting and business practice are substituted.

The school has had a uniform growth, the enrolment each year exceeding that of the previous year by a goodly per cent. It is proving a boon to hundreds of young men and women, who would otherwise not have the opportunity of a high-school education and the inspiration for a college education. But while the emphasis placed on the college-preparatory course encourages and fosters a college sentiment, the arrangement of the courses shows that it is not the purpose

of the school to be merely a preparatory school to the higher institutions. By reason of a good normal course, the character of the teaching in the rural schools has been much improved, for a large percentage of those now teaching in the country schools have either graduated from the county high school or have attended a year or more. And this has raised the standard in those schools materially. They all look toward the high school, and, whether the pupils expect to enter it or not, they want to meet its requirements for admission. The high school has met the highest expectations of its friends and has vanquished all enemies.

MEDICAL COLLEGES.

KANSAS MEDICAL COLLEGE.

JOHN E. MINNEY, Dean of the Faculty.
R. S. MAGEE, Secretary of the Faculty.

Topeka, Kan. Founded, 1889. Under auspices of the faculty of the Kansas Medical College. Number of professors, 25. Number of other teachers, 8. Number of departments, 1. Total enrolment last year, 98. Number of graduates last commencement, 16. Total number of graduates since organization of institution, 135. Land owned by institution, 10 lots, city of Topeka. Value of buildings, \$20,000. Value of apparatus, \$5000. Total receipts for current year, \$4200. Total expenditures for the current year, \$4000. Rates of tuition per annum, \$75. Average total annual expense per student, \$250.

HISTORY.—The Kansas Medical College was chartered July 3, 1889. There were twenty-one trustees, and a faculty of nineteen members. Judge John Martin was the first president of the board of trustees; Judge Horton succeeded him, and in 1896 Dr. John C. McClintock was elected, and has held the office since. D. W. Nellis was elected secretary, and has held the office up to the present. Dr. J. E. Minney was elected dean of the faculty, and has been elected from year to year. Dr. W. S. Lindsey is the treasurer. Dr. M. B. Ward was the first secretary of the faculty. He was succeeded by Dr. W. E. McVey, and he in turn by Dr. R. S. Magee, the present secretary. The first session was held in rented rooms, with fourteen registered medical students and five pharmacy students. The session of 1902-'03 has enrolled 100 medical students. The college owns its building and ten lots, in the best part of the city. It has a corps of thirty-five instructors. The number of graduates from the college is 144. These graduates are practicing in the various states of the Union. The college assisted in organizing the American Association of Medical Colleges, at Nashville, Tenn., in 1890. It is also a member of this association.

At first, three years' attendance was required for graduation. In 1900 the course was extended to four years. This was done to meet the advanced requirements in medicine and the laws of a majority of the states governing the practice. The college has stimulated medical education in Kansas, until to-day Kansas physicians take a high rank in their profession.

The hospital facilities of Topeka are excellent. This spirit of medical progress has reached out and stimulated physicians in the state to establish hospitals in a number of the smaller cities, where the most difficult operations are performed successfully and the lives of the citizens saved and prolonged.

A diploma from this college entitles the holder to practice medicine in any state in the Union where diplomas are recognized. The teaching facilities are being increased each year. Topeka has become a medical center through the influence of this school. Some fifteen or twenty states are represented by its students. The anatomical law of the state enables the college to get dissecting material without trouble. The hospital facilities insure abundance of clinics.

TELEGRAPH SCHOOLS.

SKELTON'S SCHOOL OF TELEGRAPHY AND RAILWAY BUSINESS.

W. H. SKELTON, President.

Salina, Kan. Founded December 26, 1887. Private school. Number of professors, 2. Number of other teachers, 3. Number of departments, 5. Total enrolment last year, 100. Site valued at about \$4000. Value of buildings, \$8000. Value of apparatus, \$3000. Number of volumes in libraries, over 300. Value of libraries, \$500. Rates of tuition per annum, \$40, \$50, \$57, and \$65. Annual expense per student, \$100 to \$125.

HISTORY.—December 26, 1887, Skelton's School of Telegraphy opened its doors with but one student ready for business, and he with no money with which to pay his tuition. One year later the school moved into larger quarters and, in 1890, increased attendance made it necessary to move into still larger ones. Up to October, 1899, telegraphy alone was taught. At that time, foreseeing the benefit of combining the use of the typewriter with the telegraph, Professor Skelton introduced a course of typewriting in connection with telegraphy. This proved a success. Then, in July, 1900, seeing that poor penmanship retarded the progress of many of his students, a course of rapid business penmanship was added. At the same time, seeing the necessity for such a course, a full set of station blanks, books, reports, tickets, etc., was added and competent teachers placed in charge. None of these new branches are taught except in connection with telegraphy. On November 1, 1900, the former floor space was doubled, making 3750 square feet of floor space. A new primary department was added to the former equipment, the balance of the added space being used for a gymnasium and library. The gymnasium provides a place where the students can go to have a general good time and get necessary exercise. In the library is found a fine assortment of good books, where the students can spend the evenings, Sunday afternoons and other spare time reading.

SHORTHAND AND TYPEWRITING SCHOOLS.

DOUGHERTY'S SHORTHAND SCHOOL.

GEO. E. DOUGHERTY, President.

Topeka, Kan. Founded April 30, 1894. Under auspices of Geo. E. Dougherty. Number of teachers, 5. Total enrolment last year, 125. Value of apparatus, \$2000. Rates of tuition per annum, \$70.

HISTORY.—Dougherty's Shorthand School was established by George E. Dougherty April 30, 1894, being the outgrowth of a night school conducted for several months previously by Mr. Dougherty, while employed as stenographer for Bartholomew & Co. This school is headquarters for Dougherty's touch typewriting and Dougherty's brief shorthand, methods of which Mr. Dougherty is the author. The school has steadily grown, until now its annual enrolment is about 150, with five teachers. The school now uses the second and third floors of 118 West Eighth street, Topeka. One of the features of Mr. Dougherty's teaching is the use of actual work for business men as instruction matter. Students begin doing work of this kind within two weeks after entering school, continuing it throughout the course, and all of it is done under the personal supervision of Mr. Dougherty. Mr. Dougherty is the originator of the method of learning typewriting by completely covering the key-board and working, as nearly as possible, as a blind person would. This method he has been using for the past six years. Dougherty's brief shorthand is a connectible vowel system, so simple that all the principles, fully illustrated, are shown on four pages of the text-book.

THE STANDARD SHORTHAND SCHOOL.

ANNA E. CANAN, President.

Topeka, Kan. Founded September 13, 1887. Under auspices of Miss Anna E. Canan. Number of teachers, 5. Number of departments, 2. Total enrolment last year, 150. Rates of tuition per annum, \$50.

HISTORY.—The Standard Shorthand School of Topeka was established September 13, 1887, in one small room, with one pupil. Year by year its numbers have increased, until it now occupies nine rooms, including office and cloak-room, centrally located on Kansas avenue, heated with steam and furnished with all modern conveniences. During its years of existence the school has been constantly improving in methods of instruction and equipment, and the results have been most gratifying to both its pupils and their employers. It was one of the first to take up touch typewriting, in 1894, and has taught it to some extent ever since, and now makes it a specialty. The school furnishes a business office with all modern equipments for its advanced pupils, wherein they do shorthand and typewriting work for the public, and gives the pupils their entire earnings.

SCHOOLS OF ORATORY AND ELOCUTION.

WESTERN SCHOOL OF ELOCUTION AND ORATORY.

GEORGE W. HOSS, President.

Wichita, Kan. Founded September, 1890. Under auspices of Geo. W. Hoss. Number of professors, 1. Number of other teachers, 1. Number of departments, 2. Total enrolment last year, 87. Number of graduates last commencement, 2. Total number of graduates since organization, 53. Value of apparatus, \$100. Number of volumes in libraries, 200. Value of libraries, \$250.

HISTORY.—This school was founded by Geo. W. Hoss, September, 1890, and in 1891 chartered under the laws of the state of Kansas, with authority to confer degrees and grant diplomas. Total enrolment of pupils has been about 800. These have been very varied in ages, attainment, and calling—lawyers, teachers, preachers, and business men, including pupils from the public schools and graduates of colleges. In addition to elocution and oratory specific, the curriculum includes rhetoric, English literature, psychology, logic, parliamentary law, and extemporaneous speaking. Extemporaneous speaking is made prominent among all advanced male pupils, elocution being used as a means leading up to this higher end. The principal believes very firmly that men should be speakers, not mere declaimers or reciters. Mere entertainment is satisfied with declamation, but business and duty require speech that springs naturally and spontaneously from a heart aglow in the presence of a great cause or burdened by a great duty. It is believed that many schools, following in the wake of Delsarte, are spending their strength in manner rather than in matter. This latter goes under the captivating title of "art," but when put to the test of utility, it may safely be said, with Shakespeare, "More matter and less art." Art may in this connection be translated manner. Hence, more matter and less manner should be the motto of every school of elocution and oratory.

SCHOOL OF EXPRESSION AND THE DRAMA.

CLARA M. CRUMB, Principal.

Topeka, Kan. Founded, 1895. Under auspices of Miss Clara M. Crumb. Number of professors, 2. Number of lecturers, 1. Number of departments, 5. Total enrolment last year, 75. Value of libraries, \$200.

HISTORY.—The School of Expression and the Drama was established in 1895

as a branch of the art institute, under the leadership of Miss Carolyn Baum. In 1899 Miss Clara M. Crumb became principal of the school. Its teachings are based upon the same great principles as those upon which the Emerson school is founded: Individuality, and the upbuilding of the *best* that lies in each student. Time was when the general public attached great opprobrium to the term "elocution" and to the profession. This was, no doubt, greatly due to the unwise methods of many teachers in allowing the pupil to use inflection, gesture, etc., simply as attachments, with little knowledge of the root of the matter. The great educators are now recognizing the immense value of cultivating the speaking voice together with the mind and will.

The school of expression has for its purpose, first, the inspiration of the student's mind to a realization of his *higher* powers, and the desire to will and to accomplish the best of which he is capable; and second, the upbuilding of the mind (together with the body) and imagination, by closest contact with the best thoughts of our most learned minds in the field of literature. This wider range of development is reached by guiding the student's mind through a series of evolutionary steps, until he can grasp at last the height, breadth and depth of the author's meaning, and portray it as he sees it, and not as his teacher sees it.

In line with this thought is the department of "The Philosophy of Life," conducted by Mrs. Elizabeth F. Atwood, lecturer, and instructor in psychophysiology, psychological philosophy, and psycho-physical culture. The department of physical culture, indispensable to a school of expression, is doing a notable work in Topeka. This work, together with voice culture, is given with all private and class instruction. The school of expression conducts classes of students of various ages and occupations, children of the public schools, high school, and college students, lecturers, lawyers, readers, club workers, and others engaged in public work.

SCHOOLS OF MUSIC.

BISSING'S CONSERVATORY OF MUSIC.

PETROWITSCH BISSING, President.

Hays City, Kan. Founded, 1890. Under auspices of Petrowitsch Bissing. Number of professors, 2. Number of other teachers, 1. Number of departments, 6. Total enrolment last year, 125.

WESTERN MUSICAL CONSERVATORY.

Mrs. S. P. CHASE, President.

Emporia, Kan. Founded, 1871. Number of professors, 5. Number of lecturers, 1. Number of departments, 10. Total enrolment last year, 187. Number of graduates last commencement, 1. Total number of graduates since organization, 21.

SCHOOL OF PIANOFORTE PLAYING.

ANNIE M. PARRY-BUNDY, President.

Topeka, Kan. Under the auspices of Annie M. Parry-Bundy. Number of professors, 1. Number of other teachers, 1. Number of departments, 4. Number of graduates last commencement, 20.

HISTORY.—Students are divided into regular and special. Regular students pursue the required work of the regular courses, while special students are at liberty to choose elective work. The required work of the regular courses is divided between theoretical branches, such as history, harmony, musical analysis, and counterpoint, and the technical work of the instrument. Special students may

enter at any time any branch of work. No definite time can be fixed for the completion of any line of study. Differences in ages, in mental capacity, in physical control and in musical temperament make it possible for some students to progress more rapidly than others. The following courses have been arranged for the guidance of the average student: Kindergarten, intermediate, teachers', artists'. Upon completing the kindergarten course, students are given promotion cards which admit them to the intermediate course. On completion of the intermediate course, testimonials are given admitting to the teachers' course. The required work of the teachers' course being completed, and an analytical program being given, students receive a teacher's certificate. A diploma is granted upon completion of the artists' course and upon giving a public recital. Further work toward a degree may be taken. This work includes advanced counterpoint, canon, and fugue, with more advanced study in piano. All theory, kindergarten and technic work is taught in classes. Supplementary piano work is given during the kindergarten course. Private and public piano recitals are given by the students during the year. The special aim of each course is to develop, not simply piano players, but musicians.

BUSINESS COLLEGES.

ATCHISON BUSINESS COLLEGE.

A. F. HECK, Proprietor.

Atchison, Kan. Founded, 1885. Under auspices of A. F. Heck. Number of teachers, 5. Number of departments, 5. Total enrolment last year, 175. Number of graduates last commencement, 15. Rates of tuition per annum, \$45 and \$60.

IOLA BUSINESS COLLEGE.

HUGH J. POWELL, President.

Iola, Kan. Founded September 12, 1899. Under auspices of Iola Business College Company. Number of professors, 3. Number of departments, 3. Total enrolment last year, 82. Number of graduates last commencement, 24. Total number of graduates since organization, 59. Value of apparatus, \$1000. Total receipts for the current year, \$1818.90. Total expenditures for the current year, \$366.25—not including salaries of teachers. Rates of tuition per course, \$40. Average total annual expense per student, \$158.

HISTORY.—The Iola Business College was incorporated under the laws of the state of Kansas September 6, 1899, to give instruction in bookkeeping, shorthand, typewriting, telegraphy, penmanship, commercial law, grammar, spelling, arithmetic, etc.; to grant diplomas to graduates of any of its courses of instruction and confer degrees upon same. The school opened September 12 of the same year, with two teachers and seven pupils enrolled. The history of the school since its beginning is a history of steady, constant growth. The school now occupies more than 4000 square feet of floor space for school purposes, employs three teachers, and has excellent equipment in all the departments. The third school year, which ended June 30, 1902, had a total enrolment of over eighty students in the various departments.

GREAT WESTERN BUSINESS AND NORMAL COLLEGE.

W. T. LARIMORE, President.

Concordia, Kan. Founded, 1900. Under auspices of W. T. Larimore. Number of professors, 7. Number of departments, 7. Total enrolment last year, 165. Number of graduates last commencement, 36. Total number of graduates since

organization, 65. Value of apparatus, \$7800. Rates of tuition per annum, \$60. Average total annual expense per student, \$200.

HISTORY.—The Great Western Business and Normal College was established at Concordia in the fall of 1891. It is incorporated under the laws of Kansas. The courses of study are complete. The work is thorough and practical. On March 17, 1902, the institution was purchased by W. T. Larimore, of Grand Island, Neb., who is now the president and owner of the institution. Since taking hold of the Great Western Business College as president and proprietor, many new features have been added: A normal course, which entitles its graduates to teachers' certificates; a musical conservatory, with a two-years course for graduation, including piano, organ, voice, band, and stringed instruments; a commercial and railroad telegraph office, which trains telegraph operators for railroad positions, as operators and station agents, and a complete electrical course. The college band and gymnasium are some of the attractive features of the school.

Debating is a regular department of the school, where every member of every department must take part. Regular classes in parliamentary law are maintained. The new departure in the shorthand and typewriting department is a very attractive feature. Class work has been illuminated, and it is an actual office experience from beginning to finish. There are fifty forty-five-dollar roll-top office desks in school, and sixty-two standard typewriters, and during the present school year it is expected that the number will be increased to 100.

KANSAS WESLEYAN BUSINESS COLLEGE.

T. W. ROACH, General Superintendent.

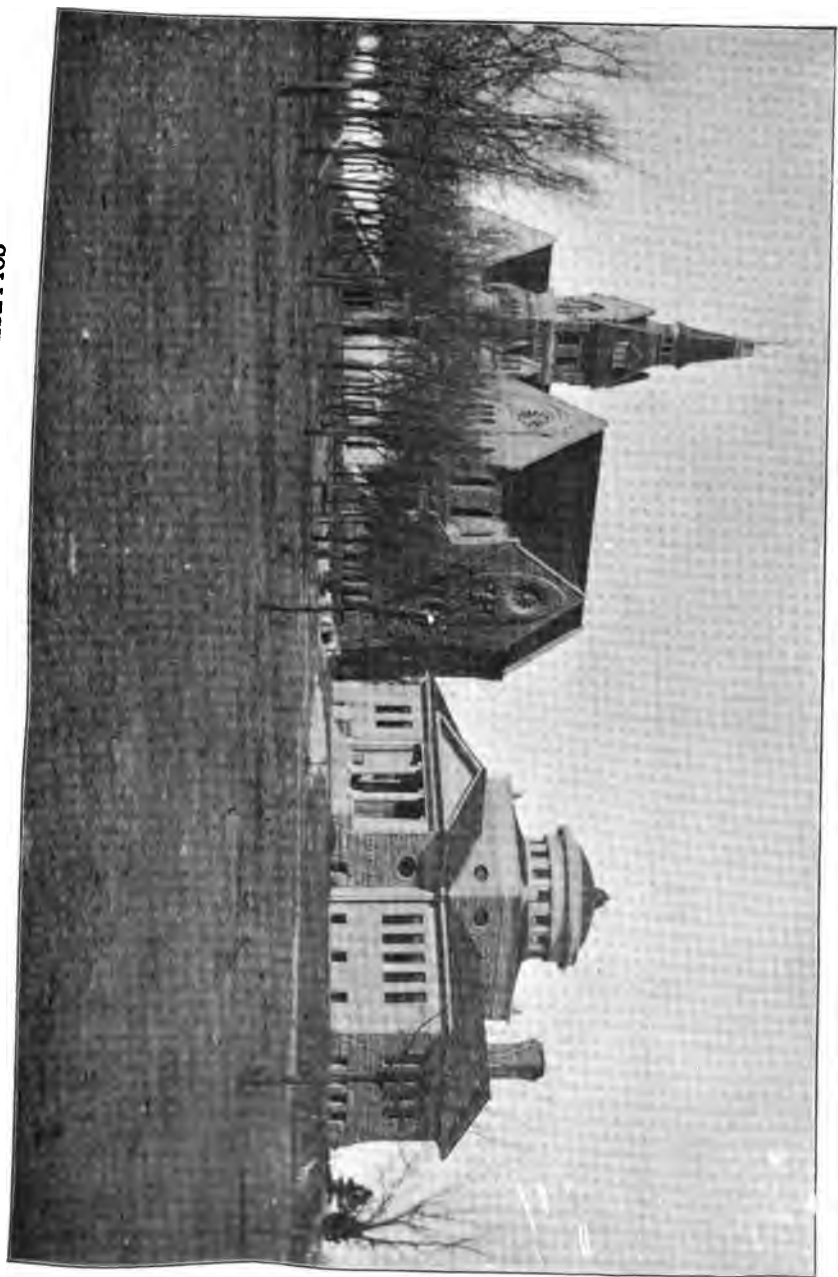

Salina, Kan. Founded, 1892. Under auspices of trustees Kansas Wesleyan University. Number of professors, 8. Number of other teachers, 6. Number of lecturers, 2. Number of departments, 4. Total enrolment last year, 588. Number of graduates last commencement, 388. Total number of graduates since organization, about 2000. Value of apparatus, \$4000. Number of volumes in libraries, 1500. Value of libraries, \$1000. Total receipts for the current year, \$10,000. Total expenditures for the current year, \$9800. Rates of tuition per annum, \$40. Average total annual expense per student, \$140.

HISTORY.—The Kansas Wesleyan Business College is located at Salina, and is a branch of the Kansas Wesleyan University of that place. At the annual meeting of the board of trustees of the university in 1892, it was decided, in order to accommodate the young people who demanded a business education, that there should be a commercial department started in connection with the University. The trustees asked T. W. Roach to start this branch of the institution. On September 12, 1892, Prof. T. W. Roach began his work in the university building, with one assistant teacher and two pupils. At the end of five years the business college was moved into a building by itself, owing to a lack of room in the university building. A three-story building, 50x110 feet, was secured in the central part of the city of Salina. The enrolment for the year closing June, 1902, was in the neighborhood of 600, while fourteen teachers were employed to take charge of the school. A feature of this institution is that it holds "chapel exercises," and look after the moral welfare of the students the same as in other denominational schools.

LAWRENCE BUSINESS COLLEGE.

C. T. SMITH, President.

Lawrence, Kan. Founded, 1869. Under auspices of Coonrod & Smith. Number of professors, 3.

COLLEGE OF EMPORIA. Main Building and Carnegie Library Hall. See page 106.

LEAVENWORTH BUSINESS COLLEGE.

N. B. LEACH, President.

Leavenworth, Kan. Founded September, 1887. Under auspices of N. B. Leach. Number of professors, 2. Number of other teachers, 2. Number of departments, 2. Total enrolment last year, 120. Total receipts for the current year, \$2756. Total expenditures for the current year, \$1000. Rates of tuition per annum, \$75. Average total annual expense per student, \$250.

NEMAHA COMMERCIAL COLLEGE.

F. L. NUTTER, President.

Seneca, Kan. Founded September 3, 1900. Under auspices of Nutter brothers. Number of professors, 3. Number of other teachers, 2. Number of lecturers, 10. Number of departments, 4. Total enrolment last year, 60. Number of graduates last commencement, 25. Total number of graduates since organization of institution, 40. Value of buildings, \$3500 (belongs to the town). Value of apparatus, \$700. Number of volumes in libraries, 150. Value of libraries, \$250. Total receipts for the current year, \$1700. Total expenditures for the current year, \$1300. Rates of tuition per annum, \$40. Average total annual expense per student, \$150.

NATIONAL BUSINESS COLLEGE.

HENRY COON, President.

Kansas City (Kan.), Hiawatha, Manhattan, and Coffeyville. Founded, 1884. Under auspices of National Business College (chartered in Missouri). Number of teachers, 18. Number of departments, 5. Total enrolment last year, 400. Total number of graduates since organization, 2500. Value of apparatus, \$3000. Total receipts for the current year, \$8000. Total expenditures for the current year, \$6500. Rates of tuition per annum, \$50. Average total annual expense per student, \$250.

PARSONS BUSINESS COLLEGE.

J. C. OLSON, President.

Parsons, Kan. Founded, 1891. Under auspices of Parsons Business College Association. Number of professors, 5. Number of other teachers, 2. Number of lecturers, 10. Number of departments, 4. Total enrolment last year, 332. Number of graduates last commencement, 23. Value of apparatus, \$1700. Total receipts for the current year, \$10,656.75. Total expenditures for the current year, \$7425.40. Rates of tuition per annum, \$80.

HISTORY.—In 1892 the Parsons Business College was organized by C. E. Ball. In 1898 J. C. Olson became the head of the institution and he at once began to enlarge and improve it.

The annual enrolments are as follows: School year 1898-'99, 118; 1899-'00, 187; 1900-'01, 239; 1901-'02, 332. The indications are that the present year's enrolment will reach 400. The work done at the college is of a high grade, and every branch of business education is taught by practical and capable instructors. The patronage of the college is made up of students not only from all parts of the state, but from many other states, and the Indian and Oklahoma territories. The faculty is composed of four men and three ladies. The college has more than 1000 square feet of floor space in a fine building. The building is heated and lighted with natural gas, and the equipment is very excellent. A catalogue is issued annually and a college journal is published quarterly. The institution is favorably known over the entire Southwest.

PITTSBURG BUSINESS COLLEGE.

O. S. JOHNSTON, President.

Pittsburg, Kan. Founded September 9, 1894. Under auspices of O. S. Johnston. Number of professors, 3. Number of other teachers, 3. Number of lecturers, 5. Number of departments, 3. Total enrolment last year, 175. Number of graduates last commencement, 15. Land owned by institution, four lots with buildings, valued at \$17,200. Value of apparatus, \$2000. Number of volumes in libraries, 50. Value of libraries, \$175. Total receipts for the current year, \$6500. Total expenditures for the current year, \$2000. Rate of tuition per annum, \$75. Average total annual expense per student, \$140.

HISTORY.—The Pittsburg Business College was organized by O. S. Johnston September 9, 1894. The enrolment for the first week was one student. During the second year the college secured fine rooms on Broadway. Then, in 1896, the college was compelled to move again to more commodious quarters, which were secured in a large hall on second floor of a 100-foot building. In 1898 a two-story brick building was erected. The enrolment for the present year will number about 300. The faculty is carefully selected. Five departments—the preparatory, business, shorthand, typewriting, telegraphy, and penmanship—are maintained.

SALT CITY BUSINESS COLLEGE.

C. E. HUTCHINSON, President.

Hutchinson, Kan. Founded July, 1897. Under auspices of C. E. Hutchinson. Number of professors, 5. Number of other teachers, 3. Number of departments, 6. Total enrolment last year, 165. Number of graduates last commencement, 10. Total number of graduates since organization of institution, 50. College fixtures, \$1000. Number of volumes in libraries, 50. Total receipts for current year, \$3500. Total expenditures for current year, \$2000. Rates of tuition per annum, \$55. Average total annual expense per student, \$110.

HISTORY.—The Salt City Business College was organized by Messrs. Haroon and Stewart, about six years ago. They sold out to Messrs. Drummond and Hutchinson. On July 1 last, the management of the Salt City Business College bought out the Hutchinson Business College. The school is located in what is known as the College block, at the corner of Fourth and Main streets. This building was built especially for a business college, with rooms on the second floor to be used by the students as a dormitory, but is not used by the present management for that purpose. The school has an attendance of eighty-nine, and a corps of able teachers.

WICHITA COMMERCIAL COLLEGE.

E. H. ROBINS, President.

Wichita, Kan. Founded September 4, 1893. Under auspices of E. H. Robins. Number of professors, 5. Number of other teachers, 2. Number of departments, 3. Total enrolment last year, 208. Total number of graduates since organization of institution, 330. Value of apparatus, \$1500. Number of volumes in libraries, 100. Value of libraries, \$300. Total receipts for the current year, about \$8000. Total expenses for the current year, \$6000. Rates of tuition per annum, \$65. Average total annual expense per student, \$225.

HISTORY.—The Wichita Commercial College opened its doors in the Y. M. C. A. building September 4, 1893, under E. H. Robins. The courses of study and plan of work are equal to those of the highest rank of commercial colleges. The college belongs to the International Business Practice Association of America,

and the students are in daily communication, through the regular United States mail, with the pupils of all the leading commercial colleges of the United States. Business firms in the commercial department employ their stenographers from the shorthand department; hence the students in shorthand get experience in connection with their regular work.

During the nine years the school has been running the following teachers have been employed, viz.: W. R. Peacock, F. E. Reppert, Mrs. Isophene Fiscus, C. D. Long, C. D. Fazel, E. S. Binning, F. A. Hibarger, J. E. Farrow, E. W. Robins, J. E. Driscoll, Minnie Caughey, P. G. De Vaughn, J. T. Vandervoort, C. A. Newman, E. R. Hart, Leila Byers, E. D. Charles, Lillian Rogers, Eva Garton, A. L. McDaniel, Maud Mosher, H. J. Freeman, W. L. Thomas, T. W. DeHaven, and E. H. Robins. The last seven named constitute the faculty at present, E. H. Robins being the president and proprietor. Five years ago the Sheets building, at the corner of Market and Douglas avenues, being in course of construction at that time, was selected for the new home of the college.

WICHITA BUSINESS COLLEGE.

CHESTER F. ADAMS, President.

Wichita, Kan. Founded, 1901. Under auspices of Fazel, Adams, Hibarger and Price. Number of professors, 5. Number of other teachers, 4. Number of departments, 3. Total enrolment last year, 335. Total number of graduates since organization of institution, about 187. Amount of endowment fund (eht brains of the founders have not yet been weighed; we await the *post mortem*). Number of volumes in libraries, 50. Value of libraries, \$75. Total receipts for the current year, \$7500. Total expenditures for the current year, \$3500. Rates of tuition, \$50 for nine-months term. Average total annual expense per student varies from \$125 for nine months to \$250; \$185.

HISTORY.—In the summer of 1901, Charles D. Fazel, Chester F. Adams, Frank A. Hibarger and Will G. Price formed themselves into a company to carry on a business college. During the following year they enrolled 335 pupils, for courses of various lengths in bookkeeping, actual business, shorthand, and other subjects usually handled in a complete business course. The entire force is now composed of four proprietors, one penmanship principal, three assistants in the commercial department, two assistants in shorthand, and one office clerk. Its furniture and fixtures are worth something over \$2500. It occupies part of the second story and all of the third of a building 50 x 100 feet, known as Wall building, on North Market street.

WINDSOR COMMERCIAL COLLEGE.

DEAN DICK, PRESIDENT.

Fort Scott, Kan. Founded, 1897. Under auspices of Dick and Diok. Number of professors, 2. Number of other teachers, 2. Number of departments, 4. Total enrolment last year, 280. Number of graduates last commencement, 26; issued diplomas to 175. Total receipts for the current year, nearly \$5000. Total expenditures for the current year, nearly \$3000. Rates of tuition per annum, \$5 per month. Average total annual expense per student, \$200, board and room included.

HISTORY.—Some six years ago the Windsor Commercial College was established in Fort Scott. It began in a modest way, under modest circumstances. The promoters were confident of success. The results of their effort were to be the evidence, and the public the judge. The verdict may be read in the fact that the attendance has steadily increased, until at the present time it is greater than at

any other time in the history of the institution. The management has remained unchanged. The college rooms are pleasantly situated and well ventilated. They are cool in summer and warm in winter. Particular attention is given to the temperature and ventilation of the rooms at all times. The Windsor Commercial College has the full confidence of the leading firms of the section in which it is located and has the hearty indorsement of its students.

WINFIELD BUSINESS AND ACADEMIC COLLEGE.

H. F. W. KUEHNE, President.

Winfield, Kan. Founded, 1894. Under auspices of H. F. W. Kuehne. Number of professors, 4. Number of departments, 4. Total enrolment last year, 90. Number of graduates last commencement, 20. Total number of graduates since organization of institution, 133. Value of apparatus (including library), \$3500. Number of volumes in libraries, 5000. Value of libraries, \$2500. Total receipts for the current year, \$3000. Total expenditures for the current year, \$2700. Rates of tuition per annum, \$40. Average total annual expense per student, \$37.50.

HISTORY.—This school was established in 1896 by H. F. W. Kuehne. The object of the founder of the institution was to establish a school where commercial science is really taught as a science. Doctor Kuehne started from the beginning with thoroughness as the watchword. He believed that if the new institution was worthy of the patronage of the people, it would secure it sooner or later. This it has done. The school pays special attention to good practical English, the art of punctuating correctly, political economy, and good business writing. Complete courses are found in the following departments: Bookkeeping, mathematics, telegraphy, shorthand, typewriting. Pupils can choose from fourteen modern languages. Two of them are taught free with the complete course, which costs, with all the books furnished for an indefinite period, only \$40.

PRIVATE NORMALS.

THE NICKERSON NORMAL COLLEGE.

EDWARD B. SMITH, President.

Nickerson, Kan. Founded in 1898. Under auspices of the trustees of Nickerson Normal College. Number of professors, 9. Number of other teachers, 5. Student assistants, 3. Number of departments, 5. Total enrolment last year, 312. Number of graduates last commencement, 31. Total number of graduates since organization, 103. Land owned by institution, one block in the city of Nickerson. Value of buildings, \$25,000. Value of apparatus, \$1750. Number of volumes in libraries, 2000. Value of libraries, \$3000. Total receipts for the current year, \$6340. Total expenditures for the current year, \$6500. Rates of tuition per annum, \$40. Average total annual expense per student, \$135.

HISTORY.—The Nickerson Normal College was founded in 1898. The enrolment for the first year was 268, for the second year 303, for the third year 307, and for the fourth year 312. The normal course was approved by the State Board of Education, under the act of 1893, in 1900. The following courses of study are sustained: University preparatory, normal, collegiate (four years), law, commercial, instrumental music, Bible study, painting and drawing. Under a special act of the legislature, the Reno county high school is organized as the preparatory department of the college. One hundred and three students have been graduated from the different courses of study.

SALINA NORMAL UNIVERSITY.

CHARLES SWISHER, President.

Salina, Kan. Founded, 1885. Private enterprise. Number of professors, 7. Number of other teachers, 5. Number of departments, 5. Total enrolment last year, 384. Number of graduates last commencement, 73. Total number of graduates since organization, about 1000. Land owned by institution, 8 acres. Value of buildings, \$25,000. Value of apparatus, \$2000. Number of volumes in libraries, 1500. Value of libraries, \$700. Total receipts for the current year, about \$6000. Total expenditures for the current year, about \$6000. Rates of tuition per annum, \$40. Average total annual expense per student, \$250.

ACADEMIES.

ASSUMPTION SCHOOL.

F. M. HAYDEN, President.

Topeka, Kan. Founded, 1887. Under auspices of the Catholic church. Number of professors, 5. Number of departments, 4. Total enrolment last year, 204. Number of graduates last commencement, 5. Value of buildings, \$10,000. Number of volumes in libraries, 300. Value of libraries, \$300. Total receipts for the current year, \$950. Total expenditures for the current year, \$950. Rates of tuition per annum, \$10.

ENTERPRISE NORMAL ACADEMY.

D. W. SMITH, President.

Enterprise, Kan. Founded September, 1892. Under auspices of German M. E. church. Number of professors, 3 paid; the principal does his work gratis and receives his salary as pastor of German M. E. church. Number of other teachers, 1 assistant in office work. Number of lecturers, 4. Number of departments, 5. Total enrolment last year, 52. Number of graduates last commencement, 6. Total number of graduates since organization of institution, 25. Land owned by institution, 40 acres. Value of buildings, \$15,000. Value of apparatus, \$200. Amount of endowment fund, \$11,000. Number of volumes in libraries, 500. Value of libraries, \$600. Total receipts for the current year, \$2200. Total expenditures for the current year, \$2350. Rates of tuition per annum, \$30. Average total annual expense per student, \$126.

HISTORY.—In 1890 the citizens of Enterprise formed an association, headed by C. Hoffman, E. F. Grosser, and J. F. Buhrer, to found an educational institution for the benefit of the people of Enterprise and vicinity. The outcome was that in 1892 a stone structure costing \$14,000, 50 x 60 feet, two full stories high and full basement for kitchen and dining-room purposes, was erected. Later an addition to the town of Enterprise, known as Prather's addition, consisting of more than 400 town lots, valued at \$10,000, was added. With this the school began its career. In 1896 the entire property was turned over to the West German Conference of the Methodist Episcopal church, on condition that they establish and maintain a successful school. Rev. H. S. Hunsfeld, was elected principal, and Joseph H. Fiedler, financial secretary, who raised an endowment fund of \$11,000, of which \$7200 was subscribed by members of the German M. E. church of Enterprise. C. Hoffman has been the principal factor in the school, both in financing and directing it. The school now has four teachers: D. W. Smith, principal; W. T. Ziebarth, mathematics and German; C. F. Leuenberger, business course and phonetics; Miss Carrie Barkemeyer, music.

The following courses are taught: Normal, academic, German, business, and stenographic. The aim of this school is twofold: First, to give young people a fair academic training under Christian influence and supervision for active duties in life; second, to give a solid foundation to those who desire to go on to complete their studies in higher educational institutions.

HAVILAND ACADEMY.

J. HERSCHEL COFFIN, Principal.

Haviland, Kan. Founded September, 1892. Under auspices of the Friends' church, Haviland. Number of professors, 2. Number of departments, preparatory and academic. Total enrolment last year, 51. Number of graduates last commencement, 3. Total number of graduates since organization, 25. Number of volumes in libraries, 500. Total receipts for the current year, about \$1000. Rates of tuition per annum, \$25. Average total annual expense per student, about \$70.

HISTORY.—Haviland Academy, a Friends' institution, is situated at Haviland, in the eastern part of Kiowa county, on the Chicago, Rock Island & Pacific railroad. In 1884-'85 a number of Friends with families came, principally from Indiana, Illinois, Iowa, and Ohio, and preempted government lands in what was later organized as Kiowa county. The Friends' meeting, soon organized, was named Haviland, in honor of the philanthropist, Laura S. Haviland, of Adrian, Mich., which name was also given to the village in 1887, and to the academy, which was built and opened in September, 1892. During its whole history Haviland Academy has steadily grown in influence and interest.

HESPER ACADEMY.

D. L. DAVIS, President of Board.

Hesper, Kan. Founded, 1884. Under auspices of the Society of Friends. Number of professors, 2. Number of lecturers, 6. Number of departments, 2. Total enrolment last year, 33. Number of graduates last commencement, 9. Total number of graduates since organization, 73. Value of buildings, \$4500. Amount of endowment fund, \$1550. Number of volumes in libraries, over 500. Total receipts for the current year, about \$385. Total expenditures for the current year, about \$750. Rates of tuition per annum, \$28.80. Average total annual expense per student, \$75 to \$100.

HISTORY.—In the village of Hesper, which is located four miles southeast of Endora and twelve miles southeast of Lawrence, is situated Hesper Academy. This institution was established in the autumn of 1884, incorporated in accordance with the statutes of the state of Kansas. It is owned and controlled by a joint-stock company. Most of the stockholders belong to the Society of Friends.

The school is supported by a tuition fee and liberal donations by the stockholders and others interested. The school has an endowment fund of \$1550, the interest only being used for the expenses of the school. The building is a two-story frame structure, with well-arranged class and study rooms. The building stands about the center of a four-acre campus, decorated with a number of shade and evergreen trees.

The academic courses of study are designed to prepare students for the active duties of life, for teaching, or for college. The Latin-scientific course is sufficiently comprehensive to prepare students for most of the colleges and universities. The commercial course introduces the student to actual business transac-

tions and forms, and fits him for ordinary business or for higher commercial courses. Seventy-three young people have graduated from the school.

The influence cast about the students of Hesper Academy has always been of a highly religious and moral character. The board of trustees has always procured good instructors.

HIAWATHA ACADEMY.

WM. E. SCHLIEMANN, President.

Hiawatha, Kan. Founded, 1887. Under auspices of the Baptist church. Number of teachers, 10. Number of departments, 6. Total enrolment last year, 102. Number of graduates last commencement, 6. Total number of graduates since organization, 182. Land owned by institution, \$5000. Value of buildings, \$25,000. Value of apparatus, \$5000. Amount of endowment fund, \$60,000. Number of volumes in libraries, 2000. Value of libraries, \$2000. Total receipts for the current year, \$33,000. Total expenditures for the current year, \$9000. Rates of tuition per annum, \$30. Average total annual expense per student, \$90.

HISTORY.—Hiawatha Academy was founded in 1887, and something over \$20,000 was raised by popular subscription for buildings and equipments. An eligible and sightly tract of land was given by Governor Morrill, and the present academy building was erected and opened for the reception of students on September 11, 1888. The building and equipment cost \$15,000. Two bequests laid the foundation for a permanent endowment. Mr. Isaac B. Hoover willed his estate to the academy and that, together with the estate of Mrs. Hoover, came into its possession upon the death of the latter in 1896. Out of this estate \$7000 were used in the erection of Hoover hall, a completely equipped students' home, and the remainder, some \$18,000, was invested as an endowment. In 1897 Mr. Charles H. Janes, for many years a member of the banking firm of Morrill & Janes, died, leaving the Academy one-fifth of his estate, which increased the endowment to \$34,000.

It was found that the field for a non-sectarian preparatory school was limited, and that the usefulness of the academy might be vastly increased if the moral and financial support of some one of the leading denominations could be secured. To this end, E. H. Lovett, the representative of the American Baptist Education Society, was invited to Hiawatha for consultation. Upon his arrival he presented the plans and purposes of the society to the board of trustees, and after a careful consideration the board decided to place the property belonging to the academy—amounting in the aggregate to fully \$55,000—under the control of the American Baptist Education Society, provided that \$25,000 be added to the endowment fund, of which sum Governor Morrill offered to give \$5000. After making a careful examination of the grounds, buildings, invested funds, and the record of the school, Doctor Lovett went to New York in person, and recommended the society to accept the proposition made by the board of trustees. In accepting control of the academy, the society announced a gift of \$10,000 from Mr. J. D. Rockefeller, and within a few days \$10,000 was readily raised among the generous citizens of the county. These sums, with the \$5000 given by Governor Morrill, completed the conditions for the transfer of control; and the entire amount was added to the permanent endowment fund. At a regular meeting of the board of trustees, held on April 9, 1902, the change was formally ratified, and Hiawatha Academy has now not only the support of all the local churches and business men, but also the indorsement and backing of the American Baptist Education Society.

LEWIS ACADEMY.

J. M. NAYLOR, President.

Wichita, Kan. Founded, 1884; began work, 1886. Under auspices of the Presbytery of Emporia. Number of teachers, 3. Number of departments, 8. Total enrolment last year, 272. Number of graduates last commencement, 23. Total number of graduates since organization, 202. Land owned by institution, 10 town lots. Value of buildings, \$28,000; whole property, \$74,000. Value of apparatus, \$3000. Number of volumes in libraries, 600. Value of libraries, \$500. Total receipts for the current year, \$6318. Total expenditures for the current year, \$6318. Rates of tuition per annum, \$32; intermediate, \$28; primary, \$20. Average total annual expense per student, \$225.

HISTORY.—At the session of the Presbytery of Emporia held at Arkansas City in April, 1884, the following resolutions were adopted:

"In view of the fact that there is now great need for better educational facilities, especially in preparatory studies, and since there is no academy within the bounds of this presbytery: therefore,

Resolved, 1st, That this presbytery at once proceed to such action as shall meet this want.

Resolved, 2d, That a board of trustees be appointed, and is hereby authorized and instructed to proceed at once to locate said academy within the bounds of this presbytery," etc.

The board of trustees thus appointed located the academy at Wichita, and secured a charter from the state of Kansas, under the name of "Wichita Academy," bearing date of May 12, 1884. On May 18, 1886, the charter name was changed to "The Lewis Academy of Wichita, Kansas," in recognition of the liberal endowment given by Mr. H. W. Lewis.

While the academy is owned by "The Presbytery of Emporia," it is in no sense sectarian. On its board of trustees and in its faculty members of various denominations are found, who unite in the requirement that the study of the Bible shall be made a prominent feature of work in all departments of the school, that the moral as well as the mental faculties of the students may be equally developed. The entire influence of the school always has been, is and will continue to be for the spreading abroad of the gospel of Christ.

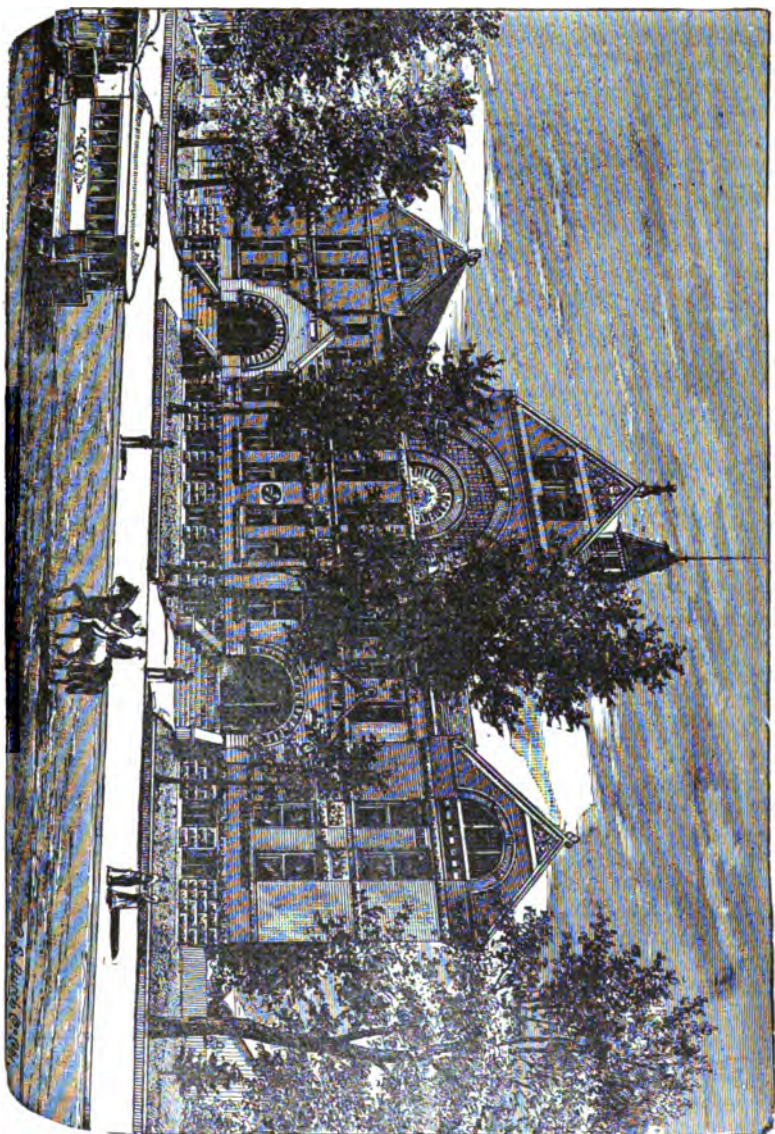

Two hundred and three graduates have received their diplomas from the academy since its organization.

LOWELL ACADEMY.

WM. B. MORGAN, Principal.

Lowell, Kan. Founded, 1891. Incorporated as Lowell Polytechnic Institute. Under auspices of the Society of Friends. Number of teachers, 3. Number of departments, 3. Total enrolment last year, 23. Number of graduates last commencement, 2. Total number of graduates since organization, 16. Land owned by institution, 20 acres. Value of buildings, \$3000. Value of apparatus, \$500. Number of volumes in libraries, 1500. Value of libraries, \$1000. Rates of tuition per annum, \$27.50. Average total annual expense per student, \$125, board and tuition.

HISTORY.—This school was established in 1891-'92, by the members of Spring River quarterly meeting of Friends (larger body), and was incorporated under the name of "Lowell Polytechnic Institute." This was the first school for purely secondary education in Cherokee county, and was designed, in the first place, for the secondary education of the younger members of the denomination, though by no means to be restricted to them. The institution from its beginning has been

LEWIS ACADEMY. Wichita. Page 96.

avored with a very select class of energetic students, though the attendance has been small, especially since the opening of the county high school, at Columbus. The institution was intended from the first to have polytechnic features incorporated in its curriculum of work. This has not yet been done, but hopes are entertained that this may yet be done in the near future. A more desirable location for a school of this character can hardly be found. Spring river and Shoal creek, both large, beautiful streams, rising among the Ozarks of Missouri, come together at Lowell, and are a source of recreation and pleasure to every one. The auditorium of the academy is the favorite meeting-place for the members of the Christian Endeavor, for literary societies, and also for gospel temperance meetings, under the auspices of the W. C. T. U.

MT. ST. SCHOLASTICA ACADEMY.

MOTHER ALOYSIA, President.

Atchison, Kan. Founded, 1863. Under auspices of the Benedictine sisters. Number of professors, 16. Number of lecturers, 4. Number of departments, 3. Total enrolment last year, 133. Total number of graduates since organization, 31. Number of volumes in libraries, 1020. Rates of tuition per annum, \$30. Average total annual expense per student, \$160, board and tuition.

NAZARETH ACADEMY.

MOTHER ANTOINETTE, President.

Concordia, Kan. Founded, 1884. Under auspices of the Sisters of St. Joseph. Number of professors, 4. Number of other teachers, 6. Number of lecturers, 2. Number of departments, 6. Total enrolment last year, 40. Number of graduates last commencement, 1. Total number of graduates since organization, 44. Land owned by institution, 40 acres. Value of buildings, \$150,000. Value of apparatus, \$5000. Number of volumes in libraries, 3000. Value of libraries, \$3500. Total receipts for the current year, \$5000. Total expenditures for the current year, \$3400. Rates of tuition per annum, \$150. Average total annual expense per student, \$200.

HISTORY.—This institution was founded by the Sisters of St. Joseph in 1884. The increase of pupils during the last few years demanded the construction of a new building. The building, when completed, will be worth over \$100,000. It is surrounded by forty acres of land and beautifully located. The apartments are large and commodious and are furnished with modern improvements. The building throughout is heated by steam, well lighted, and thoroughly ventilated. Bath-rooms, supplied with hot and cold water, communicate with the sleeping apartments and infirmaries. These apartments, as well as the study hall, classrooms, studies, etc., are bright and pleasant. The scholastic year is divided into two sections, the first commencing the first week in September, and the second the first Monday in February. Students are received at any time during the year, but have no shorter period than five months.

NORTH BRANCH ACADEMY.

H. H. TOWNSEND, Principal.

North Branch, Kan. Founded, 1889. Under auspices of the Friends' church. Number of teachers, 2. Number of lecturers, 1. Number of departments, 2. Total enrolment last year, 32. Total number of graduates since organization, 28. Land owned by institution, about 10 acres. Value of buildings, \$600. Value of apparatus, \$25. Number of volumes in libraries, 250. Value of libraries, \$250.

Total receipts for the current year, \$400. Total expenditures for the current year, \$400. Rates of tuition per annum, \$18 and \$21. Average total annual expense per student, \$100, including board.

HISTORY.—North Branch Academy grew out of a demand for a school higher than the common schools and one in which the pupils would be under Christian influences. An academy association was formed in the summer of 1889, and was chartered July 11, 1890, with a capital stock of \$2000. By the articles of incorporation, it is provided that the Friends' church shall participate in the management of the institution and shall have a leading control. Some of the chief promoters of the school were Wm. Stanton (now deceased), D. H. Dillon, A. A. Davis, A. H. Rinard, Benjamin Hiatt, Luke Dillon, N. Reed, Asa Folger, M. Lamb, and others.

The first term opened October 1, 1889.

A four-year course of study is provided, which fits students for the State University and other colleges, and embraces the most essential branches for those who go no higher. The principals of the school have been: H. H. Townsend, 1889-'94; D. R. Haworth, 1894-'96; Chas. Marshall, 1896-'97; A. H. Symons, 1897-'99; Ross Haworth Roberson, 1899-1900; H. H. Townsend, 1900-'02. There have been twenty-eight graduates. The influence of the institution has also reached hundreds of others who have not completed the course of study.

NOTRE DAME DE LOURDES ACADEMY.

SISTERS OF ST. JOSEPH.

Fort Scott, Kan. Founded September, 1901. Under auspices of the Sisters of St. Joseph of Wichita. Number of teachers, 8. Number of departments, 5. Total enrolment last year, 65. Value of buildings, \$30,000. Value of libraries, \$500. Total receipts for the current year, \$400. Rates of board and tuition per annum, \$150.

SOUTHERN KANSAS ACADEMY.

J. W. SROOGES, President.

Eureka, Kan. Founded, 1885. Under auspices of the Congregational church. Number of teachers, 5. Number of departments, 4. Total enrolment last year, 91. Number of graduates last commencement, 14. Total number of graduates since organization, 139. Land owned by institution, 15 acres. Value of buildings, \$12,200. Value of apparatus, \$2600. Amount of endowment fund, \$20,045. Number of volumes in libraries, 1752. Value of libraries, \$700. Total receipts for the current year, \$4592. Total expenditures for the current year, \$5028. Rate of tuition per annum, \$26. Average total expense per student, \$82.

HISTORY.—The Southern Kansas Academy was incorporated March 31, 1885, and its first board of trustees were: Rev. J. Harper, Burlington; Rev. W. A. Bosworth, Independence; Rev. W. B. Utley, Parsons; George McKey, Howard; D. W. Finney, Neosho Falls; Edwin Tucker, J. C. Nye, N. R. Collins, and A. M. Wassam, Eureka. They were elected by the Southern Kansas association of Congregational churches, in which the movement for the establishment of an academy began, and by whose vote the academy had been located at Eureka. The building was erected by the citizens of Eureka and Greenwood county, and was dedicated September 14, 1886; and its doors, opened for students then, have never since been closed, though the struggle was for many years a desperate one.

The principals have been as follows: Rev. A. T. Bunnell, 1886-'90; Rev. E. G. Lancaster, 1890-'95; Mr. L. C. Wooster, 1895-'96; Mr. T. H. Rhodes, 1896-'98;

Rev. J. W. Scroggs, 1898-1902. The first class graduated in 1889. The total number of graduates is 140, an average of 10 per year.

The charter of the institution forbids any sectarian teaching. But still the predominant purpose of the institution is to combine mental and moral instruction and influences, and the religious atmosphere of the school has always been prominent. The religious work of the school is chiefly done through the Young Men's Christian Association and Young Women's Christian Association. There are four courses of study: Philosophical, business, normal, each of four years, and a music course of five years. Students are prepared for the Eastern colleges and for the sophomore year of many Western colleges.

The fundamental theory of the management of the school is that the best mental discipline can only be secured in an atmosphere of moral and religious appeal, and that religious influences are most potent in an intellectual atmosphere; in their combination the power and quality of both are enhanced. In a word, the school stands for Christian education. This sketch would be incomplete without mention of Hon. Edwin Tucker, whose forethought, gifts, faith and devotion have been the chief factors in the establishment and life of the institution.

SPEING RIVER ACADEMY.

ANSON B. HARVEY, Principal.

Galena, Kan. Founded, 1879. Under auspices of the Society of Friends. Number of teachers, 4. Number of departments, 3. Total enrolment last year, 69. Total number of graduates since organization, 6. Land owned by institution, 20 acres. Value of buildings, \$6000. Value of apparatus, \$1000. Amount of endowment fund, \$2000. Number of volumes in libraries, 1400. Value of libraries, \$900. Total receipts for the current year, about \$1100. Total expenditures for the current year, about the same. Rates of tuition per half year: Primary, \$6; intermediate, \$12; academic, \$15. Average total annual expense per student, about \$15.

HISTORY.—Spring River Academy is located in the midst of the thickly settled neighborhood known as the "Quaker Valley." It is six miles west of Galena and about the same distance north of Baxter Springs. The plat of ground, of about twenty acres, on which the buildings are located is slightly higher than the surrounding valley, which helps to make rather conspicuous the modest stone building, which serves not only as a home for the academy but, also, for a meeting-house for the orthodox branch of the Society of Friends. Ground was first broken for the building in 1879, and the first committee of management was appointed "to have the oversight and management of the Friends high school at Spring River." But before the school was formally opened, in 1880, the name was changed to Spring River Academy.

The purpose of the school is to give a liberal education, under such influences as will tend to develop in the pupils, not only high ideals in life and ambitions for wider usefulness as they grow older, but, more definitely, a truly Christian character. In order to further this fundamental purpose of the school, many of the exercises and influences are of a decidedly religious character; as, for example, the memorizing of portions of the holy scriptures each week as a part of the regular work. The school is organized into three departments—primary, intermediate, and academic. The school work for the year is divided into two terms of three months each, so arranged that the principal studies are carried throughout the year. The "course" in each department covers four "years," or twenty-four months of actual study, not including vacations. The school is fairly well equipped with apparatus, having at its command a six-inch telescope,

an excellent high-power microscope, two good physiological charts, a twenty-eight-page botanical chart, maps, and other educational devices, and a well selected library of nearly 1500 volumes, including several of the popular books of reference.

ST. FRANCIS SCHOOL.

F. RAYMOND, President.

St. Paul, Kan. Founded, 1847. Under auspices of the Catholic church. Number of professors, 4. Number of lecturers, 2. Ten grades. Total enrolment last year, 148. Number of volumes in libraries, 1000. Value of libraries, \$1800. Rates of tuition, free.

ST. JOHN'S MILITARY SCHOOL.

R. H. MIZE, Rector.

Salina, Kan. Founded, 1887. Under auspices of the Episcopal church. Number of instructors, 8. Number of lecturers, 1. Number of departments, 2. Total enrolment last year, 65. Number of graduates last commencement, 6. Total number of graduates since organization, 40. Land owned by institution, 60 acres. Value of buildings, \$80,000. Value of apparatus, \$10,000. Number of volumes in libraries, 1000. Total receipts for the current year, \$25,000. Total expenditures for the current year, \$25,000. Rates of tuition per annum, \$300, including board. Average total annual expense per student, \$450.

HISTORY.—St. John's Military School was founded in 1887. In that year, a corporation was formed for the purpose of maintaining and conducting a school and college for boys and young men. The charter provides for a board of nine trustees, a majority of whom shall be residents of the state of Kansas and communicants of the Protestant Episcopal church. The original building, erected at a cost of \$60,000, together with sixty acres of land, was presented to the trustees by the citizens of Salina. Since that time, a fully equipped gymnasium, 75 x 45 feet in dimensions, has been erected. On the 20th of September, 1888, the school was formally opened by Bishop Thomas, president of the board of trustees, who also undertook the direct oversight of the school, with the title of rector. Bishop Thomas retained the rectorship until his death, in 1895. His successor was Dr. F. R. Millsbaugh, bishop of Kansas, who retained the rectorship until the fall of 1899, when he was succeeded by the Rev. R. H. Mize.

The courses of study, as arranged at present, are four in number. Three courses fulfil the requirements of the college-entrance examinations, while the fourth completes a business education. No college studies are offered, the school confining itself to those branches which prepare for college. At present the number of boarding pupils is limited to sixty. The daily life is modeled, with some modifications, after the system at West Point. A grant of arms and ammunition has been made by the United States government, and an officer of the regular army is assigned as instructor in military tactics and science. The cadets dress in West Point uniforms and have daily military drill and instruction. The school is filled to its capacity, and arrangements have been made for additional buildings. There are eight instructors, beside other assistants.

ST. MARY'S ACADEMY.

Three miles south of Leavenworth, Kan. Founded, 1860. Under auspices of the Sisters of Charity. Number of teachers, 10. Number of departments, 3. Total enrolment this year, 71. Number of graduates last commencement, 1. Number of volumes in libraries, 5000. Average total annual expense per student, \$180.

ST. ROSI ACADEMY.

P. J. MALONEY, President.

Danville, Kan. Founded, 1891. Under auspices of the Sisters of St. Joseph. Number of professors, 1. Number of teachers, 3. Number of departments, 3. Land owned by institution, 10 acres. Value of buildings, \$15,000. Value of apparatus, \$200. Value of libraries, \$1000. Total receipts for the current year, \$5000. Total expenditures for the current year, \$1000. Rates of tuition per annum, caput tax, \$1. Average total annual expense per student, \$8.

URSULINE ACADEMY.

MOTHER JEROME, President.

Paola, Kan. Founded, 1895. Under auspices of the Sisters of the Ursuline Order. Number of teachers, 5. Number of departments, 3. Total enrolment last year, 40. Number of graduates last commencement, 3. Total number of graduates since organization, 4. Land owned by institution, 5 acres. Value of buildings, \$20,000. Value of apparatus, \$900. Number of volumes in libraries, 300. Value of libraries, \$800. Rates of tuition per annum, \$200.

WASHINGTON ACADEMY.

W. S. COLLAWN, Principal.

Washington, Kan. Founded, 1892. Under auspices of the Baptist church. Number of teachers, 5. Number of departments, 3. Total enrolment last year, 60. Number of graduates last commencement, 1. Total number of graduates since organization, 14. Land owned by institution, 8 acres. Value of buildings, \$4000. Value of apparatus, \$250. Number of volumes in libraries, 625. Value of libraries, \$400. Total receipts for the current year, \$1450. Total expenditures for the current year, \$1450. Rates of tuition per annum, \$24 to \$27. Average total annual expense per student, \$35.

DENOMINATIONAL COLLEGES.

BAKER UNIVERSITY.

L. H. MUELIN, President.

Baldwin, Kan. Founded, 1858. Under auspices of the M. E. church. Number of professors, 22. Number of other teachers, 10. Number of lecturers 4. Number of departments, 9. Total enrolment last year, 856. Number of graduates last commencement: In college, 28; in all departments, 121. Total number of graduates since organization of institution: In college, 400; in all departments, 1200. Land owned by institution, \$5000. Value of buildings, \$130,000. Value of apparatus, \$70,000. Amount of endowment fund, \$10,000. Number of volumes in libraries, 10,000. Value of libraries, \$20,000. Total receipts for the current year, \$28,000. Total expenditures for the current year, \$28,000. Rates of tuition per annum, \$30 to \$50. Average total annual expense per student, \$40.

HISTORY.—On October 3, 1856, a band of Methodist preachers, coming from circuits scattered over two territories, assembled at Lawrence and organized the Kansas-Nebraska conference, Bishop Baker presiding. The committee on education urged the speedy establishment of a school. In pursuance to this advice, an educational convention was called by the presiding elder, to meet at Blue Mound, Douglas county. Upon invitation of the Palmyra Town Association, the meeting adjourned to Palmyra—a town fifteen miles south of Lawrence, founded in 1855. The offer of a section of land, and the prospect of other financial aid, combined with the desirability of the location, caused the convention to recom-

mend the acceptance of the same. At the second session of the June conference, April, 1857, the Kansas Educational Association of the Methodist Episcopal Church was formally organized, and a charter secured. Palmyra's offer was accepted, and the college section platted as Baldwin City, with Baker University as a center.

On February 12, 1858, Baker University was chartered and a building begun. Milton Baldwin, of Berea, Ohio—for whose father the town was named—conducted a preparatory school in the spring of 1858. The building known as the "old castle" being completed, in September, 1858, the college was formally opened, under the charge of Benjamin Cunningham, who retained control until the arrival of the president, Dr. Werter R. Davis, in January, 1859. The history of the school from 1858 down to the present has been as varied as that of the state yet there has ever been a steady, healthful growth, and the maintenance of the principles on which it was founded. The first catalogue issued, for the years 1862-'63, shows a faculty of seven, and 130 students enrolled in all departments. The first class, three in number, was graduated in 1866. The present senior class numbers thirty-five; the total number of students is 856—360 of these are in the college department.

In 1872, a second building, Science hall, was completed; in 1885, Centenary hall; in 1902, the Gymnasium. The general library numbers about 10,000 volumes, while several departments have special libraries. The new library building will be begun the present year. The chemical, biological and physical laboratories have been thoroughly equipped with about \$20,000 worth of apparatus within the past few years. In all, about \$100,000 permanent improvements have been made within the past two or three years.

The faculty for the present year are as follows: L. H. Murlin, president; C. S. Parmenter, professor of biology; O. G. Markham, professor of Latin; S. A. Lough, professor of Greek; W. C. Bauer, professor of physics and chemistry; E. F. Murlin, professor of modern languages; A. D. Porter, professor of English; W. H. Garrett, professor of mathematics; H. J. Hoover, professor of history; Lillian Scott, professor of pedagogy; F. N. Hair, music; Jennie Bull, vocal music; A. E. Leach, oratory; F. E. Wolf, business; E. A. Telford, Latin; H. G. Jones, modern languages; A. B. Fogle, physical training; Ada C. Heaton, physical training for women; S. E. W. Bedford, instructor in English and history; A. E. Kirk, instructor in biology; A. H. McConnell, band, stringed instruments; Birdean Motter, decorative art; Edith L. Bissell, drawing and painting.

Students in attendance: Senior, 35; junior, 55; sophomore, 110; freshmen, 160; academic, 206; normal, 110; music, 105; business, 70; other departments, 5; total, 856.

BETHANY COLLEGE.

CARL SWENSSON, President.

Lindsborg, Kan. Founded October 15, 1881. Under auspices of the Swedish Lutheran church. Number of professors, 15. Number of other teachers, 35. Number of lecturers, 6. Number of departments, 12. Total enrolment last year, 865. Number of graduates last commencement, 85. Total number of graduates since organization, 492. Land owned by institution, 25 acres. Value of buildings, \$120,000. Value of apparatus, \$30,000. Number of volumes in libraries, 7500; 5000 pamphlets. Value of libraries, \$7987. Total receipts for the current year, \$63,241.15. Total expenditures for the current year, \$62,947.52. Rates of tuition per annum, \$36 and up. Average total annual expense per student, \$135 and up.

HISTORY.—Bethany College was founded by Rev. Carl Swensson. Its birth

day is October 15, 1881. The first day's record is two teachers and no students. Total attendance first year, twenty-seven; total net property first year, nineteen dollars. The first donation to Bethany was the first net proceeds of the first "Messiah" concerts, at Easter, 1882. The sum was \$200. The institution is owned and controlled by the Kansas conference of the Lutheran Augustana Synod of North America. The institution has twenty acres of beautifully shaded grounds, and five acres additional, used as an athletic field. This field is enclosed by a board wall and has a grand stand accommodating 600 people. The college comprises the collegiate department, with regular classical, two scientific (physico-mathematical and natural history) and the modern language courses, all with electives in junior and senior years: normal department, with model school and sloyd adjunct; four-year academy course; commercial department; shorthand and type-writing department; conservatory of music, with band, orchestra and oratorio adjuncts; art department, with adjunct for mechanical drawing; school of elocution and oratory; department of law; graduate school.

The sum total of persons enrolled in the college during the twenty-one years of its history is 2997. The total attendance (adding net attendance of all the years together) is 8124. The number of persons employed during same years as professors, instructors and assistants is 134. The number of the alumni is 492. Last year's attendance was 865. The present worth of the college property is \$175,000. The library numbers 7500 volumes and 5000 pamphlets. The reading-room is furnished with dailies, magazines, and books of reference. A law library is a part of the general library. The museums are of considerable size and include the numismatic collection and the collection of Indian relics and pottery. The college has its own pianos and organs manufactured, called "the Bethany"; also has a book store and publishing house, incorporated as the Bethany Book Concern.

The buildings are as follows: The main building is 154 feet long, 60 feet wide, and 85 feet high, containing a basement and five stories. The chapel extension in the rear is 108 feet wide. The basement contains the museum and natural-science department and three recitation rooms. The first story contains six spacious recitation rooms, the commercial hall, the treasurer's office, the library, and reading-rooms. In the second story are the president's office, music studios, and a number of private rooms. The chapel extends through the second and third stories, with a seating capacity of 800. It is furnished with opera chairs. A pipe-organ costing \$3000 is also here. The four upper stories are set apart chiefly for student rooms, of which there are 103. The building has three independent systems of stairs and wide, commodious halls, is steam-heated, and gas-lighted, and has also a complete system of water-works.

The ladies' hall is a three-story brick structure with basement, accommodating ninety-two students. It has parlor and reception rooms for the use and convenience of the students. The entire building is heated by steam, and gas-lighted.

The art hall is a large one-story building, carefully and especially arranged and lighted for the purpose it is intended to serve. A complete set of plaster of Paris casts used as models for drawing have been added during the year. A valuable collection of paintings and studies, to which additions are constantly being made, belongs to this department.

The auditorium and gymnasium is one of the best buildings of its kind in the state. Its capacity as an assembly hall is 4000. Of these, 2850 are reserved seats. On the stage, a large, three-manual Moller \$5000 pipe-organ is built. Separate classes for ladies and gentlemen in gymnastics or physical culture are organized, and for their benefit the great hall is turned into a first-class gymna-

BETHANY COLLEGE, Lindsborg. See page 108.

sium. The auditorium is supplied with steam heat, and is lighted with acetylene gas.

There are also a large bakery building and a building for baths.

The oratorio department was organized 1881-1882. First chorus numbered forty voices. The oratorio "Messiah" has been rendered in public forty-one times. The present chorus numbers 527 voices; the orchestra, fifty instruments.

BETHEL COLLEGE.

C. H. WEDEL, President.

Newton, Kan. Founded, 1893. Under auspices of the Bethel College corporation of the Mennonite church of America. Number of professors, 11. Number of departments, 11. Total enrolment last year, 116. Number of graduates last commencement, 5. Total number of graduates since organization, 45. Land owned by institution, 120 acres. Value of buildings, \$50,000. Value of apparatus, \$2000. Amount of endowment fund, \$80,000. Number of volumes in libraries, 2000. Value of libraries, \$2500. Total receipts for the current year, \$4850.43. Total expenditures for the current year, \$4830.02. Rates of tuition per annum, \$30.60. Average total annual expense per student, \$150.

HISTORY.—In 1873 a large number of Mennonites from Europe and from different states of the Union came to Kansas to establish homes. They soon realized the necessity of a school adapted to their peculiar needs and requirements. To serve these purposes, the Mennonite seminary, with two instructors, was established in 1882 by the Kansas conference of Mennonites, and was located at Halstead, Kan. In course of time, however, in order to put the school on a firmer basis, it was found desirable to locate the same permanently, to increase its facilities, and to raise an endowment fund. Therefore, in 1887, the Kansas conference met in special session to discuss these matters and to consider an offer of financial aid that had been made by the city of Newton, on condition that the school be built at that place. The conference did not accept the offer, but favored the organization of an association having for its aim the establishment and maintenance of a Mennonite school at Newton. The Bethel College corporation was then formed without delay. Efforts were immediately made to create both an endowment and a building fund, and the erection of the main building was begun. But as it was the intention of the association not to incur any debt, and therefore to proceed no faster than the available funds permitted, the structure, which was erected at a cost of \$37,000, was not completed until the autumn of 1893, when its doors were opened to students.

The beginning was made with two departments and a faculty of five members. Since then the number of departments has grown to six and that of the instructors to eleven. Of the departments, the academic and collegiate maintain the following courses of three years each: College, German academic, English academic, normal, and biblical. In the last mentioned the instruction is given entirely in the German language. In addition to the courses above enumerated, others are offered in music, art, elocution, and business.

CAMPBELL UNIVERSITY.

E. N. JOHNSON, President.

Holton, Kan. Founded, 1882. Independent. Number of professors, 17. Number of departments, 8. Total enrolment last year, 372. Number of graduates last commencement, college course, 10. Total number of graduates since organization of institution, college course, 121. Land owned by institution, 11 acres. Value of buildings, \$50,000. Value of apparatus, \$10,000. Amount of

endowment fund, prospective \$100,000. Number of volumes in libraries, 2750. Value of libraries, \$2500. Total receipts for the current year, \$11,550. Total expenditures for the current year, \$11,550. Rates of tuition per annum, \$36. Average total annual expense per student, \$200.

HISTORY.—The people of Jackson county desiring to establish an institution of higher education in Holton, in 1879 called a public meeting to discuss ways and means. The result was the appointment of a committee to correspond with Hon. A. G. Campbell, a wealthy mine-owner of Utah, who had formerly been a citizen of Jackson county. The result of this correspondence was a proposition from Mr. Campbell to contribute an amount of money to the enterprise equal to a paid up subscription of not more than \$20,000 by the citizens of Holton. The sum of \$10,000 was soon raised by the citizens of Jackson county, and Mr. Campbell promptly sent his check for that amount, plus \$1100 with which to buy the eleven acres which constitute the college campus. In 1880 a fine stone building, 40 x 60, two stories and basement, was built.

During the summer of 1882, the building was leased to J. H. Miller, who, with a strong faculty, opened school in September of that year, with forty students. Under Professor Miller's efficient management, the school rapidly grew in reputation and popularity. In 1887 it became necessary to enlarge the building. At this time \$6000 was raised by subscription, with which a basement and first story of a 50 x 100-foot addition was built. In 1888 President Miller's health failed and E. J. Hoenshel succeeded him as president.

In 1883 President Miller built a dormitory, and in 1893 President Hoenshel enlarged, fitted it up with modern conveniences for boarding and rooming, steam heat and electric light. The second year of President Hoenshel's administration it again became necessary to enlarge the university building, and under a special act of the legislature the city of Holton voted \$12,000 in bonds, and the 50 x 100-foot addition was completed. The university chapel in this addition is a fine audience room and will seat 800 people.

In 1896 B. F. Kizer was elected president of the school. President Kizer remained only one year. In the spring of 1897, E. N. Johnson, a graduate of the school and also of Drake University, and a teacher in the school for several years, was elected president.

The loyalty which the people of Holton have shown the school and the patronage they have given it are worthy of commendation. It is in great part due to these public-spirited citizens that the school has secured and maintained its place among the schools of the state.

COLLEGE OF EMPORIA.

JOHN C. MILLER, President.

Emporia, Kan. Founded, 1882. Under auspices of the Presbyterian synod. Number of professors, 10. Number of other teachers, 3. Number of lecturers, 1. Number of departments, 3. Total enrolment last year, 161. Number of graduates last commencement, 19, in full college course. Total number of graduates since organization, 134, in full college course. Land owned by institution, 40 acres. Value of buildings, \$100,000. Value of apparatus, \$20,000, including furniture, etc. Number of volumes in libraries, 6000. Total receipts for the current year, \$12,789.84. Total expenditures for the current year, \$12,876.39. Rates of tuition per annum, \$30.

HISTORY.—The College of Emporia is owned and controlled by the Presbyterian synod of Kansas. It was incorporated and located at Emporia October 6, 1882, and opened in the autumn of 1883. The first class was graduated in 1889.

The total number of graduates in full college course, including the present senior class of nineteen members, is 134. The enrolment this year is 161. Its course of study is equal to that of the best colleges in the West. Its faculty is composed of able and experienced teachers. The campus consists of thirty-eight acres adjoining the city of Emporia. The buildings, including the new library—the gift of Mr. Carnegie—cost \$95,000. The total property, worth \$120,000, is entirely free of debt.

COLLEGE OF THE SISTERS OF BETHANY.

BARBARA WALKER, Principal.

Topeka, Kan. Founded, 1860. Under auspices of the Episcopal church. Number of professors and teachers, 17. Number of departments, 14. Total enrolment last year, 108. Number of graduates last commencement, 2. Total number of graduates since organization: 108 collegiate, 49 music, 8 elocution, 6 art. Value of buildings, \$200,000. Amount of endowment fund, \$30,000. Number of volumes in libraries, 1500. Value of libraries, \$10,000. Rates of tuition per annum: \$45, \$36, \$30.

HISTORY.—The College of the Sisters of Bethany was founded under the auspices of the Episcopal church in 1860. Its first location was Tecumseh, but a few months later it was decided to move the school to Topeka. Mr. Callaway, the rector of Grace church, was the most active worker at this time for the school.

In 1864 Rev. Thomas H. Vail was consecrated bishop of Kansas, and he appointed Rev. J. W. Lee as principal. The school was reopened after having been closed for a year and a half. The first charter granted was abandoned in 1870, and the name was changed from the Episcopal Female Seminary to the one it now bears. Its present site was also selected and the erection of new buildings begun. The board of seven trustees, with the bishop of Kansas as president, were empowered to confer degrees by the new charter, and to raise the standard of the school to that of a college. The great expense incurred in erecting handsome buildings and a period of business depression prevailing in Kansas about that time placed the college under a debt of \$40,000. Bishop Vail, in September, went East to try to raise this debt, but died at Bryn Mawr in October. Bishop Thomas, who succeeded him, was able to pay off only \$10,000 of the sum. At his death Bishop Millspaugh, who was his successor, went East and was able to secure the money necessary to complete the payment of the debt. The Bruno legacy of over \$30,000 was placed as a permanent endowment fund.

The college has a campus of twenty acres situated in the heart of Topeka. The main building faces the state capitol. The chapel is one of which even a larger and more richly endowed college would have a right to be proud. The buildings have all the modern improvements and are comfortably furnished.

The aim of the school is to give girls and young women the advantages of the best Eastern finishing schools, and, at the same time, the work in the most modern high schools, with the addition of two years of college work.

At a recent meeting of the board of trustees the standard was raised, and the collegiate and high-school departments separated. The requirement for graduation from the collegiate department in the classical course is five years of ancient and four years of modern language; in the scientific course, nine years of two modern languages. In the preparatory department, the books used are the same as those used in the state schools.

COOPER COLLEGE.

F. M. SPENCER, President.

Sterling, Kan. Founded, 1887. Under the auspices of the United Presbyterian church. Number of professors, 11. Number of departments, 7. Total enrolment last year, 212. Number of graduates last commencement, 10. Total number of graduates since organization, 52. Land owned by institution, 10 acres. Value of buildings, \$27,000. Value of apparatus, \$800. Amount of endowment fund, \$28,000. Number of volumes in libraries, 2000. Value of libraries, \$1500. Total receipts for the current year, \$6000. Total expenditures for the current year, \$6000. Rates of tuition per annum, \$30. Average total annual expense per student, \$200.

. HISTORY.—Cooper College was established in 1887. The Sterling Land and Investment Company in 1886 entered into an agreement with the United Presbyterian synod of Kansas, promising to donate ten acres of ground and erect a college building costing \$25,000, providing the said synod of Kansas would raise an endowment of \$25,000 and establish a college doing college work. Five years were given to bring about these results. Both parties fulfilled their part of this contract within the time agreed upon, which was five years, and classes were organized October 1, 1887. Several of the rooms were finished later, and are now all occupied. At the opening there were but two professors, S. A. Wilson, who still occupies the chair of ancient languages, and A. N. Porter, who remained four years as professor of mathematics. Rev. F. M. Spencer was elected president in March, 1889, and was inaugurated at the opening of the college in the following September, and is still the acting president.

From a small beginning Cooper has steadily grown. A library of about 2000 volumes has been gathered. The museum has several hundred specimens, worth a good many hundred dollars. Perhaps no other institution in the state has as fine a collection from Palestine and Egypt as has Cooper. A sufficient amount of apparatus has been added from time to time to illustrate the different subjects taught. A stereopticon for use in biology, botany, and physiology, costing \$125, is the latest addition. The faculty has grown from two to eleven persons. At the last commencement ten persons were graduated, and the enrolment for the year closing June 12, 1902, was 212. The literary societies have elegantly furnished rooms. An annual contest between the Crestomatheon and the Theomoron societies has given an impetus to this line of work. Cooper has won in two annual debates with the Friends University, of Wichita. The contestants were trained in these societies. A department of oratory has recently been added, to assist in this line of work.

The aim of the founders of the institution and of the management is to give a Christian education, and to do this without being sectarian. It is their belief that the truths of revelation and nature are in entire harmony, and that any teaching which ignores the Bible is one-sided and defective. It is their belief, also, that young people suffer a great loss if God's word is not to them an open book, in that they fail to gain a knowledge of the choicest gems of literature, and do not come into contact with the only divine text-book on morals. Cooper, and the other denominational colleges, prepare a large number of students for advanced standing and for postgraduate work in the state institutions, and help to develop a taste for higher education.

FAIRMOUNT COLLEGE.

NATHAN J. MORRISON, President.

Wichita, Kan. Founded as an academy, 1892. Organized as a college, 1895. Under auspices of the Congregational church. Number of professors, 13. Number of other teachers, 8. Number of lecturers, 1. Number of departments, 3. Total enrolment last year, 221. Number of graduates last commencement: Academy, 20; college, 38. Total number of graduates since organization: College, 33. Land owned by institution, about 80 acres. Value of buildings, \$70,000. Value of apparatus, \$2500. Amount of endowment fund, \$133,000. Number of volumes in libraries, 22,000, and 30,000 unbound pamphlets. Value of libraries, \$15,000. Total receipts for the current year, \$15,200. Total expenditures for the current year, \$14,000. Rates of tuition per annum, \$27 academy; \$32 college. Average total annual expense per student, \$175.

HISTORY.—Fairmount College is a child of the same spirit which, in the early days of the New England colonists, founded Harvard and Yale. In a measure, also, its establishment grew out of the magnificent schemes and sanguine expectations of the early builders of Wichita. It was during the now famous Wichita "boom" that the Rev. J. H. Parker, in conjunction with a number of leading spirits of the city, planned to place a collegiate institution on the most commanding and attractive elevation overlooking the valley of the Arkansas. The project was drawn on a grand scale. Contributions were freely given. These large donations, chiefly in land, were considered more than sufficient to erect a number of splendid buildings, but before the main structure had been completed, the great business depression which swept the West at that time had wiped out all land values. In 1892, chiefly through the efforts of H. A. Clifford, the exterior of the main structure was finally completed, and a number of rooms prepared for occupation. In the fall of that year, Rev. R. M. Tunnell was chosen principal; in October, 1894, he was succeeded by W. H. Isely.

It was originally designed that Fairmount should be a school for women only, but in the final plan both sexes were included. During the years 1892 to 1894, the curriculum of the school comprised only a four-year academic course of study. Wichita was already well supplied with an excellent high school, and several academies under denominational control. Also, at that time there was no institution of collegiate rank in the city. Hence, in 1894 the trustees of Fairmount arrived at the positive conclusion that the institution, in order to have a legitimate basis for continuance, must be advanced to college rank.

In July, 1895, Rev. N. J. Morrison, founder of Drury College, at Springfield, Mo., visited the field, and on the invitation of the board of trustees accepted the presidency of Fairmount College. The Congregational Education Society, with headquarters at Boston, under whose care the institution had been fostered, now aided the college in a very liberal manner. June, 1899, the first collegiate graduating class, consisting of nine members, were granted diplomas.

The purpose of the promoters of Fairmount was to establish in the West a Christian educational institution—an institution that should be to the West what Dartmouth, Amherst, Williams and Brown have been to the East. To this end President Morrison has gathered at Fairmount a corps of instructors of acknowledged excellence in scholarship. The college curriculum is drawn and administered in accordance with the best American school ideals, and comprises a four-year course in the academic and four years in the collegiate department. Libraries and laboratories being absolute essentials to modern school work, strenuous effort has been expended in securing both. The college library now comprises nearly 23,000 bound volumes, being one of the best and largest libraries in

the state of Kansas. The president and board of trustees also began a vigorous canvass for endowment funds. In 1897 Dr. D. K. Pearsons, the generous college philanthropist, of Chicago, made the college a provisional offer of \$25,000. Through this offer the college has secured donations and pledges for endowment purposes to the amount of \$125,000.

Ten years ago Fairmount first opened her doors as an academy; seven years ago as an institution of collegiate rank. It is thus seen that the enterprise is in its early infancy. The present faculty numbers twenty-two instructors. Next June the institution will graduate sixteen to twenty students from the collegiate department, and twenty-two to twenty-five from the academic department. The securing of the endowment, and the extension and strengthening of the various departments which will naturally follow, promise to make Fairmount College an enduring and potent factor in the educational life of Kansas.

FRIENDS UNIVERSITY.

EDMUND STANLEY, President.

Wichita, Kan. Founded, 1898. Under auspices of the Friends church. Number of professors, 9. Number of other teachers, 6. Number of departments, 5. Total enrolment last year, 209. Number of graduates last commencement: 9 collegiate, 9 normal. Total number of graduates since organization of institution: 14 collegiate, 16 normal. Land owned by institution, about 600 city lots, exclusive of 15-acre campus. Value of buildings, \$215,000. Amount of endowment fund, about \$50,000. Number of volumes in libraries, about 3000. Rates of tuition per annum: \$40 collegiate, \$28 preparatory. Average total annual expense per student, about \$160.

HISTORY.—The opening of Friends University, in the spring of 1898, was made possible through the liberality and educational interest of James M. Davis and wife, of St. Louis, Mo. These Friends, having purchased the Garfield Memorial University, presented the property to the Kansas yearly meeting of Friends for the founding of an institution of higher learning. A board of directors was at once appointed and the organization of Friends University was begun. It became at once the cherished object of its founders and promoters to build up an institution which should fulfil the broad mission of the university. The growth of the institution has been gratifying to its founders. Full lines of college work have been developed, and the annual enrolment for the past two years has exceeded 200 students. The departments of the institution embrace the schools of liberal arts, music, biblical literature, and education. The past have been the pioneer years for Friends University. Her property consists of a magnificent main building and two dormitory buildings, together with valuable city building lots. To this the Friends are contributing in liberal amounts to a growing endowment fund. The institution is free of any indebtedness, and thus enjoys an outlook of future prosperity and usefulness that is encouraging.

Friends University is dedicated to the Christian religion no less than to higher learning. An educational institution needs the support of morality and religion as much as does the state itself, or even a single family. A vital and pervasive religious influence is excited by a close alliance with some religious organization. In this respect the Society of Friends exercises a control over the affairs of the school. A religious faculty and the influences of a Christian community are the forces which are brought to bear upon the life of every student in this university. No sectarianism prevails.

HIGHLAND UNIVERSITY.

AMOS A. DAVIS, President.

Location, Highland, Doniphan county, Kansas. Founded, 1857. Under auspices of the Presbyterian church. Number of professors, 4. Number of other teachers, 8. Number of lecturers, 2. Number of departments, 2. Total enrolment last year, 58. Number of graduates last commencement; 3. Total number of graduates since organization, 82. Land owned by institution, 10 acres. Amount of endowment fund, \$40,000. Number of volumes in libraries, about 1500. Total receipts for the current year, \$2500. Total expenditures for the current year, about \$2500. Rates of tuition per annum, \$25. Average total annual expense per student, \$150.

HISTORY.—Highland University enjoys the distinction of being the oldest chartered educational institution in the state. The birth of the institution was in a log cabin in Highland, in May, 1857. In the autumn of the same year it came under the care of Highland presbytery, with a board of nine trustees, under the title of "Highland Presbyterial Academy." It continued thus until 1870, when it enlarged its scope and became a full-fledged college. It has continued to do both academic and collegiate work down to the present time. The work of the academy is therefore now in its forty-fifth year, while that of the college is in its thirty-second year. The ground on which the college stands, like that of the county in which it is situated, is of special historical interest, because of the fact that it was once the home of the Iowa and Sac tribes, among whom missionary labors were begun as early as 1837. This work was continued until 1863, when it was abandoned because so many of the Indians had either died or had been removed by treaty with the United States government to the reservation at the mouth of the Nemaha, in Nebraska. One important feature of the work among the Indians was that of education, begun in 1846, when the old "mission building," a substantial brick structure, was erected for school purposes. Beside the instruction given in the common-school branches, much was made of industrial work—the girls being taught how to cook and sew, and the boys receiving instruction in farming. Here, as elsewhere, commerce and immigration followed the missionary, and a number of white settlers made their home in Doniphan county. Those who had labored for the Indians, now that the Indians had gone, decided to found a school for the children of the white settlers, and, being a pioneer school, it was intended to draw students from a wide territory. So this school was incorporated and received a charter under the name of Highland University.

That the institution was of more than local interest, the personnel of the first board of trustees will witness: Hon. Walter Lowrie, of New York; C. Van Rensselaer, of Philadelphia; John Bayless, of the state of New York; and Rev. J. Campbell, Judge E. M. Hubbard, Rev. C. Graham, Elder C. B. Campbell, Rev. G. S. Rice, and Rev. S. M. Irwin, all of Kansas territory. This board accepted an offer of four blocks and forty-eight additional lots from the town of Highland, and decided to erect buildings at once. The building now standing is only the east wing of the projected building. The corner-stone of this building was laid in 1858. About 1870 the building known as the "boarding hall" was erected, the lumber having been shipped by steamboat from St. Joseph. Another building, known as the "square house," was erected in 1872. The foundation for a new building, designed as a dormitory for young ladies and a music hall, was laid in 1893.

The great turning-point in the financial history of the institution was in 1879, when the trustees, after a number of years of adversity, laid the matter before

the citizens of Highland in a public meeting, asking for funds to free it from debt, which then amounted to \$18,000. This amount was raised at that time and the institution freed from debt. About five years later a movement was begun toward procuring an endowment. On commencement day, 1885, Hon. J. P. Johnson promised \$10,000 if the citizens of Highland and vicinity would give a like amount. The entire sum was raised during the summer. Five years later Mr. Johnson offered to double his gift if the citizens would do the same. This was done, and the endowment fund now amounts to over \$40,000.

Highland University has sent forth eighty-two graduates—thirty-five young ladies and forty-seven young men. Because of numerous other colleges and academies now established in territory once exclusively her own, Highland University will probably never become a large institution. But she aims at thorough work and broad Christian manhood and womanhood among her students.

KANSAS CHRISTIAN COLLEGE.

O. B. WHITAKER, President.

Lincoln, Kan. Founded, 1882. Under auspices of the Christian church. Number of professors, 5. Number of other teachers, 4. Number of departments, 5. Number of graduates last commencement, 1. Total number of graduates since organization, 28. Land owned by institution, 10½ acres. Value of buildings, \$12,000. Value of apparatus, \$100. Amount of endowment fund, \$4000. Number of volumes in libraries, 3000. Value of libraries, \$3000. Rates of tuition per annum, \$30. Average total annual expense per student, \$115.

HISTORY.—The Kansas Christian College was established in 1882 by the Kansas State Christian conference, acting for the Christian church of Kansas. Since that time it has completed a substantial stone building of twenty rooms, accumulated a library of 3000 volumes, cleared itself of all indebtedness, and secured a considerable endowment. Its curriculum embraces the following courses of study, from each of which it has sent forth a number of graduates: Preparatory, commercial, music, normal, scientific, and classical. With few exceptions each year has been its most prosperous, and its present year is the most prosperous in its existence. Its first president was Rev. Thos. Bartlett, who served in that capacity for seven years, and until his death. The second president was Rev. E. Cameron, who served in that capacity for four years; and its third president and present incumbent is Dr. O. B. Whitaker, who is serving his tenth year.

KANSAS CITY BAPTIST THEOLOGICAL SEMINARY.

JAMES F. WELLS, Acting President.

Kansas City, Kan. Founded August, 1901. Under auspices of the Baptist denomination. Number of professors, 4. Land owned by institution, 115 acres, to be used for endowment purposes. Value of building, \$40,000. Number of volumes in libraries, 600. Total receipts for the current year, \$4000. Average total annual expense per student, \$125.

HISTORY.—The Kansas City Baptist Theological Seminary was chartered in September, 1901. It commenced work October 21, 1902. There are four professors and twelve students. With the exception of a newly organized seminary in Texas, this is the only Baptist seminary west of Chicago. There are 115 acres of land, two and one-half miles west of Kansas City, Kan., toward an endowment. Its value is now \$35,000. The school is twenty minutes' ride from the union depot. The site covers two acres, on a high eminence overlooking the two Kansas Citys. The buildings and site are worth \$40,000.

HIGH SCHOOL. Howard, Elk county.

McPHERSON COLLEGE. McPherson. Main Building and Dormitory. See page 116.

KANSAS CITY UNIVERSITY.

D. S. STEPHENS, President.

Kansas City, Kan. Founded, 1896. Under auspices of the Methodist Protestant church. Number of professors: Literary department, 8; college physicians and surgeons, 33; Hahneman Medical College, 36. Number of departments, 9. Total enrolment last year, 327. Number of graduates last commencement: Literary, 5; medical, 40. Land owned by institution, approximate value, \$150,000. Value of buildings: College buildings, \$30,000; residence properties, \$25,000. Value of apparatus and museum, \$2000. Number of volumes in libraries, about 2000. Value of libraries, \$1000. Rates of tuition per annum: College, \$36; academy, \$30. Average total annual expense per student, \$150.

HISTORY.—This institution owes its existence largely to the consummation of the life purpose of an esteemed member of the Congregational church, Dr. Samuel Fielding Mather, a descendant of Cotton Mather. Doctor Mather, early in life, formed the purpose to bequeath his estate to the establishment of an institution of learning, if he should be favored by fortune sufficiently to enable him to do so. About one year before his death he made a proposition to a board of trustees appointed by the general conference of the Methodist Protestant church to convey to this board certain valuable tracts of land in the suburbs of Kansas City, Kan., provided a building or buildings for educational purposes should be erected before October 15, 1896, costing not less than \$25,000. This offer was accepted on the last day of May, 1895, and a few hours after its acceptance Doctor Mather, who had been in ill health for some time, passed away in death, at the age of eighty-four years. It would seem as though he lingered in this life just long enough to be sure that his cherished purpose would be realized. When Doctor Mather's will was opened, it was found that the residue of his estate was left to the contemplated institution of learning, provided its trustees fulfilled their part of the agreement. This the board of trustees proceeded to do, and on the 23d of September, 1896, the building known as Mather hall was opened for the work of the ensuing college year. The business affairs of the university are in the hands of twenty-four trustees, twelve of whom are elected quadrennially for the term of eight years by the general conference of the Methodist Protestant church. The invested funds of the university are in the care of an endowment board of sixteen persons, who are elected to this trust by the university trustees. A recent inventory of the property belonging to the university, by a careful and conservative committee, resulted in an appraisal of \$214,428.50, which may be accepted as giving very accurately its present value. Much of this property produces but little income, and while undoubtedly some day it will be of great assistance to the support of the university, at present but little help is derived from it.

The present plan of the buildings comprises six structures. Mather hall, a building 120 feet front, is the only one so far erected. It is provided with a number of well-lighted and ventilated recitation and lecture rooms, and is admirably adapted to its intended use. It cost about \$30,000. It is expected that other buildings will follow as rapidly as means permit and necessity requires. These six buildings, when completed, will comprise two dormitories, a laboratory building, a library and reading-room, a large auditorium, and the main building now in use, containing lecture-rooms, assembly-rooms, etc.

Mr. H. J. Heinz, of Pittsburgh, Pa., president of the university board of trustees, has contributed \$10,000 toward the erection of the south dormitory, which will be known as Heinz Memorial hall, in commemoration of Mrs. S. S. Heinz, the deceased wife of Mr. Heinz. In addition to this contribution, Mr. Heinz has in various ways contributed largely to the success of the enterprise, and next to Doctor Mather is the largest donor to the university.

KANSAS WESLEYAN UNIVERSITY.

W. F. HOYT, President.

Salina, Kan. Founded, 1885. Under auspices of Methodist Episcopal church. Number of professors, 20. Number of other teachers, 8. Number of lecturers, 2. Number of departments, 8. Total enrolment last year, 985. Number of graduates last commencement, 10. Total number of graduates since organization, 134. Land owned by institution, 100 acres. Value of buildings, \$2500. Value of apparatus, \$2000. Number of volumes in libraries; 3000 bound, 5000 in all. Value of libraries, \$7000. Total receipts for the current year, \$6000. Total expenditures for the current year, \$6000. Rates of tuition per annum, \$35. Average total annual expense per student, \$90 to \$150.

HISTORY.—At the first session of the Northwest Kansas conference of the Methodist Episcopal church, held at Beloit, in March, 1883, the question of establishing an institution of learning was referred to a special committee. This committee, reported recommending the founding of a college and the appointment of a board of trustees consisting of nine persons, including J. H. Lockwood, R. A. Caruthers, H. H. Sudendorf, and Martin Mohler, which body was empowered to secure a charter and entertain proposals for the location of the institution. S. S. Goodwin, C. E. Sweet, A. N. See, H. G. Breed and M. M. Stolz were added to the board by the committee on education. This body of trustees, thus constituted, at once addressed itself to the preliminary work of securing a location and charter. Meanwhile the Southwest Kansas conference had likewise taken favorable action on the establishment of a similar institution. There were some efforts made to unite the two conferences in founding one college to be centrally located in the western part of the state, and to receive the joint support of the two controlling conferences. These negotiations were unavailing however, the Southwest conference establishing its own institution.

The committee on location from the Northwest Kansas conference then began to consider propositions for the establishment of a college within its bounds. The city of Salina proposed to give fifteen acres of land and a building to cost \$26,000, on condition that the conference sustain a school of full collegiate grade and endow it with a sum equal to the cost of the building, within two years from the opening. This generous offer was accepted, and in December, 1885, a liberal charter was secured and the board of trustees incorporated under the laws of the state. The citizens of Salina, in order to carry out their part of the contract, organized what was known as the Kansas Wesleyan University Aid Association, consisting of A. M. Claffin, T. H. Davis, C. Eberhart, H. H. Sudendorf, D. D. Campbell, and Henry Baker. This association secured the ground, erected a suitable building, and transferred the property free from all encumbrances, together with 350 town lots, to the trustees of the university. The proceeds of the sales of the lots are to be used exclusively as an endowment fund.

The corner-stone was laid early in 1886, by Rev. J. H. Lockwood, assisted by the executive committee. In the following March, the building was dedicated by Bishop Andrews, assisted by Rev. Dr. Bennett, of Garrett Biblical Institute, and Doctor Gray, of the Freedman's Aid Society. The doors of the Kansas Wesleyan University were thrown open for the admission of students September 15, 1886. One hundred and twenty-one enrolled the first year. The faculty for that year consisted of W. F. Swahlen, acting president, and professor of Latin and German; Aaron Schuyler, professor of mathematics and astronomy; W. H. Sweet, professor of ethics and metaphysics; A. C. Hillman, dean of normal department; T. W. Cowgill, professor of Greek; D. McGurk, department of elocution; Miss B. Swearingen, department of art; A. B. Gates, department of penmanship;

Miss Clida H. Green, department of music. H. M. Mayo was the first graduate, in 1887.

The following persons have served as presidents and acting presidents: W. F. Swahlen, 1886-'87; Aaron Schuyler, 1887-'94; Edward Mueller, 1894-'96; George J. Hagerty, 1896-'99; M. E. Phillips, 1899-1901; Anson Gridley, acting president 1901-'02; W. F. Hoyt, acting president 1902-'03. Aaron Schuyler, the Nestor of the present faculty, has been connected with the university since its inception, and has given the university the luster of his achievements as an educator and author.

The assets of the university now amount to about \$100,000, including 100 acres adjoining the campus. The university occupies three large, commodious buildings, beside the observatory, which was dedicated at the commencement exercises in June, 1902. The commercial department has grown from a handful of pupils to a business college, enrolling 600 pupils and employing 11 teachers. The department of music is second to none in the state. The department of elocution and oratory is now on a sound basis, and is in the hands of an efficient director. The entire enrolment for the year 1901-'02 was 985 in all departments.

LANE UNIVERSITY.

P. O. BONEBRAKE, President.

Lecompton, Kan. Founded, 1865. Under auspices of the United Brethren church. Number of professors, 7. Number of other teachers, 1. Number of departments, 4. Total enrolment last year, 136. Number of graduates last commencement, 6. Total number of graduates since organization, 94. Land owned by institution, 15 acres. Value of buildings, \$25,000. Value of apparatus, \$2000. Number of volumes in libraries, 700. Rates of tuition per annum, \$30. Average total annual expense per student, \$120.

HISTORY.—As early as 1854 the United Brethren people began to organize churches in Kansas. Considerable interest was manifested in higher education among the early settlers. The United Brethren began to plan for a college as early as 1864. In January, 1865, Lane University was founded, at Lecompton, with Rev. Solomon Weaver as president. The institution was named in honor of Gen. James H. Lane, who was to endow the college as a consideration for the name, but he died before anything was accomplished in the way of securing an endowment.

There was a large three-story stone building erected in Lecompton while it was the capital city of the territory. This building was intended for a hotel upon a large plan, but the stockholders were largely proslavery in sentiment, and the people, soon after the hotel opened for business, elected an antislavery legislature. This resulted in the failure here of the hotel business operated by proslavery men. After the capital was removed from Lecompton to Topeka this hotel building became undesirable property in the hands of its owners, and the Lane University corporation bought the building and conducted college work therein for eighteen years. The college officials secured the state-house grounds, upon which the foundation of a capitol building had been laid, and in 1881-'82 erected a college building upon the south half of the capitol foundation. Lane University has an unbroken record of thirty-six years of educational work, belongs to the College Association of Kansas, and is growing in favor in the educational world.

M'PHERSON COLLEGE.

E. FRANTZ, President.

McPherson, Kan. Founded, 1887. Under auspices of the German Baptist (Brethren). Number of professors, 12. Number of other teachers, 12. Number of departments, 10. Total enrolment last year, 400. Number of graduates last commencement: Collegiate, 6; normal, 12. Total number of graduates since organization: Collegiate, 15; normal, 47. Land owned by institution, 10 acres. Value of buildings, \$65,000. Value of apparatus, \$1000. Amount of endowment fund, \$6000. Number of volumes in library, 1500. Value of libraries, \$1000. Rates of tuition per annum, \$38.

HISTORY.—The organization of McPherson College was the result of a growing educational movement in the German Baptist (Dunkard) church, which recognized the need of such an institution west of the Mississippi. A committee appointed at the general conference held at Ottawa, in June, 1887, located and organized the McPherson College and Industrial Institute Association, and a committee appointed by the citizens of McPherson organized the McPherson College Building Association. The function of the latter was to build and equip college buildings, to be turned over to the former association, which was to conduct a college in the same. The officers of the former association were M. M. Eshleman, president; G. G. Lehmer, secretary; Geo. E. Studebaker, business manager; of the latter, F. B. Webster, president, and A. Bass, secretary and treasurer. In the fall of 1888 the dormitory had been completed, and September 5 the first session opened, with S. Z. Sharp as president. Two hundred and one students were enrolled during the year.

By June 17, 1889, the McPherson College Building Association had completed and furnished the dormitory and laid the foundation for the main building, had passed between \$80,000 and \$100,000 through its treasury, had assets to the amount of about \$34,000, and liabilities amounting to over \$20,000. At that time the McPherson College and Industrial Institute Association was dissolved, and Daniel Vaniman, A. W. Vaniman and J. H. Peck became the directors of the McPherson College Building Association, assumed all liabilities of both associations, and attempted the conduct and development of the college; at first successfully, but when, in 1893-'95, the financial crisis came, the attendance was reduced from 300, in 1892-'93, to less than 200, in 1894-'95, and less in 1895-'96. In order to put the college upon a self-supporting basis, the trustees now leased the buildings for five years to five members of the faculty, namely, C. E. Arnold, S. B. Fahnestock, H. J. Harnly, E. Frantz, and A. C. Wieand, who elected C. E. Arnold, president. On February 12, 1898, McPherson College Building Association was reorganized, and named McPherson College. Under the management of the lessees and the new board of directors, all debts of the college were paid, about \$10,000 worth of improvements made, and the annual enrolment increased to 400. In June, 1902, Pres. C. E. Arnold died, and E. Frantz was elected president. The present board of directors consists of E. Frantz, president; S. B. Fahnestock, vice-president; H. J. Harnly, secretary. F. A. Vaniman, treasurer; J. J. Yoder. The college is under the business management of S. B. Fahnestock and H. J. Harnly. The new charter provides for the perpetuation of the board of trustees by giving one voting certificate for each \$100 donated to the college. The members of the board of trustees must be members of the German Baptist (Dunkard) church in good standing. No encumbrance can be placed upon block A, a campus of ten acres, on which the college buildings are located.

McPherson College maintains collegiate, normal, oratorical, Bible and com-

mercial departments. In its faculty are represented Chicago University, Illinois Wesleyan University, Harvard University, Kansas State University, etc. In 1889 the first normal class, of two, was graduated. J. Z. Gilbert, 1894, was the first collegiate graduate. In 1902 the degrees conferred were A. M., two; A. B., four; B. S. D., twelve.

MIDLAND COLLEGE.

JACOB A. GLUTZ, President.

Atchison, Kan. Founded, 1887. Under auspices of the Lutheran general synod. Number of professors, 6. Number of other teachers, 9. Number of lecturers, 3. Number of departments, 5. Total enrolment last year, 160. Number of graduates last commencement, 10. Total number of graduates since organization of institution, 70. Land owned by institution, campus of 20 acres and a farm of 103 acres. Value of buildings, \$45,000. Value of apparatus, \$5000. Amount of endowment fund, \$25,000. Number of volumes in libraries, 6000. Value of libraries, \$5000. Total receipts for the current year, \$14,752.35. Total expenditures for the current year, \$14,526.43. Rates of tuition per annum: Collegiate department, \$40; preparatory, \$30. Average total annual expense per student, \$175 to \$225.

HISTORY.—Midland College is located at Atchison. It was founded in 1887 by the board of education of the general synod of the Evangelical Lutheran church. For some years before this the Lutheran pastors and people connected with the general synod had been feeling the need of a college of their own in which to educate their young people, and especially for the training of suitable young men for the ministry. On several occasions they had sent memorials to the general synod at its biennial meetings asking for the establishment of such an institution at some point west of the Missouri river. This agitation finally bore fruit at the meeting of the general synod held in Omaha, Neb., in May, 1887, when the board of education was definitely instructed to found a college at some suitable place. As soon as this fact was announced a number of cities in Nebraska and Kansas communicated with the board, offering various inducements to secure the institution. Among these, the offer made by the city of Atchison was regarded as the most advantageous. It included a campus of twenty acres, beautifully located in the southern part of the city, and \$50,000 in cash for buildings. The land syndicate which donated the campus subsequently added five acres in town lots. A corps of teachers was engaged, and the college was opened for students in September, 1887. During the first year and a part of the second the work was carried on in a rented building on Kansas avenue, formerly occupied by Mrs. Monroe's private academy. In January, 1879, the school was moved into the new building erected on the campus by the city and now known as Atchison hall. This building cost about \$30,000 and was entirely paid for by the city. Owing to the collapse of the "boom" of 1886-'87, the remaining \$20,000 of the bonus promised by the city was never raised.

This first building is used as a general recitation hall, and also as a dormitory for young men. Since then three additional buildings have been added—a dormitory for young ladies, costing about \$10,000, a gymnasium costing about \$2000, and a small observatory, which has an excellent equatorial telescope having a six inch lens. Midland College has held itself so far strictly to collegiate and preparatory work. Hence the number of students has never been so large as in many other schools, but the work done is recognized in some of the oldest and best professional and postgraduate schools both in the West and in the East.

Midland College has sent out sixty-eight graduates with the bachelor's degree, of whom sixteen have been young women. Besides these, hundreds of other young men and women have taken partial courses.

OTTAWA UNIVERSITY.

J. D. S. Riggs, President.

Ottawa, Kan. Chartered in 1865. Under auspices of the Baptist churches of Kansas. Number of professors, 12. Number of other teachers, 11. Number of departments, 7. Total enrolment last year, 630. Number of graduates last commencement, 20. Total number of graduates since organization, 210. Land owned by institution, 33 acres in campus, about 400 acres besides; value, \$52,000. Value of buildings, \$53,000, when new building is completed. Value of apparatus, \$10,000. Amount of endowment fund, \$100,000. New library just being accumulated. Total receipts for the current year, \$14,790, and gifts amounting to \$28,500. Total expenditures for the current year, \$43,290, including building expenses. Rates of tuition per annum, \$30. Average total annual expense per student, \$150.

HISTORY.—The origin of Ottawa University can be traced to the missionary work done by the Baptist denomination among the Ottawa Indians. This work began while the Ottawas lived in Canada and continued during their migration westward and after their settlement upon their reservation in Kansas. The principal teachers among the Ottawas during the '50's and early '60's were Rev. John Tecumseh Jones, an Indian, educated at Madison University, New York, and his wife, Jane Kelly Jones, a native of Maine. At that time the Ottawas were occupying a reservation about twelve miles square, in Franklin county, Kansas. In October, 1860, Mr. Jones proposed that the white Baptists of Kansas unite with their Indian brethren in founding a school on the Ottawa reservation. The Indians had land which might serve as a basis for endowment. The whites had money and teachers. A committee was appointed to confer with the Ottawas, who were found favorable to the proposition.

The first meeting of the trustees, consisting of four Indians and two white men, was held August 20, 1862, and for some years a school exclusively for the Indians was carried on and quite a number of the children of the Ottawas attended it. In 1865 a charter was obtained for Ottawa University, and for several years a school was carried on under the dual management. For a variety of reasons, however, the arrangement was unsatisfactory to both races, and a division of interests was finally agreed upon, the Indians withdrawing from the organization. In this adjustment it was agreed that the board of trustees should be increased from six to twenty-four; that the 640 acres retained by the university should forever be devoted to the purposes of education at Ottawa under the auspices of the Baptists of Kansas; that it should never be encumbered by mortgage, and that the proceeds from the sale of any part should be used as an endowment. The history of the present institution properly begins with this settlement of equities.

The progress of the university, after the final settlement with the Indians, forms a pleasing record. The first collegiate class, of one member, was graduated in 1886. Since that time the university has had five presidents, a fact which materially hindered its growth. In spite of this, however, substantial progress has been made, which may be summarized as follows: Under Pres. M. L. Ward, (1883-'87), and Acting Pres. George Sutherland (1887-'90), the college section of land was platted and nearly half of it sold, realizing \$40,000 as the beginning of a productive endowment. Under Pres. Franklin Johnson (1890-'92), the north wing of a new college building and a dormitory for young women were erected, and about \$30,000 added to the endowment. Under Pres. F. W. Colegrove (1892-'96), the curriculum was improved, the faculty enlarged, the attendance increased, and a gymnasium built. The most substantial progress

has been made during the present administration (1893—), because of its character of permanency and of the impetus given by the preceding administrations. The curricula have been further improved, four new departments have been organized, the faculty enlarged and greatly strengthened, the gymnasium and cottage finished and fully equipped, city water and sewerage connections made, the attendance steadily increased, and a large sum added to the endowment. When the subscriptions are paid in, this additional sum will amount to \$40,000. The beautiful central part of the main building, 70 by 100 feet in dimensions, was constructed in 1902, and was furnished and ready for use in September. On the morning of the opening day, a disastrous fire swept away the whole of the main building, with chapel, offices, class rooms, study rooms, society halls, library, and all the furniture and equipment these rooms contained. The college year was opened, however, with an increased enrolment, and the work of the institution went on without a break. A new building is now in process of erection, and it will be larger and much more conveniently arranged than the one destroyed. It is confidently expected that this building will be ready for occupancy in September, 1903.

This university occupies a large place in the interest of its friends and patrons. All the members of the faculty are enthusiastic teachers, and masters in their several departments. Ottawa University is evidently destined to perform an increasingly extended and beneficent service for the youth of Kansas in the years to come.

SOULE COLLEGE.

E. H. VAUGHAN, President.

Dodge City, Kan. Founded in 1894. Under auspices of the Methodist Episcopal church. Number of professors, 8. Number of departments, 7. Land owned by institution, 640 acres. Value of buildings, \$100,000. Value of apparatus, \$600. Amount of endowment fund, \$25,000. Number of volumes in libraries, 1200. Value of libraries, \$1000. Rates of tuition per annum, \$30. Average total annual expense per student, \$125.

HISTORY.—Soule College, located at Dodge City, was erected in 1888, by Hon. Asa T. Soule, a Presbyterian gentleman, of Rochester, N. Y. He promised to donate it to the Presbyterian church, on certain conditions. The Presbyterian people began the school, and operated it about two years, but did not comply with the conditions imposed, and hence did not get the property. Mr. Soule died, and his heirs donated it to the Methodist Episcopal church, in October, 1893, through the agency and solicitation of Rev. E. H. Vaughan, who was elected president and commissioned to raise money, pay all indebtedness on the property, make the necessary repairs and improvements, and open school, for both ladies and gentlemen, not later than September, 1894. This was during the period of drought in western Kansas, and money could not be raised there. He went East and raised the money necessary, repaired, improved and partly furnished and equipped the property, which was valued at \$50,000, but has now been improved until it is worth about \$100,000. The school opened at the appointed time, with three regular and two special teachers and a small number of students. It has been gradually becoming better established and equipped, and now has the following departments: Preparatory, normal, music, business, collegiate, and postgraduate, with an industrial department being added. All obligations against the property, and all running expenses from the beginning, have been paid, and \$25,000 pledged for endowment.

SOUTHWEST KANSAS COLLEGE.

FRED C. DEMOREST, President.

Winfield, Kan. Founded, 1885. Under auspices of the Methodist Episcopal church. Number of professors, 12. Number of other teachers, 4. Number of lecturers, 3. Number of departments, 7. Total enrolment last year, 297. Number of graduates last commencement: 5 college, 9 academy, 2 normal, 4 music, 2 oratory, 25 business. Land owned by institution, 20 acres. Value of buildings, \$60,000. Value of apparatus, \$3000. Amount of endowment fund, \$5000. Number of volumes in libraries, 3600. Value of libraries, \$3500. Total receipts for the current year, \$8200. Rates of tuition per annum: College, \$37.50; academy and normal, \$30; business, \$39. Average total annual expense per student, \$150.

HISTORY.—The Southwest Kansas College was founded in 1885. At its annual session, March 19-23 of that year, the Southwest Kansas conference of the Methodist Episcopal church decided to build an institution of learning within its boundaries. A committee of seven was appointed to select a suitable location. Among the propositions received by the committee of location was one from the city of Winfield, which was accepted. In the spring of 1886 the foundations of the building were laid and the work pushed vigorously forward. As the college building was not ready for occupancy when the time came for school to open in the fall, the "McDougal hall" in Winfield was rented for that purpose. School opened here on Wednesday morning, September 7, 1886, with an enrolment of forty-three. The next spring arrangements were made for the erection of a woman's dormitory on the college campus. This building was destroyed by fire in 1894. At the beginning of the school year 1887, the college building was completed and occupied by the school. In 1889 the number of the board of trustees was increased from nine to fifteen. In 1901 the charter of the college was changed so that the board of trustees was to consist of twenty-one, with the privilege of increasing it to twenty-five, six of whom were to be elected from the Oklahoma conference. In 1902, in conformity with the new charter, the board of trustees was increased to twenty-one. Already the school has sent forth a body of worthy graduates.

The campus consists of twenty acres of elevated ground. The college building is a four-story structure of modern style. The rooms are large and comfortable. The entire building is heated by steam. The library contains several thousand well-selected volumes. During the last year 273 volumes have been added. The college museum contains collections illustrative of natural history, the industrial arts, anatomy, archæology, ethnology, and the fine arts, arranged in such a way as to render them accessible to students and to visitors. The college is well equipped with chemical, physical and biological laboratories, a stereopticon, excellent chemical apparatus, and a four-inch telescope. Opportunities are provided for practical instruction in physics, chemistry, geology, zoology, botany, and physiology. The physical laboratory is equipped with apparatus for experimental work in dynamics, heat, light, sound, magnetism, and electricity. The chemical laboratory is convenient, well lighted, and commodious. Having about forty cases, it affords superior opportunities for students pursuing individual work in analytic, general and organic chemistry. The biological laboratory is furnished with apparatus sufficient to accommodate thirty students. It is supplied with water-tables, microtome, compound microscopes, and other necessary apparatus.

WASHBURN COLLEGE. Topeka. *See page 123.*
New Astronomical Observatory, 1902.

HIGH SCHOOL. Seneca.
Nemaha county.

ST. MARY'S COLLEGE.

JAMES MCCABE, President.

St. Marys, Kan. Founded, 1849. Chartered, 1869. Under auspices of the Jesuits. Number of professors, 30. Number of departments, 4—classical, commercial, scientific, and musical. Total enrolment last year, 355. Number of graduates last commencement, 18. Total number of graduates since organization, 355. Land owned by institution, 2000 acres. Value of buildings, \$200,000. Value of apparatus, \$5000. Number of volumes in libraries, 15,000. Value of libraries, \$4000. Total receipts for the current year, \$60,000. Total expenditures for the current year, \$65,000. Rates of tuition per annum, \$30. Average total annual expense per student, \$300.

HISTORY.—St. Mary's College, St. Marys, is the development of the school established by the early Jesuit missionaries among the Pottawatomie Indians. As far back as the fall of the year 1839, when the Pottawatomie reservation was situated at Sugar creek, where Centerville, Linn county, now stands, a school was built, and in the beginning of the following year, 1840, classes commenced, and it is on record that the school was well attended till the removal of the Pottawatomies from their reservation on Sugar creek to the new reservation established for them, by the government on the Kansas or Kaw river west of Topeka. On September 27, 1844, took place the first recorded distribution of premiums in the school; and on May 21, 1845, books in the Pottawatomie language, which had been printed in Cincinnati and St. Louis, arrived and were distributed among the Indians.

On June 17, 1846, the government purchased from the Indians their reserve on Sugar creek, and from this time began the movement of the Indians to their new location. Two years were spent by the tribe in their slow and hesitating journey to their new home, during which time the school was suspended. On November 12, 1849, school opened in a building erected on the present site of St. Mary's College, and from that date to the present time there has been no interruption of the work of education. On September 9, 1848, the new mission of St. Mary's was established, on the north bank of the Kansas river at the present site of St. Mary's College, this site having been selected as early as the spring of 1846. It was only during the first years of the school at its new location that its pupils were from the Pottawatomie tribe alone. Boys from other tribes, notably the Miamis and Peorias, were soon numbered among its students. In 1863 the first white boy entered, and for two years remained the sole representative of his race. In 1865 white boys began to attend in numbers, and a few succeeding years marked the change of the student body from the descendants of the red man to the sons of the white man, who was fast supplanting the aborigines in the possession of the land. On December 24, 1869, St. Mary's College was chartered under a general law of the legislature and empowered to confer degrees and academic honors in all the learned professions. From the little log schoolhouse of its infancy at Sugar creek, it has grown to such proportions on the banks of the Kansas river, where it has been permanently established, that to-day there is scarcely a state in the entire Mississippi valley not represented by students within its walls. With the exception of some slight governmental aid in the erection of the first school building at St. Mary's, the college has grown and developed on its own resources alone, such as they have been. It is due to the prudence and energy of those who have guided its destinies that it has become what it is to-day. It has received no gifts or donations of any kind.

It is not the object of the college to train specialists, but to develop all the mental and moral faculties of the students by means of a liberal education. The

student who has successfully passed through the regular college course is prepared to follow any avocation, or master any profession he may afterward choose. The several classes are graded to contain each a certain definite amount of matter on which no other class of the same course will trespass. There are two courses of studies, the classical and commercial. The sciences and music are taught by competent instructors. The buildings are new; the classrooms, study halls, dining-rooms and dormitories are spacious and well ventilated. The college has its own water-works and electric-light plant. Among the recent improvements are a steam laundry, two liberally furnished gymnasiums, and a large natatorium. Libraries and reading-rooms are at the disposal of the boys. The recreation grounds are extensive, and afford every facility for athletic and health-giving exercises. A new and splendidly equipped infirmary has been built for the accommodation of the sick. .

The discipline of St. Mary's is of a high order. Gentlemen and students who have had experience in other noted institutions give ample testimony in proof of the regularity, alacrity and precision of the college discipline. Yet it is such as must necessarily commend itself to every impartial person. It is parental in character—that is, kind and firm. Only such students as those whose excellent character is already known to the faculty, or who present unimpeachable testimonials of good character, are admitted to the college.

ST. JOHN'S LUTHERAN COLLEGE.

A. W. MEYER, President.

Winfield, Kan. Founded September, 1893. Under auspices of the Missouri synod of the English Lutheran church. Number of professors, 4. Number of other teachers, 4. Number of departments, 4. Total enrolment last year, 80. Number of graduates last commencement, 8. Total number of graduates since organization, 65. Value of buildings, \$35,000. Value of apparatus, \$500. Number of volumes in libraries, 1000. Value of libraries, \$500. Total receipts for the current year, \$3800. Total expenditures for the current year, \$3800. Rates of tuition per annum, varies from \$27 to \$39. Average total annual expense per student, \$120.

HISTORY.—The St. John's College, Winfield, was opened in September, 1893, with an enrolment of but ten scholars. The building is a donation of the late Mr. J. P. Baden, who appropriated \$50,000 for college purposes. The present enrolment is about 100, and in the course of these years six have been graduated in the ministerial department, the college being under the auspices of the English Lutheran synod of Missouri. Other courses, such as commercial, normal, elocution, and art, are also provided; students have graduated from all of these except art. The college is now supported partly by tuition and partly by synodical appropriations. There is no debt on the college buildings.

ST. BENEDICT'S COLLEGE.

INNOCENT WOLF, President.

Atchison, Kan. Founded, 1858. Under auspices of the fathers of the Order of St. Benedict. Number of professors, 25. Number of departments, 3. Total enrolment last year, 145. Number of graduates last commencement, 4. Rates of board and tuition per annum, \$200. Tuition for ten months, \$60. Average total annual expense per student, \$250.

WASHBURN COLLEGE.

NORMAN PLASS, President.

Topeka, Kan. Founded, 1865. Under auspices of the Congregational church. Number of professors, 8. Number of other teachers, 17. Number of departments, 4. Total enrolment last year, 328. Number of graduates last commencement, 22. Total number of graduates since organization of institution: 209 from collegiate department; 34 from musical department. Land owned by institution, campus, 160 acres; land and lots adjoining, 50 acres. Value of buildings, \$178,000. Value of apparatus, \$20,000. Amount of endowment fund, \$75,000. Number of volumes in libraries, 10,000. Value of libraries, \$8000. Total receipts for the current year, \$27,835.94. Total expenditures for the current year, \$30,107.60. Rates of tuition per annum, \$40. Average total annual expense per student, \$200.

HISTORY.—As early as the spring of 1857 the General Association of Congregational Ministers and Churches of Kansas began to agitate the question of founding a college to represent the denomination in Kansas. Only two of the men who were active in the beginning of this movement are now living—Harrison Hannahs, of Denver, and Harvey D. Rice, of Topeka. It was not, however, until after the close of the civil war, on February 6, 1865, that the institution was incorporated, under the name of Lincoln College. The first building was erected at the corner of Tenth and Jackson streets, in the city of Topeka. A few years later the college was moved to its present site in the southwestern part of the city. Here it has a campus of 160 acres of undulating land, well shaded by forest-trees. At present the college has seven buildings: Four of stone—Rice hall, the library, the chapel, and the observatory; one of brick—Holbrook hall; and two of wood—Hartford cottage and Whitin hall. These buildings contain upwards of 125 rooms and are valued at \$178,000. The productive endowment of the college is \$75,000, with an additional fund of \$20,000 nearly completed. A new building has been added this year, at a cost, including equipment, of \$56,000. This building will be provided with a very complete equipment for astronomy and physics. The telescope purchased is an eleven and one-half inch equatorial.

The faculty is composed of fourteen men and eleven women, of whom all but two give their entire time to the service of the college. Of the members of the faculty, eight have prepared wholly or in part at the University of Chicago, three at Harvard, three at Yale, three at the University of Michigan, two at the University of Berlin, and others at Johns Hopkins, Amherst, Williams, and Brown. The departments of study in the college at present are philosophy, pedagogy, history and political economy, sociology, English literature, mathematics, chemistry, physics and astronomy, natural history, Latin, Greek, French, German, theism and Christian evidences, biblical literature, and public speaking. Each department is under the direction of an instructor especially fitted for his work, who devotes all his time to the one subject. Closely connected with the college department are three other departments—the academy, the department of music and the department of art. The academy maintains a four-years course, preparing fully for college admission. The department in music also offers courses four years in piano, voice, and violin. This department employs five instructors. The department in art is newly organized, offering work in charcoal, water-colors, and oils.

The growth in the college has been steadily in the line of the college department. During the last fifteen years this department has increased from 30 members to over 150. During the same period the number in the freshmen class has increased from nine to sixty-six. The college has had four presidents: Rev. H. Q. Butterfield, elected in June, 1869, and serving until November, 1870; Rev. Peter McVicar, elected in February, 1871, and serving until June, 1895; Dr. George M. Herriok, elected in June, 1896, and serving until June, 1901; the present incumbent, Rev. Norman Plass, was elected in June, 1902.

WESTERN UNIVERSITY (INDUSTRIAL SCHOOL).

W. T. VERNON, President.

Quindaro, Kan. Founded, as Western University, indefinite; as an industrial school, 1898. Under auspices of the A. M. E. church. Number of professors, 10. Number of lecturers, 4. Number of departments, 4. Total enrolment last year, 103. Number of graduates last commencement, 5. Total number of graduates since organization, 23. Land owned by institution, 130 acres. Value of buildings, \$35,000. Value of apparatus, \$5000. Number of volumes in libraries, 100. Value of libraries, \$250. Total receipts for the current year, \$7000. Total expenditures for the current year, about the same as receipts. Rates of tuition per annum, \$10. Average total annual expense per student, \$100.

HISTORY.—Just before emancipation, a Presbyterian minister, Rev. Edwin Blatchley, founded a school (Freedman University) where Western University now stands. The school was continued for some years, with varying success. It was his dying request that these grounds be made the seat of learning for the children of African descent. After his death, the colored citizens of Quindaro were organized into a board of trustees and the property by legal process was transferred to them. They managed it for some years, with varying success, when it was transferred to the A. M. E. church. The work of the institution then began to take form, Bishops T. M. D. Ward, Jno. M. Brown, Jas. A. Handy and B. T. Tanner laboring to pay off debts, clear titles, and open school. The close of 1896 saw the present incumbent in charge. He had the support of Bishop Tanner. The school had been opened with Dr. F. Jesse Peck and Rev. Wm. Spurlock as presidents, one succeeding the other. They resigned to enter ministerial work, and W. T. Vernon took charge. Since the organization under Bishops Handy and Tanner there has been growth. The present bishop, C. T. Shaffer, has been an earnest advocate of education for the colored people. The university now has a steady growth in numbers, property valuation, and influence.

Possibly nothing ever did more to stimulate the work than this clause from the message of Gov. W. E. Stanley to the legislature of Kansas in session 1898-'99: "One of the most recent movements in the state is the attempt to establish industrial schools at Quindaro for the negro. No race ever emerged from slavery and in so short a time reached such an advanced position in all branches of industrial pursuits as the colored race in America. They have also made great advance in literature and the arts. The one great need of the negro to-day is progress and development in the things fostered and encouraged by industrial education. The fame of Booker T. Washington is national, and his work in the South in connection with his great industrial school for the education of the negro is attracting wide attention. While he has been greatly assisted by private donations, he has also been aided by public appropriations. The school at Quindaro is under the supervision of W. T. Vernon, a gentleman of culture, who is fully devoted to the uplifting of his race. If within the limits of the constitution, I would suggest that the Quindaro movement be given aid and encouragement by the state."

The Bailey bill was passed in the house and senate and signed by the governor. It provided for the deeding to the state of Kansas by the Western University corporation a number of acres of land, and provided that the controlling power should be vested in the state. Increased appropriations have been made, over \$30,000 in all. Stanley hall, named for the governor, is the pride of the negroes of the West. There are also Ward's hall, Handy hall, and Brown hall.

Classics are taught in the following departments: Theological, classical, aca-

demic, normal, subnormal, and musical, under the university corporation. In the state industrial school are taught carpentry, cabinet-making, architectural and mechanical drawing, printing, bookbinding, dressmaking, plain sewing, business course, shorthand, and typewriting. This being an agricultural state, efforts are made to teach scientific farming and to inculcate in the negro a love for the soil. There are, in all departments, ten teachers and four lecturers. Over 100 students were enrolled last year. The students all take industrial work of some kind. The literary work is done in the forenoon by the first section, and the trade (or industrial) work in the afternoon; and the second section does industrial work in the forenoon and literary work in the afternoon. Sectarianism is discountenanced, but attendance upon religious service is compulsory. There is constant supervision and dormitory services for both sexes. There is close supervision of students' conduct on the grounds, in their rooms, in study hall, in dining hall, and at all times. The young negro, only forty years from slavery, with, at times, not the best environment, needs to be directed aright. In the trades he can find employment, which means self-respect, self-control, and competency. There are many who desire to come, but have no means. The negro must become a help, and not a hindrance; he must, for the preservation of our American civilization, rise to the full measure of his duties.

STATE CHARITABLE AND CORRECTIVE INSTITUTIONS.

STATE SCHOOL FOR THE DEAF.

H. C. HAMMOND, Superintendent.

Olathe, Kan. Founded, 1861, at Baldwin, Kan., by P. A. Emery. Taken up by state in 1863. Number of professors, 20. Number of other teachers, 7. Total enrolment last year, 275. Number of graduates last commencement, 6. Total number enrolled since organization, 1005. Land owned by institution, about 200 acres. Value of buildings, \$300,000. Number of volumes in libraries, about 3000. Total expenditures for the current year, \$17,790.28. Tuition free.

HISTORY.—The Kansas School for the Deaf, located at Olathe, in Johnson county, has for its aim the betterment of the condition of the deaf children of this great state. To this end, all deaf children are admitted who are of school age and sound in body and mind.

The branches taught are those pursued in the common schools of our state; but pupils who are unusually proficient are encouraged to take the higher course provided for the deaf by the United States government, and are fitted for entrance to the college located in the District of Columbia. The graduates of that college have taken good positions among their fellow men and have sustained themselves therein with credit. That college is named "Gallaudet," in honor of the founder of schools for the deaf in the United States. Kansas is at present represented there by five students.

Schools for the deaf have, for the last fifty years, been in the front rank in the matter of industrial training. The Kansas school, as far as its means allow, keeps even pace with those in other states. If a trade is a good thing for a man possessed of all his faculties, it is almost indispensable for one who is deprived of one. Shoe- and harness-making, printing, baking, and cabinet making, including wood-turning, are taught at present, and to these may be added domestic science and dressmaking. Mutes all over the country are supporting families by the trades learned at the schools. The demand for bakers has been greater than could be supplied. More trades could be added if facilities were adequate.

The buildings now in use, though they have cost the state quite an outlay in

the aggregate, are not yet entirely equal to the needs, but it is confidently expected that what is lacking will be made up by special appropriation in the near future, and this state will then rank alongside of its neighbors in this line of educational work. As this school is supported by the state, no charge is made for books, tuition, board, or ordinary medical attendance. It behooves all who have deaf children to avail themselves of its advantages, and it would be a worthy deed for any one knowing of an uneducated deaf child to put the superintendent of the school in touch with the parents of such.

The beginning of the Kansas institution for the deaf dates back to the summer of 1861, and the principal actor was P. A. Emery; the place Baldwin. Mr. Emery, who had previously been connected with the Indiana institution, and a man who had lost his hearing, but was still able to converse, was encouraged by the parents of some deaf-mute pupils to start a school in this state; the idea being that it would surely grow into an institution. Like some other enterprises in Kansas, born amid the throes of civil strife, the young school had a hard struggle for a bare existence. Finally it was recognized by the state to the extent of giving it a small appropriation, but this appropriation for the year 1863 was partly in state scrip, which was then at a discount of from twenty-five to thirty-five per cent. The institution was located in Olathe in 1866; meanwhile the school had been kept running in Baldwin and Topeka. Its fortunes were varied, as may be inferred from the fact that, between the foundation of it by Superintendent Emery and 1892, it had no less than eleven superintendents. The list of these names is as follows: P. A. Emery, B. R. Nordyke, Joseph Mount, Thomas Burnsides, Louis Jenkins, Theodore C. Bowles, J. W. Parker, W. H. DeMotte, Geo. L. Wyckoff, H. A. Turton, and S. T. Walker.

The successful operation of an institution of this kind surely depends quite largely upon a tenure of office of sufficient length to insure that well-measured plans may be carried out. The comparison of different tenures of office of the superintendents of this institution will impress this idea very forcibly upon the mind; the most in the way of improvements having been done during those years in which the tenure of office was the longest. The present superintendent is H. C. Hammond, formerly principal of the Chicago day schools for the deaf.

STATE INDUSTRIAL REFORMATORY.

J. S. SIMMONS, Superintendent.

Hutchinson, Kan. Founded August, 1895. Number of officers, 40. Number of teachers, 3. Total enrolment last year, 301. Land owned by institution, 640 acres. Value of buildings, \$426,000. Number of volumes in libraries, 1600. Value of libraries, \$900.

HISTORY.—This is a penal institution, but considerable attention is given to education. It is found that almost all of the inmates are very deficient in education. Out of 182 inmates received the last fiscal year, only one had a high-school education; forty-eight had a fair common-school education, and 117 had a poor common-school education or were illiterate. This is bad enough on its face, but when it is found that, out of 182, seventy-nine are native Kansans, and that, out of seventy-nine native-born Kansans, fifty-nine are in the class of illiterate or poor common-school education, and perhaps half of those who were born in other states lived several years in Kansas, it would seem that a better enforcement of our compulsory-education law would be a benefit. When an inmate is received, if he has a very poor education, he is sent to school two sessions a day; if he is better educated, he is sent only one session a day; and if he has sufficient education, he is put to assisting in the school-room, clerk's office, or store-room.

All inmates must be able to do problems in fractions and have a corresponding advancement in the other branches before they are paroled. This is based on the idea that a good education will enable them to take care of any business that they may drift into, and, while not what it should be, is perhaps as good as it can be made, commencing with pupils as old as they are. If an inmate has this much education when he enters, he is put in what is called the "ethics class," and, under the direction of the principal of the school, discusses current topics, especially those pertaining to citizenship, etc. There is a library of about 1000 volumes, which is used constantly by the inmates.

STATE SCHOOL FOR FEEBLE-MINDED YOUTH.

C. S. NEWLON, Superintendent.

Winfield, Kan. Founded, 1881. Number of teachers, 3. Number of departments, 3. Total enrolment last year, 300. Land owned by institution, 250 acres. Value of buildings, \$140,000. Number of volumes in libraries, 125. Total receipts for the current year, \$54,426. Total expenditures for the current year, \$50,503.54. Tuition free. Average total annual expense per student, \$188.73.

HISTORY.—The Kansas State School for Feeble-minded Youth is located and maintained at Winfield, in Cowley county, in accordance with certain acts of the legislature, the same being compiled in paragraphs 6973 to 6985, General Statutes of 1901. The law provides "that the trustees shall admit into said school all feeble-minded youth who have been residents of the state of Kansas six months and are not over fifteen years of age, and who are incapable of instruction in the common schools." The law creating the Kansas State School for Feeble minded Youth became operative March 8, 1881. The act appropriated \$9890 for the first year and \$6190 for the year following. It also prescribed that the old state university building at Lawrence should be fitted up and receive pupils, which was done, and the first child admitted was Belle, daughter of Major Abbott, from Johnson county, September 7, 1881. The school struggled along, receiving but little encouragement until the legislature of 1885 appropriated \$25,000 to erect a suitable building for the needs of the school; at the same time they relocated it, at Winfield. In March, 1887, the building having been completed, the pupils, forty in number, were transferred from Lawrence to Winfield, the present location. Since that time, land and buildings have been added from time to time, until there is a plant consisting of 250 acres of land, a main building, cottage on the west, custodia on the east, hospital, bakery, laundry, boiler-house and engine-rooms, electric-light plant, two barns, and a pump-house, the whole costing in the aggregate \$200,000. The population of the institution at the present time is 361—feeble-minded children, 300; employees, 61. Inmate males, 161; females, 139.

There are three educational departments—grammar-school, kindergarten, custodial—in which are taught eighty children. An appreciable progress is made in their mental training. While there are not more than five per cent. discharged and sent home capable of caring for themselves, yet the majority learn to read and write, which gives them recreation and occupation. In addition, industrial and domestic pursuits are taught on farm and garden and in the various departments. Much time and attention have been devoted to the educational department. The mental improvement of nervous and backward children depends largely upon the intelligence of the teachers. If they manifest no interest and are without tact, forbearance, and kindness, showing no disposition to develop and expand the sluggish mentality of the children, then you can expect no marked mental improvement, and the teacher simply becomes a "herder," with no higher

ambition than to draw her salary. Fortunately the teachers connected with this institution are to be congratulated for bringing respect and success to their several departments. Taking into consideration the large number of low-vitality children admitted, the general health has been good. Very few, however, live to a greater age than twenty-one, undoubtedly a providential provision. The blighted tree and injured fruit in like manner die early. There are many epileptics and they are given a great deal of outdoor exercise. The medical treatment is also kept up. Some success has attended the efforts—enough to justify a continuation of the treatment. Hard work in the open air prolongs life and keeps down the inherent viciousness. The average age of the children is twelve years and twenty-six days. There are thirteen colored pupils; sixty-one are epileptics, five are blind, and thirty-two cannot feed themselves. There are about ninety-two non-improvable; twenty-seven boys and twenty-five girls can read and write.

Eighty counties in Kansas are represented. Statistics show that there are about 2000 feeble-minded in Kansas. There are on file about 150 applications that cannot be admitted.

OSAWATOMIE STATE HOSPITAL FOR INSANE.

L. L. UHL, Superintendent.

Osawatomie, Kan. Founded, 1863. Total enrolment last year, 1100. Land owned by institution, 324 acres. Value of buildings and land, \$750,000.

HISTORY.—The Osawatomie State Hospital was established by an act of the legislature approved March 2, 1863. The site is one mile north of the city of Osawatomie, Kan. Osawatomie township donated 160 acres of land. Since that time 164.91 acres have been added by purchase, making 324.91 acres. The first building for the care of the insane in Kansas was erected here, and was large enough to admit ten patients. The building was a two-story square frame structure, and is still in a good state of preservation. The institution has grown, until there is now room for 1200 patients, the males and females being about equal in number. About 185 officers and employees are required to take care of these patients; 5560 patients have been admitted since the hospital was established; 1770 have been discharged restored, making about 32 per cent. of recoveries. During the last biennium the per cent. of recoveries was 36. During the history of this institution nine different men have served as superintendent. One of them, Dr. A. H. Knapp, served more than one-half of the time. The hospital now consists of a main building, where are kept the acute cases, both male and female; also two detached buildings, one for 300 chronic male patients, and the other for the same number and class of female patients; also one infirmary building, which is now nearing completion, and which will probably accommodate 100 patients. Here all the people who are bedfast, and all contagious, infectious and surgical cases, will be cared for. Connected with the main building is the administration building, the chapel, the kitchen, sewing-room, shops, powerhouse and electric-light plant, etc. There is a good new laundry building, well equipped with the latest machinery. All the machinery in the shops and the laundry is driven by electricity. Electric flat-irons are used. The total value of the buildings and equipment, together with the land, stock, etc., is about \$750,000. There is a training-school for nurses, with a two-year course of study.

HIGH SCHOOL. Topeka.

TOPEKA STATE HOSPITAL FOR INSANE.

T. C. BIDDLE, Superintendent.

Topeka, Kan. Founded, 1875. Total enrolment last year, 996. Land owned by institution, 180 acres.

HISTORY.—The original act authorizing the erection of an insane asylum at Topeka was enacted in March, 1875. The act provided an appropriation of \$25,000. Since that time the total appropriation for the completion of the hospital and the purchase of additional land has amounted to \$381,594. The general plan of the Topeka hospital comprises a central building devoted to the administration department, in the rear of which are the domestic and mechanical departments, including kitchen, laundry, bakery, boiler-house, and shops. On either side of the administration building are three ward buildings, each three stories high. These separate buildings are connected by one-story corridors; the structures on the west being used for the women's department, and those on the east for the men's department; each building having a capacity for the accommodation of about 110 patients. The detached building consists of six wards, three on either side of the center or administration building. This building is used entirely for the accommodation of males, and has a capacity for 280 beds. The institution as now equipped has a total capacity of 1002 beds.

The farm connected with the hospital consists of 180 acres, about one-third of which is occupied by building sites and the park and exercise grounds for the patients. The remainder is used for gardens, etc.

The service organization of the institution consists of superintendent, three medical assistants, and 140 other officers and employees.

STATE SOLDIERS' ORPHANS' HOME.

E. L. HILLIS, Superintendent.

Atchison, Kan. Founded July 1, 1887. Number of teachers, 4. Number of departments, 4. Total enrolment last year, 100. Land owned by institution, 160 acres. Value of buildings, \$150,000. Number of volumes in libraries, 1200. Value of libraries, \$1000. Total expenditures for the current year, \$32,430.20. Rates of tuition per annum, \$12.50. Average total annual expense per student, \$200.

HISTORY.—There have been admitted to the home since its opening, July 12, 1887, 501 boys and 332 girls, or a total of 833. The classification of the school work is for eight years' work of the ordinary graded school. Two years' work is assigned to each of the four teachers, and promotions are made as often as possible, taking into consideration that about two-thirds of the school population changes each year, by going from the Home to homes in private families. About 100 are admitted to the institution during the year, and about the same number are sent out, either restored to parents or relatives, or sent out under indenture contract until they are eighteen years of age. There is difficulty in classification, arising from the unequal advantages before coming to the Home. Children of ten are in classes with others of five, and it is necessary to do a great deal of personal work with the backward to get them advanced with the others of nearly the same age. The object of the Home is to save boys and girls, and make men and women of them. For this purpose they are kept until they can be recommended to a good family and assurance given that they will not be returned to the Home after sixty days' trial. The institution is in no sense a clearing-house, and the sooner the public understands this the better; neither is it the plan of the management to make a permanent home for its inmates. The proper course is to make it a training school to fit the children for homes, regardless of

the length of time required to keep them in the institution. The state can point with pride to some of the inmates of the Home who have grown up wholly under its fostering care and are ladies fit for any society and worthy of the friendship of any good people.

STATE INDUSTRIAL SCHOOL FOR BOYS.

H. W. CHARLES, Superintendent.

Topeka, Kan. Founded, 1879. Number of teachers, 2. Total enrolment last year, 212. Land owned by institution, 170 acres. Value of buildings and land, \$175,000. Number of volumes in libraries, 850. Value of libraries, \$850. Total expenditures for the current year, \$41,037.30.

HISTORY.—In 1879 the legislature made provision for the erection of a state reform school, to be located on a site to be purchased by Shawnee county within five miles of the capitol building at Topeka. An appropriation of \$35,000 was made for the erection of the buildings. Accordingly the building now known as the "main building" was erected on the site, two and one-half miles northwest of North Topeka. Two years later, June 6, 1881, the school was opened, under the superintendency of J. G. Eckles. In March, 1882, Dr. J. F. Buck was appointed superintendent. He remained in this position for thirteen years and it was through his efforts that the school was organized and placed in the front rank of schools of its kind in the West. The legislature of 1885 made a further appropriation of \$43,000 for the erection of additional buildings, including the two cottages, chapel hall, and engine-house, and for the completion of the heating and sewerage system. Two years later the sum of \$16,000 was appropriated for additional buildings and repairs. For the next ten years no appropriations were made for buildings or improvements, except for the erection of a hospital, for which \$1500 was appropriated in 1889. The legislature of 1897 appropriated \$1800 for the purchase and installation of an electric-light plant, which was completed the year following. In 1899 an appropriation of \$20,000 was made for the erection and equipment of an industrial building, to be used for the various shops and the department of manual training. This was ready for occupancy in the fall of 1901 and proved a valuable addition to the equipment of the school. There are now installed in this building and in daily use the blacksmith and machine shops, shoe shop, harness shop, tailor shop, carpenter shop, and manual-training department.

Since the opening of the school 2242 boys have been received. The number now in school is 212. The time that a pupil is required to remain in school depends upon his conduct; the average time being about fourteen months. When a boy earns his release he is allowed to go to his home, or, if he has no home to go to, one is found for him, where he remains on parole and subject to return to the school for any violation of his parole agreement until such time as the board of charities give him his final discharge. The legislature of 1901 changed the name from "Reform School for Boys" to "Industrial School for Boys."

STATE INDUSTRIAL SCHOOL FOR GIRLS.

JULIA B. PERRY, Superintendent.

Beloit, Kan. Founded, 1889. Number of teachers, 3. Number of departments, 15. Total enrolment last year, 141. Land owned by institution, 164 acres. Value of buildings and land, \$115,500. Number of volumes in libraries, 1176. Value of libraries, \$800. Total receipts for the current year, \$25,731.55. Total expenditures for the current year, \$25,731.55. Average total annual expense per student, \$210.07.

HISTORY.—The Kansas Industrial School for Girls was established by an act of the legislature during the year 1889. It is beautifully situated, one mile north of the city of Beloit, on a tract of land donated to the state by the city of Beloit. At the same time the school was established there was an appropriation of \$25,000 for the erection of the main building. Previous to this time the school had been under the management of the Woman's Christian Temperance Union, and had been maintained by private subscriptions and donations. The first building occupied by the home was a neat nine-roomed cottage, located in the northeast part of the city. The school had need of a more commodious building; hence it was moved to the corner of Main and Bell streets; it remained there until it passed under state control; since that time it has been known as the State Industrial School for Girls. Since the erection of the main building the west cottage was erected, at a cost of \$34,000; the detached hospital, a one-story frame building, was erected, furnished and equipped for \$3500; the engineer and farmer's cottage is a one and one-half-story frame building, erected at a cost of \$1000; the boiler-house and laundry building were completed and equipped for \$10,000. Owing to damages that resulted from fire on the night of November 6, 1900, it became necessary to make an appropriation of \$5000 for repairs needed. The east cottage, a stone structure similar to the west cottage, has been completed and furnished, at an expense of \$25,666.

At the time the Industrial School for Girls came under state control there were fourteen girls enrolled; the number at the present time is 141, this being the largest number in the history of the school. The students in attendance are classified according to proficiency in the work. The course of study shows eight grades, or an equivalent of eight years' work. It is the plan to conform the work and studies, as near as the half-day system will permit, to the course used in advanced city schools of to-day. Physiology and music form a part of the regular course. The teachers have been earnest in their efforts to accomplish the best results possible, and earnest, conscientious effort is being made to lift the industrial school to a higher plane of usefulness. There is a regular musical instructor, whose duties are to teach the rudiments and elementary principles of music in the day schools, as well as to direct the chorus and chapel singing.

SWEDISH EVANGELICAL LUTHERAN ORPHANS' HOME.

A. G. JOHNSON, Superintendent.

Mariadahl, Kan. (post-office, Cleburne, Riley county). Founded, 1880. Under auspices of the Swedish Lutheran Kansas Conference of Augustana Synod. Number of teachers, 1. Total enrolment last year, 39. Land owned by institution, 500 acres. Value of buildings and land, \$18,000. Total receipts for the current year, \$2300. Total expenditures for the current year, \$2250.

HISTORY.—In 1873 the Union Pacific Railroad Company donated 160 acres of land to the Kansas conference for orphans' home purposes. Said land was located at Fremont, McPherson county, Kansas. From 1873 until 1878 very little was done. At the conference in New Gottland, October, 1878, a committee, consisting of the board of directors and John A. Johnson, of Mariadahl, was appointed to secure a good location for the home. The committee reported at the conference at Scandia, September, 1879, that they had found a suitable location in Mariadahl, Pottawatomie county. A farm was bought on the Big Blue river consisting of 280 acres, 126 acres under cultivation, balance pasture and timber. For the farm \$5400 was paid. A good stone dwelling-house, large stone stable, plenty of running water and other conveniences made it a desirable place for an

orphans' home. The home was opened and the first orphans admitted in 1879. It has continued its blessed mission and has had a healthy growth ever since.

The first board of directors of the home consisted of the following: Rev. A. W. Dahlsten, Rev. O. Olson, C. J. Brodeen, J. Rodell, and J. A. Nelson. In January, 1880, the land donated by the Union Pacific Railroad Company was sold for \$2000. March 22, 1880, the home was dedicated. Mr. Gus. Hatterius was superintendent for the home a few months, after which Mr. and Mrs. B. Berg were called as superintendent and matron for the home. They accepted, and moved there in the fall of 1880 and continued their work until March, 1898. In 1888 an addition was built to the dwelling-house, which made it large enough to accommodate thirty-eight or forty children. In 1893, by the will of the late J. A. Johnson, of Mariadahl, the home received \$8000. This paid all the debt of the home. In 1898 Mr. B. Berg resigned as superintendent. The board of directors called Mr. and Mrs. A. G. Johnson as superintendent and matron for the home.

Six months of public school are taught every year at the home. The home now owns 500 acres of land, valued at \$18,000. No debt. Thirty-nine children were at the home last year.

STATE EDUCATIONAL INSTITUTIONS.

THE UNIVERSITY OF KANSAS.

FRANK STRONG, Chancellor.

Lawrence, Kan. Founded, 1864. Under auspices of the state of Kansas. Number of professors and assistant professors, 40. Number of other teachers, 34. Number of lecturers, 6. Seven schools. Total enrolment last year, 1233. Number of graduates last commencement, 199. Total number of graduates since organization, 1977. Land owned, 50 acres in campus and 12 acres in the McCook athletic field. Value of buildings and apparatus, \$1,000,000. Amount of endowment fund, about \$145,000. Number of volumes in libraries, 37,764 bound volumes, 554 periodicals, 158 state newspapers. Value of libraries, estimated at \$75,000. Total receipts for the current year, \$165,000; \$50,000 for new museum, from June, 1902, to June, 1903. Total expenditures for the current year, \$165,000. Rates of tuition per annum, \$10 and \$25 for non-residents of Kansas. Average total annual expense per student, \$133.

HISTORY.—The idea of a state university in Kansas dates from the early days of Kansas territorial government. Each of the constitutions adopted for the territory of Kansas during the period of its memorable struggles provided for the establishment of an institution of higher learning, to be supported by public funds. The last of these, which became, on the admission of Kansas to the Union, the constitution of the state, declares that "provision shall be made by law for the establishment, at some eligible and central point, of a state university, for the promotion of literature and the arts and sciences." By an act of Congress approved January 29, 1861, the day on which Kansas was admitted to statehood, seventy-two sections of land were set apart and reserved for the use and support of a state university. The state accepted the trust, and in 1863 the legislature selected the city of Lawrence as the location for the institution. One year later the legislature passed an act organizing the university and giving to it the name of "The University of Kansas." A charter was immediately drawn up, and the government of the institution was vested in a board of regents, to be appointed by the governor. The board held its first meeting on March 21, 1865, and decided to open a preparatory department as soon as the citizens of Law-

rence should provide rooms for that purpose. This the citizens undertook to do, and by the middle of September, 1866, they were enabled, by the aid of gifts from various individuals and organizations, to erect the building now known as North college.

The first faculty of the university was elected by the board of regents in July, 1866, and on the 12th of September the university was opened to the young men and women of the state. Fifty-five students were admitted to the preparatory department during the first term. For the second year the enrolment was nearly doubled, but there were only two students in the collegiate department. In fact, the work of the institution during the first few years of its existence was almost confined to the preparatory department, and the first class was not graduated until 1873. In 1876 the legislature of the state established a normal department, which, though successful, was discontinued in 1885. In 1889 the preparatory department was abolished and the work left to the high schools of the state. The law school was opened in October, 1878, and the school of pharmacy was established in 1885. A course in engineering was arranged as early as 1873, but remained a part of the collegiate department until 1891, when the school of engineering was organized, and the collegiate department became known as the school of arts. During the same year the departments of music and art were combined to form the school of fine arts. The graduate school was organized in 1896, and in 1899 the preparatory medical course, which had been offered in the collegiate department since 1880, was extended into a regular medical course, constituting the work of the school of medicine.

Rev. R. W. Oliver, the first chancellor of the university, resigned his position after one year of service, and was succeeded by Gen. John Fraser. During the latter's administration the faculty was increased to ten members, the first class was graduated from the collegiate department, and Fraser hall, the main university building, was erected. Upon his resignation in 1874, James Marvin was made chancellor. He remained at the head of the institution for nine years, during which time the faculty was further increased, to nineteen members, the attendance reached 582, and 135 students were graduated. His resignation, in 1883, was followed by the election of Joshua A. Lippincott as his successor. Under the new administration larger legislative appropriations were secured, and Snow hall of natural history was erected. At its close, in 1889, the faculty numbered thirty-two members, and 461 students had been graduated, but the attendance, owing to the discontinuation of the preparatory department had decreased to 505. One year later, Francis H. Snow, who had been a member of the faculty from the beginning, was elected chancellor. During his administration the university enjoyed a wonderful period of growth; the attendance increased to 1200 and the faculty to eighty members. Doctor Snow, on account of failing health, resigned in September, 1901, and Wm. C. Spangler was appointed acting chancellor. He served until 1902, when Frank Strong was elected chancellor of university. Doctor Strong entered upon the duties of the office August 1.

During recent years the legislative appropriations have been more nearly adequate to the needs of the university, and five buildings have been erected, three as the gifts of individuals and two by the generosity of the state. The institution has become a university in fact as well as in name, and has taken a position among the universities of the country which it is hoped, by the munificence of the commonwealth, it may be enabled to maintain. As the head of the public educational system of Kansas, the university endeavors to encourage whatever may contribute to the higher intellectual and moral interests of the state.

THE STATE NORMAL SCHOOL.

J. N. WILKINSON, President.

Emporia, Kan. Founded, 1865. Under auspices of the state of Kansas. Number of professors, 20. Number of other teachers, 24. Total enrolment last year, 2034. Number of graduates last commencement, 152. Total number of graduates since organization, 1700. Land owned by institution, 24 acres. Value of buildings, \$236,000. Value of apparatus, \$12,000. Amount of endowment fund, \$270,000. Number of volumes in libraries, 15,000. Value of libraries, \$28,000. Total receipts for the current year, \$66,700.72. Total expenditures for the current year, \$65,965.37. Average total annual expense per student, \$32.43.

HISTORY.—The State Normal School was located at Emporia soon after the university was located at Lawrence, and by the same legislature.

The school was started with an appropriation of \$1000, February, 1864, for salaries, and the board held its first meeting in December of that year. The city of Emporia furnished the building first used by the school, and L. B. Kellogg was the first president. On February 7, 1866, the governor approved a bill appropriating \$10,000 for the erection of a building, with the proviso that it should be regarded as a loan and should be returned to the state treasury from the first sales of land set apart for the use of the school. A building 40 x 60, two stories and basement, was at once erected on the site selected, at the head of Commercial street. On February 19, 1867, another bill was approved, with similar provisions, which set apart \$9000 for finishing and furnishing said building. In February, 1872, the legislature appropriated \$50,000 for an additional building, on condition that the city of Emporia contribute \$10,000 toward the erection of the same. This condition was promptly met, and a handsome new structure was erected a few feet south of the first building. It was dedicated June 19, 1873, T. Dwight Thacher making the dedicatory address. This beautiful building, along with the older in the rear, was destroyed by fire, resulting from spontaneous combustion of coal, on October 26, 1878. The city of Emporia again came to the rescue, and at an expense of \$1000 immediately fitted up two buildings for class use. The friends of the school rallied to its support, and in March, 1879, the legislature appropriated \$25,000 for a new building, on condition that Emporia and Lyon county should supplement said appropriation with \$20,800 in addition. Though Emporia had already contributed \$12,000 directly to the school, and, in 1870, \$6000 more to erect normal school boarding-houses, the heavy requirement above named, burdensome as it appeared, was met by a unanimous vote of both the city council and the county commissioners. Thus Emporia and Lyon county have paid or yet carry in bonded indebtedness nearly \$40,000, that proper buildings might be provided and the school continued. Additions have since been made, and even the new library, now in course of construction, will not sufficiently alleviate the crowded condition of the main building.

An agitation for more normal schools began in 1869, and has periodically recurred at nearly every session of the legislature. On May 3, 1870, what was known as the Leavenworth Normal School was established. The city furnished a building, and appropriations were regularly made to the school until 1876. It was organized with John Wherrell as president, and in 1874 had about 100 students. A law approved March 1, 1872, appropriated \$2500 for the support of a normal school for colored people in connection with Quindaro University. The school appears to have attracted few students, and interest in it was not sufficient to induce further expenditures for a normal department. The Concordia Normal School was established in 1874, under conditions similar to those under which the Leavenworth school was established. E. F. Robinson was appointed

principal for the first year, and ex-State Supt. H. D. McCarty president at the opening of the second year. The announcement for 1875 showed eighty-six students for the year. The miscellaneous appropriation for 1876 contained a few items to meet some old normal-school accounts at Leavenworth, Concordia, and Emporia, and contained the death-sentence of two of these schools, in the following proviso:

"Provided, That these appropriations to the Leavenworth Normal School, the Concordia Normal School and Emporia Normal School shall be received in full for all claims against the state, and that said schools cease to be maintained at the expense of the state; and that under no circumstances shall the regents of said institutions incur any liability or create any debt beyond this appropriation; and the state shall not be liable for any expense in excess of this appropriation; and that the Leavenworth and Concordia Normal Schools cease to be state institutions."

The inalienable land endowment of the original Kansas State Normal School saved its life at this critical time. With the disappearance of the discouragement of the grasshopper period, the state legislature began again to make appropriations for the support of the school, and in 1886 added the remainder of the salt lands to its endowment. The appropriations of 1887, 1893 and 1901 gave greatly increased building accommodations for the constantly increasing number of students. The growth of the school has been constant, and it is now recognized as the largest state normal school in the country, and is, in point of numbers, not surpassed by any school anywhere devoting itself strictly to the preparation of teachers.

No part of the United States has yet been able to reach the point of requiring that all who draw public funds for teaching shall have special preparation. This ideal has been reached by other countries whose limitations are no greater than are the limitations of the state of Kansas. The Normal School of this state is striving to give such preparation as will lead its graduates to make teaching a life profession, and hopes to secure facilities that will enable all who wish the highest training to receive it here, and that will give a training so excellent as to make all the schools of the state desire to secure professionally trained teachers.

WESTERN BRANCH STATE NORMAL SCHOOL.

J. N. WILKINSON, President; WILLIAM S. PICKEN, Principal.

Hays, Kan. Founded February, 1902. Under auspices of the state of Kansas. Number of teachers, 3. Total enrolment last year, 70. Land owned by institution, 4100 acres, worth \$80,000. Value of buildings, \$3492.39. Value of apparatus, library, etc., \$3507.39. Number of volumes in libraries, 1000. Total expenditures for the year ending June 30, 1902, \$7000. Tuition free to students in normal department.

HISTORY.—Six and one-half sections of land, and the average value of it all not less than twenty dollars an acre—such is the initial financial support of the new school which the state has opened up on the old Fort Hays reservation, adjoining Hays. The reservation was abandoned by the general government and the soldiers were withdrawn in 1889. Neglect and the usual abuse therefrom was the lot of the buildings and land for nearly a dozen years, while local leaders endeavored to get various measures through Congress for the utilization of the land. At one time a bill passed both houses of Congress authorizing the use of the plant for the support of a Kansas home for old soldiers. It passed so late in the session, however, that President Cleveland, then in office, let it die from lack of time to consider it. During the summer of 1899 the reservation was declared open for settlement by a subordinate in the interior department, and before higher powers, stirred to action by the

efforts of Representative Reeder, from that congressional district, could reverse the ruling, almost every quarter-section was squatted upon by eager settlers in search of homes. In March, 1900, the Kansas delegation in Congress succeeded in getting the land and houses set apart for educational purposes by the state of Kansas. Contrary to the usual policy of the national government, the whole grant was made conditional upon the state's perpetual maintenance of the two educational institutions named in the law—a branch of the State Normal School and an experiment station of the State Agricultural College. The state may not convert the land into cash nor part with any portion of it. It must be a permanent support for the two educational agencies.

The state accepted the gift, and early in the session of the legislature of 1901 took measures to make the grant effective. An appropriation of \$12,000 was made for the biennium ending June 30, 1903, for the organization and support of the school. As much of the land was still in the hands of the squatters, the law provided that the appropriation was not to be available until a clear title to all the land was vested in the state. The boards of regents took the matter of title up with the interior department, and, after protracted negotiations, the matter was compromised by granting to such settlers as had gone upon the land in good faith leases, in no case extending more than five years, rent free. These settlers in return gave up to the state all their title to the lands. Parties holding claims but not on the land in good faith were summarily dispossessed by ruling of the interior department. These steps were not finished for nearly a year after the passage of the law. In February, 1902, President Wilkinson, as *ex officio* president of the branch school, began to formulate plans, and the regents of the State Normal School took first steps towards organizing the branch normal by electing as principal Mr. William S. Picken, then associate professor of history and Latin in the State Normal at Emporia, and Miss Anna Keller as assistant teacher. Later Mr. J. E. Crawford was engaged as special teacher for the summer session of 1902, while a short time subsequent Miss Della Sisler was added to the regular faculty as librarian and registrar. Workmen had been put at work remodeling the old fort buildings, and matters pushed so vigorously that quarters were in readiness for the opening of summer term of the school on June 23, 1902. The Ellis county normal institute associated itself with the summer school, and nearly a hundred young people availed themselves of the privileges of the school before the nine-weeks term came to a close. The first regular term of school opened September 2, with a body of earnest students in attendance.

By the terms of the state law, the school offers the first two years of the course at Emporia, and the completion of this course entitles the graduate to a year's state certificate and to admission to the next higher work at Emporia, without examination. The necessary delay in establishing the school left a fine sum of money to be expended in equipment. Nearly all of the \$7000 appropriated for the first year's running expenses thus went for library, apparatus, and furniture. The library is especially well selected and adapted for the use of a normal school, and is thoroughly catalogued. Two commodious buildings are used for the purposes of the school. The main building includes assembly, class, library and laboratory rooms, with cloak-rooms for students, and principal's office. The second building is used for gymnasium and operating laboratory. The room devoted to gymnasium use is amply large for the purpose, and not only provides space for nearly \$500 worth of first-class apparatus, but also makes a place well adapted for the popular game of basket-ball. Several basket-ball teams and one football team have been organized. It is asserted that a higher percentage of the enrolment

STATE AGRICULTURAL COLLEGE. Manhattan. *See pages 57 and 137.*

RURAL SCHOOL. Marshall county.
Deer Creek district.

of this school take athletics than of any other school in the state. This may have some connection with the fact—a most unusual one for a normal school—that the institution enrolls in its regular term enrolment at the start more of the male sex than of the opposite sex. And yet the girls are as devoted enthusiasts over basket-ball as are their brothers over football and heavy gymnastics.

STATE AGRICULTURAL COLLEGE.

E. R. NICHOLS, President.

Manhattan, Kan. Founded February, 1863. Under auspices of the state of Kansas. Number of professors, 25. Number of other teachers, 38. Number of departments, 27. Total enrolment last year, 1396. Number of graduates last commencement, 51. Total number of graduates since organization, 866. Land owned by institution, 323 acres. Value of buildings, \$369,325. Value of apparatus, \$115,383. Amount of endowment fund, \$491,181.36. Number of volumes in libraries, 23,168, and about 20,000 pamphlets. Value of libraries, \$53,625. Total receipts for the current year, \$73,747.35. Total expenditures for the current year, \$73,467.10.

HISTORY.—The bill endowing agricultural colleges was signed by President Lincoln on July 2, 1862, and was entitled "An act donating public lands to the several states and territories which may provide colleges for the benefit of agriculture and the mechanic arts." Section 1 apportions to each state and territory 30,000 acres of public land for each senator and representative in Congress. Section 4 reads, in part, as follows: ". . . for support and maintenance of at least one college, where the leading object shall be, without excluding other scientific and classical studies, and including military tactics, to teach such branches of learning as are related to agriculture and the mechanic arts, . . . in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions in life." The joint resolution of the legislature accepting the grant was approved by Governor Carney February 3, 1863. The land has all been sold, and results in a permanent endowment of about \$500,000. In March, 1887, Congress passed the following bill: "An act to establish agricultural experiment stations in connection with the colleges established under the act of 1862." This act gave to each state and territory \$15,000 annually. A further bill was approved by President Harrison August 30, 1890, the purposes of which are set forth in the title of the bill: "An act to apply a portion of the public lands to a more complete endowment and support of the colleges for the benefit of agriculture and the mechanic arts established under the provisions of an act of Congress approved July 2, 1862." Under this act each college received \$15,000 for the year ending June 30, 1890, and an annual increase of \$1000 over the preceding year.

Early in 1857 an association was formed to build a college in or near Manhattan, to be under the control of the Methodist Episcopal church of Kansas, and to be called Bluemont Central College. The charter was approved February 9, 1858, and provided for the establishment of a classical college, and also contained the following provision: "The said association shall have power and authority to establish, in addition to the literary department of arts and sciences, an agricultural department, with separate professors, to test soils, experiment in the raising of crops, the cultivation of trees, etc."

The leading members of the association were: Rev. Joseph Denison, afterwards president of the college; Isaac T. Goodnow, state superintendent of public instruction, 1862-'66; S. C. Pomeroy, afterwards United States senator. A site of 100 acres two miles northwest of the town was selected, and the title

secured by special act of Congress introduced by Senator Pomeroy. The cornerstone was laid May 10, 1859. The college had a hard struggle, and when the act of July 2, 1862, was passed, and accepted by the legislature, the trustees offered it at once to the state. The offer, consisting of 100 acres of land, a plain three-story stone building, 44x60 feet, several hundred volumes, and some illustrative apparatus, valued at about \$25,000, was accepted. Doctor Denison was president of the college till 1873. At the end of his term there was a preparatory course of two years and four four-year courses—agriculture, mechanic arts, military science, and literary. The last catalogue issued by President Denison lists 202 students and gives a faculty of eight professors and four assistants.

To John A. Anderson, president from 1873-'79, belongs the credit of making the college agricultural and industrial in its tendencies. Three six-year courses of study were adopted—farmer's, mechanic's, and woman's. In 1877 the farmer's and mechanic's courses were united, and that with the woman's course reduced to four years. The enrolment at the close of his term was 207.

Geo. T. Fairchild was president from 1879 to 1897. The farmer's and woman's courses were merged into one course, differing in a few studies and in the industrial work as sex required. The enrolment the last year was 734.

During Thomas E. Will's administration (1897-'99), four courses of study were offered—agriculture, mechanical engineering, general science, and domestic science. A twelve-weeks course in dairying was established, and an apprentice course of forty weeks in the shops and printing-office.

At the beginning of E. R. Nichols's administration (1899), the four long courses of study were thoroughly revised and a course in electrical engineering added. These courses were all made alike the first year, except such differences as sex requires. A term in agriculture was put in the first year, so that each young man might have one term of scientific agriculture before making a selection of a course. A short course in domestic science and a short course in agriculture were introduced. The length of each of these is two terms of twelve weeks, the domestic science being given in the fall term and the agriculture in the winter. The apprentice courses were increased to eighty weeks each, and an apprentice course in dairying added.

The college now owns 323 acres of land, valued at \$29,700; twelve large stone buildings and several smaller buildings and sheds, all valued at \$333,455; equipment, including a library of 43,000 volumes and \$10,000 worth of thoroughbred cattle, valued at \$195,469. The total value of all property, including endowment, is \$1,068,624, toward which the state has paid \$730,507.

FORT HAYS BRANCH EXPERIMENT STATION OF THE STATE AGRICULTURAL COLLEGE.

J. G. HANEY, Superintendent.

Hays, Kan. Founded February, 1901. Under auspices of the board of regents of the State Agricultural College. Land owned by institution, 3700 acres. Value of buildings, \$2000. Value of apparatus, \$500. Total receipts for the current year, \$3000. Total expenditures for the current year, \$3000.

HISTORY.—The Kansas State Agricultural College has come into full possession of and begun work on a part of the abandoned Fort Hays military reservation. The body of the land contains 4000 acres. The Fort Hays reservation is situated 290 miles west of Kansas City, on the Union Pacific "overland route." The reservation embraces 7500 acres, lying along Big creek, in Ellis county. The soldiers were withdrawn in November, 1889, and since then the buildings at the post and the timber along the creek have been subject to the usual neglect and abuse. In March, 1900, a bill passed Congress ceding this land to the state for

the establishment of western branches of the Agricultural College Experiment Station and State Normal School, which was approved in February, 1901. During the summer of 1899 the reservation was erroneously reported open for settlement, and nearly every quarter was squatted on. Some of the filings were even accepted, and homestead papers allowed. The appropriation made by the state for beginning the work was not to be available until a clear title was had to all the land. Some of the squatters recognized their error and relinquished. Others had made some improvements and were given leases of from three to five years.

The boards of regents of the two institutions made a division of the land which gave the Agricultural College all the land along the creek, which runs diagonally through the quarters for four miles. The land slopes gently back from the creek to an elevation of perhaps 200 feet, which gives a great variety of conditions. This location, being typical of the great Western plains, is expected to make a great experiment station. A thousand acres or so will be reserved for pasture and breaking at future times. A large area of alfalfa will be planted, and other areas devoted to trials of various forage-plants that may be adapted to the West. Fifty acres of land are being prepared for planting forest-trees next spring, and undoubtedly a whole quarter-section will later be devoted to this.

The work in seed-breeding and distribution will be in cooperation with the United States Department of Agriculture. They will send next spring, for trial, 100 varieties of the durum wheat, and other grain and grasses in similar amounts. It is expected to make a selection of as large a quantity as possible of the very best heads of wheat from as many fields as possible. Then the best of these will be determined by counting and weighing in the laboratory, and planted as a possible basis of an improved variety of wheat. It is the opinion that in five years a variety may be produced that will increase the yield over the wheat now grown by one to two bushels, which, when sown on the millions of acres now devoted to this crop, will make an appreciable increase in the profits. The work in seed-breeding will be pushed along the line of selection and crossing. By straight selection an improved variety may be put out through station co-operators selected in different localities, in from five to seven years, while by crossing it will take from ten to fifteen years to get a variety into general use that may be an improvement. It is intended to make the work as general as practicable, and the large area that may be devoted to experiments will undoubtedly give it a practical appearance.

The branch station will bear the same relation to the Agricultural College as any of the various departments. It is not expected that any of the national appropriation for the experiment station can be used, as it is already inadequate to the needs at Manhattan. The Fort Hays branch will rely on its own resources and the generosity of the state. The appropriation for the years 1902 and 1903 is but \$3000 per annum, which is hardly sufficient to make even a semblance of beginning. This amount will be put into fencing, opening the land, buying implements, and making as many other foundation improvements as possible. The next legislature will doubtless provide for buildings, necessary stock, and equipments for carrying forward the work in a manner commensurate with the needs of such an institution.

FEDERAL EDUCATIONAL INSTITUTIONS.

HASKELL INSTITUTE.

H. B. PEAIRS, Superintendent.

Lawrence, Kan. Founded, 1884. Under auspices of the general government. Number of professors, 66. Total enrolment last year, 891. Number of graduates last commencement, 40. Total number of graduates since organization, 167. Land owned by institution, 1000 acres. Value of buildings, \$250,000. Number of volumes in libraries, 1200. Total expenditures for the current year, \$152,000. Average total annual expense per student, \$167.

HISTORY.—A short distance south of the historic city of Lawrence is the large Indian training-school which bears the name of the distinguished congressman, D. C. Haskell. Mr. Haskell was chairman of the house committee on Indian affairs when it was decided to establish another Indian training-school, and it was through his influence that Lawrence was chosen as a suitable location for the institution. The location could not be more favorable, as it is a convenient distance to the tribes on the north, south, and west. The citizens of Lawrence donated 280 acres of land to be used as a school farm. More farm land has been purchased by the government at different times, until there are now 1000 acres. The site for the buildings was selected and plans prepared under the supervision of Maj. James M. Haworth, the first superintendent of Indian schools. On July 1, 1884, two dormitories and the school building were completed. In September the school was formally opened, with seventeen pupils. The first superintendent was Dr. James Marvin, formerly chancellor of the Kansas State University, and, afterward, for several years pastor of the First M. E. church in Lawrence. The next superintendent was Col. Arthur Grabowski, of Georgia. He was soon succeeded by ex-Gov. Charles Robinson, who served between one and two years. Col. O. E. Larnard, of the *Lawrence Journal*, was appointed next, but he soon asked to be relieved, as his other business cares were heavy. In October, 1889, Dr. Charles F. Meserve, of Massachusetts, took charge. In March, 1894, he resigned to accept the presidency of Shaw University, Raleigh, N. C. J. A. Swett, who had been assistant superintendent for several years, was promoted to the position of superintendent. He remained until April 1, 1898, when H. B. Peairs, supervisor of Indian schools in this district, succeeded him.

The school is an industrial as well as a literary institution. The pupils, with the exception of those in the normal department, and a few of the older ones who come for the express purpose of learning some particular trade, are in school one-half of the day and work in the industrial departments the other half. The trades taught are sewing, cooking, millinery, laundering, tailoring, carpentry, printing, blacksmithing, harness-making, shoemaking, wagon-making, painting, baking, and engineering. The school is well graded. There are nine regular grades, a kindergarten, and a normal department. Special attention is paid to business methods in the advanced grades, so that the pupils may learn how to care for their money and the leasing and renting of their surplus land. Mechanical drawing, vocal and instrumental music are also taught. An excellent military band of thirty-five pieces is one of the features of the school. There were 805 pupils enrolled at the close of the last quarter. They came from Kansas, Oklahoma, Indian Territory, Colorado, New Mexico, Arizona, Washington, Oregon, Montana, Michigan, Indiana, North Carolina, South Dakota, North Dakota, Wisconsin, Missouri, Idaho, Wyoming, California, and Alaska.

The buildings, fifty in number, are heated by steam and lighted by electricity. The main buildings are substantial stone structures. A handsome new domestic building has just been completed; also, five pretty cottages for employees.

POTTAWATOMIE BOARDING SCHOOL.

THOMAS RICHET, Superintendent.

Nadeau, Kan. Founded, 1872. Under auspices of the United States Civil Service Commission. Number of teachers, 10. Number of departments, 6. Total enrolment last year, 120. Land owned by institution, 360 acres. Value of buildings, \$30,000. Value of apparatus, \$800. Number of volumes in libraries, 200. Value of libraries, \$100. Total receipts for the current year, \$2000. Total expenditures for the current year, \$167,000. Tuition, free to Indians (board and clothing). Average total annual expense per student, \$167.

YOUNG MEN'S CHRISTIAN ASSOCIATIONS, DOING EDUCATIONAL WORK.

YOUNG MEN'S CHRISTIAN ASSOCIATION.

H. W. WIDDOWS, Secretary.

Arkansas City, Kan. Founded, 1887. Under auspices of citizens (board of directors). Number of teachers, 2. Number of departments, 3. Total enrolment last year, 300. Land owned by institution, 4 lots. Value of buildings, \$5000. Value of apparatus, \$700. Number of volumes in libraries, 640. Value of libraries, \$200. Total receipts for the current year, \$1538. Total expenditures for the current year, \$1538. Rates of tuition per annum, \$5. Average total annual expense per student, \$10.

RAILROAD YOUNG MEN'S CHRISTIAN ASSOCIATION.

FRANK L. GERR, General Secretary.

Coffeyville, Kan. Founded, 1902. Number of departments, 3. Land owned by institution, 1 lot; value, \$1000. Value of buildings, \$12,000. Value of apparatus, \$1000. Number of volumes in libraries, 1600. Value of libraries, \$2000. Total receipts for current year, \$4600. Total expenditures for the current year, \$4600.

YOUNG MEN'S CHRISTIAN ASSOCIATION.

GEO. F. LERRIGO, Secretary.

Topeka, Kan. Founded, 1881. Number of teachers, 6. Number of departments, 3. Total enrolment last year, 825. Value of apparatus, \$4000. Number of volumes in libraries, 400. Value of libraries, \$500. Total receipts for the current year, \$7450. Total expenditures for the current year, \$7429. Rates of tuition per annum, \$10.

HISTORY.—Among the varied means employed by the Young Men's Christian Association to attract and benefit the young men, the night school is, perhaps, the most recent and promises to be one of the most popular.

This line of work has been in use by the associations of the United States about twenty-five years. The Topeka association night school was first organized shortly after the organization of the association, in 1881, and was carried on at intervals from that time until 1894, when the present work was established, with H. G. Larimer as chairman of the educational committee. Classes were organized in English literature, elementary electricity, and in the common branches. Each year the work has been carried on under competent instructors with gratifying results, and at this time is a thoroughly established department of the association. Mr. H. T. Chase, the editor of the Topeka *Daily Capital*, is the present chairman of the educational committee, and under his direction the work has been systematized and arranged into courses. The season for 1902-'03 opened October 15, and three distinct courses of study are offered: The common-school branches, the business-practice course, and a course in electrical engineering.

The common branches are taught by E. H. Roudebush, and comprise classes in penmanship, reading, spelling, grammar, and arithmetic. The enrolment in this course is twenty-six. The course in business practice is taught by C. B. Van Horn. It is specially designed to meet the needs of young men who are preparing to occupy clerical positions. Its classes are penmanship, business arithmetic, business correspondence, and bookkeeping. Twenty-five students are in regular attendance at these classes. The course in electrical engineering is under the direction of C. R. Maunsell, superintendent of the Edison Electrical Lighting Company of the city. In this course advanced mathematics is taught on Monday and Wednesday evenings by W. G. Magaw, of the high school. On Tuesday evenings E. H. Heacock, of the high school, teaches physics and chemistry. On Monday and Thursday the subjects of mechanical drawing and machine design are taught by F. H. Benton, a practical draftsman in the employ of the Atchison, Topeka & Santa Fe railway. Practical, experimental and theoretical electricity is taught on Friday evenings by F. H. Maunsell. The enrolment in this course is thirty-seven. About April 1 of each year an examination is held, under the auspices of the international committee of the Young Men's Christian Association, and certificates are granted to those who succeed in passing with a grade of seventy-five per cent.

In addition to these classes a number of educational clubs are conducted by the association, which have for their object the intellectual improvement of their members.

RAILROAD YOUNG MEN'S CHRISTIAN ASSOCIATION.

THOS. E. PROUT, Secretary.

Topeka, Kan. Founded, 1882. Number of teachers, 7. Number of lecturers, 8. Total enrolment last year, 227. Number of graduates last commencement, 11. Number of volumes in libraries, 300. Value of libraries, \$200. Total receipts for the current year, \$411.69. Total expenditures for the current year, \$482.80. Rates of tuition per annum, \$1 and \$2. Average total annual expense per student, \$2.11.

YOUNG MEN'S CHRISTIAN ASSOCIATION.

GEO. W. FLEMING, Secretary.

Fort Scott, Kan. Founded, 1887. Under auspices of the international committee of the Young Men's Christian Association. Number of professors, 2. Number of other teachers, 5. Number of departments, 5. Total enrolment last year, 545. Land owned by institution, lot and buildings, valued at \$3000. Value of apparatus, \$3500. Number of volumes in libraries, 1206. Total receipts for the current year, \$3369.78. Total expenditures for the current year, \$3061. Rates of tuition per annum, \$5. Average total annual expense per student, \$5.59.

HISTORY.—The Young Men's Christian Association at Fort Scott was first organized in May, 1887. The first president was J. M. Bright, a dry-goods merchant. The first year of the association was varied with success and failure. There was but little educational work attempted outside of Bible and physical instruction for a number of years; then, with the advent of a broader work among the associations, a congress was started which resulted in much benefit to the members; then were added bookkeeping and business arithmetic. Within the past three years the membership has increased from 225 to 545. Department work has been developed. The religious work has increased from a small men's meeting to large meetings, and a boys' meeting with good attendance is held each week. There has been established two Bible classes each week, one for men and one for boys. There is also a morning devotional meeting each week-day. There

has been one international certificate issued as a result of Bible study. The physical work has been progressing well. From no gymnasium it has established one with six classes a week in physical culture, with a competent instructor in charge. The library has grown from a few old books to 1200 new ones, a very fine selection, to which books are continually being added; there were circulated among the members last year over 2000 books, and the present year will reach above 3000. The reading room is one of the most attractive features. Seventy-five periodicals are on file, many of them scientific and mechanical. The reference library is also an advantage to students. The social work has become a factor in the training of young men and boys in the duties of social life.

The education of many young men is incomplete, and the different classes, such as electricity, vocal music, bookkeeping, air-brake, and practical talks on various subjects, are helpful, and tend to supplement an unfinished education and fit young men for a better sphere in life.

YOUNG MEN'S CHRISTIAN ASSOCIATION.

C. G. TITUS, Secretary.

Lawrence, Kan. Founded, 1882. Under auspices of the evangelical churches. Number of lecturers, 5. Total enrolment last year, 115. Total number of graduates since organization: Business branches, about 30. Lands owned by institution, lots in Wichita and Lawrence. Value of apparatus, \$1000. Number of volumes in library, 320. Value of library, \$400. Total receipts for the current year, \$1559.01. Total expenditures for the current year, \$1534.47. Rates of tuition per annum, \$5.

YOUNG MEN'S CHRISTIAN ASSOCIATION.

E. H. PIERCE, Secretary.

Winfield, Kan. Present organization founded February 1, 1902. Land owned by institution, 1 lot, \$1500. Value of buildings, \$7000. Number of volumes in libraries, 300.

New building not yet completed. Expect to have some educational work, but cannot organize until we have room for classes.

EDUCATIONAL INSTITUTIONS—ALPHABETICAL LIST.

Name of school, location, and name of the principal, superintendent, or president.

Atchison Business College, Atchison. A. F. Heck.
 Atchison County High School, Effingham. J. W. Wilson.
 Allen Commercial College (private), Abilene. E. O. Allen.
 Assumption School (Catholic), Topeka. F. M. Hayden.
 Baker University (Methodist), Baldwin. L. H. Murlin.
 Bissing Conservatory, Hays. Petrowitsch Bissing.
 Bethel College (Mennonite), Newton. C. H. Wedel.
 Bethany College (Lutheran), Lindsborg. Carl Swensson.
 College Preparatory School, Atchison. Joanna Parke.
 Cherokee County High School, Columbus. C. S. Bowman.
 Clay County High School, Clay Center. S. A. Bardwell.
 Campbell Business College, Holton. W. S. Pritchett.
 Campbell University (Baptist), Holton. E. N. Johnson.
 College of Emporia (Presbyterian), Emporia. J. C. Miller.
 Cooper College (United Presbyterian), Sterling. F. M. Spencer.
 College of Sisters of Bethany (Episcopal), Topeka. Mrs. Barbara Walker.
 Convent of the Sisters of Charity (Catholic), Topeka. Sister Martina.

College of Physicians and Surgeons, Kansas City, Kan. J. W. May.

Young Men's Christian Associations doing educational work:

Lawrence. C. G. Titus.
 Topeka, Railroad Department. Thos. E. Prout.
 Topeka Central. George E. Lerrigo.
 Fort Scott, Railroad and City. Geo. W. Fleming.
 Arkansas City. H. W. Widdoes.
 Coffeyville. Frank L. Greer.
 Winfield. E. H. Pierce.

CLASSIFIED LIST — EDUCATIONAL AND CHARITABLE INSTITUTIONS OF THE STATE.

CONSOLIDATED SCHOOLS.

Lorraine Union School, Lorraine. W. S. Bean.
 Pearl, Dickinson county (will open next year).

MANUAL-TRAINING SCHOOLS.

Kansas City Manual-training School (high school). G. E. Rose.
 Pittsburg Manual-training School. R. S. Russ.
 Topeka Manual-training School (Y. W. C. A.). Mrs. J. C. McClintock.
 Topeka Industrial Institute. Wm. R. Carter.
 Topeka Manual-training School. W. M. Davidson.

COUNTY HIGH SCHOOLS.

Atchison County High School, Effingham. J. W. Wilson.
 Cherokee County High School, Columbus. C. S. Bowman.
 Clay County High School, Clay Center. S. A. Bardwell.
 Dickinson County High School, Chapman. Homer S. Myers.
 Labette County High School, Altamont. W. M. Kyser.
 Lane County High School, Dighton. Herman Gillette.
 Montgomery County High School, Independence. S. M. Nees.
 Norton County High School, Norton. W. G. Riste.
 Sherman County High School, Goodland. S. V. Mallory.
 Sumner County High School, Wellington. T. W. Butcher.
 Scott County High School, Scott City. E. A. Wyatt.
 Thomas County High School, Colby. W. E. Ray.

CITY HIGH SCHOOLS.

I.—Names of high schools and academies (and names of superintendents) re-

porting courses which fully prepare for the freshman class, school of arts, State University:

Abilene, J. H. Niesley.
 Anthony, Theo. Fulton.
 Argentine, H. P. Butcher.
 Arkansas City, W. M. Fisher.
 Atchison, Nathan Veatch.
 Atchison Co. (Effingham), J. W. Wilson.
 Atwood, A. Dannevik.
 Augusta, Chas. W. Pratt.
 Belleville, J. C. Wright.
 Beloit, C. A. Shively.
 Burlingame, A. H. Newton.
 Burlington, W. A. Stacey.
 Carbondale, C. A. Deardorff.
 Centralia, G. O. Kean.
 Chanute, W. E. Royster.
 Cherokee Co. (Columbus), C. S. Bowman.
 Cherryvale, James A. Moore.
 Chetopa, Nellie McGinley.
 Clay Co. (Clay Center), S. A. Bardwell.
 Clifton, G. B. Buikstra.
 Clyde, N. F. Daum.
 Concordia, A. B. Carney.
 Cottonwood Falls, Glen O'Bryan.
 Council Grove, A. M. Thoroman.
 Dickinson Co. (Chapman), Homer S. Myers.
 Dodge City, C. A. Smith.
 Downs, R. K. Farrar.
 El Dorado, W. M. Sinclair.
 Elmore, Olive Stewart.
 Emporia, L. A. Lowther.
 Eureka, B. E. Lewis.
 Florence, E. L. Rosebush.
 Fort Scott, D. M. Bowen.
 Frankfort, M. G. Kirkpatrick.
 Fredonia, H. S. McFadden.
 Garden City, A. C. Wheeler.
 Garnett, H. C. Oman.
 Great Bend, Warren Baker.
 Halstead, J. L. Shearer.
 Hartford, J. H. Sawtell.
 Haye City, J. E. Crawford.
 Herington, C. M. Rose.
 Hiawatha, A. R. Williams.
 Holton, Erwin E. Heath.
 Horton, J. O. Hall.
 Howard, Irwin Stimmel.
 Humboldt, J. E. Cook.
 Hutchinson, R. R. Price.
 Iola, Clifford Mitchell.
 Junction City, W. S. Heusner.
 Kansas City, M. E. Pearson.
 Labette Co. (Altamont), W. M. Kyser.
 La Crosse, W. S. Robb.

La Cygne, Geo. F. Gorow.
 Larned, B. F. Ader.
 Lawrence, F. P. Smith.
 Leavenworth, Geo. W. Kendrick.
 Lincoln, W. B. Larnick.
 Lyndon, L. A. Parke.
 Mankato, F. W. Simmons.
 Marion, W. B. Hall.
 Marysville, W. H. Greider.
 Medicine Lodge, A. B. Honnold.
 Minneapolis, A. F. Senter.
 Montgomery Co. (Independence), S. M. Nees.
 Moran, L. E. Bush.
 Mound City, S. A. Kennedy.
 McPherson, T. J. Johnson.
 Neodesha, John W. Brown.
 Newton, D. F. Shirk.
 Norton County (Norton), W. G. Riste.
 Oberlin, A. C. Banta.
 Olathe, R. L. Parker.
 Onaga, J. P. Perril.
 Osage City, J. T. Albin.
 Osborne, J. N. Banks.
 Oskaloosa, J. H. Gibson.
 Oswego, Belle English.
 Ottawa, Jas. H. Adams.
 Paola, E. D. George.
 Parsons, N. McDonald.
 Peabody, A. H. Bushey.
 Pittsburg, R. S. Russ.
 Pleasanton, L. W. Culp.
 Pratt, F. D. Tracy.
 Russell, J. W. Gordon.
 Sabetha, W. J. Hull.

 Scranton, John H. Linn.
 Sedgwick, R. A. Hampshire.
 Seneca, C. C. Starr.
 Smith Center, H. H. Gerardy.
 Sterling, F. C. Jacoby.
 Stockton, G. M. Brown.
 Sumner Co. (Wellington), T. W. Butcher.
 Syracuse, R. L. Magill.
 Thomas Co. (Colby), W. E. Ray.
 Topeka, W. M. Davidson.
 Wa Keeney, F. W. Hennickseman.
 Wamego, A. L. Bell.
 Washington, L. W. Mayberry.
 Waterville, Josephine Berry.
 Wathena, Geo. W. Kinkad.
 Wetmore, W. H. Keller.
 Wichita, R. F. Knight.
 Winfield, John W. Spindler.

II.—Names of high schools which fall short of preparing for the freshman class, school of arts, State University, by not more than the amount of two terms' work:

Blue Mound, Charles Minkley.
 Blue Rapids, W. H. Andrews.
 Burrton, W. W. Willis.
 Caldwell, J. J. Loop.
 Cawker City, E. G. Ganoung.
 Coffeyville, W. E. Ringle.
 Colony, J. B. White.
 Delphos, Anna D. White.
 Ellsworth, E. T. Fairchild.
 Erie, Leslie Huffman.
 Girard, H. W. Shideler.
 Greenleaf, L. P. Wharton.
 Kingman, J. E. Boyer.
 Kinsley, D. A. Baugher.
 Le Roy, W. W. Jones.

Nortonville, W. A. Anderson.
 Osawatomie, J. R. Thierstein.
 Overbrook, L. C. Reynolds.
 Phillipsburg.
 Pomona, F. F. Brightman.
 Sedan, J. A. Ferrell.
 St. Marys, Geo. T. Beach.
 Thayer, Earl Vaughan.
 Tonganoxie, J. L. Kelsey.
 Troy, I. B. Morgan.
 Valley Falls, E. B. Gift.
 White Cloud, C. S. Hambleton.
 Williamsburg, J. F. Lyon.
 Winchester, W. W. Wood.
 Yates Center, F. M. Patterson.

YOUNG MEN'S CHRISTIAN ASSOCIATIONS.

Doing educational work.

Topeka central, Geo. E. Lerrigo.
 Topeka railroad dep't, Thos. E. Prout.
 Lawrence, C. G. Titus.
 Fort Scott, railroad and city, Geo. W. Fleming.

Arkansas City, H. W. Widdoes.
 Coffeyville, Frank L. Greer.
 Winfield, E. H. Pierce.

SPECIAL SCHOOLS.

TELEGRAPHY.

School of Telegraphy, Topeka. F. G. Miner.
 Shelton's School of Telegraphy, Salina. W. H. Skelton.

SHORTHAND.

Dougherty's Shorthand School, Topeka. Geo. E. Dougherty.
 Standard School of Shorthand, Topeka. Anna E. Canan.
 (A number of the colleges of the state also have shorthand departments.)

ORATORY AND ELOCUTION

School of Expression and the Drama, Topeka. Clara M. Crumb.
 Western School of Oratory, Wichita. G. W. Hoss.
 (Departments of oratory are also found in a number of the state and denominational schools.)

MUSIC.

Bissing Conservatory, Hays. Petrowitsch Bissing.
 Potter's Music School, Girard. Mrs. Lena Potter.
 Leavenworth Conservatory of Music, Leavenworth. Miss Mary Henderson.
 Sickner's Conservatory of Music, Wichita. A. E. Sickner.

EDUCATIONAL RESOURCES.

Herewith follow condensed statements of the educational resources of the state. It is encouraging to know that so large a part of the wealth of the state is invested annually for the education of the people. A tribute of respect should also be paid to the large army of teachers engaged in the public schools and the higher institutions of learning:

SUMMARY.

PUBLIC SCHOOLS.

8990 districts; 9106 buildings; 11,931 rooms; 11,709 teachers; 506,820 school children; valuation of school property, \$11,660,470.

500,000 acres of unsold school land.

\$8,420,000 in permanent school funds.

\$56,765.95 invested annually for public-school libraries and apparatus.

\$4,804,562.55 expended annually for public schools.

\$5,505,240.11 received annually for public-school purposes.

137 school buildings erected last year, at a cost of \$262,319.

HIGHER EDUCATION.

Largest state normal in the world.

Largest state agricultural college in the world.

A state university with 74 professors and instructors and 1233 students.

Combined property valuation of above-named state institutions, including branch schools, \$2,884,959.

26 denominational colleges; 3 private normals; 30 academies; 29 business colleges, shorthand schools, schools of telegraphy; 823 teachers; 12,490 students; property valuation, including libraries, etc., \$3,197,375.

118 city high schools, with courses approved by the State University; 12 county high schools; 67 teachers; 2019 students; libraries, \$20,799; property valuation, \$194,000.

Total valuation of all school property reported, \$18,603,324.

\$6,171,205 expended annually for education in the state.

\$92,981,616 expended for public schools during the last twenty-five years.

NOTE.—Repeated efforts were made by the state department of education to secure data from each educational institution in the state. A few schools, however, failed to report.

TEXT-BOOKS.

The State Text-book Commission convened in May, 1902, in accordance with the state-uniformity law, and adopted the following text-books for a period of five years, for the public schools of the state:

| | |
|---|-----------|
| Speller and Word Book..... | 10 cents. |
| Rand, McNally & Co., Chicago. | |
| Appleton's First Reader..... | 10 " |
| American Book Company, Chicago. | |
| Appleton's Second Reader..... | 17 " |
| American Book Company, Chicago. | |
| Appleton's Third Reader..... | 23 " |
| American Book Company, Chicago. | |
| Appleton's Fourth Reader..... | 30 " |
| American Book Company, Chicago. | |
| Appleton's Fifth Reader..... | 40 " |
| American Book Company, Chicago. | |
| Wentworth's Mental Arithmetic (Kansas edition)..... | 20 " |
| Ginn & Co., Chicago. | |
| Belfield's Revised Model Elementary Arithmetic..... | 25 " |
| Scott, Foresman & Co., Chicago. | |
| Belfield's New Model Complete Arithmetic..... | 35 " |
| Scott, Foresman & Co., Chicago. | |
| Natural Primary Geography (Kansas edition)..... | 30 " |
| American Book Company, Chicago. | |
| Natural Complete Geography (Kansas edition)..... | 75 " |
| American Book Company, Chicago. | |

| | |
|---|-----------|
| Hyde's Practical Lessons in the Use of English..... | 20 cents. |
| D. C. Heath & Co., Chicago. | |
| Hoenshel's Complete Grammar..... | 35 " |
| Crane & Co., Topeka. | |
| Elementary Anatomy, Physiology, and Hygiene (New Century series) .. | 50 " |
| American Book Company, Chicago. | |
| Davidson's History of United States..... | 50 " |
| Scott, Foresman & Co., Chicago. | |
| Kellogg and Taylor's Government of State and Nation..... | 40 " |
| D. C. Heath & Co., Chicago. | |
| Wentworth's School Algebra (Kansas edition)..... | 50 " |
| Ginn & Co., Chicago. | |
| Davis's Elementary Physical Geography (Kansas edition)..... | 80 " |
| Ginn & Co., Chicago. | |
| Carhart and Chute's Elements of Physics..... | 50 " |
| Allyn & Bacon, Boston. | |
| Crane's Easel Writing Portfolio (eight books), each..... | 5 " |
| Crane & Co., Topeka. | |
| Goodyear's Sixty Lessons in Business..... | 40 " |
| Goodyear, Marshall & Co., Cedar Rapids, Iowa. | |

Following is a list of high-school books adopted by the commission, for a period of five years, in May, 1899:

Crane & Co., Topeka, Kan.:

Wooster's Primer, 12 cents.

E. P. Greer, Winfield, Kan.:

Prentiss's History of Kansas, 60 cents.

D. Appleton & Co., Chicago:

Botany (Coulter's "Plant Relations"), 75 cents.

Zoölogy ("Animal Life"), 75 cents.

Astronomy ("A Text-book of Astronomy"), 80 cents.

Allyn & Bacon, Boston:

Bennett's Latin Grammar, 66 cents.

Comstock's Virgil, 75 cents.

Scott, Foresman & Co., Chicago:

Latin Exercises ("Bellum Helveticum"), 60 cents.

Cæsar (Lowe and Ewing), 75 cents.

Cicero (Johnston), 75 cents.

Rhetoric (Herrick and Damon), 75 cents.

Maynard, Merrill & Co., New York:

Anderson's English History, 75 cents.

Word Analysis (Kellogg and Reed's "Word-building"), 20 cents.

Silver, Burdett & Co., Chicago:

Geology (Heilprin's "The Earth and its Story"), 70 cents.

Ginn & Co., Boston and Chicago:

Burt's Primary Reading Chart, \$8.

Wentworth's Plane and Solid Geometry, 80 cents.

Sibley & Ducker, Chicago:

English Literature (Painter's English and American), 75 cents.

D. C. Heath & Co., Boston:

Thompson's New Short Course in Drawing, Nos. 1 to 8, each, 10 cents.

Thompson's High-school Course in Drawing, Nos. 1 to 4, each, 10 cents.

Shepard's Briefer Chemistry, 64 cents.

German Exercises (Joyne's German Reader), 70 cents.

German Grammar (Joyne-Meissner), 70 cents.

Below is a list of the maps, globes, charts and apparatus approved by the commission in 1899, and upon which maximum prices have been fixed:

The maps and globes of Rand, McNally & Co., of Chicago, to be furnished at the following discounts from catalogue prices of 1898, which are made a part of the contract with the commission:

Prepaid to the nearest railroad station, 40 per cent. discount.

Prepaid to Topeka, Kan., 45 per cent. discount.

Free on board cars, Chicago, 50 per cent. discount.

Discounts named above are to apply on all the maps of the—

Rand-McNally Globe Series Wall Maps.

Rand-McNally Outline Series Wall Maps.

Rand-McNally Outline Tracing Maps.

Rand-McNally Columbia Series Wall Maps.

Rand-McNally Mammoth Map of the Hemispheres.

Rand-McNally General and Commercial Maps of the United States.

Rand-McNally New and Miscellaneous School Maps.

Rand-McNally New Map of the State of Kansas, size 54 x 32 inches.

Rand-McNally School Globes in all styles of mounting.

Rand, McNally & Webber new eight-inch Tellurian.

Outline Blackboard Maps.

Blackboard Map of Kansas.

On Rand-McNally Physical Maps, a discount of 40 per cent., delivered at nearest railway station to point of shipment, will be given.

On the list given below, the following discounts on prices of catalogue of 1898 will apply:

Prepaid to the nearest railroad station, 20 per cent. discount.

Prepaid to Topeka, Kan., 25 per cent. discount.

Free on board cars, Chicago, 33½ per cent. discount.

Doctor Kiepert's Historical Maps.

Kampen's Classical Maps.

Spruner-Bretschneider Historical Wall Maps.

Stanford's School Maps.

Any other miscellaneous school maps named in the catalogue.

The following schedule indicates net prices at point of shipment and destination of some of the leading maps and globes furnished by Rand, McNally & Co.:

Globe series and outline series of wall maps, sizes 41 x 52, and 41 x 58 inches.

| | Destination. | Topeka. | Chicago. |
|-------------------------------------|--------------|---------|----------|
| On common rollers..... | \$1 80 | \$1 65 | \$1 50 |
| On spring rollers and boards..... | 2 40 | 2 20 | 2 00 |
| In diamond cases..... | 3 00 | 2 75 | 2 50 |
| Eight globe maps in globe case..... | 19 80 | 18 15 | 16 50 |
| Four globe maps in globe case. | 12 00 | 11 00 | 10 00 |
| Columbia series wall maps: | | | |
| Seven maps in Columbia case..... | \$37 80 | \$34 65 | \$31 50 |
| Maps on common rollers..... | 3 60 | 3 30 | 3 00 |

| No. 810, eighteen inch..... | 12 00 | 11 00 | 10 00 |
| No. 94, eighteen inch..... | 36 00 | 33 00 | 30 00 |

Eaton & Co., Chicago:

Normal Relief Maps (North America, South America, Europe, Asia, Africa, United States, and the World), mounted and cased, per set, \$30.00.

Any one of the seven above-named maps, mounted and in single case, \$5.00.

Charles E. Miesse, Chicago:**The Primary Language Series—**

Section I, with stand and teacher's manual, \$11.

Section II, with stand and teacher's manual, \$11.

Section III, with stand and teacher's manual, \$11.

Sections I, II, and III, bound in one, with stand and manuals combined, \$30.00.

J. M. Olcott & Co., Chicago and New York:**Kellogg's Physiological Charts—**

On common rollers, each, \$1.25.

On spring rollers, veneer case, each, \$2.00.

G. & C. Merriam & Co., New York:

Webster's International Dictionary, each, \$8.50.

Same, with complete index, \$9.25.

American Book Company, Chicago:

Webster's Primary School Dictionary (revised), f. o. b., Chicago, 38 cents.

Webster's Common School Dictionary (revised), f. o. b., Chicago, 58 cents.

Webster's High School Dictionary (revised), f. o. b., Chicago, 78 cents.

Webster's Academic Dictionary (revised), f. o. b., Chicago, \$1.20.

D. Appleton & Co., Chicago:

"The History of the American Nation," f. o. b., Chicago, \$1.12; postage paid, \$1.20.

"A Practical Agriculture," 60 cents.

Franklin Publishing Company:

The People's Library Cyclopedia (six volumes), per set, \$25.

Central School Supply Company, Chicago:**Politico-Relief Maps—**

Complete set in cabinet case, f. o. b., Chicago, \$84.

Single map, each, \$15.

Teachers' Anatomical Aid, per set, \$20.

Eli G. Foster, Topeka:

Foster's Historical Chart, \$10.

The Goldsmith Book and Stationery Company, Wichita:**Campbell's School Register, complete—**

f. o. b., Wichita, 42 cents; delivered, 50 cents.

Extra Fillers, f. o. b. Wichita, 24 cents; delivered, 30 cents.

Planetary Pencil Pointers, \$2.90.

Numeral Frames, 100 balls, 40 cents; 144 balls, 50 cents.

Tarr's Pointers, rubber tipped, per dozen, \$1.15.

The Goldsmith Book and Stationery Company, Wichita:

Bartlett's Dictionary Holder, each, \$1.00.

Noyes's No. 19 Dictionary Holder, each, \$2.50.

Slated Cloth—

36 inches wide, slated one side, per yard, 45 cents.

48 inches wide, slated one side, per yard, 55 cents.

35 inches wide, slated two sides, per yard, 65 cents.

Liquid Slating, best grade, pure alcohol—

Pergallon, \$2.75; per half-gallon, \$1.75; per quart, \$1.00; per pint, 60 cents.

J. M. Olcott & Co., Chicago and New York:

Planetary pencil pointer, each, \$3.

Hand numeral frames, 144 colored balls, 60 cents; 100 colored balls, 50 cents.

Tarr's pointers, rubber tip, per dozen, \$1.20.

Bartlett's dictionary holder, \$1.25.

Crayons: American Hard Dustless, per gross, 35 cents. Alpha Dustless, per

gross, 40 cents. Steatite, per gross, 45 cents. Olmstead's Dustless, per

gross, \$1.80. Common white, per gross, 7½ cents; per case of 100 gross, \$7.

Enameled yellow, per case of 100 gross, \$8.50; per gross, 9 cents. Enam-

eled pink, per case of 100 gross, \$8.75; per gross, 9½ cents. Assorted colors,

best grade, per gross, 75 cents; medium, per gross, 60 cents; No. 3, 30 cents.

Portable blackboards, style A, one side slated, per square foot, 9 cents; both

sides slated, per square foot, 11 cents; style B, slated both sides, per square

foot, 26 cents.

Real slate blackboard, 3 feet wide, per square foot, 14 cents; 3½ feet wide, per

square foot, 15 cents; 4 feet wide, per square foot, 16 cents.

inches wide, per linear yard, 65 cents.

Pure alcohol slating, black, pints, 65 cents; quarts, \$1.15; half-gallons, \$2.15;

gallons, \$4.

Pure alcohol slating, green, pints, 75 cents; quarts, \$1.50; half-gallons, \$2.75;

gallons, \$5.

Wood alcohol slating, pints, 45 cents; quarts, 75 cents; half-gallons, \$1.40;

gallons, \$2.

E. G. Dann & Co., Chicago:

Dann's Dustless Blackboard Erasers, delivered at any county-seat, per dozen,

48 cents; per gross, \$5.

Crane & Co., Topeka:

McVicar's Treasurer's Record, \$1.12½.

School-district Warrant Register, 90 cents.

McVicar's Clerk's Record, \$1.58½.

District Clerk's Order Book, 45 cents.

Ramsey's Teacher's Register and Year-book, 75 cents.

Bellows Bros., Chicago:

The School Library Encyclopedia, per set, \$17.50.

Silver, Burdett & Co., Chicago:

First Principles of Agriculture, 60 cents.

APPROVED SCHOOL SUPPLIES.

Below will be found a list of approvals made by the State Text-book Commission at its session in May, 1902:

New Century Primer of Hygiene, American Book Company, Chicago, 23 cents.

Intermediate Physiology and Hygiene, American Book Company, Chicago, 50 cents.

High-school Physiology, American Book Company, Chicago, 50 cents.

Wooster's Primary Arithmetics (two books), Lizzie E. Wooster, Topeka, Kan.

Number Analysis (one book), Della Van Amburgh, Holton, Kan.

New International Encyclopedia, Dodd, Mead & Co.:

Per set, cloth, \$80; buckram, \$90; half Russia, \$112; half Morocco, \$128.

From the above prices on the International Encyclopedia a discount of twenty per cent. will be given on sales made during the first year.

Burton's Perfect Classification and Attendance Register, with Course of Study, Crane & Co., Topeka, Kan, \$1.

Practice paper and blank books to accompany bookkeeping, Goodyear, Marshall & Co., Cedar Rapids, Iowa, 30 cents.

Business papers, blanks, and box, with office appliances, Goodyear, Marshall & Co., Cedar Rapids, Iowa, 55 cents.

Separate writing tablets, perforated, Crane & Co., Topeka, Kan., 3 cents.

Copy sheets, complete, for any book, Crane & Co., Topeka, Kan., $2\frac{1}{2}$ cents.

Central School Supply House, Chicago:

Set of tablets, complete, for biology, botany, zoology, astronomy, physiology, geology, and physiography, 28 cents.

Tablets for field-notes, 5 cents.

Set for physics and chemistry, complete, each, 20 cents.

Drawing tablet, as used in biology, $17\frac{1}{2}$ cents.

Note tablet, as used in biology, $10\frac{1}{2}$ cents.

Note tablet, unruled, as used in biology, $10\frac{1}{2}$ cents.

Atlas science tablets, complete, per set, 20 cents.

Atlas Outlines for United States History, complete, 50 cents.

Atlas Outlines for English History, complete, 28 cents.

Atlas Outlines for English Grammar, complete, 28 cents.

Atlas Outlines for Rhetoric, complete, 20 cents.

Atlas herbarium No. 709, for fifty specimens, with index, 28 cents.

Atlas herbarium No. 1117, for fifty specimens, with index, 50 cents.

THE SCHOOL-FUND COMMISSIONERS.

The commissioners for the management and investment of the state permanent school fund, the normal school permanent fund, the university permanent fund and the Stormont medical library fund held meetings during the biennial period in the office of the state superintendent of public instruction, as follows:

1901.—January 15, 26; February 2, 4, 14, 23; March 30; April 1, 4, 11, 23, 27; May 7, 10, 14, 16, 23, 25; June 12, 15, 19, 25, 26, 29; July 2, 20, 27, 31; August 1, 10, 15, 20, 30; September 3, 9, 17, 28; October 2, 10, 15, 26; November 7, 8, 15, 26, 30; December 28, 31.

1902.—January 3, 7, 16, 20, 25, 30; February 15, 22; March 3, 29; April 9, 16, 26, 30; May 23, 31; June 4, 9, 23, 28; July 2, 5, 12, 16, 22, 26; August 1, 4, 8, 22, 25, 28, 30; September 9, 11, 13, 15, 27, 30; October 2, 6, 13, 25; November 6, 29.

The amount of bonds held by the state treasurer December 1, 1902, were as follows:

| | |
|---------------------------------------|----------------|
| In state permanent school fund..... | \$7,164,464 01 |
| In university permanent fund..... | 149,992 90 |
| In normal school permanent fund..... | 217,275 00 |
| In Stormont medical library fund..... | 5,000 00 |
| Total in all funds..... | \$7,536,731 91 |

The following statement shows the investments for the biennial period ending December 1, 1902:

| | |
|---------------------------------------|----------------|
| In state permanent school fund..... | \$2,368,283 00 |
| In university permanent fund..... | 37,750 00 |
| In normal school permanent fund..... | 86,900 00 |
| In Stormont medical library fund..... | 3,500 00 |
| Total in all funds..... | \$2,496,433 00 |

The uninvested balances of the several funds December 1, 1902, are as follows:

| | |
|---------------------------------------|-------------|
| In state permanent school fund..... | \$11,673 82 |
| In university permanent fund..... | 9 47 |
| In normal school permanent fund..... | 687 68 |
| In Stormont medical library fund..... | |

In the investments of the funds, the school-fund commissioners have endeavored to deal directly with the officers of the municipalities issuing the bonds. In doing this they have been brought in contact with the strong competition for Kansas securities by investors in the East, as well as by local investors. This has made it difficult at times to secure the best investments. The commissioners have been very careful to select none but good securities in which to invest these funds.

During this biennial period there have come into the hands of the commissioners for investment over \$2,490,000. This sum arises from the payment of matured bonds, or bonds payable at the option of the municipalities issuing them; from the sale of school lands; from charter fees, etc.

During the biennial period just passed many municipalities have been disposed to take advantage of the lowering of the rate of interest to refund their indebtedness at a much lower rate than that formerly commanded. This has thrown upon the commissioners the responsibility of reinvesting these funds. As the school-fund commissioners are prohibited by law from paying a premium on bonds, and as Eastern and local bond brokers do pay liberal premiums, the commissioners have been compelled to exercise the greatest diligence and care in the investment of the funds. Notwithstanding these conditions, the statements above made will show that the commissioners have been successful in investing \$2,496,433 of the various funds. This leaves practically all the funds invested, and all investments are in securities of the first class.

The commissioners have also been successful in converting quite a sum of former investments into cash and into revenue-producing bonds.

For a number of years there have been in the vault of the state treasurer some securities which were made during the period of inflated

values, which have since become non-producing by reason of the fact that the interest had defaulted. Since the revival of prosperous times the commissioners have been able to make settlements, by which most of these securities have become revenue-producing and all of them will in time be liquidated. This has been done without any reduction of the original principal of these investments.

TENURE OF OFFICE OF MEMBERS OF STATE BOARD OF EDUCATION.

The law governing the appointment of members of the State Board of Education should be amended so as to make the term of office of the three members of the board appointed by the governor six years instead of two. The time element should be so arranged that the term of only one of the appointed members should expire with each biennium. This plan would give us experienced men on the State Board of Education all the time, and the schools would get the benefit of their observation and experience. All efforts to secure permanency and stability in our educational work should be encouraged, and I trust, therefore, that the legislature will look with favor upon this recommendation.

LIST OF EDUCATIONAL INSTITUTIONS BY COUNTIES.

Name of school, location, and name of president or principal.

ALLEN COUNTY.

Iola Business College, Iola. Hugh J. Powell.

ATCHISON COUNTY.

Atchison Business College, Atchison. A. F. Heck.
Atchison County High School, Effingham. J. W. Wilson.
College Preparatory School, Atchison. Joanna Parke.
Trinity School (German Lutheran), Atchison. G. Roller.
Midland College, Atchison. Jacob A. Clutz.
Mount Scholastica Academy, Atchison. Mother Aloysia.
Sacred Heart School, Atchison. Phillip Williams.
St. Benedict's College, Atchison. Innocent Wolf.
St. Louis College, Atchison. Girard Heinz.
Soldiers' Orphans' Home, Atchison. E. L. Hillis.

BOURBON COUNTY.

Loretta Academy, Fort Scott.
Notre Dame de Lourdes Academy, Fort Scott. Mother Bernard.
Railroad and City Y. M. C. A., Fort Scott. Geo. W. Fleming.
Windsor Commercial College, Fort Scott. Mrs. Dean Dick.

BROWN COUNTY.

Hiawatha Academy, Hiawatha. William E. Schliemann.

CHEROKEE COUNTY.

Cherokee County High School, Columbus. C. S. Bowman.
Spring River Academy, Galena. Anson B. Harvey.
Lowell Academy, Lowell. W. B. Morgan.

CLAY COUNTY.

Clay County High School, Clay Center. S. A. Bardwell.

CLOUD COUNTY.

Great Western Business College, Concordia. W. T. Larimore.
Nazareth Academy, Concordia. Mother Antoinette.
Parochial Academy, Concordia. Sister Louise.

COWLEY COUNTY.

Southwest Kansas College, Winfield. Fred C. Demorest.
St. John's Lutheran College, Winfield. A. W. Meyer.

*Over one million expended for building schoolhouses alone.

CONCLUSION.

I desire to take this opportunity to thank the teachers, superintendents, head of institutions of learning and school officers for their support and cooperation during my term of office. The four years that I have served the people of Kansas have been very short and pleasant ones, and I trust that I have succeeded in making at least some small contribution to the educational work of our great and growing state.

I also wish to thank those who have contributed articles and biographical and historical sketches to this report.

I owe a deep debt of gratitude to my assistant, D. W. Little; to my bond clerk, A. V. Lindell; to my statistician, W. H. Wasson; to Louella B. Rudolph, who served as stenographer during almost three years of my administration; and to my present stenographer, Nellie P. Tatcher.

Commending the educational work of the state to the highest consideration of the people, I remain,

Very respectfully,

Frank Nelson

State Superintendent of Public Instruction.

STATISTICAL TABLES.

TABLE No. 1—1901—Showing number of organized school districts in each county, number of district clerks reporting, and population between 5 and 21 years of age.

LETTER OF TRANSMITTAL.

OFFICE OF THE BANK COMMISSIONER,
TOPEKA, KAN., September 1, 1902.

Hon. W. E. Stanley, Governor of Kansas:

SIR—In accordance with the provisions of section 56 of the Kansas banking law, I transmit herewith my report showing the condition of all state and private banks and trust companies doing business in the state at this date, together with banks in the hands of receivers, and other information by law required.

Including the four savings-banks, there are at this time FOUR HUNDRED AND TWENTY-SIX STATE BANKS, THIRTY-EIGHT PRIVATE BANKS and ONE TRUST COMPANY under the supervision of this department. Of these, two state banks are in process of liquidation.

NEW BANKS INCORPORATED.

During the period covered by this report (September 1, 1900, to September 1, 1902), 117 new state banks, with a capital of \$1,175,600, have been incorporated, as follows:

| | | <i>Capital.</i> |
|---------------------|---|-----------------|

CLOSED BANKS.

During this biennial period it has been necessary for this department to take charge of three banks, as follows:

| | |
|-------------------------------------|-----------|
| The Wathena State Bank | Wathena. |
| The Citizens Bank of La Cygne | La Cygne. |
| The Bank of Dexter | Dexter. |

The Wathena State Bank.—On the 16th day of January, 1901, my predecessor, John W. Breidenthal, took possession of the assets of the Wathena State Bank, Wathena, Kan. This bank had a capital of \$7100 and a surplus and undivided-profit account of \$3000, but its resources had been dissipated through unfortunate speculations upon the part of the cashier. Jacob Miller was appointed receiver, and the liabilities were ascertained to be about \$38,000. Its affairs are still in process of settlement.

The Citizens Bank of La Cygne.—On February 21, 1901, Deputy Bank Commissioner Waterman closed this bank, and L. G. Porter was appointed receiver. The bank had a capital of \$25,000 and undivided profits of about \$2000. Its liabilities were found to be about \$43,000. The receivership was promptly closed up and the depositors paid in full.

The Bank of Dexter.—On June 11, 1901, Eugene Davis, deputy bank commissioner, took charge of the assets of the Bank of Dexter, Dexter, Kan. This bank had a capital of \$5000 and net profits of \$3500, and, although its books only showed liabilities of about \$32,000, it was found that liabilities existed aggregating over \$40,000, while much of the assets were found to be worthless. J. F. Balliet, of Winfield, was appointed receiver, and the affairs of the bank are now in process of settlement.

All three of these failures were due, largely, to negligence upon the part of the banks' directors, and speculation, largely the result of such negligence, upon the part of the active officers in charge. Had the directors given the banks' affairs the attention they should, such speculation and wrongful use of the banks' moneys would have been impossible upon the part of these cashiers.

LOSS TO DEPOSITORS.

The total liabilities to depositors in these three closed banks, amounted to less than \$120,400. The depositors of the Citizens Bank of La Cygne have been paid in full. There is yet due to the depositors of the Wathena State Bank \$29,752.29, and to the depositors of the Bank of Dexter \$27,761.36; but there still remain in the hands of these respective receivers assets that will liquidate a fair share of this.

SURPLUS AND PROFITS.

The disposition of Kansas bankers to build up and strengthen their surplus and profit accounts, so as to provide against possible losses in the event of changed conditions, is commendable. Already ninety-eight banks have a surplus account of fifty per cent. or more of their capital. Many others have surplus and undivided profits aggregating a like amount. These banks have been able to do, and, at the same time, pay reasonable and satisfactory dividends to their stockholders.

INCREASE IN DEPOSITS AND LOANS.

Each biennial report of this department shows a gratifying increase in the deposits in the state banks. This increase is the legitimate outgrowth of the continued prosperity of the state. The fact that the increase in loans has kept pace with the increase in deposits does not mean that as the people make money they go more and more in debt. Many loans that were formerly carried on real estate or in some other form in the East are now carried in Kansas banks. Kansas is paying interest largely to her own money-loaners.

PRIVATE BANKS.

The law of 1897 precludes the institution of any new private banks, but it does not provide for the compulsory liquidation of those already in existence. Gradually, though, the private banks are liquidating or incorporating. At the time of the last biennial report, there were fifty-three private banks in Kansas. At this time there are thirty-eight. While many of these are among the strongest and most ably managed in the state, yet it would be far better if they would all proceed to incorporate. This would avoid any possible commingling of the business of the bank with the private business of the owner or owners thereof. It would avoid infinite complications in case of the death of the owner.

During the biennial period just closed, notwithstanding the fact that \$542,100 of capital and \$78,960 of surplus have been withdrawn from the state and private banks by voluntary liquidation, and otherwise, the aggregate capital of the state and private banks has increased \$802,100, and surplus \$368,069.40.

The increase in the business of the banks has been even more gratifying. The total loans have increased \$9,541,207.03, and the deposits \$8,441,815.64. While the total deposits have increased \$8,441,815.64, the time deposits upon which the banks pay interest have only increased \$827,779.06.

RECOMMENDATIONS.

Graduated Capitalization.—The repeal in 1901 of that provision of the law of 1897, which limited the total investments of a bank to four times the amount of its capital and surplus, together with the absence of any practical provision of the law for the enforcement of the prohibition against excess loans, has led to the organization of many banks with a capital by no means in keeping with the business demands of the community in which the bank is located. Ten thousand dollars is the minimum amount for which any bank should be chartered in this state, and this should be increased according to the population of the town or city in which the bank is located.

Annual Meeting of Stockholders.—Section 9 of the banking law should be so amended as to provide a definite fixed date for the annual meeting of stockholders, and such date should be early in January.

Fees for Examinations.—Section 24 of the banking law should be so amended that the fees for examination would be based upon the total investments of the bank rather than upon its capitalization. I would suggest that a minimum fee of fifteen dollars be established for all banks with total investments of less than \$100,000; that banks with total investments from \$100,000 to \$200,000 shall be charged twenty dollars; from \$200,000 to \$300,000, twenty-five dollars, and that an additional five dollars be added for each \$100,000 of increase in the investments thereafter.

Bonds of Officers.—Section 9 of the banking law provides that the officers having the care and handling of the funds of the bank, shall give bond in such an amount as the directors shall require, the same to be approved by the directors. Many boards have wisely required surety bonds, but others accept personal bonds, in which case the law should require that these bonds be made for a stipulated time. Many boards of directors have permitted them to be made during the official term of the officer, and, as a result, many Kansas banks hold official bonds that are worthless.

Duties of Directors.—The duties of bank directors are clearly outlined in the present banking law, and when the director's oath is taken there should be, and under the law can be, no avoidance of these duties. A bank director is as much responsible if he neglects the proper supervision of the bank as he is for wrongful supervision. No man should be selected as a bank director merely to give standing to the bank, nor should any one be given a directorship to add standing to his own private business. He should give the bank the supervision the law contemplates, and the fact that so many directors of state banks in

Kansas have appreciated this relationship has had much to do with the present enviable condition of these banks. Not one failure of a Kansas bank in late years can be cited where the directors gave that attention to the bank's management that the law contemplated they should. I would advise that the law be amended so as to provide for a minimum amount of unpledged stock, of which it is necessary that a person be a *bona fide* owner before he can serve as a bank director. This would avoid the disposition occasionally encountered for one man to incorporate, and yet practically run a private bank, by utilizing four nominal stockholders as members of his board.

Form of Directors' Oath.—The legislature is urged to make the same provision relative to oaths of directors for state banks as the national banking law provides for national banks. It is as follows:

"Each director, when appointed or elected, shall take an oath that he will, so far as the duty devolves upon him, diligently and honestly administer the affairs of such association, and will not knowingly violate, or willingly permit to be violated, any of the provisions of this title, and that he is the owner in good faith, and in his own right, of the number of shares of stock required by this title, subscribed by him, or standing in his name on the books of the association, and that the same is not hypothecated, or in any way pledged, as security for any loan or debt. Such oath subscribed by the directors making it, and certified by the officer before whom it is taken, shall be immediately transmitted to the comptroller of the currency [bank commissioner], and shall be filed and preserved in his office."

Insolvent Banks.—The law, as far as it relates to the settling of insolvent banks, should be radically changed. The present law provides that the receiver be appointed by the district court, and, to all practical purposes, the banking department has no further supervision over a bank after it has passed into the hands of a receiver. There is no uniformity relative to proof of claims and no limitation of time provided in which claims must be filed. The law should be so amended that, when a receiver ascertains to his own satisfaction that a closed bank will not pay its depositors in full, he can immediately enforce the double liability of stockholders, instead of having to wait a year, as he does under the present law, giving the stockholders, if they are so inclined, ample time to put their affairs in such shape as to escape the liability. The interests of the depositors are paramount to those of the stockholders.

Excess Loans.—The provision of the law which prohibits the loaning of more than fifteen per cent. of a bank's capital to any one person, firm or corporation is the one most frequently violated, and while every possible effort has been made by the department to have this provision of the law complied with, yet the absence of any punishment for its violation largely nullifies the effect of such efforts.

Regardless of the solvency of the borrower, it is not safe for any bank to hazard to exceed fifteen per cent. of its capital and surplus upon any single transaction, and I would advise an amendment to the law which would make it a criminal offense for a bank officer to make an excess loan without the formal approval in writing of a majority of his board of directors, and that the members of the board making such approval be held personally responsible for the amount the loan is in excess of the legal limit.

Loans to Officers and Directors.—There has probably not been a bank failure in Kansas in recent years that has not been the result of the utilization of the bank's funds by some officer connected with the bank. Every possible restriction should be thrown around loans that are made to bank directors or bank officers. No loans should be made to officers or employees of a bank without the approval in writing of three-fourths of the members of the board of directors, and excess loans to bank officers or bank directors should by law be prohibited.

Loans to Shareholders.—The law should provide that no shareholder who has a liability to the bank that is past due and unpaid, or who is liable to the bank either directly or indirectly for an amount in excess of fifteen per cent. of the bank's capital and surplus, shall be allowed to vote at the annual meeting of stockholders.

Trust Companies.—One trust company, The Banking Trust Company of Kansas City, Kan., has been organized under the law passed by the legislature of 1901. There are a number of so-called trust companies operating in the state that began business before the enactment of this law, doubtless doing business of a character that should require them to conform with its provisions, but the fact that this department cannot compel an inspection of their books has to a large extent prevented our either compelling them to quit business or to comply with the provisions of the law. The provisions of the trust-company law are exceedingly broad, and permit a wide range of business operations. It is particularly important that this law be so amended that a trust company cannot own stock in a state or national bank, or in any other trust company. If this is not done, under the provisions of the present act, a trust company with \$100,000 capital can be made the nucleus for the organization or ownership by purchase of innumerable banks and other trust companies throughout the state, with, as a matter of fact, no other foundation upon which for the whole fabric to stand, except the original capital of the parent company. A trust company with \$100,000 capital can purchase a majority of the stock in a bank with \$50,000 capital for, say \$30,000, and having secured control can have this bank place \$40,000, or any other desired amount, of its deposits on deposit with the trust com-

pany and at once be ready to purchase another bank, and repeat the former transaction, and continue to make similar purchases *ad infinitum*. Neither the people nor the bankers of Kansas desire a system of branch banking, and the present trust law was certainly not enacted with the idea that it could be made the means to attain such an end.

Salaries for Deputies.—The salaries of the deputies connected with this department are entirely out of proportion to the duties that they are called upon to perform. The number of banks have continued to increase with such rapidity, and their business has grown to such proportions, that their work has been practically doubled. Their work is of a character that requires, not only first-class clerical ability, but a wide range of experience and sound and discriminating judgment. All our neighboring states pay from fifty to sixty per cent. more to their bank examiners than Kansas does. I would urge, in the strongest terms, that these salaries, that are now fixed at \$1200 per year, be increased to \$1800. As an evidence of the fairness of this recommendation, attention is called to the fact that the receipts for fees for examinations, for the past six years, have been as follows:

| | |
|--|------------|
| October 1, 1896, to October 1, 1897..... | \$6,428 95 |
| October 1, 1897, to October 1, 1898..... | 7,351 60 |
| October 1, 1898, to October 1, 1899..... | 7,713 43 |
| October 1, 1899, to October 1, 1900..... | 7,140 70 |
| October 1, 1900, to October 1, 1901..... | 8,407 63 |
| October 1, 1901, to October 1, 1902..... | 9,021 35 |

GENERAL CONDITIONS.

The biennial period just closed has been without precedent in Kansas. The state has grown and prospered. Bank deposits have increased. Bank investments have grown in proportion to this increase in deposits, but they have been upon a safer basis. While interest rates have decreased, yet, on account of this increased volume of business, owners of stock in Kansas banks have realized satisfactory profits. The old theory of loaning a man money because his credit is good has gradually given away to loaning upon the collateral or security that the borrower may furnish. The fact that losses in the banks of Kansas have been reduced to the minimum has been the greatest factor in the reduction of interest rates.

CIMARRON STATE BANK.

This report gives the condition of all Kansas banks at the close of business on September 2, 1902. The Cimarron State Bank made no report in response to this call, and on September 18, Deputy Bank Commissioner Davis took charge of it for this department. It had a capital of \$5000, and surplus and undivided profits of \$1164.50. Its books showed liabilities to depositors aggregating \$39,000, but it

was ascertained by Mr. Davis that these liabilities, in fact, amounted to about \$62,000. Application was made for the appointment of a receiver, and A. Russell, of Dodge City, was placed in charge by the judge of the district court. He is energetically at work closing up the affairs of the bank and is of the opinion that a sufficient amount can be realized from the bank's assets to pay the depositors in full.

Respectfully,

MORTON ALBAUGH,
Bank Commissioner.

Deputies and clerks of commissioner, powers. |
|---|---|

[407] *Organization of.* SECTION 1. Any five or more persons may organize themselves into a banking corporation, and shall be permitted to carry on the business of receiving money on deposit and to allow interest thereon, giving to the person depositing credit therefor; and of buying and selling exchange, gold, silver, foreign coin, bullion, uncurrent money, bonds of the United States and of the state of Kansas, and bonds and warrants of cities, counties, and school districts in the state of Kansas; of loaning money on real estate, chattel and personal security, at a rate of interest not to exceed the legal rate allowed by law; of discounting negotiable notes and of notes not negotiable, and to own a suitable building, furniture and fixtures for the transac-

tion of its business, of the value not to exceed one-third of the capital of such bank: *Provided*, That nothing in this section shall prohibit such bank from holding and disposing of such real estate as it may acquire through the collection of debts due to it.

[408] *Name; capital.* SEC. 2. The name selected for such bank shall not be the name of any other bank doing business in the state, but shall include the word "state," and the capital stock shall not be less than \$5000; and in addition to other requirements of law, the charter of any such bank shall contain the names and places of residence of its stockholders, and the amount of stock subscribed by each, and may contain such other provisions, not inconsistent with law, as the stockholders may deem proper. The charter shall be subscribed by at least five of the stockholders of the proposed bank who are residents of the state of Kansas, and shall be acknowledged by them; and the full amount of the capital stock shall be subscribed before the charter is filed.

[409] *Date of existence.* SEC. 3. The existence of such bank as a corporation shall date from the filing of its charter, from which time it shall have and may exercise the powers conferred by law upon corporations generally, except as limited or modified by this act: *Provided*, That such bank shall transact no business except the election of officers, the taking and approving their official bonds, the receipts of payments on account of subscriptions to its capital stock, and such other business as is incidental to its organization, until it has been authorized by the bank commissioner to commence the business of banking as hereinafter provided.

Existence of a bank begins with filing charter. See 61 Kan. 102.

[410] *Shares.* SEC. 4. The capital stock of any such association shall be divided into shares of \$100 each, and all subscriptions to said capital stock shall be paid in cash: *Provided*, That in the reorganization of a bank, assets of the old bank worth par may be accepted in lieu of cash.

[411] *Statement; certificate.* SEC. 5. When the capital of any such bank shall have been paid in, the president or cashier thereof shall transmit to the bank commissioner a verified statement showing the names and residence of stockholders, the amount of stock subscribed, and the amount paid in by each; and the bank commissioner shall thereupon have the same power to examine into the condition and affairs of such bank as if it had been before that time engaged in the banking business; and he shall within thirty days from the receipt of such statement make such examination, and shall examine especially as to the amount of money paid in on account of its capital,

and by whom paid, and the amount of capital stock of which each stockholder is in good faith the owner, and whether such bank has complied with the provisions of law in all respects; and if such bank has been organized as prescribed, and has in all respects complied with the provisions of law, said commissioner shall issue to such bank, under his hand and seal, a certificate showing that it has been organized and its capital paid in as required by law, and is authorized to transact a general banking business as provided by this act.

[412] *Increase of stock.* SEC. 6. No increase in the capital stock of any such bank shall be made unless the same shall be fully paid up at the time when subscriptions are entered therefor; and a verified statement shall be transmitted to the bank commissioner showing the amount of the increase, the names and places of residence of the subscribers therefor, the amount subscribed by each, and that the same has been fully paid in. The date and amount of each increase shall also be certified to the secretary of state.

[413] *Delinquent stock, how sold; old bank, amend charter.* SEC. 7. Whenever any shareholder, or his assignee, fails to pay any assessment on his stock, when the same is required to be paid, the directors of such bank may sell the stock of such delinquent shareholder, or as much thereof as is necessary to satisfy the debt, at public auction, after having given three weeks' previous notice thereof in a newspaper published and in general circulation in the city or county where the bank is located, to any person who will pay the highest price therefor, to be not less than the amount due thereon with the expenses of the advertisement and sale; but said stock so bid for shall at the price bid be first tendered to the other stockholders of said bank at said price, and if said stock is not taken by the said stockholders or any of them, then said stock shall be sold to the said highest bidder, and the excess, if any, shall be paid to the delinquent stockholder. If no bidder can be found who will pay for such stock the amount due thereon and the cost of the advertisement and sale, the amount previously paid shall be forfeited to the bank, and such stock shall be sold as the directors shall order, within six months from the time of such forfeiture. Any bank heretofore organized under the general corporation law, the capital of which has not been paid in full, shall conform to the provisions of this act within six months after its passage, and may for that purpose amend its charter in conformity herewith.

[414] *Dissolution of.* SEC. 8. Any corporation transacting business under this act may be dissolved by the district court of the county in which its place of business is located, in the following manner: A

verified petition shall be filed in the office of the clerk of said court, signed by the president or a majority of the board of directors, setting forth that stockholders representing two-thirds in amount of the stock of such association have adopted a resolution favoring such dissolution, and directing proceedings to be instituted for that purpose, a copy of which resolution shall set forth that all claims and demands against such association have been paid and discharged; and thereupon a notice shall be published for the time and in the manner prescribed by the law for service by publication. Such notice shall state the name of the court in which the petition has been filed, the substance and purpose thereof, and that unless objections are filed thereto on or before a time to be stated, which shall not be less than forty-one days from the first publication, the relief prayed for will be granted. A copy of such notice shall be sent to the bank commissioner within ten days after the first publication thereof, and he shall, within thirty days thereafter, make a thorough examination of the affairs of such bank, and file a certified copy of his report with said petition. Any creditor or stockholder may, on or before the time fixed by the notice, and afterwards if permitted by the court, file written objections to the dissolution of such corporation. The petition and objections thereto, if any, shall stand for hearing the same as a civil action; and if upon the hearing thereof, the court shall be satisfied that the petition is true, and that there is no valid objection to the dissolution of such corporation, it shall render judgment dissolving the same.

[415] *Management and control; cashier's bond; meetings.* SEC. 9. The affairs and business of any banking corporation doing business under this act shall be managed and controlled by a board of directors, not less than five nor more than thirteen in number, who shall be selected from the stockholders in the manner provided in the general corporation act, a majority of whom shall be residents of Kansas; the board shall designate one of their number to act as president and one as secretary, and shall select from among the stockholders a cashier; such officers shall hold their offices for the term of one year and until their successors are elected and qualified, and before entering upon the discharge of their duties shall take and subscribe the usual official oath. The board of directors shall require the cashier and any and all other officers having the care and handling of the funds of the bank, to give good and sufficient bond, to be approved by them and held by such custodian as the board may designate. The board of directors shall hold not less than four regular meetings each year, and at such meetings a thorough examination of the books, records, funds and securities held by the bank shall be made by them,

and the result of such examination shall be recorded in detail upon the record-book of the bank. A certified copy of the record of such meeting shall be forwarded to the bank commissioner within ten days after the holding of same.

[416] *Shareholders' liability.* SEC. 10. The shareholders of every bank organized under this act shall be additionally liable for a sum equal to the par value of stock owned, and no more.

[417] *Investment of funds.* SEC. 11. No bank shall employ its moneys, directly or indirectly, in trade or commerce, by buying and selling goods, chattels, wares and merchandise, and shall not invest any of its funds in the stock of any other bank or corporation, nor make any loans or discounts on the security of the shares of its own capital stock, nor be the purchaser or holder of any such shares unless such security or purchase shall be necessary to prevent loss upon a debt previously contracted in good faith; and stock so purchased or acquired shall, within six months from the time of its purchase, be sold or disposed of at public or private sale. After the expiration of six months any such stock shall not be considered as a part of the assets of any bank: *Provided*, That it may hold and sell all kinds of property which may come into its possession as collateral security for loans or any ordinary collection of debts, in the manner prescribed by law: *Provided further*, That any goods or chattels coming into the possession of any bank as aforesaid shall be disposed of as soon as possible, and shall not be considered as a part of the bank's assets after the expiration of six months from the date of acquiring same.

[418] *Funds on hand; insolvency; commissioner take possession.* SEC. 12. Each bank doing business under this act shall have on hand at all times in available funds the following sums, to wit: Banks located in cities or towns having less than 5000 population, an amount equal to twenty per cent. of their entire deposits; and banks located in cities having over 5000 population an amount equal to twenty-five per cent. of their entire deposits, one half of which may consist of balances due to them from good solvent banks located at commercial centers and at such other points as the bank commissioner may approve; and one-half shall consist of actual cash: *Provided*, That any bank which is made the depository for the reserve of any other bank or banks shall have on hand, at all times in the manner herein provided, twenty-five per cent. of its deposits. Cash items shall not be considered as a part of the reserve of any bank. Whenever the available funds in any bank shall be below the required amount, such bank shall not increase its investments by making any new loans or discounts, otherwise than by discounting or purchasing

bills of exchange payable at sight, nor make any dividends of its profits, until the required proportion between the aggregate amount of deposits and its lawful money reserve has been restored; and the bank commissioner shall notify any bank whose lawful money reserve shall be below the amount above required to be kept on hand, to make good such reserve, and if such bank or association shall fail to do so for a period of thirty days after such notice it shall be deemed to be insolvent, and the bank commissioner shall take possession of same and proceed in the manner provided in this act relating to insolvent banks. The bank commissioner may refuse to consider as a part of its reserve balances due to any bank from any other bank or association which shall refuse or neglect to furnish him with such information as he may require from time to time relating to its business with any bank doing business under this act, which shall enable him to determine its solvency: *Provided*, That all savings banks or savings associations which do not transact a general banking business shall be required to keep on hand at all times, in actual cash, a sum equal to ten per cent. of their deposits, and shall be required to keep a like sum invested in good bonds of the United States or state, county, school district, or municipal bonds of the state of Kansas worth not less than par.

[419] *Loans limited.* SEC. 13. The total liability to any bank of any person or company, corporation or firm, for money borrowed, including in the liabilities of a company or firm the liabilities of the several members thereof, shall not at any time exceed fifteen per cent. of the capital stock and surplus of such bank actually paid in; but the discount of bills of exchange drawn in good faith against actual existing values or loans upon produce in transit, or upon warehouse or elevator receipts as collateral security, and the discount of commercial or business paper actually owned by the person negotiating the same, shall not be considered as money borrowed. The bank commissioner may, at any time, order any excess loan reduced to the legal limit within sixty days from the date of notification by him.

[420] *Penalty for false statement.* SEC. 14. Every officer, director, agent or clerk of any bank (other than national bank) doing business in the state of Kansas, who wilfully and knowingly subscribes to or makes any false report or any false statement or entry in the books of such bank, or knowingly subscribes or exhibits any false writing or paper, with the intent to deceive any person as to the condition of such bank, shall be punished by a fine not to exceed \$1000, or by imprisonment in the penitentiary not less than one year nor more than five years.

[421] *Insolvent bank receiving deposits.* SEC. 15. No bank shall accept or receive on deposit, with or without interest, any money, bank bills or notes, or United States treasury notes, gold or silver certificates, or currency, or other notes, bills, checks, or drafts, when such bank is insolvent; and any officer, director, cashier, manager, member, partner or managing partner of any bank who shall knowingly violate the provisions of this section or be accessory to or permit or connive at the receiving or accepting on deposit of any such deposit, shall be guilty of a felony, and upon conviction thereof shall be punished by a fine not exceeding \$5000, or by imprisonment in the penitentiary not less than one year nor more than five years, or by both such fine and imprisonment.

As to insolvency of a bank, knowledge of officers, etc., see 60 Kan. 94.

[422] *Banks without authority; penalty.* SEC. 16. It shall be unlawful for any individual, firm or corporation to transact a banking business, or receive deposits, without having first transmitted to the bank commissioner a verified statement of the resources and liabilities of such individual, firm or corporation; said statement shall be made in accordance with sections 5 and 17 of this act. The bank commissioner shall thereupon have power to examine into the condition and affairs of such bank, and shall within thirty days from the receipt of such statement make such examination; and if such bank has in all respects complied with the provisions of law applicable thereto, said commissioner shall issue to such individual, firm or corporation, under his hand and seal, a certificate showing the amount of capital paid in, and that the same is authorized to transact a general banking business, as provided by this act. And it shall be unlawful for any individual, firm or corporation to transact a banking business without having first received such certificate from the bank commissioner. Any person violating the provisions of this section, either individually or as an interested party in any association or corporation, shall be guilty of a misdemeanor, and on conviction thereof shall be fined in a sum not less than \$300 nor more than \$1000, or by imprisonment in the county jail not less than thirty days nor more than one year, or by both such fine and imprisonment.

[423] *Report to commissioner.* SEC. 17. Every bank shall make at least four reports each year, and oftener if called upon, to the bank commissioner, according to the form which may be prescribed by him, verified by the oath or affirmation of the president or cashier of such association, and attested by the signature of at least three of the directors. Each such report shall exhibit in detail and under appropriate heads, the resources and liabilities of the association at the close of business on any past day by him specified, and shall be transmitted

to the bank commissioner within ten days after the receipt of a request or requisition therefor from him, or within ten days after publication of the call for such statement in the official state paper, and shall be published in such form as the commissioner may prescribe, within ten days after the same is made out, in a newspaper published in the place where such bank is established, or, if there is no newspaper in the place, then in one published nearest thereto in the same county, at the expense of the bank; and such proof of publication shall be furnished within five days after date of publication, as may be required by the bank commissioner. The bank commissioner shall also have power to call for special reports from any bank whenever in his judgment the same are necessary in order to obtain a full and complete knowledge of its condition. The verification of such statement shall be made in the following form :

STATE OF KANSAS, COUNTY OF ———, ss.

I, ———, president [or cashier] of said bank, do solemnly swear that the above statement is true; that said bank has no liabilities, and is not indorser on any note or obligation, other than shown in the above statement, to the best of my knowledge and belief. So help me God.

—————, *President—Cashier.*

[424] *Statement of dividends.* SEC. 18. In addition to the reports, required by the preceding section, each bank doing business under this act shall, within ten days after the declaring of any dividend, forward to the bank commissioner a statement of the amount of such dividend and the amount carried to surplus and undivided-profit account, and shall forward to the commissioner, within ten days after the 1st day of January in each year, in such form as he may designate, a verified statement showing the receipts and disbursements of such bank for the preceding year: *Provided*, That incorporated banks shall not be required to forward to the secretary of state the statement required by paragraph 1181, General Statutes of 1889.*

[425] *Failing to report.* SEC. 19. Every bank which fails to make and transmit or to publish any report required under either of the two preceding sections shall be subject to a penalty of fifty dollars for each day after the period respectively therein mentioned that it delays to make and transmit its report of the proof of publication. Whenever any bank delays or refuses to pay the penalty herein imposed for a failure to make and transmit or to publish a report, the commissioner is hereby authorized to maintain an action in the name of the state of Kansas against the delinquent bank for the recovery of such penalty, and all sums collected by such action shall be paid into the state treasury and placed to the credit of the banking department.

* Sec. 29, ch. 23, Gen. Stat. 1901.

[426] *Refusal to comply.* SEC. 20. Every bank, except national banks, doing business in the state of Kansas, which shall refuse or neglect to comply with any requirement lawfully made upon it by the bank commissioner pursuant to this act, for a period of ninety days after demand in writing is made, shall be deemed to have forfeited its franchise, and the bank commissioner shall thereupon revoke its authority to transact a banking business, by notice to the president or cashier thereof, by publication in the official state paper; and any failure on the part of such bank to comply with, or any violation of the provisions of this act, shall work a forfeiture of its franchise; and in either case the attorney-general, upon the request of the bank commissioner, shall commence an action for the purpose of dissolving said corporation.

[427] *Bank commissioner; term.* SEC. 21. The governor shall appoint, by and with the advice of the senate, a bank commissioner for the state of Kansas, whose term of office shall be four years, and until his successor is appointed and qualified. The first term shall commence on the 1st day of March, 1897. The bank commissioner shall appoint two deputies, a clerk, and a stenographer, who shall continue in office during the term of the bank commissioner, or until his successor is appointed, subject to removal by the commissioner at any time. No officer or employee of any bank, or person interested as owner or stockholder thereof, shall be eligible for the office of bank commissioner or deputy. If a vacancy shall occur in the office of bank commissioner by death, resignation, or otherwise, the same shall be filled by appointment by the governor; and any such appointee shall hold the office for the unexpired term.

[428] *Oath and bond.* SEC. 22. The bank commissioner and deputies shall each, before entering upon the discharge of his duties, take and subscribe the usual oath of office and execute to the state of Kansas a good and sufficient bond, to be approved by the executive council, conditioned that he will faithfully and impartially discharge the duties of his office, and pay over to the persons entitled by law to receive it all moneys coming into his hands by virtue of his office; the commissioner in the sum of \$20,000 and the deputies in the sum \$10,000, with sufficient sureties, to be approved and filed as provided by law.

[429] *Visit banks.* SEC. 23. It shall be the duty of the commissioner or his deputy to visit each and every bank doing business in this state, except national banks, at least once in each year, and oftener if necessary, for the purpose of making a full and careful investigation and inquiry into the condition of affairs of such bank;

and for that purpose the commissioner or deputy is hereby authorized and empowered to administer oaths and to examine under oath the owners and directors and all officers and employees and agents of such bank. The officer making such investigation shall reduce the result thereof to writing, which shall contain a full, true and careful statement of the condition of such bank.

[430] *Fees for examination.* SEC. 24. Each and every bank so examined, having not more than \$15,000 capital stock then paid in, shall pay a fee of \$15 for each and every examination; and each and every bank having more than \$15,000 capital stock paid in and not more than \$25,000 capital stock paid in, shall pay a fee of \$20; and each and every bank having more than \$25,000 capital stock paid in and not more than \$50,000 capital stock paid in, shall pay a fee of \$25; and each and every bank having more than \$50,000 capital stock paid in and not more than \$100,000 capital stock paid in, shall pay a fee of \$30; and each and every bank having more than \$100,000 capital stock paid in, shall pay a fee of \$35 to the officer making such examination. On receipt of any fee as herein provided, the officer receiving same shall execute to the bank or banker from whom received, his receipt in duplicate therefor; and it shall be the duty of every bank or banker to immediately forward to the state treasurer one of said receipts.

[431] *Record of fees.* SEC. 25. It shall be the duty of the bank commissioner to keep a record of all fees collected by him or his deputy, together with a record of the expenses incurred in making the examination of all banks, and at the end of each quarter pay over to the state treasurer all fees collected during the preceding quarter; and he shall file with the state treasurer an itemized statement showing from whom collected.

[432] *Report of prior date.* SEC. 26. The commissioner shall have power, at any time when he deems it necessary, to call upon any bank, except national banks, for a report of its condition upon any given day which has passed, or as often as the commissioner may deem it necessary.

[433] *Notice.* SEC. 27. A copy of each call made by the bank commissioner for a statement from all banks doing business under this act shall be mailed to each bank, and such call shall be published in the official state paper, and such publication shall be deemed legal notice to all such banks.

[434] *Insolvency; duty of commissioner.* SEC. 28. If, upon examination made by the commissioner or his deputy, or from any report made to the commissioner, it shall appear that any bank is

insolvent, it shall be the duty of the commissioner to immediately take charge of such bank and all the property and effects thereof. Upon taking charge of any bank, the commissioner shall, as soon as possible, ascertain by a thorough examination into its affairs, its actual condition; and whenever he shall become satisfied that such bank cannot resume business or liquidate its indebtedness to the satisfaction of all its creditors, he shall report the fact of its insolvency to the attorney-general, who shall immediately upon the receipt of such notice, institute proper proceedings in the proper court for the purpose of having a receiver appointed to take charge of such bank, and to wind up the affairs and business thereof for the benefit of its depositors, creditors, and stockholders. The bank commissioner may appoint a special deputy bank commissioner to take charge of the affairs of an insolvent bank temporarily until a receiver is appointed; such deputy shall qualify, give bond and receive compensation the same as a regular deputy; such compensation to be paid by such bank or allowed by the court as costs in case of the appointment of a receiver: *Provided*, That in no case shall any bank continue in charge of such special deputy for a longer period than ninety days.

[435] *In commissioner's hands.* SEC. 29. Any bank doing business under this act may place its affairs and assets under the control of the bank commissioner by posting a notice on its front door as follows: "This bank is in the hands of the state bank commissioner." The posting of such notice or the taking possession of any bank by the bank commissioner shall be sufficient to place all its assets and property of whatever nature in the possession of the bank commissioner, and shall operate as a bar to any attachment proceedings.

[436] *Voluntary liquidation.* SEC. 30. Any bank doing business under this act may voluntarily liquidate by paying off all its depositors in full; and upon filing a verified statement with the bank commissioner, setting forth the fact that all its liabilities have been paid, and the surrendering of its certificate of authority to transact a banking business, it shall cease to be subject to the provisions of this act, and may continue to transact a loan and discount business under its charter: *Provided*, That nothing in this section shall prevent the bank commissioner from making examination of any such bank for the purpose of determining that all its liabilities have been paid.

[437] *When insolvent.* SEC. 31. A bank shall be deemed to be insolvent—first, when the actual cash market value of its assets is insufficient to pay its liabilities; second, when it is unable to meet the demands of its creditors in the usual and customary manner; third, when it shall fail to make good its reserve as required by law.

[438] *Declare dividends.* SEC. 32. The directors or owners of any bank doing business under this act may declare dividends of so much of the net profits of their bank as they shall judge expedient; but each bank shall, before the declaration of a dividend, carry one-tenth part of its net profits since the last preceding dividend to its surplus fund, until the same shall amount to fifty per cent. of its capital stock.

[439] *Losses charged.* SEC. 33. Any losses sustained by any bank in excess of its undivided profits may be charged to its surplus account: *Provided,* That its surplus fund shall thereafter be reimbursed from its earnings, and no dividend shall be declared or paid by any such bank in excess of one-half of its net earnings until its surplus fund shall be fully restored to its former amount.

[440] *Cannot withdraw capital.* SEC. 34. No bank officer or director thereof shall, during the time it shall continue its banking operations, withdraw or permit to be withdrawn, either in form of dividends or otherwise, any portion of its capital. If losses have at any time been sustained by such bank equal to or exceeding its undivided profits then on hand, no dividend shall be made, and no dividend be declared by any bank while it continues its banking business to any amount greater than its net profits on hand, deducting therefrom its losses, to be ascertained by a careful estimate of the actual cash value of all its assets at the time of making such dividend; the present worth of all maturing paper shall be estimated at the usual discount rate of the bank. Nothing in this section shall prevent the reduction of the capital stock of any bank in the manner prescribed herein.

[441] *Penalty.* SEC. 35. Every banker, officer, employee, director or agent of any bank who shall neglect to perform any duty required by this act, or who shall fail to conform to any lawful requirement made by the bank commissioner, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine not to exceed \$1000, or by imprisonment in the county jail not to exceed one year, or by both fine and imprisonment.

[442] *Considered banking.* SEC. 36. Any individual, firm or corporation who shall receive money on deposit, whether on certificates or subject to check, shall be considered as doing a banking business, and shall be amenable to all the provisions of this act. *Provided,* That promissory notes issued for money received on deposit shall be held to be certificates of deposit for the purposes of this act.

[443] *Certified checks.* SEC. 37. It shall be unlawful for any officer, clerk or agent of any bank doing business under this act to

certify any check, draft or order drawn upon the bank unless the person, firm or corporation drawing such check, draft or order has on deposit with the bank at the time such check, draft or order is certified, an amount of money equal to the amount specified in such check, draft, or order. Any check, draft or order so certified by the duly authorized officer shall be a good and valid obligation against such bank; but any officer, clerk or agent of any bank violating the provisions of this section shall be deemed guilty of a misdemeanor, and upon conviction shall be punished as provided in section 35 of this act.

[444] *Intent to defraud.* SEC. 38. Every president, director, cashier, teller, clerk, officer, or agent of any bank who embezzles, abstracts or wilfully misapplies any of the moneys, funds, securities or credits of the bank; or who issues or puts forth any certificate of deposit, draws any draft or bill of exchange, makes any acceptance, assigns any note, bond, draft, bill of exchange, mortgage, judgment, or decree; or who makes use of the name of the bank in any manner with intent in either case to injure or defraud the bank or any individual, person, company, or corporation, or to deceive any officer of the bank or any agent appointed to examine the affairs of the bank; and any person who with like intent aids or abets any officer, clerk or agent in violation of this section, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished as provided in section 35 of this act.

[445] *Overchecks.* SEC. 39. Any bank officer who shall pay out or permit to be paid out the funds of any bank upon the check, order or draft of any individual, firm, company, corporation or association which has not on deposit with such bank a sum equal to such check, order or draft, shall be personally liable to such bank for the amount so paid.

[446] *Collateral security.* SEC. 40. No bank, banker or bank officer shall give preference to any depositor or creditor by pledging the assets of the bank as collateral security: *Provided*, That any bank may borrow money for temporary purposes not to exceed in amount fifty per cent. of its paid-up capital, and may pledge assets of the bank not exceeding twenty per cent. in excess of the amount borrowed as collateral security therefor: *Provided further*, That whenever it shall appear that a bank is borrowing habitually for the purpose of reloading, the bank commissioner may require such bank to pay off such borrowed money. Nothing herein shall prevent any bank from rediscounting in good faith and indorsing any of its negotiable notes. It shall be unlawful for any bank to issue its certificate of deposit for the purpose of borrowing money.

[447] *Investments limited.* SEC. 41. [This section is repealed by chapter 64 of the Laws of 1901, which took effect March 15, 1901. The repealing section reads: "SECTION 1. That section 41 of chapter 47 of the Session Laws of 1897 be and is hereby repealed."]

[448] *Name; banker's note.* SEC. 42. Any individual or firm doing business as a private bank shall designate a name for such bank; and all property, real or personal, owned by such bank shall be held in the name of the bank, and not in the name of the individual or firm; all of the assets of any private bank shall be exempt from attachment or execution by any creditor of such individual or firm until all liabilities of such bank shall have been paid in full. No private banker shall use any of the funds of his bank for his private business, and the note of the owner or owners of any private bank shall not be considered or accepted as a part of its assets.

[See 61 Kan. 486.]

[449] *Stock, how reduced.* SEC. 43. The capital stock of any bank doing business under this act may be reduced at any time by resolution adopted by a vote of its stockholders representing three-fourths of the capital of such bank, at any regular meeting, or at a special meeting held for that purpose, of which all stockholders shall have notice as provided in the by-laws, subject to the approval of the bank commissioner. When the bank commissioner has approved of any such reduction, a certificate signed by the president and cashier of the bank setting forth the reduction of its capital and the names and amount of stock held by its stockholders shall be filed with the secretary of state, and a duplicate copy shall be forwarded to the bank commissioner. Whenever the capital of any bank shall be reduced as provided in this act, every stockholder, owner or holder of any stock certificate shall surrender same for cancelation, and shall be entitled to receive a new certificate for his proportion of the new stock; no dividend shall be paid to any such stockholder until the old certificate shall have been surrendered.

[450] *Stock impaired.* SEC. 44. Whenever it shall appear that the capital stock of any bank doing business under this act has been impaired, the bank commissioner shall notify such bank to make such impairment good within ninety days; and it shall be the duty of the officers and directors of any bank receiving such notice from the bank commissioner to immediately call a special meeting of its stockholders, for the purpose of making assessment on its stock sufficient to cover the impairment of its capital: *Provided*, That such bank may reduce its capital to the extent of the impairment, if such reduction will not place its capital below the amount required by this act.

[451] *May organize as state bank.* SEC. 45. Any private bank or national bank doing business in this state may incorporate as a state bank as provided herein for the organization of banks: *Provided*, That the bank commissioner may accept good assets of such private and national banks, worth not less than par, in lieu of cash in payment for the stock of such state bank.

[452] *Private banks.* SEC. 46. Each individual or firm engaging in the banking business shall conform to the provisions of section 2 of this act, so far as said section relates to its name and capital: *Provided*, That the word "state" shall not be a part of its name: *And provided further*, That in all advertisements or published statements made by such bank, and upon all stationery used by it, the words "private bank" shall appear.

[453] *List of shareholders.* SEC. 47. The president and cashier of every incorporated bank shall cause to be kept, at all times, a full and correct list of the names and residences of all the shareholders in the bank and the number of shares held by each, in the office where its business is transacted. Such list shall be subject to the inspection of all the shareholders and creditors of the bank and the officers authorized to assess taxes under state authority, during the business hours of each day in which business may be legally transacted. A list of the owners of private banks shall be kept in like manner. A copy of such list, on the first Monday in January of each year, verified by oath of such president, cashier or owners, shall be transmitted to the bank commissioner.

[454] *Refusal to be examined.* SEC. 48. Whenever any officer of any bank shall refuse to submit the books, papers and concerns of such bank to the inspection of the commissioner, deputy, or examiner appointed as aforesaid, or shall in any manner obstruct or interfere with him in the discharge of his duty, or refuse to be examined on oath, touching the concerns of the bank, the commissioner may revoke the authority of such bank to transact a banking business, and may, with the concurrence of the attorney-general, institute proceedings for the appointment of a receiver for such bank to wind up its business.

[455] *Authority revoked.* SEC. 49. Any officer of any bank whose authority to transact a banking business has been revoked as herein provided, who shall receive or cause to be received any deposit of whatever nature, after such revocation, shall be subject to the penalty provided in section 16 of this act.

[456] *Real estate, held and conveyed.* SEC. 50. Any bank may purchase, hold and convey real estate for the following purposes,

but no other: First, such as shall be necessary for the convenient transaction of its business, including its furniture and fixtures, but which shall not exceed one-third of the paid-in capital; second, such as shall be conveyed to it in satisfaction of debts previously contracted in the course of its business; third, such as it shall purchase at sale under judgment, decrees or mortgage foreclosure under securities held by it; but a bank shall not bid, at any such sale, a larger amount than to satisfy its debt and costs. Real estate shall be conveyed under the corporate seal of the bank and the hand of its president or vice-president, and cashier or treasurer. No real estate acquired in the cases contemplated in the second and third subsections above shall be held for a longer time than five years. If not sold before the expiration of said five years, it must be sold at private or public sale within thirty days thereafter, or charged off out of the earnings or surplus of said bank.

[457] *Real estate.* SEC. 51. Any bank now doing business in this state which owns real estate in excess of fifty per cent. of its capital shall reduce its holdings by converting same into cash or other good assets, to an amount not exceeding fifty per cent. of its paid-up capital, within one year after the passage of this act.

[458] *Transfer of stock.* SEC. 52. The shares of stock of an incorporated bank shall be deemed personal property, and shall be transferred on the books of the bank in such manner as the by-laws thereof may direct; but no transfer of stock shall be valid against a bank so long as the registered holder thereof shall be liable as principal debtor, surety or otherwise to the bank for any debt which shall be due and unpaid, nor in such case shall any dividend, interest or profit be paid on such stock so long as such liabilities continue, but all such dividends, interests or profit shall be retained by the bank and applied to the discharge of such liabilities; and no stock shall be transferred on the books of any bank without the consent of the board of directors, where the registered holder thereof is in debt to the bank for any matured and unpaid obligation; and no transfer of stock shall be made when the bank is in a failing condition, or when its capital is impaired. All transfers of stock shall be certified to the bank commissioner immediately.

[459] *In hands of receiver; examined; report.* SEC. 53. The bank commissioner shall examine each and every bank in the hands of a receiver at least once in each six months, until its affairs shall be wound up, and shall file a copy of each such examination with the clerk of the district court in the county where such bank is located. Receivers of all insolvent banks shall make reports to the bank commissioner in the same manner as is required of other banks, and shall

cause such statements be published in like manner. Any receiver of an insolvent bank who shall fail to comply with the provisions of this section, or who shall neglect or refuse to submit the affairs of such bank to an examination by the bank commissioner or his deputy, or who shall violate any of the provisions of this act relating to the examination of banks, shall be subject to the same penalties provided for officers or employees of banks.

[460] *Forms; reports; fees.* SEC. 54. For the purpose of carrying into effect the provisions of this act, the bank commissioner shall provide a form for and make requisition upon the secretary of state for the necessary blanks for such examinations and reports; and all examinations and reports received by him shall be preserved in his office. It shall be the duty of the bank commissioner to furnish a certified copy of any published official statement made by the bank, to any person demanding same, upon the payment to him of the sum of ten cents per folio for each and every folio therein, and fifty cents for his certificate thereto, which fees shall be paid to the state treasurer quarterly, and by him placed to the credit of the bank fund.

[461] *Institute proceedings.* SEC. 55. If, after the expiration of one year from the closing of any incorporated bank, it shall appear to the receiver thereof that the assets of such bank are insufficient to pay its liabilities, it shall be the duty of such receiver to immediately institute proper proceedings, in the name of the bank, for the collection of the liability of the stockholders of such bank; all sums so collected to become a part of the assets of such bank and to be distributed *pro rata* to the creditors thereof, in the same manner as other funds. No action by any creditor against any stockholder of such bank for the recovery of such liability shall be maintained unless it shall appear to the satisfaction of the court that the receiver has failed to commence action as herein provided.

See 61 Kan. 369.

[462] *Biennial report.* SEC. 56. The bank commissioner shall make a report to the governor on September 1st of every even-numbered year, which report shall contain the names of the owners, or the principal officers, the paid-up capital of each, the number of banks in the state, the name and location of each, the number and date of examinations and reports made of and by each during the period covered by the report, and such other information concerning the same as the bank commissioner may deem necessary to inform the governor of the condition thereof.

[463] *Salaries.* SEC. 57. The bank commissioner shall receive for his services a salary of \$2500 per annum; each deputy bank commissioner shall receive a salary of \$1200 per annum; the bank commis-

sioner's clerk shall receive a salary of \$1000 per annum; and his stenographer shall receive a salary of \$700 per annum. The legislature shall appropriate a sum for each year to cover the incidental expenses of the bank commissioner's office, and such sum as may be necessary to defray the traveling expenses of the commissioner and his deputy. All money actually and necessarily paid out by the commissioner and his deputy for traveling and incidental expenses shall be paid to them upon the auditor's warrant, to be issued upon sworn vouchers containing an itemized account of such expenses.

[464] *Neglect of commissioner.* SEC. 58. Any bank commissioner or deputy commissioner who shall wilfully neglect to perform any duty provided for by this act, or who shall knowingly and wilfully make any false statement concerning any bank, or who shall be guilty of any misconduct or corruption in office, shall upon conviction thereof be deemed guilty of a misdemeanor, and shall be punished in the manner provided for in section 35 of this act, and in addition thereto shall be removed from office by the governor.

[465] *To inform county attorney.* SEC. 59. It shall be the duty of the bank commissioner, or either of his deputies, to inform the county attorney of the county in which the bank is located, of any violation of any of the provisions of this act, which constitute a misdemeanor or felony, by the officers, owners, or employees of any bank, which shall come to his notice; and upon receipt of such information, the county attorney shall institute proceedings to enforce the provisions of this act.

[466] *Office.* SEC. 60. It shall be the duty of the executive council to provide such commissioner with a suitable office in the state capitol, and the necessary books, blanks, office furniture and seal of office to enable him to discharge the duties of his office.

[467] *Perjury.* SEC. 61. Every officer or employee of a bank required by this act to take an oath or affirmation, who shall wilfully swear or affirm falsely, shall be deemed guilty of perjury, and upon conviction thereof shall be punished as provided by the law of this state in case of perjury.

[468] *Unlawful banking.* SEC. 62. It shall be unlawful for any individual, firm or corporation to advertise, publish, or otherwise promulgate that they are engaged in the banking business, without first having obtained authority from the bank commissioner as herein provided. Any such individual or member of any such firm or officer of any such corporation so offending shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished as provided in section 35 of this act.

[469] *Under Laws of 1891.* SEC. 63. If upon examination of any bank heretofore authorized to transact a banking business under the provisions of chapter 43 of the Laws of 1891, it shall appear that such bank has complied with all the provisions of this act, and that its capital is unimpaired, the bank commissioner, as provided in section 17 of this act, shall issue to such bank a certificate; and if it shall appear that such bank has not conformed to all the provisions of this act, the bank commissioner shall notify such bank to do so within ninety days from the date of such examination, and upon failure to comply, the bank commissioner may revoke the authority of such bank to transact a banking business: *Provided*, That certificates heretofore issued under and in conformity with chapter 43 of the Laws of 1891, shall be held to be sufficient authority until revoked as herein provided.

[470] *Repeal; proviso.* SEC. 64. Chapter 43 of the Laws of 1891, and all acts and parts of acts inconsistent with this act, are hereby repealed: *Provided*, That all criminal offenses committed, and criminal actions commenced under said chapter 43 of the Laws of 1891, shall in no manner whatever be affected or abated on account of the repeal of said law, and that the parties may be prosecuted, tried, convicted, sentenced and punished in all ways the same as though there had been no repeal of said chapter 43 of the Laws of 1891.

AN ACT making officers of banking institutions responsible for the reception of deposits or the creation of debts, when such bank is insolvent or in a failing condition.

[Took effect March 15, 1879.]

Be it enacted by the Legislature of the State of Kansas :

[471] *Receiving deposits, etc., when bank in failing condition, etc.* SEC. 65. It shall be unlawful for any president, director, manager, cashier, or other officer of any banking institution, to assent to the reception of deposits or the creation of debts by such banking institution, after he shall have had knowledge of the fact that it is insolvent or in failing circumstances; and it is hereby made the duty of every such officer, agent or manager of such banking institution to examine into the affairs of the same, and, if possible, know its condition. And upon failure of any such person to discharge such duty, he shall, for the purpose of this act, be held to have had knowledge of the insolvency of such bank, or that it was in failing circumstances. Every person violating the provisions of this section shall be individually responsible for such deposits so received, and all such debts so contracted: *Provided*, Any director who may have paid more than his share of the liabilities mentioned in this section, may

have the proper remedy at law against such other persons as shall not have paid their full share of such liabilities. [Laws 1879, ch. 47, § 1.]

See 60 Kan. 94; 4 Kan. App. 266; 9 Kan. App. 694.

[472] *Joinder of parties.* SEC. 66. In all suits brought for the recovery of the amount of any deposits received or debt so created, all officers, agents, or managers of any such banking institutions, charged with having so assented to the reception of such deposit, or the creation of such debt, may be joined as defendants or proceeded against severally; and the fact that such banking institution was so insolvent or in failing circumstances at the time of the reception of the deposit charged to have been so received, or the creation of the debt charged to have been so created, shall be *prima facie* evidence of such knowledge and assent to such deposit or creation of such debt on the part of such officer, agent or manager so charged therewith. [Id., § 2.]

[473] *Private bankers included.* SEC. 67. The foregoing sections shall also apply to private bankers, their officers, managers, and agents; and for the purposes of this act, persons who carry on the business of banking by receiving money on deposit, with or without interest, buying and selling bills of exchange, promissory notes, gold or silver coin, bullion, uncurrent money, bonds or stocks or other securities, and of loaning money without being incorporated, shall be deemed private bankers. [Id., § 3.]

[474] *Personal representatives.* SEC. 68. This act shall extend to and may be enforced by and against executors and administrators of such deceased officers, agents and managers. [Id., § 4.]

[475] *Deputies and clerks.* SEC. 69. That any deputy or clerk in the office of the bank commissioner of the state of Kansas, employed under authority of law directly conferred or by appropriation, may be authorized by the bank commissioner to examine any bank or building and loan association within the state of Kansas subject to examination under state authority; and any examination so made shall have the same effect in all respects as examinations made by the bank commissioner himself. [Laws 1901, ch. 63, § 1.]

SAVINGS BANKS.

- | | |
|--|--|
| <p>§143. Who may organize; their privileges. 144. Capital stock limited; shall be divided into shares; payable, when. 145. Business shall be controlled by whom; officers, how appointed. 146. Commence business, when; certificate; attested copy shall be evidence.</p> | <p>§147. Verified statement shall be published; shall set forth what; penalty, and how recovered. 148. Dividend shall be declared, when. 149. Repealing section.</p> |
|--|--|

[1386] *Organization.* SEC. 143. Any five or more persons in any county in this state may organize themselves into a savings association, and shall be permitted to carry on the business of receiving money on deposit, and to allow interest thereon, giving to the person depositing, credit therefor; and of buying and selling exchange, gold, silver, coin, bullion, uncurrent money, bonds of the United States, of the state of Kansas, and of the city, county and school district in which any association shall be organized; of loaning money on real estate and personal security; and of discounting negotiable notes and notes not negotiable; and on all loans made may keep and receive the interest in advance. [Gen. Stat. 1868, ch. 23, §127.]

May purchase notes. See 20 Kan. 440.

[1387] *Capital stock; shares.* SEC. 144. The capital stock of any such association shall be not less than \$50,000 nor more than \$500,000, to be divided into shares of not less than \$100 each, of which ten per cent. upon each share shall be paid at the time the same shall be subscribed; the remainder of the stock so subscribed shall be paid upon such calls and upon such terms as the directors may from time to time prescribe. [Id., §128.]

Bank cannot purchase its own stock. See 19 Kan. 60.

[1388] *Business; officers.* SEC. 145. The affairs and business of any such association shall be managed and controlled by a board of directors, not less than five nor more than nine in number, from whom there shall be designated, by themselves, a president and a secretary, who shall hold their office for one year and until their successors are elected and duly qualified. Said board of directors shall designate who shall act as cashier; and said board of directors may appoint and remove such cashier. [Gen. Stat. 1868, ch. 23, §129, as amended by Laws of 1871, ch. 66, §1. Same as ¶1419, Gen. Stat. 1889.]

See 19 Kan. 60 and 31 Kan. 286.

Cashier's bond, no limit as to time. See 58 Kan. 603.

[1389] *Commence business; certificate; name.* SEC. 146. Before any such corporation shall commence its business, a majority of the shares thereof shall have been subscribed for, and the entrance fees thereon paid in, and the president and secretary thereof, under their hands and seals, shall have made a certificate which shall specify: First, the corporate name of such corporation; second, the name of the city or town in which such incorporation is to be located; third, the amount of its capital stock, and the number of shares into which the same shall be divided; fourth, the names and places of residence of the stockholders, and the number of shares held by each; fifth, the time when such corporation was organized; which certificate shall be acknowledged before a notary public, and recorded in the registry of deeds for the county in which such corporation is to be located; and a copy thereof, and of the by-laws of the said association, shall be filed in the office of the secretary of state, and copies of such certificate, duly attested by the register of deeds or secretary of state, shall be admitted as sufficient evidence in all the courts of law, and on all occasions whatsoever: *Provided, however,* That no corporation established under the provisions of this chapter shall take the name of any corporation or association heretofore organized or incorporated in this state for similar purposes. [Gen. Stat. 1868, ch. 23, § 130.]

See 4 Kan. App. 284.

[1390] *Statement to be filed.* SEC. 147. Every such corporation shall, semiannually, in the months of July and January, publish in one or more newspapers in the county where such corporation shall have its place of business, a statement, verified by the oath of its president or secretary, setting forth its actual financial condition and the amount of its property and liabilities, under a penalty of \$500 to the state, to be recovered by indictment against the president, cashier, or directors, and shall also deposit a copy of said statement, verified as aforesaid, in the office of the secretary of state. [Id., § 131.]

[1391] *Dividends.* SEC. 148. Dividends of the net profits of such association shall be declared on the 1st day of July and January of each year unless some different time is fixed by the by-laws of such corporation. [Id., § 132.]

SEC. 149. All other acts and parts of acts inconsistent with this act are hereby repealed. [Id., § 133.]
